DODOMA REGION, ADMINISTRATIVE BOUNDARIES

Foreword

The 2022 Population and Housing Census (PHC) for the United Republic of Tanzania had its

reference as the midnight of the 22nd/23rd August 2022. This was the Sixth and the first digital Census after the Union of Tanganyika and Zanzibar in 1964. Other post union censuses were carried out in 1967, 1978, 1988, 2002 and 2012. The Sixth Phase Government of Tanzania

under the leadership of Her Excellency Dr. Samia Suluhu Hassan and the Eighth Phase Government of Zanzibar under the leadership of His Excellency Dr. Hussein Ali Mwinyi, like the previous phases, have fulfilled their obligation of conducting the 2022 PHC according to the United Nations Principles and Recommendations for the Population and Housing Census. **We owe them much appreciation for their commitment and support during Census implementation.**

The 2022 PHC was conducted in accordance with the Statistics Act Cap 351, which mandates the Government of the United Republic of Tanzania to conduct Population and Housing Census every ten years. It also followed the United Nations Principles and Recommendations for conducting the 2020 Round of Population and Housing Census, including adoption of advanced Information and Communication Technology (ICT) at all stages of Census implementation. Indeed, the country's decision to use more advanced technology to capture data during cartographic mapping, enumeration, data transmission and processing made the 2022 PHC the first ever digital census to be conducted in Tanzania.

The Government of the United Republic of Tanzania conducted for the first time the 2022 Tanzania Buildings Census (2022 TBC), an exercise done concurrently with the 2022 Population and Housing Census. Buildings are amongst the most important infrastructure in the lives of people in Tanzania and around the world. Buildings help to preserve and promote the lives of individuals, families and society at large in the economic, social, political and cultural spheres. Moreover, buildings as part of premises are an important criterion for measuring the state of a non-income economy for an individual or community concerned. The main uses of buildings in the lives of rural and urban people include residential, commercial, commercial-

residential, institutional and industrial. Apart from addressing the long-time challenges of lack of information on buildings in the country, the 2022 TBC has been conducted to meet the requirements of various national, regional and international policies pertaining to human settlements development. This huge national undertaking has been made practical due to a clear understanding that, buildings census is the primary means of accessing complete, accurate, adequate, timely and reliable building information.

The 2022 PHC and TBC results are for integrated plans and sustainable development of the country and will increase awareness and transparency in allocation of resources at all levels of administration based on the actual population. The results will be used by the Government and stakeholders in monitoring and evaluating various national, regional and international development frameworks including the Tanzania Development Vision 2025 and Zanzibar Development Vision 2050; the Third National Five-Year Development Plan 2021/22 - 2025/26 and Zanzibar Development Plan 2021/22 - 2025/26; the East African Community Vision 2050; Southern African Development Community Vision 2050 and the African Development Agenda 2063.

Furthermore, the results will enable the country to evaluate the progress of implementation of Sustainable Development Goals (United Nation Agenda 2030); goals that aim at achieving equality and eradicating poverty of all kinds including extreme poverty by 2030 by ensuring no one is left behind. The census data will also provide a basis for the computation of several indicators such as enrolment and literacy rates, infant and maternal mortality rates, unemployment rate and others.

The Regional Basic Demographic and Socio-Economic Profile Reports are the sixth in a series of major planned publications for the 2022 PHC. The major reports that have been produced so far are Administrative Units Population Distribution Reports, Age and Sex Reports, The Tanzania Basic Demographic and Socio-Economic Profile and *Ripoti ya Idadi ya Watu katika Majimbo ya Uchaguzi (Constituency Population Distribution Report)* in two volumes of United Republic of Tanzania and Tanzania Zanzibar. The first three major reports are in three volumes for the United Republic of Tanzania, Tanzania Mainland and Tanzania Zanzibar. The main purpose of this report is to provide a short descriptive analysis and related tables on main thematic areas covered in the 2022 Population and Housing Census. Areas covered include

population and household characteristics, as well as social and economic activities. Other report in the series of planned Census publications will be Thematic Reports.

The success of both 2022 PHC and TBC depended on the cooperation and contributions from the Government, specifically Census Committees from national to the lowest administrative level. These include the National Central Census Committee; National Census Advisory Committee; National Census Technical Committee; Census Committees at regional, district, wards, village/mtaa and hamlet. There were also forums from Non-States Actors including Collaborators Forum, Private Sector, various institutions and the public at large.

A word of thanks goes to Government leaders at all levels, particularly, Minister for Finance; Minister for Lands, Housing and Human Settlements Development, Minister of State - President's Office, Finance and Planning, Zanzibar; Minister for Lands and Housing Development Zanzibar; Members of Parliament; Members of the House of Representatives; Councillors/Shehas; Regional and District Census Committees chaired by Regional and District Commissioners of respective areas; Census Coordinators (National and Zanzibar); Regional and District Census Coordinators; Supervisors; Enumerators; Local leaders and all respondents (heads of households, members of households and other individuals).

Special gratitude is extended to the following Development Partners:- United Nations Population Fund (UNFPA); World Bank (WB); United Nations Children's Fund (UNICEF); UN-Women; International Organization for Migration (IOM); United States Agency for International Development (USAID); Foreign, Commonwealth and Development Office (FCDO); United States Census Bureau (USCB), The Republic of South Korea, The People's Republic of China and other Development Partners for providing equipment, expertise, training and financial support in making the 2022 Population and Housing Census a success. We also thank religious, traditional and political leaders, non-governmental organization leaders, the media and all citizens and non-citizens in general for their participation and contributions in the successful implementation of the Census.

Special thanks also go to Honourable Anne Semamba Makinda - Census Commissar for Tanzania Mainland and Former Speaker of the National Assembly and Honourable Ambassador Mohamed Haji Hamza - Census Commissar for Tanzania Zanzibar, for their

effective leadership and management in educating and sensitizing all citizens and non-citizens to participate in the 2022 Population and Housing Census, thus resulting in enhanced quality, smooth and timely execution of the Census exercise. We also thank the Chairperson of the Governing Board of the National Bureau of Statistics (NBS), Dr. Amina Msengwa and the Chairperson of the Statistics Board of Zanzibar, Ambassador Amina Salum Ali, for their guidance throughout the implementation of the Census exercise.

Last but not least, we acknowledge the unprecedented efforts and commitment of the management and staff of the National Bureau of Statistics under the leadership of Dr. Albina Chuwa, the Statistician General; and staff of the Office of the Chief Government Statistician, Zanzibar under the leadership of Mr. Salum Kassim Ali; Chief Government Statistician; staff from the Ministry of Lands, Housing and Human Settlements Development; Ministry of Information, Communication and Information Technology; as well as other Government officials who worked tirelessly in ensuring that the 2022 Population and Housing Census was implemented successfully.

Kassim Majaliwa Majaliwa (MP)
Prime Minister of
The United Republic of Tanzania

Hemed Suleiman Abdulla (MHR)
Second Vice President of Zanzibar

Acknowledgement

The National Bureau of Statistics and Office of the Chief Government Statistician, Zanzibar conducted the 2022 PHC and TBC to provide necessary information for policy implementation, planning, monitoring and evaluation of development processes. The Census collected detailed information on demographic characteristics, fertility, mortality, migration, orphanhood, disabilities, possession of national documents, education, economic activities, land ownership and information related to ICT ownership and use, housing ownership and assets, agriculture, community facilities and buildings. Some information on physical addresses were also collected.

This report presents basic demographic and socio-economic indicators from regional to Council level. The report will facilitate users of Census data to make evidence-based decisions for social and economic development. We therefore express our appreciation to all experts who have put their time and efforts to produce this report. In particular, we would like to thank Ruth Davison Minja, the Director of Population Census and Social Statistics (NBS); Fahima Mohamed Issa, Director of Social Statistics, Census and Survey, (OCGS); Seif Ahmad Kuchengo, the National Census Coordinator; Abdul-majid Jecha Ramadhan, the Tanzania Zanzibar Census Coordinator, National Census Technical Team, Statisticians, Demographers, Information Technology and Geographic Information System officers for their commitment which led to successful completion of this report.

Our appreciation is as well extended to all professionals, regional and district supervisors, enumerators and field supervisors as well as the media for their dedicated work. Certainly, without their commitment and dedication, the census would not have been successful. We would also like to thank the public for their cooperation during the entire period of the Census.

Dr. Albina Chuwa
Statistician General
National Bureau of Statistics

Salum Kassim Ali
Chief Government Statistician
Office of the Chief Government
Statistician, Zanzibar

Executive Summary

The 2022 Dodoma Region Basic Demographic and Socio-Economic Profile provides a short descriptive analysis and related tables on main thematic areas covered in the 2022 Population and Housing Census as well as the 2022 Buildings Census. Areas covered are population size, growth and distribution; age and sex profile; household composition; marital status; national identification documents and citizenship; survival of parents; education, literacy and numeracy; employment and economic activities; disability; land ownership; housing characteristics, asset ownership and environmental control; and access and use of Information and Communication Technology (ICT) by individuals and households; and Information on buildings. In many cases, information has been disaggregated by place of residence and where possible comparisons have been made with previous Census(es) to observe the trend over time. New topics covered in the 2022 PHC for the first time to fill the national data gaps include; national identification documents, numeracy, land title deed status, production and disposal of Electronic and Electric Equipment Waste (EEEW), forestry and ICT. The report also provides policy recommendations emanating from key findings on areas covered by the 2022 PHC.

Chapter One presents an overview of the 2022 PHC. It gives the brief history of census undertaking in the country and the main objective of the 2022 PHC. It also highlights on preparatory and implementation of census activities at different levels as well as the legal framework, census organisation structure, development of census instruments, cartographic work, pilot census, census publicity and advocacy campaigns. Furthermore, the Chapter elaborates on census enumeration activities including recruitment and training of personnel, distribution of enumeration materials and the actual enumeration exercise. Post enumeration activities (data processing and quality control procedures) are also discussed in this Chapter.

Chapter Two gives a user of this publication an understanding on the size, growth and distribution of Dodoma Region population from the 2022 PHC and previous censuses. Dodoma Region has a population of 3.1 million persons, out of those, 1,572,865 are females and 1,512,760 are males. Population of Dodoma Region grew at an average annual growth rate of 3.9 percent from 2012 to 2022 representing a population increase of 48.1 percent over a 10-year period. At this rate, the population of Dodoma Region is expected to double in the next 18

years. The Region's population remains predominantly rural, with 64.7 percent of its total population living in rural areas and 35.3 percent living in urban areas.

Chapter Three is about age and sex profile of the Dodoma Regional population. The Chapter presents population by sex and major age groups. The data depict a young population age structure with a median age of 18.7 years. More than forty percent (42.4%) of the population is aged below 15 years. The percentage of the working age population (15 - 64 years) has increased from 49.2 percent in 1988 Census to 52.8 percent in 2022. Results from 2022 PHC also show that the proportion of the working age population is higher in urban areas (60.0%) compared with rural areas (48.9%) and the age dependency ratio for the Region is 89.4. The percentage of the elderly population aged 65 years and above in Dodoma Region has remained almost the same (4.6% in 2002 and 4.8% in 2022).

Chapter Four presents information on household composition. Dodoma Region has 754,631 private households, out of which 294,071 (39.0%) are in urban areas. This is an increase from 16.2 percent in 2012 PHC indicating increasing urbanization in the region. Female-headed households in Dodoma Region increased from 32.2 percent in 2012 to 35.4 percent in 2022. Furthermore, the percentage of female headed households is slightly higher in rural areas (35.6%) than in urban areas (35.1%). The average household size decreased from 4.6 persons in 2012 to 4.1 persons in 2022.

Chapter Five presents the results on marital status. For persons aged 15 years and above, about 50 percent (51.2%) are married, where females are more likely (52.0%) to be married than males (50.3%). About four percent (4.5%) of persons aged 10 years and above are widowed. The percentage of females widowed is higher (9.3%) than that of Males (1.5 %). The Mean Age at First Marriage in Dodoma 2022 is 26.4 years for males and 22.1 years for females. The Mean Age at First Marriage for males and females increased from 22.9 in 2012 to 24.2 in 2022 Censuses respectively.

Chapter Six provides information on national identification documents and citizenship. The majority of the population (70.5%) have neither birth certificate nor birth notification. Only 26.8 percent have birth certificate and a mere 1.8 percent have birth notification. Analysis by age indicates that the under-five population has the highest percentage (56.8 %) of the individuals

with birth certificate, followed by 46.5 percent of the population aged 5-9 years. Results on other national identification documents show that about a quarter (25.88%) aged 18 years and above have national identification card and about 12 percent (12.75%) have national identification number. It is also noted that only 10.0 percent out of 3,058,813 persons in private households in the region have health insurance from National Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF).

The results show that 3,080,423 (99.8%) of the persons enumerated in Dodoma Region are Tanzanians. The majority of non-Tanzanians are from Countries Outside Africa (2,241 persons) followed by other East African Countries (1,631 persons).

Chapter Seven presents information on survival of parents. Results indicate that about nine out of ten (91.6%) children under 18 years in Dodoma Region have both parents alive. About eight percent (8.4%) of children under 18 years are orphans with proportionately more in urban areas (8.7%) than rural areas (8.2%). About six percent (6.1%) of children under 18 years are orphan with one parent dead while 2.2 percent are orphan with both parent dead. Chemba District Council have the highest percentage (4.6%) of orphans with both parents dead compared with other councils in Dodoma Region.

Chapter Eight presents information on education, literacy and numeracy. Adult literacy rate for persons aged 15 years and above in Dodoma Region is 76.3 percent. Literacy rate is higher among males (80.5%) than females (72.5%). Numeracy rate among persons aged five years and above is 77.9 percent and it is higher among males (78.4%) than females (77.5%). Net Enrolment Rate (NER) for primary schools is 77.4 percent. It is higher among females (81.6%) than males (73.3%). Majority (75.2%) of population aged four years and above attained primary education, 16.4 percent attained ordinary level secondary education and 6.0 percent attained university and other related education level.

Chapter Nine presents information on employment and current economic activities for persons aged 15 years and above. There are 1,369,077 (78.1%) persons in employment. The current unemployment rate in Dodoma Region using International relaxed definition is 5.1 percent.

Females have higher unemployment rate (6.0%) than males (4.2%). The overall Labour Force Participation Rate (LFPR) for Dodoma Region is 82.3 percent

Chapter Ten highlight statistics on disability status in Dodoma Region. For the purpose of this report Persons With Disabilities (PWDs) are those with physical, mental, intellectual or sensory impairment which may hinder or limit their full and effective participation in society on an equal footing with others. More than twelve percent (12.3%) of the total population aged 7 years and above is living with some form of disability. Difficulty in seeing (3.4%) and walking (2.0%) are the most common types of disabilities in Dodoma Region.

Chapter Eleven focuses on status of land ownership including information on persons owning land, type of ownership and legal documents possession. About forty two percent (41.8%) of the population aged 15 years and above in Dodoma Region own land for different uses, including agriculture, residential, commercial or industrial. The proportion of females owning land is lower (38.7 percent) than that of males (45.2%). More than fifty seven percent (57.9%) of persons aged 15 years and above in Dodoma Region own land without legal documents. Among the land owners with legal documents in Dodoma Region, majority of them own land jointly (22.3%) followed by those owning land Alone (18.5%).

Chapter Twelve presents information on housing characteristics, assets ownership and environmental control. About seven out of ten (72.8%) households in Dodoma Region live in their own houses. Further, about four out of ten (42.2 %) of households have no legal rights over the land where their houses are built. More than forty percent (45.9%) of households are living in houses with improved floor covering materials and more than sixty percent (67.8%) use improved sources of drinking water. Further, more than a half (54.5%) of households use improved toilet facilities.

The majority of households in Dodoma Region use firewood (65.4%) and charcoal (18.3%) as main sources of energy for cooking. The main source of energy for lighting is solar used by 34.0 percent of households. Percentage of households using electricity from the national grid for lighting increased from 22.9 percent in 2012 to 28.9 percent in 2022. About four in ten (39.7%) households in Dodoma Region use burning of solid waste as the main method of solid waste disposal and 64.1 percent of households mix electronic waste with other refuse.

Chapter Thirteen highlights households' and individuals' Access and Use of Information and Communication Technology (ICT), including Ownership of ICT equipment as well as the Type of Use of ICT equipment in Dodoma Region. Results reveal that there is significant mobile phone penetration in this region, with 81.9 percent of person aged 15 years and above own mobile phone where 64.5 percent of them own only non-smartphones. The proportion of person aged 15 years and above using ICT equipment for communication is similarly high (84.3%). Non-smartphone is mostly utilised by individuals aged 15 years and above who attained training after secondary education (98.9%) and training after primary (97.8%). Further, about five percent (4.5%) of person aged 15 and above in Dodoma Region use laptop and about three percent (2.5%) use desktop computers.

Chapter Fourteen provides information on the number of buildings, types of buildings, main uses of buildings and the number of units in residential and commercial-residential buildings in Dodoma Region and Council levels as per the 2022 Tanzania Building Census (2022 TBC) Results. Findings also indicate that 77.5 percent of all buildings/units in Dodoma Region are occupied by the owners themselves, and 9.6 percent are occupied by tenants. Sixty seven percent (67.0%) of all individually owned buildings in Dodoma Region are owned by male, 24.5 percent by female, and 5.9 percent are jointly owned. About thirty-five percent (34.6%) of all buildings have permanent flooring materials (sand-cement or Tiles/with cement, tiles (ceramic/marble/PVC) and Terrazzo). Seventy-one percent (71.0%) percent of all buildings in Dodoma Region are built on un-surveyed land. About forty-seven percent (46.7%) of all buildings in Dodoma Region are constructed on land that does not have legal documents. About eighteen percent (17.9%) of all buildings in the region are connected to the national grid electricity while 26.3 percent are powered by other sources. About fourteen percent (14.3%) of all buildings have water services. Three percent (3.2%) of all buildings in Dodoma Region have infrastructure for the people with disabilities.

Census Results in Brief

TABLE OF CONTENTS

CHAPTER 1.....	1
OVERVIEW OF THE 2022 POPULATION AND HOUSING CENSUS.....	1
1.1 INTRODUCTION.....	1
1.1.1 <i>A Brief History of Census Undertaking in Tanzania</i>	1
1.2 OBJECTIVES OF THE 2022 PHC.....	2
1.2.1 <i>Specific Objectives of the 2022 PHC</i>	2
1.3 PREPARATIONS FOR THE 2022 PHC.....	2
1.3.1 <i>Legal Framework</i>	2
1.3.2 <i>Census Organisation</i>	3
1.3.3 <i>Development of Census Instruments</i>	3
1.3.4 <i>Cartographic Work</i>	4
1.3.5 <i>Pilot Census</i>	5
1.3.6 <i>Census Publicity and Advocacy Campaign</i>	7
1.4 CENSUS ENUMERATION ACTIVITIES.....	8
1.4.1 <i>Recruitment and Training</i>	8
1.4.2 <i>Other Preparations for Enumeration</i>	8
1.4.3 <i>Enumeration</i>	8
1.4.4 <i>Post Enumeration Activities</i>	9
1.5 DATA PROCESSING.....	9
1.6 QUALITY CONTROL PROCEDURES.....	10
CHAPTER 2.....	11
POPULATION SIZE, GROWTH AND DISTRIBUTION.....	11
2.1 INTRODUCTION.....	11
2.2 POPULATION SIZE.....	11
2.2.1 <i>Population Size by Council</i>	12
2.2.2 <i>Rural and Urban Population</i>	13
2.3 POPULATION CHANGE AND GROWTH.....	16
2.3.1 <i>Population Change</i>	16
2.3.2 <i>Annual Population Growth Rate and Trends</i>	16
CHAPTER 3.....	18
AGE AND SEX PROFILE.....	18
3.1 INTRODUCTION.....	18
3.2 QUALITY OF AGE AND SEX DATA.....	18
3.2.1 <i>Population Distribution by Five Year Age Groups</i>	19
3.2.2 <i>Population Pyramid</i>	22
3.3 POPULATION DISTRIBUTION BY SELECTED AGE GROUPS.....	24
3.3.1 <i>Children Under Five Years</i>	26
3.3.2 <i>Young Population (0-14 Years)</i>	26
3.3.3 <i>Young Population (0-17 Years)</i>	27
3.3.4 <i>Youth Population (15-24 Years)</i>	28
3.3.5 <i>Youth Population (15 - 35 Years)</i>	29
3.3.6 <i>Working Age Population (15-64 Years)</i>	30
3.3.7 <i>Elderly Population</i>	30
3.3.8 <i>Age Dependency Ratio</i>	32
CHAPTER 4.....	33
HOUSEHOLD COMPOSITION.....	33
<i>Key points</i>	33
4.1 INTRODUCTION.....	33
4.2 NUMBER OF HOUSEHOLDS.....	34
4.3 AVERAGE HOUSEHOLD SIZE.....	37

4.4 HOUSEHOLD HEADSHIP	39
4.4.1 Households Living in Improved or Unimproved Houses	42
4.4.2 Heads of Households by Marital Status and Occupation	45
4.4.3 Heads of Households by Type of Toilet Facility	46
4.4.4 Heads of Households by Source of Drinking Water	49
4.4.5 Household Heads with Children Under 18 Years	53
CHAPTER 5.....	56
MARITAL STATUS	56
5.1 INTRODUCTION.....	56
5.2 MARITAL STATUS.....	57
5.2.1 Marital Status for Selected Age Groups	60
5.3 MEAN AGE AT FIRST MARRIAGE	64
CHAPTER 6.....	68
NATIONAL IDENTIFICATION DOCUMENTS AND CITIZENSHIP	68
6.1 INTRODUCTION.....	68
6.2 NATIONAL IDENTIFICATION DOCUMENTS	68
6.2.1 Birth Certificate	69
6.2.2 Birth Notification.....	69
6.2.3 Other National Identification Documents	73
6.2.3.1 National Identification Cards.....	73
6.2.3.2 Health Insurance	75
6.3 CITIZENSHIP	76
CHAPTER 7.....	78
SURVIVAL OF PARENTS.....	78
7.1 INTRODUCTION.....	78
7.2 SURVIVAL OF PARENTS.....	79
7.2.1 Survival of Parents by Council	81
7.3 ORPHANHOOD	82
CHAPTER 8.....	85
EDUCATION, LITERACY AND NUMERACY	85
8.1 INTRODUCTION.....	85
8.2 LITERACY	85
8.2.1 Literacy for Selected Age Groups	88
8.2.2 Adult Literacy	89
8.2.3 Adult Literacy in Different Languages.....	92
8.3 NUMERACY.....	96
8.3.1 Adult Numeracy Rates.....	98
8.4 EDUCATION	100
8.4.1 School Attendance Status	100
8.4.2 Net and Gross School Enrolment.....	111
8.4.3 Gross Enrolment Rate	114
8.4.4 Education Attainment	116
CHAPTER 9.....	117
EMPLOYMENT AND ECONOMIC ACTIVITIES.....	117
9.1 INTRODUCTION.....	117
9.2 CURRENT ECONOMIC ACTIVITY STATUS	117
9.3 CURRENT UNEMPLOYMENT	121
9.4 LABOUR FORCE PARTICIPATION RATE.....	122
9.5 EMPLOYMENT BY INDUSTRY	123
9.6 OCCUPATION STATUS	125

9.7 EMPLOYMENT BY SECTOR	126
9.8 INFORMAL NON-AGRICULTURAL ECONOMIC ACTIVITIES	126
CHAPTER 10.....	128
DISABILITY	128
10.1 INTRODUCTION.....	128
10.2 PREVALENCE OF DISABILITY	131
10.2.1 <i>Prevalence of Disability by Councils</i>	132
10.2.2 <i>Prevalence of Disability by Sex and Council</i>	133
10.2.3 <i>Prevalence of Disabilities by Age and Sex</i>	134
10.3 PREVALENCE OF PERSON WITH ALBINISM	135
10.4 POPULATION WITH OTHER TYPES OF DISABILITY.....	136
10.5 CAUSES OF DISABILITIES	137
10.6 USE OF ASSISTIVE DEVICES.....	140
CHAPTER 11.....	141
LAND OWNERSHIP	141
11.1 INTRODUCTION.....	141
11.2 LAND OWNERSHIP STATUS	141
11.3 POSSESSION OF LEGAL LAND OWNERSHIP DOCUMENTS.....	146
CHAPTER 12.....	149
HOUSING CHARACTERISTICS, ASSETS OWNERSHIP AND ENVIRONMENTAL CONTROL.....	149
12.1 INTRODUCTION.....	149
12.2 HOUSING OWNERSHIP AND TENURE STATUS	149
12.2.1 <i>Legal Ownership of Land</i>	151
12.3 HOUSEHOLD CHARACTERISTICS.....	153
12.3.1 <i>Roofing Materials</i>	153
12.3.2 <i>Floor Covering Materials</i>	155
12.3.3 <i>Wall Materials</i>	157
12.3.4 <i>Rooms for Sleeping</i>	159
12.4 WATER AND SANITATION	160
12.4.1 <i>Source of Drinking Water</i>	160
12.4.2 <i>Sanitation Facilities</i>	165
12.5 SOURCES OF ENERGY	168
12.5.1 <i>Sources of Energy for Cooking</i>	168
12.5.2 <i>Sources of Energy for Lighting</i>	170
12.6 HOUSEHOLD ENVIRONMENTAL CONTROL	174
12.6.1 <i>Waste Disposal</i>	174
12.6.2 <i>Waste Collection Authorities</i>	176
12.6.3 <i>Electronic Waste Disposal</i>	177
12.7 OWNERSHIP OF ASSETS	179
12.7.1 <i>Transport Assets</i>	179
12.7.2 <i>Housing and Cooking Assets</i>	180
12.7.3 <i>Agricultural Assets</i>	181
CHAPTER 13.....	182
ACCESS AND USE OF INFORMATION AND COMMUNICATION TECHNOLOGY BY INDIVIDUALS AND HOUSEHOLDS.....	182
13.1 INTRODUCTION.....	182
13.2 HOUSEHOLDS WITH RADIO	183
13.3 OWNERSHIP OF TELEVISION	183
13.4 HOUSEHOLDS WITH LANDLINE TELEPHONE.....	184
13.5 HOUSEHOLDS WITH INTERNET FACILITY	184
13.6 MOBILE PHONES	186
13.6.1 <i>Ownership of Mobile Phones by Individuals</i>	186

13.6.2 Ownership of Mobile Phones by Households	192
13.6.3 Ownership of Mobile Phones by Age Groups and Sex.....	193
13.6.4 Ownership of Mobile Phones by Level of Education.....	196
13.6.5 Usage of Mobile Phones by Individuals.....	200
13.6.6 Usage of Mobile Phones by Type, Age Group and Sex.....	200
13.6.7 Type of Use of ICT Equipment	203
13.6.8 Usage of Mobile Phones.....	204
13.6.9 Usage of Mobile Phones by Employment Status and Sex	206
13.6.10 Usage of Mobile Phones by Occupation.....	208
13.7 COMPUTERS	211
13.7.1 Ownership of Computers by Individuals.....	211
13.7.2 Usage of Computers by Individuals.....	212
13.7.3 Usage of Computers by Age Group and Sex.....	213
13.7.4 Usage of Computers by Highest Level of Education attained and Sex.....	215
13.7.5 Usage of Computers by Employment Status and Sex.....	216
CHAPTER 14.....	221
INFORMATION ON BUILDINGS	221
14.1 INTRODUCTION.....	221
14.2 NUMBER OF BUILDINGS	222
14.2.1 Buildings with Physical Addresses.....	225
14.2.2 Type of Buildings	226
14.2.3 Main Uses of Buildings.....	227
14.2.4 Number of Units in Building	227
14.3 BUILDING ATTRIBUTES	229
14.3.1 Building Categories	229
14.3.2 Construction Status of Buildings	230
14.3.3 Building Occupancy Status	231
14.3.4 Building Construction Materials.....	232
14.3.5 Number of Bedrooms	238
14.4 BASIC SERVICES IN BUILDINGS	239
14.4.1 Electricity.....	239
14.4.2 Water	240
14.4.3 Toilets.....	241
14.5 ACCESSIBILITY OF THE BUILDING.....	243
14.5.1 Access of Roads.....	243
14.5.2 Infrastructure for Persons with Disabilities	244
14.6 TENURE STATUS OF BUILDINGS.....	245
14.6.1 Building Ownership Status	245
14.6.2 Building Ownership by Sex	247
14.6.3 Building Occupancy Tenure Status.....	249
14.6.4 Buildings Land Survey Status.....	251
14.6.5 Building Land Ownership Documents	253
CHAPTER 15.....	254
SUMMARY OF KEY FINDINGS, IMPLICATION AND RECOMMENDATIONS.....	254
15.1 INTRODUCTION.....	254
15.2 KEY FINDINGS	254
15.2.1 Population Size and Growth.....	254
15.2.2 Age Profile.....	255
15.2.3 Marital Status and Early Marriages.....	256
15.2.4 Possession of National Identification Documents	257
15.2.5 Orphanhood.....	258
15.2.6 Literacy and Education.....	259
15.2.7 Employment and Economic Activities	260
15.2.8 People with Disabilities	261

15.2.9 Land Ownership	262
15.2.10 Drinking Water.....	263
15.2.11 Sanitation.....	264
15.2.12 Energy	265
15.2.13 Information and Communication Technology (ICT) Access and Use by Individual and Households	266
15.2.14 Information on Buildings.....	267
ANNEX TABLES	269

Concepts and Definitions

Population and Housing Census

Census Night is a reference point for Census enumeration and all questions in the census relate to that night. According to the Tanzania 2022 Population and Housing Census, the Census night was the night of 22nd /23rd August, 2022.

De facto Methodology means persons were enumerated where they slept on the Census night.

Enumeration Area (EA) is a designated area with an average of 60 to 100 households.

Geographical Information System (GIS) is a system designed to capture, store, manipulate, analyse, manage and present all types of geographical data.

Population and Housing Census (PHC) is defined as the total process of collecting, compiling, evaluating, analysing and publishing or otherwise disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country or in a well delineated part of a country (United Nations definition).

Quality Control refers to observations, techniques and activities used to fulfil requirements for quality.

Population Size, Growth and Distribution

Population growth refers to the change in population over time, and can be quantified as the change in the number of individuals in a population using "per unit time" for measurement.

Population Growth Rate refers to the change in population over a unit time period, often expressed as a percentage of the number of individuals in the population at the beginning of that period. Growth rate in this book is expressed as an exponential rate of growth of population from year 2012 to 2022 and is termed as average annual intercensal population growth rate.

Age and Sex Profile

Age is the number of years one had lived as at last birthday i.e., in reference to the census night.

Age-Dependency Ratio is the ratio of people in the “dependent” ages (those under age 15 and age 65 and older) to those in the “working age population” (15-64 years).

Elderly Population refers to persons aged 65 years and above (according to international definition). However, according to Tanzania National Ageing Policy, the elderly include all individuals 60 years and above.

Median Age is the age at which exactly half the population is older and half is younger.

Population Pyramid is a graphical presentation of population’s age and sex composition. Horizontal bars present the numbers or proportions of males and females in each age group.

Sex Ratio is the ratio of males to females in a given population usually expressed as the number of males for every 100 females.

Working Age Population in Census is the population age 15 to 64 years (international definition).

Young People comprise the population aged 0 to 14 years.

Youth Population comprises the population aged 15-24 years (international definition). However, according to Tanzania’s Youth Policy. Youth population refers to the population aged 15 to 35 years.

Household Composition

Average Household Size is the average number of persons per private household. Average household size is obtained by dividing the total number of persons living in private households by the total number of private households.

A Collective Household is one in which a group of persons reside in one dwelling or compound and have no head of household. Boarding schools, hospitals and camps are examples of collective households.

Head of Household is a person who is acknowledged as such by other household members.

Household refers to a person or group of persons who reside in the same homestead or compound but not necessarily in the same dwelling unit, have same cooking arrangements, and are answerable to the same household head except for collective household.

Private Household is defined as a person or group of persons who reside in the same homestead or compound but not necessarily in the same dwelling unit, having the same cooking arrangement, and are answerable to the same household head.

Marital Status

Divorced Persons are those persons who were once married but their marriages were permanently terminated and have not remarried since then. Note that in polygamous marriages the divorce of one or more wives does not categorize the husband as divorced if he still lives with the other wife (wives).

Living Together is an act of persons who are not formally married but are in a consensual union or are living in a socially recognized stable union.

Marriage is an act of persons who are living together or separately but are formally married irrespective of the type of marriage, which may be customary, civil or religious marriage.

Mean Age at First Marriage is defined as the average length of single life expressed in years among those who marry before age 50.

Never Married means persons who have remained single all their lives and exclude persons who have lived with a spouse but are now living alone.

Separated is the act of persons who were once married but now are living apart. Those who live apart because their spouses are employed far away from home or for similar reasons are considered to be married.

Widowed is the act of persons whose marriages were terminated by death and have not remarried since. Note that in polygamous marriages the death of one or more wives does not make the husband a widower if he still has other wife (wives).

National Identification Documents and Citizenship

Birth Certificate is a vital record that documents the birth of a child. The term "birth certificate" can refer to either the original document certifying the circumstances of the birth or to a certified copy of or representation of the ensuing registration of that birth.

Birth Registration is the process by which a child's birth is recorded in the civil register by Government authority.

National Identification is any official document that may be used to prove a person's identity such as the bearer's full name, birth date, address, an identification number, card number, sex, citizenship and more.

Survival of Parents

Orphan hood is the condition of being a child without living parents. In other words, the term 'orphan' is understood to mean a person whose parents are both dead. However, United Nations definition that was adopted by the Tanzanian Government identifies an orphan as a child under 18 years of age who has lost one or both parents.

Literacy, Numeracy and Education

Educational Attainment is the highest grade completed according to the country's educational system. A grade is a stage of instruction usually covered in the course of a school year.

Gross Enrolment Rate (GER) is defined as the number of children attending primary school regardless of age divided by the total number of children age 7-13 years.

Literacy is the ability to read and write with an understanding a short simple sentence in everyday life.

Literacy Rate is the percentage of a population that can read and write in Kiswahili, English, both Kiswahili and English or in any other language(s)

Net Enrolment Rate (NER) is defined as the number of children age 7-13 years who are attending school divided by the total number of children in that age group.

Numeracy is the ability to access, use, interpret and communicate simple mathematical information and ideas, to engage in and manage mathematical demands for a range of situations in adult life.

Numeracy Rate is the percentage of a population who has ability to access, use, interpret and communicate simple mathematical information and ideas.

School Attendance refers to attendance at any regular authorized or licensed educational institution or programme for organized learning at any level of education at the time of the Census.

Employment and Economic Activities

Economic activity status refers broadly to economically active population which includes those employed and unemployed. It also includes inactive population covering all persons who were without work during the reference period and were not available for work.

Labour Force Participation Rate (LFPR) is defined as the number of persons in the labour force as a percentage of the population aged 15 years and above.

Informal Non-Agricultural Economic Activities are activities that are unregulated and often without formal recorded business transactions, and are normally outside the framework of formal business regulations and system.

Unemployed persons comprise those who in the last seven days prior to the census enumeration were not engaged in any economic activity but were available for work regardless of whether they took any effort to look for work. (According to the relaxed international definition of unemployment).

Disability

Disability is defined as a loss or limitation of opportunities to take part in the normal life in the community on an equal level with others due to physical, mental or social factors. All the three (physical, mental and social factors) use the concept of activity limitation in defining disability rather than physical impairment.

Land Ownership

Certificate of Right of Occupancy is a formalized land tenure system. It allows individuals or entities to acquire rights to use and occupy land for specific purposes, such as agriculture, residential, commercial or industrial.

Customary land tenure is the form of land ownership based on customary practices and traditional land rights.

Land ownership is a process of acquiring land or right of occupancy from a relevant Government authority. It is categorized into three main tenure systems namely Customary Land Tenure, Right of Occupancy and Government Land.

Land Title Deed is a legal document that states and proves a person's legal right to own a piece of land

Housing Characteristics, Assets Ownership and Environmental Control

Improved roofing materials are durable roofing materials used for roofing which include iron sheets, tiles, concrete and asbestos. Unimproved roofing materials include grass or leaves, mud and leaves, plastics or box and tent.

Improved floor covering materials are long lasting flooring materials such as cement, ceramic tiles, parquet or polished wood, terrazzo, vinyl or asphalt strips. Non-improved materials include wood planks, palm or bamboo, earth or sand, dung, containers or tents.

Room for sleeping is defined as any space within a dwelling which is currently used for sleeping by household members. Any space within a dwelling can be termed as a room for sleeping if currently used by any household members for sleeping purposes and can be a sitting room, a dining room or even a store.

Improved sources of drinking water include sources that, by nature of their construction or through active intervention, are protected from outside contamination, particularly faecal matter. It comprises piped water, tube well or borehole, protected dug well, protected spring, rainwater, bottled water, carts with small tank/drum and tanker truck. Unimproved sources of drinking water include unprotected dug well, unprotected spring and surface water.

Solid waste disposal refers to the collection, sorting, transport and treatment of waste as well as its storage and tipping above or burying, as well as the transformation operations necessary for its re-use, recovery or recycling.

Electronic waste (E-waste) describes discarded electrical or electronic devices. It is also known as waste electrical and electronic equipment (WEEE) or end-of-life (EOL) electronics. It also refers to discarded, recycled or refurbished electrical and electronic products.

Access and Use of Information and Communication Technology

Radio refers to a device capable of receiving broadcast signals using frequencies in the FM, AM, LW and SW bands. A radio can be a standalone unit or integrated into other devices, including alarm clocks, audio players, mobile telephones or computers.

Television refers to a device capable of receiving broadcast signals using standard access methods, including radio frequency (over-the-air), cable, and satellite. A television set is

usually a standalone unit but may be integrated into other devices, such as computers or mobile telephones.

The Internet is a vast global network of interconnected computers and other electronic devices, allowing them to share information and communicate through a standardised set of protocols known as the Internet Protocol Suite (TCP/IP). It provides access to several communication services, including the World Wide Web and carries e-mail, news, entertainment and data files, irrespective of the device used.

Landline Telephone is a communication device that transmits and receives sound, typically the human voice, through physical wire or fibre optic cable connections.

A mobile (cellular) telephone also known as a cell phone, is a portable device that allows for voice and data communication over a wireless cellular network. Mobile phones have become essential devices in daily life, profoundly impacting on how we communicate, access information, and interact with the world around us.

Smart Mobile Phone (Smartphone) refers to a device that performs many computer functions, typically having a touch screen interface, broadband Internet access, and an operating system capable of running apps such as Facebook, WhatsApp or YouTube.

Non-Smartphone (Feature phone) refers to a device that performs only basic functions such as making and receiving calls, sending/receiving text messages and browsing Internet.

Computer is an electronic device designed to process, store, and manipulate data according to a set of instructions known as programs. It can perform a wide range of tasks, from simple calculations to complex operations involving data analysis, graphics design, and more.

Desktop Computer is a personal computing device designed for regular use at a single location. Unlike portable devices like laptops and tablets, desktop computers typically comprise separate components, including a monitor (screen), a keyboard, a mouse, and a central processing unit (CPU) housed in a tower or desktop case.

Laptop is a portable computer that integrates all the components of a traditional desktop computer into a single compact unit. Laptops are designed for convenience and mobility, making them ideal for use in various settings, such as at home, in the office, while travelling, or in educational environments.

Tablet is a portable computing device with a touchscreen interface, allowing users to interact with digital content and applications through touch gestures. Tablets are larger than smartphones but smaller and more compact than laptops, making them highly portable while offering a screen size that enhances the experience of browsing the Internet, reading digital books, watching videos, and playing games.

Information on Buildings

Access Road means any road whether public or private and includes any street, square, court, alley, beach, footway, path, passage or highway whether a thoroughfare or not.

Building Census is the act of collecting, analysing and disseminating buildings' data for specific time.

Building means any structure or erection and any part of any structure or erection of any kind whatsoever whether permanent, temporary or movable, and whether completed or uncompleted.

Building Parastatals are government institutions whose functions are to provide and or facilitate the provision of housing and other buildings in Tanzania.

Building Stock refers to the total number of buildings in a particular area.

Certificate of Customary means the certificate of right of occupancy issued to land Right of Occupancy under customary tenure as stipulated under Section 27 of the Land Act No.5 of 1999.

Certificate of Right refers to a legal land certificate of occupation granted under **Occupancy** the Land Act No. 4 of 1999 in Tanzania and Land Tenure Act No. 12 of 1992 of Tanzania Zanzibar.

Detached house refers to a building that stands alone from the foundation to roof level. Does not share walls with other houses. The building could be single or multi-storey.

Non-residential Use means a building or structure of any kind whatsoever used, designed or intended to be used for other than a residential use.

Partly Complete House refers to a building where one part is complete and can be occupied and other part is still under construction.

Physical Address means the mailing address, including a zip code which details the actual location (building number and street name) of a person, business or physical property.

Regularised Settlement is the legalised tenure status in the informal or unplanned settlements through a deliberate process aimed at bringing the informal and unauthorised settlements within the official legal (formal) and administrative systems of land to guarantee secure tenure for the concerned population.

Residential Building means a structure used or constructed or adapted to be used primarily for human habitation; such buildings may be available as apartments, quarters and similar facilities or accommodation.

Residential License confers upon the licensee the right to occupy land in non-hazardous land, land reserved for public utilities and surveyed land, urban or peri-urban area for the period of time for which it has been granted as provided in Section 23 of the Land Act No.4 of 1999.

Single Storey refers to a building consisting of ground floor only.

Stand Alone refers to a single house that is separate and detached from other buildings.

Surveyed Settlement refers to human settlements that cadastral surveying has been undertaken to each land parcel to determine its location, the extent of its boundaries and surface area, and to indicate its separate identity, both graphically on a map or in a record as well as physically on the ground.

Tenure is defined as institutions and rules which regulate property rights and resource use, and determine who can use what resource, under what conditions and for how long.

Terrace/Row of Houses refers to a terraced house is a row of more than two similar houses under one roof joined together by their side walls. The house could be single or multi-storey

Unit for the purpose of this publication, is a house or part of the house with all necessary amenities. A building can have more than one unit.

Chapter 1

Overview of the 2022 Population and Housing Census

1.1 Introduction

The United Nations defines a population census as the total process of collecting, compiling, evaluating, analysing, publishing and disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country or in a well delineated part of a country. It is the primary source of detailed data on the size, distribution and composition of the population. It covers all population groups including those in private households, institutions, the homeless and migrants for all geographic and/or administrative units in a country.

Additionally, the term “Housing Census” is used to imply the collection of information related to housing conditions such as the number of households, access to basic household amenities and living conditions. By combining population and housing data, policy makers and researchers are provided with valuable insights about demographic trends, social conditions and housing patterns, enabling them to make informed decisions and develop appropriate policies to address the needs of the population.

1.1.1 A Brief History of Census Undertaking in Tanzania

The history of population counts in Tanzania dates back to 1910. The first population census was conducted in 1958. Other censuses were conducted in 1967, 1978, 1988, 2002 and 2012 after the union of Tanganyika and Zanzibar in 1964. Since 1967, the country has conducted decennial Population and Housing Censuses (PHC) on a *de-facto* basis in accordance with the United Nations (UN) Principles and Recommendations for Conducting Population and Housing Censuses.

Unlike previous censuses, the 2022 PHC is the first digital census in Tanzania, whereby mobile technology was used at all stages of Census implementation. In the first phase, mobile GIS technology was used to facilitate demarcation of enumeration areas and transmission of census cartographic information to the servers located at NBS and OCGS Headquarters. Likewise, in the second phase, Computer Assisted Personal Interviews (CAPI) technology was used for data capture and transmission of information from the field to the servers during enumeration. Mobile devices (tablets) were programmed with a data capture system developed using CSEntry (a CSpro tool for data capture) that runs on Android Operating System. Development of the applications and programming of the devices were done by Tanzanian experts. The third phase of Census implementation which

includes data processing, analysis and dissemination is based on the use of more advanced technologies such as mobile phones for broadcasting census results and more iterative dashboards for data sharing.

1.2 Objectives of the 2022 PHC

The main objective of conducting the 2022 PHC was to provide the Government and other stakeholders with information on the size, distribution, composition and other social economic characteristics of the population, environment and information on housing conditions. This information contributes to the improvement of quality of life for Tanzanians through provision of current and reliable data for policy formulation, development planning, evidence-based decision making and service delivery. Census information is also used for monitoring and evaluating population and socio-economic programmes in the country.

1.2.1 Specific Objectives of the 2022 PHC

Specific objectives of the 2022 PHC were to:

- a) Increase availability and accessibility of accurate, timely and reliable data on demographic, socio-economic characteristics and environment;
- b) Enhance knowledge of stakeholders on socio-economic, demographic characteristics and environment of the Tanzanian population as well as patterns and trends of population growth; and
- c) Strengthen capacity of the National Bureau of Statistics (NBS) and the Office of the Chief Government Statistician (OCGS) in carrying out population and housing censuses, in areas of planning, collecting, processing, analysing, disseminating, utilising and archiving population and housing census and other statistical data.

1.3 Preparations for the 2022 PHC

1.3.1 Legal Framework

The 2022 PHC was carried out in accordance with the Statistics Act CAP 351. The Act, inter alia, mandates the NBS, in collaboration with OCGS Zanzibar, to conduct population and housing censuses within the United Republic of Tanzania every ten years. In this respect, the Statistician General (SG) of NBS is responsible for planning the overall organisation and technical administration of the Census. Furthermore, SG is the Accounting Officer and in charge of all Census operations. The Order to conduct the 2022 Population and Housing Census on 23rd August, 2022 was made by H.E. Dr. Samia Suluhu Hassan, President of

the United Republic of Tanzania, on 21st March, 2022 and was published in the Tanzania Government Gazette of the 29th April, 2022 as directed by the Act.

1.3.2 Census Organisation

A Population and Housing Census is a massive undertaking that needs careful planning coupled with an appropriate organisation, administrative arrangements as well as procedures. These are necessary in ensuring that, extensive human and material resources mobilized for the census are effectively and efficiently used and that the census tight schedules and massive logistic requirements are met. During the 2022 Census, a well-planned decentralized census organisation was formed with the primary role of coordinating all census activities from the national down to the grass root level.

Preparations for the 2022 PHC were facilitated by various committees at national, regional, district, ward/shehia and village/mitaa levels to guide and monitor the Census processes. The committees drew members from Ministries, Departments and Agencies (MDAs), Higher Learning Institutions, Private Sector and Non-Governmental Organizations (NGOs). The main committees were: - National Census Central Committee, National Census Advisory Committee, Census Collaborators Forum, Technical Advisory Committee as well as Regional and Districts Census Committees.

The Prime Minister's Office of the United Republic of Tanzania and the Second Vice President's Office for the Government of Zanzibar, were responsible for overseeing the overall operations of the 2022 PHC. The Regional and District Census Committees chaired by Regional and District Commissioners respectively were responsible for ensuring that all Census activities were successfully undertaken in their areas of jurisdiction.

The Population and Housing Census Commissars, one from each side of the United Republic of Tanzania, were responsible for publicity and advocacy activities such as educating, sensitising and mobilising the public for census exercise. They were also responsible for resource mobilisation and played the role of a link between census technical personnel and other stakeholders as well as enhancing political buy-in of the Census.

1.3.3 Development of Census Instruments

The Census instruments (questionnaires, manuals and other census documents) were developed in collaboration with national experts from MDAs, higher learning and research institutions, private sector and Non-State Actors. Further, they were developed in accordance with the United Nations Principles and Recommendations for the 2020 Round of Population Censuses. They included topics from previous censuses for comparison purposes (both national, regional and international) and new topics to cater for the country's

current data needs (Tanzania Development Vision 2050) and to feed into regional and international programmes (including East African Community Vision 2050; the Southern African Development Community Vision 2050; African Development Agenda 2063; and 2030 Agenda for Sustainable Development). The draft questionnaires were shared widely with various stakeholders both in Tanzania Mainland and Tanzania Zanzibar through stakeholders' workshops and the Census Committees. The final questionnaires were approved by the Central Census Committee.

The 2022 PHC had three main digital tools for data collection. The first one was a community questionnaire, which collected information on all social amenities; land use patterns and environmental or natural features and available community infrastructure. The second tool was the main census questionnaire which collected detailed information on demographics, including fertility, mortality, migration, orphan hood, and disabilities; possession of national documents, education level and economic activities. It also collected information on land ownership and information related to ICT ownership and use, housing, utilities, ownership of assets and agriculture. The third tool was a questionnaire for special population groups such as diplomats and travellers.

1.3.4 Cartographic Work

The 2022 PHC enumeration was preceded by extensive cartographic work covering the entire country. The main objective of the cartographic work was to delineate the entire country into Enumeration Areas (EAs) in order to produce maps required for Census operations. In urban areas, EA sizes ranged from 50 to 150 households while for rural areas, a hamlet was considered as an EA.

Unlike in previous censuses, the 2022 Population and Housing Census used modern technology (Arc-GIS) in demarcating enumeration areas. The Arc-GIS technology enabled the use of digital based maps (Satellite images) instead of analogue -based maps. Delineation of EA boundaries was done using Global Positioning System (GPS). In addition, coordinates of prominent features existing in each particular EA were also recorded as shown on Map 1.1. Overall, 4,974 EAs were delineated in Dodoma Region (1,936 EAs in urban areas and 3,038 hamlets in rural areas).

Map 1.1: A Typical Enumeration Area Map for 2022 PHC

1.3.5 Pilot Census

According to the United Nations requirements and guidelines, NBS/OCGS conducted a Pilot Census in September, 2021; one year before the actual census. The main purpose of the Pilot Census was to test the effectiveness of the entire Census mechanism that would be used during implementation of the 2022 Population and Housing Census. Pilot census was conducted in 18 purposively selected regions, of which 13 were in Tanzania Mainland and five in Tanzania Zanzibar (Map 1.2). The experience and obtained results provided valuable inputs which were used to improve Census instruments and logistics in the final preparations towards the 2022 Population and Housing Census enumeration.

Map 1.2: Selected Areas for the 2021 Pilot Census

1.3.6 Census Publicity and Advocacy Campaign

The 2022 PHC used intensive and extensive publicity and advocacy programmes to educate, sensitise and mobilise the public to participate in the Census process. There were two Census Commissars one for Tanzania Mainland and the other for Tanzania Zanzibar. The main functions of the Commissars included to publicise the implementation of the Population and Housing Census as well as Advocacy activities. Further, to collaborate with committees at all administrative levels to motivate community participation and ensure timely and sufficient availability of human and financial resources as well as equipment.

To standardise publicity and advocacy campaigns throughout the country, the NBS and OCGS developed publicity guidelines that were used during the Census publicity and advocacy operations. The guidelines explained in brief, the meaning and purpose of the Census as well as broad topics covered.

Given the importance of Census publicity, resources were availed to regional authorities for the purpose of educating, sensitising and mobilising the public to participate in the census in their respective areas.

Image 1.1: Hon. Anne Semamba Makinda, Census Commissar for Tanzania Mainland speaking to citizens living on the border of Tanzania and Rwanda at Rusumo during the 2022 census publicity campaign on 14th June, 2022.

1.4 Census Enumeration Activities

Several activities were undertaken in preparation for the main enumeration exercise, including recruitment and training of field personnel and distribution of enumeration materials to all regions and districts.

1.4.1 Recruitment and Training

Recruitment of census enumerators and supervisors followed procedures set by NBS and OCGS and approved by the Central Census Committee. The process was coordinated by Regional and District Census Committees in their respective administrative areas. A total of 205,000 enumerators and supervisors were recruited and trained.

Training for census enumeration was conducted at three levels namely: - Training of Trainers (TOT) at national level; training of trainers at regional level; and training of supervisors and enumerators at district level. Trainings were conducted from June to August 2022 and covered theoretical and field practical trainings. The training enabled participants to conceptualise the topics covered in the Census questionnaires; build common understanding of all questions, understand techniques of asking questions and probing where necessary. Furthermore, participants were trained on the use of ICT during data collection, particularly the use of tablets to collect the required information. Trainers were provided with training manuals while supervisors and enumerators were provided with instruction manuals to be used as reference materials.

1.4.2 Other Preparations for Enumeration

A range of other preparatory activities were carried out in the second and third week of August 2022. The activities included distribution of enumeration materials to supervisors and enumerators, physical identification of EA boundaries and meeting local authorities in the respective areas. Activities at regional and district levels were coordinated by Regional and District Census Coordinators in collaboration with respective Census Committees.

1.4.3 Enumeration

The targeted population for the 2022 PHC was all persons who spent the night of 22nd/23rd August, 2022 within the borders of Tanzania. The actual enumeration was conducted by enumerators and supervisors in their respective assigned areas. There were enumerators stationed at mass transit points (the night of 22nd/23rd) to enumerate passengers on buses, trains, airports and ships. Special enumeration cards were issued to each traveller after enumeration to avoid double-counting. Arrangements were also made to enumerate the homeless during the same night. During enumeration, enumerators were submitting data to

their supervisors every day and the supervisors in turn were transferring them to the server at NBS after checking their quality.

The duration for enumeration, as per the Presidential Order, was seven days from 23rd to 29th August, 2022. Enumeration exercise was completed by 93.45 percent within the planned period of seven days. However, in some areas, enumeration could not be completed within the seven days' period due to various reasons. Reasons for not completing enumeration within the allocated time included scattered households, EAs having more households than anticipated as well as difficulty to reach EAs. Nevertheless, by the 5th September, 2022 the enumeration exercise had been completed by 99.99 percent in all EAs.

Image:1.2 H.E. Dr. Samia Suluhu Hassan, President of the United Republic of Tanzania being enumerated at the State House, Dodoma on 23rd August, 2022.

1.4.4 Post Enumeration Activities

After enumeration all tablets and their accessories, quality control forms and notebooks were collected for safe custody at respective Regional Census Offices from where they were transported to NBS and OCGS headquarters for further logistics.

1.5 Data Processing

The whole process of compilation basic counts and basic data analysis was completed in 45 days after completion of the enumeration exercise. Initial results of the 2022 PHC at National level were released in Dodoma by H.E. Dr. Samia Suluhu Hassan, President of the United Republic of Tanzania on 30th October, 2022.

1.6 Quality Control Procedures

Quality control is an essential component of the Census undertaking. Quality control standards and procedures were developed and observed throughout all steps of the census undertaking to ensure collection of quality data. All supervisors and coordinators were trained on quality control standards and procedures during training sessions of the census.

Chapter 2

Population Size, Growth and Distribution

Key Points

- Dodoma Region has a population of 3,085,625 persons; (1,512,760 males and 1,572,865 females).
- The regional population grew at an average annual growth rate of 3.9 percent between 2012 and 2022. At this rate, Dodoma Regional population is expected to double in the next 18 years; that is in year 2040.
- The regional population remains predominantly rural with 64.7 percent of its total population living in rural areas and 35.3 percent living in urban areas.

2.1 Introduction

This chapter presents information on population size, distribution by place of residence and sex, population growth and the annual average intercensal growth rates in Dodoma Region. Population size is the first demographic fact that any population census intends to obtain. Determining population size is important for planning, monitoring and establishing required resources for socio-economic development of any country. The growth and distribution of the population determines the demand for and location of essential social services, such as education, health, water, transport and housing. Therefore, understanding population size, growth and distribution is important for decision makers, planners, researchers, implementers of development programmes and the public in general. These statistics facilitate making evidence-based decisions, optimal resources allocation, planning, monitoring and evaluation of development frameworks.

2.2 Population Size

Dodoma Region has a population of 3,085,625 persons and is the fifth most populous region in Tanzania Mainland. Slightly more than half (51.0%) of this population are females (1,572,865 persons) and 49.0 percent (1,512,760 persons) are males (Table 2.1).

2.2.1 Population Size by Council

Administratively, Dodoma Region has eight Councils, out of those, six are District Councils, one is a Town Council and one a City Council. Dodoma City Council in Dodoma Region has the largest population (765,179 persons) compared with other Councils. Dodoma City Council is followed by Chamwino District (486,176 persons), Kongwa District (443,867 persons) and Mpwapwa District (430,247 persons). These four councils account for 68.9 percent of the total population in Dodoma Region. The last two Councils with small population in Dodoma Region are Kondoa Town (80,443 persons) and Kondoa District (244,854 persons).

Further results show that proportion of females is high compared with males in most of Dodoma council except Kondoa and Chemba District male population is slightly higher (50.8% and 50.3% respectively) than that of females (Table 2.1).

Table 2.1: Number and Percentage Distribution of Population by Sex and Council; Dodoma Region, 2022 PHC

Council	Population size				
	Both sexes	Male		Female	
		Number	Percent	Number	Percent
Total	3,085,625	1,512,760	49.0	1,572,865	51.0
Kondoa District	244,854	124,379	50.8	120,475	49.2
Kondoa Town	80,443	40,153	49.9	40,290	50.1
Mpwapwa District	403,247	196,466	48.7	206,781	51.3
Kongwa District	443,867	214,475	48.3	229,392	51.7
Chamwino District	486,176	236,583	48.7	249,593	51.3
Dodoma City	765,179	373,440	48.8	391,739	51.2
Bahi District	322,526	156,427	48.5	166,099	51.5
Chemba District	339,333	170,837	50.3	168,496	49.7

**Figure 2.1: Percentage Distribution of Population by Council; Dodoma Region, 2022
PHC**

2.2.2 Rural and Urban Population

Dodoma Region population is predominantly rural, with 64.7 percent of its population living in rural areas and 35.3 percent living in urban areas. Across Councils with more than 90 percent of their population living in rural areas are Bahi (95.8%), Chamwino (95.1%), Chemba (94.8%) and Kondoa (91.1%). Further results show that Dodoma City and Kondoa Town is the most urbanized Council with all of its population living in urban areas. (Figure 2.2 and Table 2.2).

Figure 2.2: Percentage Distribution of Population by Counciland Place of Residence; Dodoma Region, 2022 PHC

2.3 Population Change and Growth

2.3.1 Population Change

The population of Dodoma Region has increased by 48.1 percent from 2,083,588 persons in 2012 to 3,085,625 persons in 2022. This is an indication of increasing population growth rate over the two decades (Table 2.3).

2.3.2 Annual Population Growth Rate and Trends

Dodoma Region population grew at an average annual growth rate of 3.9 percent between 2012 and 2022. This growth is above the national average of 3.2 percent. At this rate, the population is expected to double in the next 18 years; that is in year 2040. The growth rate for the female population is the same (3.9%) as that of the total population while for the male population it is 4.0 percent (Table 2.3).

Table 2.3: Population Size and Growth Indicators by Sex; Dodoma Region, , 2012 and 2022 PHCs

Sex	Population Size		Percentage Changes	Percentage Growth Rate (per annum)	Doubling Time from 2022 (Years)
	2012	2022	2012-2022	2012-2022	
Total	2,083,588	3,085,625	48.1	3.9	18
Male	1,014,974	1,512,760	49.0	4.0	17
Female	1,068,614	1,572,865	47.2	3.9	18

Figure 2.3 shows the trend of Dodoma Region population average annual intercensal growth rate since 1967 to 2022 censuses. The rate shows a decrease from 2.9 percent in 1967-1978 to 2.1 percent in 2002 - 2012, then an increase to 3.9 percent in 2012 – 2022.

Figure 2.4: Average Annual Intercensal Population Growth Rates; Dodoma Region, 1967–2022 Censuses

Chapter 3

Age and Sex Profile

Key Points

- Forty two percent (42.4%) of the Dodoma Region population is below 15 years and 4.8 percent is aged 65 years and above, thus a youthful age structure.
- The median age of the population of Dodoma Region is 18.7 years.
- The percentage of the working age population (15 - 64 years) in Dodoma Region has increased from 49.2 percent in 1988 Census to 52.8 percent in 2022.
- The percentage of the population aged 60 years and above in Dodoma Region is 6.9
- The age dependency ratio for Dodoma Region is 89.4.

3.1 Introduction

This chapter discusses quality of age and sex data, presents age and sex profiles as well as population distribution by selected age groups and respective demographic attributes in Dodoma Region. The Tanzania 2022 PHC collected information on age in completed years for all persons who spent the census night in the country. Age and sex are the most fundamental demographic characteristics of human populations. They are important variables in the study of population dynamics, demographic analysis, social functions and responsibilities in socio-economic development processes.

Age, in particular, is a critical variable for planning and making important decisions in public administration for different population groups. For instance, age is used as an essential input in population projections, planning for social economic development and provision of social services including health, education, food security and energy. Despite its importance, the results from previous censuses and the experience from most developing countries, show that age and sex information is affected by misreporting.

3.2 Quality of Age and Sex Data

The quality of age and sex data in the 2022 PHC was examined using an array of conventional methods and indices. It was observed to have suffered errors associated with age misreporting which cannot be neglected. Based on experience gained from previous

censuses, age data are characterized by a significant clustering at ages ending in digits “0”, “5” and “8” and to a lesser extent to ages ending with even numbers, with corresponding deficiencies at ages ending in digits “1”, “3”, “7” or “9”. The tendency of respondents to report ages ending with certain digits at the expense of other digits is called age heaping, age preference or digit preference. Age misreporting is most pronounced among populations or population sub-groups with no birth registration systems or low literacy rates.

The 2022 Census results in Dodoma Region show a significant heaping in ages ending with digits “0”, “2”, “4” and “8” and avoidance of ages ending with digits “1”, “3”, and “9”. There is a clear indication that, age misreporting for digit 5 is insignificant. This might be due to improved data collection techniques used in the 2022 Census, specifically the use of tablets, improved probing of age data as well as the use of National Identification Cards during enumeration to reconfirm the stated ages. The observed jagged edged pattern is a typical feature of single-year age distributions in most developing countries’ census data depicting age misstatements. Digit preference is observed to be relatively higher among females than males (Figures 3.1).

Figure 3.1: Population Distribution by Age in Single Years and Sex; Dodoma Region, 2022 PHC

3.2.1 Population Distribution by Five Year Age Groups

Tables 3.1, 3.2 and 3.3 present the distribution of population by five-year age groups and sex for Dodoma Region. The data depict a young population age structure with 42.4 percent of the population aged below 15 years and 4.9 percent aged 65 years and above. The median age of the Dodoma Region population is 18.7 years.

Sex ratio by age groups provides an important index of possible age misreporting. Under normal circumstances, the general trend of sex ratio is a gradual decrease with age, eventually falling below 100, whereby the number of females begins to exceed the number of males and the difference grows larger with advancing ages. The overall sex ratio for Dodoma Region is about 96 males for every 100 females (97 for rural areas and 95 for urban) indicating more females than males. The sex ratio of the population aged 5 - 19 years (ranging from 100 to 112 boys per 100 girls) in rural areas is relatively high. On the other hand, the sex ratio of the population of the same age group in urban areas is relatively low (ranging from 88 to 98 boys per 100 girls). This indicates that there may be an early out migration of girls from rural to urban areas (Tables 3.1, 3.2 and 3.3).

Table 3.1: Number and Percentage Distribution of Population by Sex and Five-Year Age Group; Dodoma Region, 2022 PHC

3.2.2 Population Pyramid

A population pyramid is a graphical representation of the age and sex composition of a specific population. It provides a snapshot of the population’s age and sex structure. It also provides useful insights into the patterns of vital events (birth and death rates). The pyramid of Dodoma Region as per the 2022 PHC has a broad base indicative of high fertility and a youthful age structure (Figures 3.2 to 3.5). Dodoma Region population structure resembles other regional structures in the country.

However, pyramids for major urban centres may have a different structure. For example, the pyramid for Dodoma City Council (Figure 3.5), the largest town in Dodoma Region shows a bulge in age 20 – 29, an indication of youth in-migration from other parts of the country.

Figure 3.2: Population Pyramid for Five Year Age Groups; Dodoma Region, 2022 PHC

Figure 3.3: Population Pyramid for Five Year Age Group; Dodoma Rural, 2022 PH

Figure 3.4: Population Pyramid for Five Year Age Group; Dodoma Urban, 2022 PHC

Figure 3.5: Population Pyramid for Five Year Age Group; Dodoma City Council, 2022 PHC

3.3 Population Distribution by Selected Age Groups

The 2022 PHC reveals that, Dodoma Region has a young population with 42.4 percent of the total population below 15 years of age and 4.8 percent of the population aged 65 years and above (Table 3.4). The broad-based structure is an indication of a development stage where a country succeeds in reducing infant mortality while fertility remains high.

Table 3.4: Number and Percentage Distribution of Population by Place of Residence, Selected Age Groups and Sex; Dodoma Region, 2022 PHC

Age Group	Total		Rural		Urban	
	Number	Percent	Number	Percent	Number	Percent

3.3.1 Children Under Five Years

The 2022 PHC results show that, the population under five years in Dodoma Region is 14.8 percent. Figure 3.6 indicates that the percentage of population under five years in the Region has declined from 16.4 percent in 2002 to 14.8 percent in 2022. This decline indicates a slow pace of fertility decline in the Region during the specified period.

Figure 3.6: Percentage of Children Under Five Years by Place of Residence; Dodoma Region, 2002, 2012 and 2022 PHCs

3.3.2 Young Population (0-14 Years)

Dodoma Regional population is characterised by a young age structure, with 42.4 percent of the total regional population below 15 years of age. Figure 3.7 shows that the percentage of population below 15 years of age has declined from 44.4 percent in 2002 to 42.4 percent in 2022.

Figure 3.7: Percentage of Young Population (0-14 Years) by Place of Residence; Dodoma Region, 2002, 2012 and 2022 PHCs

3.3.3 Young Population (0-17 Years)

Figure 3.8 shows that in Dodoma Region 48.8 percent of the population is below 18 years. The percentage of population aged 0-17 years in Dodoma Region has declined from 50.7 percent in 2002 to 48.8 percent in 2022.

Figure 3.8: Percentage of Young Population Aged 0-17 Years by Place of Residence; Dodoma Region, 2002, 2012 and 2022 PHCs

3.3.4 Youth Population (15-24 Years)

The Tanzania National Youth Development Policy, 2007 defines a youth as “a boy or girl who is in transition from childhood to adulthood”. According to the Policy, a youth is defined as a person aged 15 – 35 years. However, according to the United Nations, a youth is defined as a person aged 15 - 24 years. In this chapter analysis has employed both definitions.

Figure 3.9 presents census results on the youth population as per the United Nations definition (age 15 - 24) for Dodoma Region for 1988, 2002, 2012 and 2022 Censuses. Results for PHC 2022 indicate that the youth population (15 – 24 years) in Dodoma Region accounts for 19.2 percent of the total regional population. The percentage of youth population (15-24 years) in Dodoma Region has declined from 18.9 percent in 1988 to 17.5 percent in 2012 and then increased to 19.2 percent in 2022.

Figure 3.9: Percentage of Youth Population (15-24 Years) by Place of Residence; Dodoma Region, 1988, 2002, 2012 and 2022 PHCs

3.3.5 Youth Population (15 - 35 Years)

The 2022 PHC results show that the youth population as per the National Youth Development Policy, 2007, (15 - 35 years) accounts for 33.5 percent of the Dodoma regional population. The percentage of persons aged 15-35 years has a declining trend from 34.1 in 2002 to 33.5 percent in 2022 (Figure 3.10).

Figure 3.10: Percentage of the Youth Population (15-35 Years) by Place of Residence; Dodoma Region, 2002, 2012 and 2022 PHCs

3.3.6 Working Age Population (15-64 Years)

The working age population (15 – 64 years) in Dodoma Region is 52.8 percent of the total regional population. The percentage of working age population in the region has an increasing from 49.2 percent in 1988 Census to 52.8 percent in 2022 (Figure 3.11).

Figure 3.11: Percentage of the Working Age Population (15-64 Years) by Place of Residence; Dodoma Region, 1988, 2002, 2012 and 2022 PHCs

3.3.7 Elderly Population

According to the international definition, an elderly is a person aged 65 years and above. However, according to the Tanzania National Ageing Policy of 2003, an elderly is a person aged 60 years and above. In this chapter the analysis has taken into account both definitions.

Population Aged 60 Years and Above

Findings indicate that, the elderly constitute a small segment of Dodoma regional population. The percentage of the population aged 60 years and above is 6.9 percent. This percentage show a slightly increasing trend from 6.6 percent in 1988 census to 6.9 percent in 2022 (Figure 3.12).

Figure 3.12: Percentage of the Population Aged 60 Years and Above by Place of Residence; Dodoma Region, 1988, 2002, 2012 and 2022 PHCs

Population Aged 65 Years and Above

Findings indicate that, the elderly population constitutes a small segment (4.8%) of Dodoma regional population. The percentage of the elderly population aged 65 years and above in the region show a slightly increasing trend over the two decades (4.6% in 2002, 4.9% in 2012 and 4.8% in 2022) (Figure 3.13).

Figure 3.13: Percentage of the Population Aged 65 Years and Above by Place of Residence; Dodoma Region, 2002, 2012 and 2022 PHCs

3.3.8 Age Dependency Ratio

Age-dependency ratio is the proportion of persons in the “dependent” ages (those under 15 years of age plus those aged 65 years and above) to the “working age population” (15-64 years). It is expressed as a number of dependents per 100 persons of the working age population. Ratios higher than a 100 are undesirable. The age-dependency ratio is a proxy indicator of the economic burden and responsibility borne by the working age population.

According to the 2022 PHC results, the dependency ratio for Dodoma Region is 89.4 implying that there are 89 dependents per 100 non-dependents. Results further show that in three decades from 1988 to 2022, the age dependency ratio for the region show a declining trend from 103.0 percent in the 1988 census to 89.4 percent in the 2022 census (Figure 3.14).

Figure 3.14: Age Dependency Ratio by Place of Residence; Dodoma Region, 1988, 2002, 2012 and 2022 PHCs

Chapter 4

Household Composition

Key points

- Most of private households in Dodoma Region (61.0%) are in rural areas.
- The average household size in Dodoma Region is 4.1, in rural areas it is 4.3 persons while in urban areas it is 3.6 persons.
- There is a decline in average household size from 4.6 persons in 2012 to 4.1 in 2022.
- The average number of persons per household in male-headed households is 4.2 and 3.7 in female-headed households.
- Female-headed households in Dodoma Region increased from 32.2 percent in 2012 to 35.4 percent in 2022.

4.1 Introduction

This chapter presents information on private households including household composition, number of households, average household size and household headship. Although the 2022 PHC collected information from private and collective households; this analysis is based on private households.

A private household refers to a person or group of persons living together, having the same cooking arrangements and answerable to one household head, but not necessarily living in the same dwelling unit. Since the 2022 PHC enumeration was *de facto*, some modifications were made to this definition. For instance, visitors present in the household on census night were also included as members of the household. Further, usual members of the household who spent the census night elsewhere due to being on duty were included as members of the household. On the other hand, collective households are those with members not necessarily related to each other, such as students in hostels, orphanages, prisons and patients in hospital wards.

4.2 Number of Households

The 2022 PHC reveals that Dodoma Region has a total of 754,631 private households out of which 294,071 (39.0%) are in urban areas and 460,560 (61.0%) in rural areas. Female headed households account for 35.4 percent of all private households. The percentage of female headed households is slightly higher in rural areas (35.6%) than in urban areas (35.1%) (Table 4.1).

Basic Demographic and Socio-Economic Profile

Results further reveal that, Dodoma City has the largest number of households accounting for 28.1 percent of total private households in the region. The next four Councils with relatively high contributions to the total households are Chamwino District (15.7%), Kongwa District (13.5%), Mpwapwa District (13.1%) and Bahi District (10.0%). On the other hand, Kondoia Town has the smallest contribution of households (2.7%) (Table 4.2).

Table 4.2: Number and Percentage of Households by Place of Residence and Council; Dodoma Region, 2022 PHC

Figure 4.1 shows an increase in urban households from 16.2 percent in 2012 to 39.0 percent in 2022 PHC. Dodoma Region shows an increase of 22.8 percentage points in urban households.

Figure 4.1: Percentage Distribution of Private Households by Place of Residence; Dodoma Region, 2012 and 2022 PHCs

4.3 Average Household Size

Average household size is the mean number of persons in a private household. The average household size decreased from 4.6 in 2012 to 4.1 persons in 2022. Households in rural areas have an average of 4.3 persons per household which is relatively higher than in urban areas (3.6 persons). Average household size declined from 4.6 persons in 2012 to 4.3 in 2022 in rural areas while in urban areas the decline is from 4.2 persons in 2012 to 3.6 persons in 2022. Moreover, the average household size varies across Councils, ranging from 3.5 persons in Dodoma City to 4.6 persons in Kondoa District Council (Figure 4.2 and Table 4.3).

Figure 4.2: Average Household Size by Council; Dodoma Region, 2022 PHC

³ Data from Dodoma Region Basic Demographic and Social-Economic Profile, 2012 PHC

4.4 Household Headship

A household head is the individual normally recognized by other household members as their head. The 2022 PHC results show that, of the total private households in Dodoma Region, 64.6 percent are headed by males and 35.4 percent are headed by females (Figure 4.3).

Figure 4.3: Percentage Distribution of Households by Sex of Household Head and Place of Residence; Dodoma Region, 2022 PHC

Results further reveal that percentage of male-headed households decreased from 67.8 in 2012 to 64.6 percent in 2022, while female-headed households increased from 32.2 in 2012 to 35.4 percent in 2022. A similar pattern is observed across Councils except for Kondoa Town Council where there is a slight decrease in female headed households from 33.2 in 2012 to 32.6 percent in 2022 (Table 4.4).

4.4.1 Households Living in Improved or Unimproved Houses

This sub section discusses the heads of households and the type of building materials used to build the main dwelling (house). For the purpose of this report, an improved house implies a house that is built using improved building materials in at least two of the following; roofing, walling and flooring materials.

Table 4.6 shows that 77.2 percent of households in Dodoma Region live in improved houses. Further, the percentage for male headed is slightly higher (77.8%) than for female (76.0%). Results show further that the percentage of household which live in improved houses is higher (94.2%) in urban areas compared with rural areas (66.3%). A similar pattern is observed for male headed and female headed households.

Councils with high percentage of households living in improved houses are Dodoma City (95.6%), Kondoa District (93.5%) and Kondoa Town (93.4%). On the other hand, Councils with high percentage of households living in unimproved houses are Bahi District (49.1%), Mpwapwa District (37.7%) and Chamwino District (30.6%). A similar pattern is observed for both male headed and female headed households (Table 4.6).

Basic Demographic and Socio-Economic Profile

The findings in Table 4.7 show that as age of household head increases the chances of living in improved house generally decrease. For example, while 81.5 percent of household heads aged 25-29 years live in improved houses, such percentage decreases to 66.4 percent for those household heads aged 80 years and above. This observation for both male headed and female headed households.

4.4.3 Heads of Households by Type of Toilet Facility

In Dodoma Region percentage of households using improved toilet facilities is 54.9 percent for the male headed and 53.9 percent for the female headed households. On the other hand, with respect to households with no toilet facilities, there is hardly any difference between female headed (5.3%) and male headed households (5.2%) (Figure 4.4).

Figure 4.4: Percentage Distribution of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head; Dodoma Region 2022 PHC

Results show that the percentage of households using improved toilet facilities is much higher in urban compared with rural areas, with a percentage point difference of 45.6 for female headed households and 46.0 for the male headed. However, there is hardly any difference between male headed and female headed households. In contrast, the results further reveal that, households that use unimproved toilet facilities as well as those without toilet facilities is mostly a rural occurrence (Figure 4.5).

Figure 4.5: Percentage of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head and Place of Residence; Dodoma Region; 2022 PHC

Across councils, results reveal that Dodoma City has the highest percentage of both male and female headed households with improved toilet facilities (87.0 and 85.4% respectively). Other Councils with relatively high percentage of male and female headed households using improved toilet facilities are Kondoa Town (59.5% and 65.4%) and Kongwa District (54.7% and 51.8%).

Councils with high percentage of male headed household with no toilet facilities are Chemba District (14.2%) and Bahi District (9.6%). This also applies to female headed households (14.6% and 9.5%) for Chemba District and Bahi District respectively (Table 4.12).

4.4.4 Heads of Households by Source of Drinking Water

The results show that, there is slight difference between female headed households that use improved source of drinking water (86.2%) compared with male headed households in (85.2%) urban areas. The same pattern is also observed in rural areas whereby the proportion of female headed households that use improved source of drinking water is 58.0 percent and 55.4 percent for female headed households.

Both male and female headed households using improved source of drinking water are more dominant in urban areas than rural areas. The proportion of households that use unimproved source of drinking water is about the same for male and female headed households in rural areas (44.6% and 42.0% respectively). The respective figures in urban areas are 14.4 percent and 13.8 percent respectively (Figure 4.6).

Figure 4.6: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head and Place of Residence; Dodoma Region, 2022 PHC

The results also reveal that the percentage of female headed households that use unimproved source of drinking water is slightly higher (68.9%) compared with that of male headed households (67.2%) (Figure 4.7).

Figure 4.7: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head; Dodoma Region, 2022 PHC

Across Councils, Dodoma City has the highest percentage of both male and female headed households that use improved sources of drinking water (88.0% and 87.6% respectively).

Other councils with relatively high percentages of male and female headed households using improved sources of water for drinking water are Chamwino District (67.2% and 68.7% respectively) and Kongwa District (22.6% and 21.6% respectively)

On the other hand, Councils with high percentages of male headed households using unimproved sources of drinking water are Bahi District (60.7%), Chemba District (46.7%), Kondoa District (43.5%) and Mpwapa District (42.2%). Female headed households with high proportion of households using unimproved sources of water for drinking are Bahi District (60.1%), Chemba District (43.4%) and Kondoa District (41.2% each) (Table 4.13).

4.4.5 Household Heads with Children Under 18 Years

Results show that percentage of female headed households with one to three children under 18 years is higher (55.6%) than that of male headed households (49.1%). The percentage of male headed households with more than three children under 18 years (21.0%) is higher than that of female headed households (18.9%). On the other hand, the percentage of male headed households with no children under 18 years is higher (30.0%) compared with that of female headed households (25.4%) (Figure 4.8 and Table 4.14).

Figure 4.8: Percentage Distribution of Households with Children under 18 Years by Sex of Household Head; Dodoma Region, 2022 PHC

The results show that the majority of households with children under 18 years have one to three such children. Out of 754,631 households with children under 18 years 51.4 percent have one to three children, 28.4 percent have no child and 20.2 percent have more than three children. Results further indicate that 56.2 percent of female headed households living in rural areas have one to three children under 18 years compared with 51.1 percent for male headed households. The same pattern is observed in urban areas. The percentage of male headed households with more than three children and reside in rural areas is 25.6 percent compared with 22.5 percent of female headed households. On the other hand, the proportion of male headed households with no children under 18 years is higher in urban areas (40.4%) compared with female headed households (32.1%) (Figure 4.9 and Table 4.14).

Across councils Mpwapwa District has the highest percentage of households (55.9%) with one to three children followed by Kongwa District with 54.7 percent, while Dodoma City has the lowest percentage of households with one to three children (47.8%) (Table 4.14).

Chapter 5

Marital Status

Key Points

- Fifty one percent (51.2%) of the population aged 15 years and above in Dodoma Region are married.
- About six percent (5.5%) of persons aged 15 years and above are widowed. The percentage of Females widowed is higher (4.8%) than that of Males (0.7%).
- About four percent of persons (3.8%) aged 15 years and above are divorced. More females are divorced (2.6%) than males (1.3%).
- Mean Age at First Marriage in Dodoma Region is 24.2 years. Females are getting married at a younger age (22.1 years) than males (26.4 years).

5.1 Introduction

This chapter focuses on analysis of marital status and Singulate Mean Age at First Marriage. The term "marital status" refers to the state of being unmarried, married, widowed, separated or divorced. Marital status is one of the most important factors in population dynamics as it affects fertility and other social and economic characteristics such as school attendance and labour force participation. The information on marital status helps Government Agencies and other users to understand marriage trends and forecast future needs of programmes that have spousal benefits. It also measures the effects of policies that focus on the well-being of families, including financial assistance plans.

In the 2022 PHC the questions on marital status were asked to all persons aged 10 years and above. However, in order to allow comparison of the 2022 Census results with the 2012 results, the analysis is mainly focused on the population aged 15 years and above. Six categories were adopted to classify marital status which are: - never married, married, living together, separated, divorced and widowed.

Data on marital status for the 2022 PHC is disaggregated by age, sex, rural and urban areas and councils. Information on marital status of the population aged 15 years and above is presented by residence, age, sex and councils.

5.2 Marital Status

In Dodoma Region result show that 51.2percent of persons aged 15 years and above are married and the percentage is higher among females (26.9%) than males (24.2%). Proportionately, the percentage of married persons in rural areas is higher (33.9%) compared with urban areas (17.2%). Nearly, one third (31.8%) of persons aged 15 years and above are never married; among males it is 18.7 percent while for females it is 13.1 percent. The results also show notable differences between rural and urban areas for the never married persons (16.5% and 15.3% respectively).

Results further show that, the percentage of persons aged 15 years and above who are widowed is 5.5 percent which is higher among females (4.8%) than males (0.7%). The percentage of widowed in rural areas in Dodoma Region is 3.7 while it is 1.9 percent in urban areas. The large number of females who are widowed compared with males might be contributed by the tendency of most males to remarry after death of their wives. This may also be due to the fact that males are more subjected to risky tasks hence more likely to die at younger ages than females. Further studies are needed to ascertain the root causes of the disparities (Table 5.1 and Figure 5.1).

Table 5.1: Percentage Distribution of the Population Aged 15 Years and Above by Place of Residence, Sex and Marital Status; Dodoma Region, 2022 PHC

Figure 5.1: Percentage Distribution of Population Aged 15 Years and Above by Sex and Marital Status; Dodoma Region, 2022 PHC

The percentage of married persons increases sharply with age from 57.3 percent for persons aged 25-29 years to 70.2 percent for those aged 50-54 and thereafter declines gradually as age increases. Percentage of the divorced persons increases with age from 4.3 percent for those aged 30 -34 years to 6.7 percent for those aged 65-69 years and started to decline gradually up to 4.5 percent for those aged 80+ years. The widowed persons increase steadily as age increases from 3.1 percent for age 40-44 to 53.2 percent for those aged 80 years and above (Table 5.2).

5.2.1 Marital Status for Selected Age Groups

Table 5.5 shows the percentage of population by marital status for selected age groups. Results reveal that the percentage of married persons aged 15-64 years in Dodoma Region is 51.5 while for age group 65 years and above is 47.8 percent. The percentage for widowed persons aged 65 years and above is 37.2 percent. Results further show that by age 65 and above, only 2.4 percent of the population aged 10 years and above are still single implying that marriage in Dodoma Region is almost universal. There is a relatively high proportion (5.5 and 5.8%) of persons living together in age groups 15 – 35 and 15-64 respectively.

Table 5.5: Percentage Distribution of the Population Aged 10 Years and Above by Marital Status and Selected Age Groups; Dodoma Region, 2022 PHC

Figure 5.2 presents comparison of marital status of persons aged 15 years and above for the 2012 and 2022 Censuses. The results show an increase in the proportion of persons in the categories of never married, divorced, separated and widowed. On the other hand, a decreasing proportion is revealed for the married and living together categories.

Figure 5.2: Percentage Distribution of Population Aged 15 Years and Above by Marital Status; Dodoma Region, 2012 and 2022 PHCs.

5.3 Mean Age at First Marriage

The Mean Age at First Marriage (MAFM) which is defined as the average length of single life (before marriage) expressed in years among those who marry before age 50, is one of the proxy determinants of fertility. The mean age at first marriage is estimated using the Singulate Mean Age at First Marriage (SMAM). A population with a low age at first marriage tends to have early childbearing and high fertility.

The results show that, MAFM in 2022 is 24.2 years; females are getting married at a younger age (22.1 years) than males (26.4 years). Results further show that there is decrease slight increase in the MAFM for females from 21.1 years in 2012 to 22.1 years in 2022. During the same period, the MAFM for males increased from 24.8 years in 2012 to 26.4 years in 2022 (Figure 5.3).

Figure 5.3: Mean Age at First Marriage by Sex; Dodoma Region, 2012 and 2022 PHC

The MAFM is higher in urban areas compared with rural areas for both males and females and for both censuses (Figure 5.4).

Figure 5.4: Mean Age at First Marriage by Place of Residence and Sex; Dodoma Region, 2012 and 2022 PHC

Table 5.9 shows that in Dodoma Region, the MAFM for females slightly increased from 21.1 years in 2012 to 22.1 years in 2022 while for males it increased from 24.8 years in 2012 to 26.4 years in 2022. In general, there is an increase in MAFM in urban areas compared with rural areas for males and females in both censuses.

Chapter 6

National Identification Documents and Citizenship

Key Points

- About seventy one percent (70.5%) of the population in Dodoma Region have neither birth certificate nor birth notification.
- Fifty-seven percent (56.8%) of children under-five years have birth certificate.
- Almost thirteen percent (12.75%) of persons aged 18 years and above have national identification number and 25.88 percent have national identification cards.
- Ten percent (10.0%) of persons in Dodoma Region have health insurance from national Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF).

6.1 Introduction

This chapter presents information on possession of national identification documents, which include birth certificate and notification, National Identification Card (NIDA), Zanzibar Identification Card (ZAN ID), Driving License, Voter's ID, Travel Passport and Small Entrepreneur ID. The chapter also presents citizenship status. The objective of national identification documents is to help eligible citizens to access various services including financial, health and education.

6.2 National Identification Documents

A national identification document is any official document that may be used to prove a person's identity such as the bearer's full name, birth date, address, an identification number, card number, sex, citizenship and the like. If issued in a small, standard smart card size, it is usually called an identity card or citizen card. Alternatively, it is issued in other formats such as Tanzania travel permit or passport. For a national identification document to be valid it should be issued by an authorized government/state institution.

6.2.1 Birth Certificate

A birth certificate is a vital record that is used to document the birth of a child. The term "birth certificate" can refer to either the original document certifying the circumstances of the birth or to a certified copy or a representation of the ensuing registration of that birth.

In the 2022 PHC, data on birth certificates were collected from all respondents regardless of their age. Results show that, in Dodoma Region 26.8 percent of persons have birth certificates while majority of the population (70.5%) have neither birth certificates nor birth notifications. There is a declining percentage of population with birth certificates from younger to older age groups. It is highest for age group 0 - 4 years (56.8 %) followed by age group 5 - 9 years (46.5%) (Tables 6.1).

The percentage of persons with birth certificates is larger in urban (39.3%) than in rural areas (20.1%). The result also shows that the percentage of males with birth certificate is slightly higher (27.7%) than females (25.9%). Further results show, 40.8 percent of males and 38.0 percent of females living in urban areas have birth certificates compared with males and females living in rural areas (20.8% and 19.4 % respectively) (Tables 6.2 and 6.3).

6.2.2 Birth Notification

Birth notification is a document issued by a health facility to confirm the occurrence of a birth. It is an initial document in the process of registering a child's birth. It provides the first legal recognition of the child and is generally required for the child to obtain a birth certificate and other legal documents and rights. The results show that, in Dodoma Region, 1.8 percent of the population have birth notifications, with 1.9 percent and 1.7 percent in rural and urban areas respectively (Tables 6.1, 6.2, 6.3, and Figure 6.1).

6.2.3 Other National Identification Documents

Tanzania Population and Housing Census 2022 collected information on travel passport, national health insurance/community health insurance and other health insurance schemes from all persons regardless of their age. On the other hand, information on national identification card, national identification number, Zanzibar identification card, driving license and voters' identification card were collected for all persons aged 18 years and above. In addition, persons aged 15 years and above provided information on possession of small entrepreneur identification card and those aged 60 years and above provided information whether they have card for elderly treatment.

6.2.3.1 National Identification Cards

Table 6.5 and Figure 6.2 reveal that in Dodoma Region persons aged 18 years and above possessing Zanzibar ID card is very small. About a quarter (25.88%) of persons possess national identification card while 12.75 percent have only national identification number. Moreover, results show a higher percentage (39.06%) of persons in urban areas with national identification card than in rural areas (17.46%). Additionally, results reveal that about 60 percent (59.91%) have voters' identification cards. Further results reveal that five percent (5.34%) of persons aged 15 years and above who engaged in Informal Activities have a small entrepreneur identification card.

6.2.3.2 Health Insurance

Table 6.6 indicates that 10.0 percent of persons in private households in Dodoma Region have health insurance from the National Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF). Dodoma city council has the highest percentage (18.5%) of persons who possess NHIF/CHIF insurance followed by Mpwapwa District Council (11.6%) and lastly Chemba District with (4.5%). In addition, (1.0 %) has health insurance from other health insurers. Residential analysis indicates that more persons (17.1%) in urban areas have NHIF/CHIF than rural areas with (6.3%). On the other hand, (0.8%) persons in rural areas have other health insurance schemes while (1.4%) in urban areas.

6.3 Citizenship

Tanzania citizenship is governed by the Tanzania Citizenship Act, CAP 357 (Revised Edition of 2002) and its Regulations of 1997. The 2022 PHC collected information on citizenship status.

The results show that 3,080,423 (99.8%) of the persons enumerated in Dodoma Region are Tanzanians. The majority of non-Tanzanians are from Countries Outside Africa (2,241 persons) followed by other East African Countries (1,631 persons) (Table 6.7).

Table 6.7: Distribution of Population by Place of Residence, Sex and Country of Citizenship; Dodoma Region, 2022 PHC

Chapter 7

Survival of Parents

Key Points

- Nine out of ten (91.6%) of children under 18 years have both parents alive.
- Almost one out of ten (8.4%) children under 18 years is orphan with proportionately higher percent in urban areas (8.7%) than rural area (8.2%).
- About six percent (6.1%) of children under 18 years are orphans with one parent dead.
- Two percent (2.2%) of children under 18 years are orphans with both parent dead.
- Bahi District Council has the highest proportion (9.9%) of orphans compared with other councils in Dodoma Region.

7.1 Introduction

This chapter presents information on survival of parents at regional levels. The information helps to determine the extent of orphanhood in a society and for making evidence-based decisions. In Tanzania, an orphan is defined as a child under 18 years of age who has lost one or both parents⁴. This definition is consistent with the United Nations definition.

The death of parents has a substantial negative impact on the wellbeing and survival of young children, especially those who are young and most vulnerable (under 5 years old). The death of a mother if other factors remain unchanged, has a greater impact and is associated with 2 to 50 times increased risk of death among the under-5 children left behind⁵. Orphans with no family or community support face risky life situations including: having no family social network; lacking food and healthcare and sometimes having to assume the role of heads of household and taking care of their younger siblings. Furthermore, information on survival of parents was collected from all children under 18 years with respect to a child's biological parents and not adopting or fostering parents.

⁴ The law of Child Act Cap 56, 2019

⁵ Hani K. Atrash, 2011.

7.2 Survival of Parents

Results indicate that 91.6 percent of all children under 18 years in Dodoma Region have both parents alive. The percentage of children with both parents alive decreases with increasing age from 96.3 percent for children under one year to 84.3 percent for children aged 17 years. The results further show that the percentage of children with their father dead and mother alive is higher (4.6%) than their father alive and mother dead (1.5%). In addition, the patterns of survival of parents are similar for both male and female children (Tables 7.1, 7.2 and 7.3).

7.2.1 Survival of Parents by Council

Results from Table 7.4 show that survival of both parents for children under 18 years for all councils in Dodoma Region ranges from 92.9 percent to 90.2 percent. Mpwapwa District Council has the highest percentage of children with both parents Alive (92.9%) while Bahi District Council has the least (90.2%).

The results further show that Bahi District Council has the highest percentage (6.0%) of children with Father Dead and Mother Alive compared with other councils while Kondoa Town Council has the highest percentage of children with Father Alive and Mother Dead (1.9%) while Chamwino District Council and Dodoma City Council have the highest percentage of both parents Dead (2.4% each) as well as children both parents dead (2.2%).

7.3 Orphanhood

The results from Figure 7.1 reveal that in Dodoma Region, 8.4 percent of children are orphans. The results further show that about six percent (6.2%) of children have lost either father or Mother and about two percent (2.2%) lost both their parents. The percentage of children who are orphan is slightly higher in urban areas (8.7%) than rural areas (8.2%). The percentage of orphans varies across councils, ranging from 9.8 percent in Bahi District to 2.3 percent in Chemba District (Table 7.5).

Chapter 8

Education, Literacy and Numeracy

Key Points

- More than three quarter (76.3%) of persons aged 15 years and above in Dodoma Region are literate; 68.3 percent in rural and 88.8 percent in urban areas.
- Numeracy rate among persons aged five years and above is 77.9 percent. It is higher among males (78.4%) than females (77.5%).
- More than three quarter (77.4%) of the primary school age population (7-13) are attending school and 17.9 percent had never been to school.
- Net Enrolment Rate (NER) for primary schools is 77.4 percent. It is higher (91.3%) in urban than in rural areas (71.7%).
- Majority (75.2%) of population aged four years and above attained primary education and 16.4 percent completed ordinary level secondary school education.
- About Six percent (6.0%) of the population aged four years and above attained university and other related level of education.

8.1 Introduction

Education is one of the most important factors in social and economic development of any society. This chapter presents the status of education, literacy and numeracy for persons aged five years and above in Dodoma Region. It provides information on school attendance, enrolment, school dropout and education attainment for persons aged four years and above.

8.2 Literacy

Literacy is the ability to read and write with an understanding of a short simple sentence in any language. It excludes the ability to only write or sign one's own name or write memorised phrases. The literacy rate in 2022 PHC is measured for persons aged five years and above who could read and write in: Kiswahili only; English only; both Kiswahili and English or any other languages. No test was administered to verify those who were really literate.

Results show that out of 2,628,802 persons aged five years and above 1,928,506 persons (73.4 %) in Dodoma Region are literate. The literacy rate is higher among males (74.8%) than females (71.9%). The literacy rates are generally higher among young population compared with older population. The highest literacy rate of 83.9 percent is observed for age group 25-29 years. Literacy rates below 60 percent are observed among children in the age group of 5-9 years and persons aged 65 years and above. These results indicate a positive impact of the universal primary education and increased enrolment in secondary education resulting from free education programme (Table 8.1).

Literacy rate in urban areas is substantially higher (87.5%) than in rural areas (65.4%). Males are more literate than females in both rural and urban areas as presented in Tables 8.2, 8.3 and Figure 8.1.

Figure 8.1: Literacy Rates for Persons Aged Five Years and Above by Sex and Place of Residence; Dodoma Region, 2022 PHC

8.2.1 Literacy for Selected Age Groups

Results show that youth (using national and international definition) have literacy rates above 80 percent (82.4% and 83.0% respectively). The literacy rate is highest among Secondary School in the age group of 14-17 years (84.2%). Literacy rates are higher in urban than in rural areas, and for most of the selected age groups, and with the exception of the teenage group, males are more literate than females in both rural and urban areas.

Literacy rate among population in primary school age in Dodoma Region is 74.7 percent and among secondary school age population is 84.2 percent. The literacy rate among primary and secondary population is higher among females than males in both rural and urban areas (Table 8.4).

Table 8.4: Literacy Rates by Place of Residence, Sex and Selected Age Groups; Dodoma Region, 2022 PHC

8.2.2 Adult Literacy

The results show that, the adult literacy rate for persons aged 15 years and above in Dodoma Region is 76.3 percent. The literacy rate is higher among males (80.5%) than females (72.5%). Furthermore, results reveal that in urban areas the adult literacy rate is higher (88.8%) than in rural areas (68.3%). Males are more likely to be literate than females in both rural and urban areas (Figure 8.2).

Figure 8.2: Adult Literacy Rates by Sex and Place of Residence; Dodoma Region, 2022 PHC

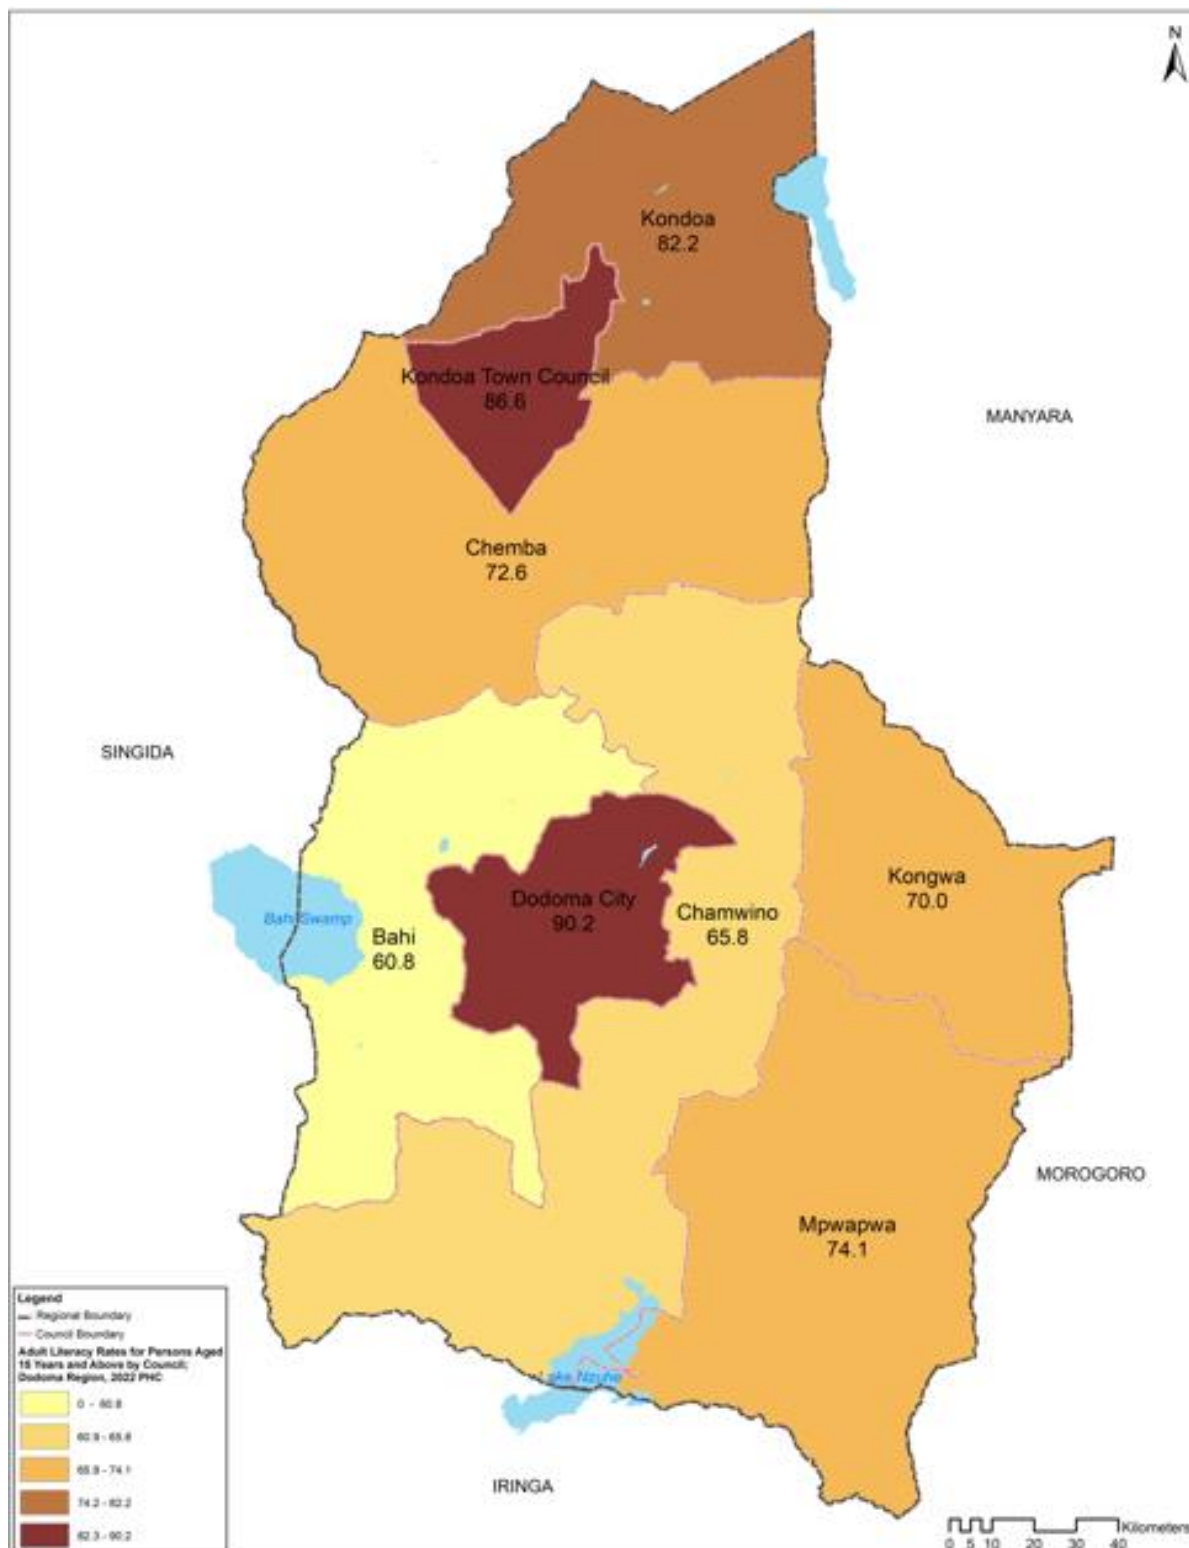

The result show that there is an increase in literacy rates among adults from 67.5 percent in 2012 to 76.3 percent in 2022. Results also indicate that, there is is an increase from 62.0 percent to 72.5 for males in 2012 and 2022 increase in adult literacy rate is more pronounced among females (from 62.0% to 72.5%) than males (73.5% to 72.5%) (Figure 8.3).

Figure 8.3: Adult Literacy Rates for Persons Aged 15 Years and Above by Sex; Dodoma Region, 2012 and 2022 PHCs

Adult literacy rates vary across councils, ranging from 60.0 percent in Bahi District to 90.2 percent in Dodoma City. Other councils with adult literacy rate above 80 percent are Kondoa Town (86.6%) and Kondoa District (82.2%). Other councils besides Bahi District Council with relatively low adult literacy rates is Chamwino District (65.8%) (Map 8.1).

Map 8.1: Adult Literacy Rates for Persons Aged 15 Years and Above by Council; Dodoma Region, 2022 PHC

Results reveal that, adult literacy rates increased from 67.5 percent in 2012 to 76.3 percent in 2022 censuses with an overall difference of 8.8 percentage point. Across councils, the highest percentage point change is 9.2 percent in Bahi District (Table 8.5).

8.2.3 Adult Literacy in Different Languages

The results in Table 8.6 and Figure 8.4 show that in Dodoma Region, literacy rate is 76.3 It is highest in Kiswahili only (56.9%), followed by literacy in both Kiswahili and English (18.8%) and is lower for other languages (0.3%). In addition, results show that from age 40 years and above, illiteracy rates increase with age.

Figure 8.4: Percentage Distribution of Adult Population Aged 15 Years and Above by Literacy Rate; Dodoma Region, 2022 PHC

Table 8.7, Figures 8.5 and 8.6 show that, the percentage of individuals who are literate in Kiswahili only is higher in rural (58.5 %) than in urban areas (54.4 %). On the other hand, the percentage of those who are literate in both Kiswahili and English is higher in urban (33.6 %) than in rural areas (9.2%). In urban areas, females are slightly more literate in Kiswahili only (54.6%) than males (54.2%).

Table 8.7: Literacy Rates for Adult Population Aged 15 Years and Above by Literacy Status, Place of Residence and Sex; Dodoma Region, 2022 PHC

8.3 Numeracy

Numeracy is the ability to access, use, interpret and communicate simple mathematical information and ideas, to engage in and manage basic mathematical demands for a range of situations in adult life. Basic numeracy skills consist of comprehending fundamental arithmetic operations such as addition, subtraction, multiplication and division.

Numeracy rate in this chapter is defined as the percentage of the population aged five years and above who can perform simple arithmetic calculations. No test was administered to verify those who were numerate. The questions on numeracy were asked in private households only.

Table 8.9 and Figure 8.7 reveal that about eight out of ten (77.9%) of persons aged 5 years and above in Dodoma Region are numerate. The numeracy rate is higher among males (78.4%) than females (77.5%). It is also noted that numeracy rates are higher (more than 80%) for persons aged 10 to 59 years and is relatively low for young population (5 -9 years) and older ages (60 years and above). Numeracy rate is higher (87.5%) in urban areas than in rural areas (72.7%). Furthermore, the rate is higher among males aged 20 years and above in rural areas. In urban areas the rate is higher for males aged 25 years and above.

Table 8.9: Numeracy Rate of Population Aged Five Years and Above by Place of Residence, Sex and Five-Year Age Groups; Dodoma Region, 2022 PHC

Figure 8.7: Numeracy Rates for Persons Aged Five Years and Above by Sex, and Place of Residence; Dodoma Region, 2022 PHC

The results further reveal that numeracy rate for the youth aged 15–35 years is 87.0 percent. The rate is higher (87.2%) for males than females (86.9%) whereas among teenagers the rate is higher (87.9%) for females than males (84.0%). Numeracy rate for working age population (15-64 years) is higher (92.0%) in urban than in rural areas (82.0%). A similar pattern is observed for other selected age groups.

Results also reveal that numeracy rate for persons in the secondary school age (14-17 years) in Dodoma Region is 86.3 percent and 73.6 percent for the primary school age (7–13 years). The rate of numeracy for secondary school age is higher (88.6%) for females than for males (84.1%). A similar pattern is observed in rural areas for both primary and secondary school age (Table 8.10).

8.3.1 Adult Numeracy Rates

Numeracy rate for persons aged 15 years and above in Dodoma Region is 83.8 percent and is higher (90.5%) in urban areas than in rural areas (79.5%). The numeracy rate is higher for males than females across every council. The rates vary across councils ranging from 73.7 percent in Bahi District to 92.1 percent in Kondoa Town (Table 8.11 and Map 8.2).

8.4 Education

This section provides information on school attendance status, education attainment, net and gross school enrolment.

8.4.1 School Attendance Status

School attendance refers to attendance at any regular authorised or licensed educational institution or programme for organised learning at any level of education at the time of the census. Informal training in particular skills, which is not part of the recognised educational structure was not considered under school attendance.

Results show that of all persons aged four years and above in Dodoma Region 34.6 percent have completed school at different levels of the education system, 28.8 percent are attending school, 10.5 percent have dropped out and 26.0 percent have never been to school. Percentage of females who have never been to school is higher (27.7%) compared with males (24.3%). Furthermore, results show that percentage of dropouts is higher (12.4%) among males than females (8.7%) (Figure 8.8).

Figure 8.8: Percentage Distribution of Population Aged Four Years and Above by Sex and School Attendance Status; Dodoma Region, 2022 PHC

Further more than three quarter (77.4%) of the primary school population age (7-13) are attending school and 17.9 percent had never been to school. Among secondary school population aged 14-17 years, 57.6 percent are attending, 14.3 percent had never been to school, while 14.6 percent have completed school. The rate of dropouts is higher among secondary school age population (13.5%) than primary school (4.1%) (Table 8.12).

Among all councils, Bahi District has the highest percentage of persons who had never attended school (41.1%) and the lowest is Dodoma City with 11.7 percent (Figure 8.10). Regarding sex differentials for never attended school category, the percentage is higher for females than males in all councils in both rural and urban areas.

Mpwapwa District is the council with the highest (13.0%) dropout rate while Kondoa Town has the lowest rate (7.8.%). Results further show that the percentage of dropouts is higher among males than females in all councils (Tables 8.15, 8.16 and 8.17).

Among persons aged four years and above who joined primary school education, 47.5 percent completed, 36.8 percent are still attending and 15.7 percent dropped out. Those who joined ordinary level secondary school education, 46.4 percent completed, 38.4 percent are still attending and 15.2 percent dropped out. Those who were admitted for university education and other related, 72.3 percent completed, 26.7 percent are still attending and 1.0 percent dropped out. Drop out is minimal at the university and other related levels compared with other levels of education. Moreover, slightly more males dropped out at university level (1.0%) than females (0.9%). The percentage of persons who completed primary education, secondary education (ordinary and advanced level) and university level is higher in urban areas compared with rural areas (Tables 8.18, 8.19 and 8.20).

8.4.2 Net and Gross School Enrolment

Enrolment rate depicts the proportions of children currently attending school which is an important indicator in assessing access to education among the population. In primary education, Net Enrolment Rate (NER) is defined as the number of children aged 7-13 years who are attending school divided by the total number of children in that age group. The 7-13 years age group is the official primary school age in Tanzania. On the other hand, Gross Enrolment Rate (GER) is defined as the number of children attending primary school regardless of age divided by the total number of children aged 7-13 years.

Net Enrolment Rate

Results show that, for primary schools NER is 77.4; it is higher (91.3) in urban areas compared with rural areas (71.7). Furthermore, results show that NER is higher (81.6) for females than for males (73.3) (Table 8.21).

Table 8.21: Net Enrolment Rates in Primary Schools by Place of Residence, Sex and Council; Dodoma Region, 2022 PHC

Council	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Total	77.4	73.3	81.6	71.7	66.7	76.8	91.3	89.8	92.7
Kondoa District	88.7	85.4	92.2	88.0	84.5	91.7	96.1	94.8	97.5
Kondoa Town	92.3	90.4	94.2	NA	NA	NA	92.3	90.4	94.2
Mpwapwa District	75.5	70.4	80.7	74.0	68.5	79.6	89.6	88.6	90.6
Kongwa District	76.7	71.6	81.8	73.2	67.4	79.2	87.2	84.8	89.5
Chamwino District	68.0	63.0	73.0	67.0	62.0	72.2	90.5	87.7	93.3
Dodoma City	92.0	90.8	93.2	NA	NA	NA	92.0	90.8	93.2
Bahi District	59.0	53.5	64.6	58.1	52.6	63.8	83.5	80.8	85.9
Chemba District	75.8	71.7	80.1	75.0	70.9	79.4	NA	NA	NA

NER in primary schools varies across councils ranging from 59.0 in Bahi District to 92.3 in Kondoa Town. Three Councils have NER above the regional average of 77.4 percent (Figure 8.11).

Figure 8.11: Net Enrolment Rates in Primary Schools by Council; Dodoma Region, 2022 PHC

Results further show an improvement in net enrolment rates from 2002 to 2022 censuses. The overall NER in primary schools increased from 62.3 in 2002 to 77.4 in 2022 census. Improvement is higher among females (18.1 percentage points difference) compared with males (12.2 percentage points difference) as shown in Figure 8.12.

Figure 8.12: Primary School Net Enrolment Rates by Sex; Dodoma Region, 2002, 2012 and 2022 PHCs

The rural NER in primary schools increased from 59.2 in 2002 to 71.7 percent in 2022 and from 86.6 in 2002 to 91.3 in 2022 in urban areas. Improvement is more remarkable in rural areas (12.5 percentage points) compared with urban areas (4.7 percentage points) as shown in Figure 8.13.

Figure 8.13: Primary School Net Enrolment Rates by Place of Residence; Dodoma Region, 2002, 2012 and 2022 PHCs

8.4.3 Gross Enrolment Rate

The primary school Gross Enrolment Rate (GER) in Dodoma Region is 112.8 and it is higher (139.2) in urban areas than in rural areas (102.0) and is higher (119.5) for females than for males (106.2). A gross rate exceeding hundred percent could be due to over age and underage enrolment of children (Figure 8.14).

Figure 8.14: Primary Schools Gross Enrolment Rates by Place of Residence and Sex; Dodoma Region, 2022 PHC

Results show GER increased from 84.8 in the 2012 to 112.8 percent in 2022. The increase is higher among females (32.1 percentage points) compared with males (24.0 percentage points) as shown in Figure 8.15.

Figure 8.15: Primary School Gross Enrolment Rates by Sex; Dodoma Region, 2012 and 2022 PHCs

8.4.4 Education Attainment

Education attainment is the highest level completed by an individual within the country's official education system. Table 8.22 shows that, majority (75.2%) of population aged four years and above attained primary education and 16.4 percent completed ordinary level secondary school education. More females had attained primary education (75.8%) compared with males (74.6%). The same pattern is observed in rural and urban areas. Results also show that 6.0 percent attained university education and other related education.

Table 8.22: Number and Percentage of Population Aged Four Years and Above by Sex, Level of Educational Attainment and Place of Residence; Dodoma Region, 2022 PHC

Chapter 9

Employment and Economic Activities

Key Points

- The current unemployment rate in Dodoma Region is 5.1 percent; the rate is higher for females (6.0 %) than for males (4.2%).
- The overall Labour Force Participation Rate (LFPR) of Dodoma Region is 82.3 percent; it is higher in urban than in rural areas.
- Agriculture, forestry and fishing industry has the highest proportion (64.4%) of the total employment.
- Majority of employed persons (51.7%) are agricultural and fishery workers.
- Agricultural sector constitutes the highest share of employed persons (68.2%).
- There are 351,473 persons aged 15 years and above engaged in informal non-agricultural economic activities, with more females (186,018 persons) than males (165,455 persons).

9.1 Introduction

This chapter presents findings on current economic activities for persons aged 15 years and above in Dodoma Region. In particular, it provides information on people's participation in economic activities, occupation, sector of employment and industry. Further, information on informal non-agricultural economic activities is also presented. Analysis in this chapter does not include population enumerated in institutional.

Statistics on employment and economic activities are important inputs for planning labour related policies and programmes to ascertain the size and structure of the working age population and its distribution by main occupation, industry and employment status. Such information from census on employment and economic activities is critical in setting the baseline data for making appropriate interventions to enhance labour force participation.

9.2 Current Economic Activity Status

Economic activity status refers broadly to economically active population which includes employed and unemployed population. It also includes inactive population covering all

persons who were without work during the reference period and were not available for work.

Table 9.1 indicates that, out of 1,752,814 persons aged 15 years and above, 1,369,077 persons are in employment, 74,319 are unemployed and 309,418 are economically inactive. Moreover, results show that, there are 841,113 employed persons in rural areas and 527,964 in urban areas. Further, results show that there are 209,864 inactive persons in rural and 99,554 in urban areas.

Table 9.1: Number of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment), Sex and Place of Residence; Dodoma Region, 2022 PHC

Sex/ Place of Residence	Economic Activity Status			Total
	Employed	Unemployed	Inactive	
Both Sexes	1,369,077	74,319	309,418	1,752,814
Male	678,617	30,043	130,784	839,444
Female	690,460	44,276	178,634	913,370
Place of Residence				
Rural	841,113	26,366	209,864	1,077,343
Urban	527,964	47,953	99,554	675,471

The results further show that in Dodoma Region 78.1 percent of persons aged 15 and above are employed. The council with highest percentage of employed persons is Chemba (80.1%) while the council with the lowest is Bahi (75.6%) (Figure 9. 1).

Figure 9.1: Percent Distribution of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment) and Councils; Dodoma Region, 2022 PHC

Table 9.2. shows that in rural areas the total number of persons aged 15 years and above who are employed ranges from 96,471 in Kondoa District Council to 191,542 in Chamwino District Council. In urban areas the number ranges from 6,157 in Bahi District Council to 381,569 in Dodoma City Council.

65 years and above	102,883	1,625	43,694	148,202

9.3 Current Unemployment

Unemployment is an indicator of labour under-utilization and it is measured as a percentage of the labour force that is currently unemployed. According to the relaxed international definition of unemployment, unemployed persons comprise those who in the seven days prior to the census/survey enumeration were not engaged in any economic activity but were available for work regardless of whether they took any effort to look for work or not.

Figure 9.2 presents current unemployment rates in Dodoma Region based on the relaxed international definition of unemployment. The results reveal that the current unemployment in Dodoma Region is 5.1 percent. The rate is higher (8.3%) in urban than in rural areas (3.0%). Unemployment rate is higher (6.0%) among females than males (4.2%).

Figure 9.2: Current Unemployment Rate of Persons Aged 15 Years and Above by Sex and Place of Residence; Dodoma Region, 2022 PHC

9.4 Labour Force Participation Rate

The Labour Force Participation Rate (LFPR) provides an estimate of the size of the labour supply currently available for production of goods and services in a country. It is defined as the number of persons in the labour force as a percentage of the population Aged 15 years and above. It provides important insight into various policy decisions to enhance performance of the labour market.

Figure 9.3 shows that, the overall Labour Force Participation Rate (LFPR) of Dodoma Region is 82.3 percent; it is higher in urban than in rural areas. Results also reveal that LFPR is higher for males (84.4%) than for females (80.4%).

Figure 9.3: Labour Force Participation Rates for Persons Aged 15 Years and Above by Place of Residence and Sex; Dodoma Region, 2022 PHC

9.5 Employment by Industry

Employment by industry provides information on relative importance of different economic activities in the labour market. This information is useful for identifying broad shifts in employment and stages of development. Classification of employment by industry in this report is based on the International Standard Industrial Classification of all Economic Activities (ISIC) Revision 4.

Results show that agriculture, forestry and fishing industry has the highest proportion (64.4%) of the total employment. The industry of 'other services activities' ranked second with 8.3 percent, followed by 'whole sale and retail trade, repair of motor vehicles and motorcycles' industry with 6.6 percent (Table 9.4).

9.6 Occupation Status

This section highlights the distribution of employed persons aged 15 years and above by occupation and sex. The information provides critical insights into the economic, societal and individual aspects of the labour market. It also helps to make right decisions related to labour policies, education and skills training programmes as well as facilitating effective manpower planning. Occupation is classified according to the Tanzania Standard Classification of Occupations (TASCO). Results reveal that 51.7 percent of employed persons in Dodoma Region are agricultural and fishery workers followed by those employed in elementary occupation (22.1%), and craft and related workers (14.7%) occupations (Table 9.5).

**Table 9.5: Percentage Distribution of Employed Population Aged 15 Years and Above by Sex and Occupation; Dodoma Region, 2022
PHC**

Occupation	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female

9.7 Employment by Sector

This section presents distribution of employed persons aged 15 years and above by sex and sector of employment. The information is an important component for conducting macroeconomic analysis, policy formulation and effective labour interventions. Table 9.6 reveals that agricultural sector accounts for the highest (68.2%) share of employed persons followed by private sector (18.2%) and household activities (9.7 %).

Table 9.6: Percentage Distribution of Employed Persons Aged 15 Years and Above by Place of Residence, Sex and Sector; Dodoma Region, 2022 PHC

Sector	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
Total	1,369,077	678,617	690,460	841,113	414,302	426,811	527,964	264,315	263,649

Household activities	9.7	9.0	10.5	8.6	8.5	8.8	11.5	9.7	13.2

9.8 Informal Non-Agricultural Economic Activities

The 2022 PHC refers to informal non-agricultural economic activities as activities which are unregulated and often without formal recorded business transactions and normally occurring outside the framework of formal business regulations and systems. It needs small capital and typically involves individuals such as street vendors and small-scale production activities without legal licenses or adhering to formal reporting and taxation requirements. These activities often operate within local communities to cater for immediate needs and therefore contributes to informal sector's overall economic performance.

Table 9.7 shows that there are 351,473 persons aged 15 years and above engaged in informal non-agricultural economic activities, with 186,018 females and 165,455 males. Moreover, results reveal that majority of persons engaged in informal sector comprise youth aged 15-35 years; accounting for 58.2 percent of total employment, followed by adults aged 36-64 years with 35.2 percent. The lowest participation in the informal sector is observed in adults aged 65 years and above with 6.6 percent. A similar distribution is observed in rural and urban areas.

Table 9.7: Percentage Distribution of Population Aged 15 Years and Above Engaged in Informal Non-Agricultural Economic Activities by Place of Residence, Sex and Selected Age Groups; Dodoma Region, 2022 PHC

Place of Residence	Sex	Age Group (Years)			Total Number

Chapter 10

Disability

Key Points

- There are 299,689 persons in Dodoma Region, equivalent to 12.3 percent of the total population aged 7 years and above living with some form of disability.
- Most common type of disability is seeing (3.4%) followed by walking (2.0%).
- Most Persons With Disabilities (56.4%) reported disease as a major cause of their disability.
- Over six percent (6.5%) of Persons With Disabilities reported accidents as a cause of their disabilities.
- The use of assistive devices among Persons With Disabilities is very low except for persons with Albinism.

10.1 Introduction

This chapter presents information on disability including prevalence of disability by sex and /council, as well as causes of disability and use of assistive devices. Disability is a broad term with various definitions depending on different aspects at international, regional and national levels. For instance; the Washington Group on disability statistics defines Persons with Disabilities (PWDs) as *“all those persons who are at greater risk than the general population in experiencing restrictions in completing specific tasks or activities due to limitations in their basic functioning such as walking, seeing, hearing or memory – even if such limitations are ameliorated by use of assistive devices, a supportive environment or plentiful resources”* (United Nations, 2001). The World Health Organisation explains that disability refers to an umbrella term covering impairments, activity limitations and participation.

At National level, the Tanzania National Policy on Disability of 2004 defines disability as a loss or limitation of opportunities to take part in the normal life in the community on an equal level with others due to physical, mental or social factors. All three definitions use the concept of activity limitation in defining disability rather than physical impairment.

Tanzania started collecting data on disability through the population census for the first time in 2002. However, the definition of disability used was based on impairment rather than activity limitation. The 2012 and 2022 PHCs used the broad definition of disability that is based on activity limitation to collect disability statistics. More specifically, the 2022 PHC defines PWDs as all persons with physical, mental, intellectual or sensory impairment which may hinder or limit their full and effective participation in society on an equal footing with others.

The main domains of disabilities included in the 2022 PHC were: visual, hearing, communication, mental, physical and self-care. The 2022 PHC also collected information on other disabilities, including: albinism, cleft palate, hydrocephalus, spinal bifida, spinal cord injuries, epilepsy psoriasis and storiasis. Other types were autism, mental health, mental disorder, persons with short stature, leprosy and persons with hunchback. The following are illustrations of some types of “other disabilities”. Ethical clearance for using the pictures on types of disability was obtained from the relevant authority⁶

⁶ Shirikisho la Vyama vya Watu wenye Ulemavu Tanzania (SHIVYAWATA)

Albinism

Cleft Palate

Hydrocephalus

Spinal bifida

Spinal cord injuries

psoriasis

Storiasis

Autism

Mental health

Persons with short stature

Leprosy

Persons with Hunchback

Disability statistics are important for promotion of evidence-based policy and programming decisions and effective monitoring. Moreover, disability statistics are essential for governments and stakeholders for enhancement of inclusiveness of PWDs in all aspects of life by removing the barriers faced by people with disabilities. Data on disability from the Census also provides a benchmark for collecting disability statistics from other household-based sample surveys.

Note that, the number of PWDs and total population used to compute disability prevalence does not include persons that were enumerated in institutions.

10.2 Prevalence of Disability

The 2022 PHC results show that 299,689 persons in Dodoma Region (137,875 males and 161,814 female), which is equivalent to 12.3 percent of the total regional population aged 7 years and above have some form of disability; the rate is slightly higher among those living in rural (13.1%) than in urban areas (11.1%).

Among the six major domains of disabilities, seeing (3.4%) and walking (2.0%) are the most common while self-care is the least with less than 1.0 percent (0.3%) of the population aged seven years and above reporting this disability. With the exception of remembering, communication, hearing and self-care, for the remaining types of disability (i.e. seeing, walking, and other types of disability) the proportion of PWDs is slightly higher for females than males (Table 10.1).

10.2.1 Prevalence of Disability by Councils

The prevalence of disability varies across councils, ranging from 10.6 percent in the City of Dodoma to 15.4 percent in Kondoa District. Five councils have prevalence of disability above the regional average of 12.3 percent (Figure 10.1 and Table 10.1).

Table 10.1: Disability Prevalence Among Persons Aged 7 Years and Above by Type of Disability, Place of Residence and Council; Dodoma Region, 2022 PHC

Figure 10.1: Prevalence of Disability for Persons Aged 7 Years and Above by Council; Dodoma Region, 2022 PHC

10.2.2 Prevalence of Disability by Sex and Council

The 2022 PHC results show that, prevalence of disability is slightly higher for females than for males in all councils in the Region. Kondoa District Council has highest prevalence of disability (15.4%). It is likewise for both Males (14.2%) and Females (16.7%) whereas the City Council of Dodoma has smallest prevalence; for both males (10.0%) and Females (11.2%) (Table 10.2).

10.2.3 Prevalence of Disabilities by Age and Sex

Results show that disability prevalence increases with age for both males and females. The level of disability prevalence in Dodoma Region is about the same for females and males below 50 years. Thereafter, the rate increases relatively sharply for females than for males reaching 56.6 percent for females and 50.0 percent for males aged 80 years and above (Figure 10.2).

**Figure 10.2: Prevalence of Disability by Age Groups and Sex; Dodoma Region, 2022
PHC**

10.3 Prevalence of Persons with Albinism

Table 10.3 reveals that Dodoma Region has a total of 3,846 persons with albinism which is less than 1 percent (0.13%) of the total population in the region. Out of that, 2,283 persons (0.15%) are males and 1,563 (0.10%) are females. More than half of persons with albinism (56.6%) are living in rural areas. Councils with large numbers of persons with albinism are City Council of Dodoma (1,284 persons), Chamwino District (653 persons) and Mpwapwa District (516 persons). Further, Table 10.4 shows that the number of persons with albinism increases from 241 persons in age group 0-4, has a peak of 422 persons in age group 20-24 and thereafter declines as age increases.

10.4 Population with Other Types of Disability

Results reveal that 105,541 persons in Dodoma Region which is equivalent to 3.5 percent of the regional population have other types of disability. Spinal cord injuries (0.71%) and Hydrocephalus (0.55%) are the most common types of other disability. The percentage of males with spinal cord injuries issues and hydrocephalus is lower among males when compared with females. The same pattern is observed in both rural and urban areas (Table 10.5).

10.5 Causes of Disabilities

There are different causes of disabilities within the population. Some persons are born with disabilities (congenital malformations), while for others a disability may be a result of a disease, accident, physical violence, drug abuse or pregnancy complications as well as multiplicity of other causes.

The 2022 PHC results reveal that diseases are major causes for all types of disability in Dodoma Region. Over fifty percent (56.4%) as a cause while 19.0 percent are born with disabilities. Relatively high proportion of PWDs (57.3%) living in urban areas reported diseases as the major cause of their disabilities compared with 56.1 percent in rural areas. Another notable cause of disabilities in the region is inborn (16.1%).

Reported causes of disabilities are not the same among males and females. Large variations are observed among accidents, inborn and “other causes”; for instance, 18.9 percent of males with disabilities reported inborn as a major cause compared with 13.9 percent for females (Tables 10.6 and 10.7).

10.6 Use of Assistive Devices

Assistive devices help PWDs to perform their daily activities more effectively. Devices enable PWDs to participate in social economic activities such as education and, employment and hence improve their social-economic conditions.

Results reveal that the use of assistive devices among PWDs is very low except for persons with albinism, of whom 19.6 percent are using assistive devices. For other types of disability, the use is below ten percent with exception of self-care disability in urban areas (10.1%). Use of assistive devices is relatively higher in urban (3.7%) than in rural (1.6%) areas for all persons with disabilities (Table 10.8).

Chapter 11

Land Ownership

Key Points

- Forty-two percent (41.8%) of the population aged 15 years and above in Dodoma Region own land.
- About twenty two percent (22.4%) of males in Dodoma Region own land alone compared with 14.3 percent of females.
- Fifty eight percent (57.9%) of persons aged 15 years and above who own land in Dodoma Region do not possess legal land ownership documents.
- Among the land owners possessing legal land ownership documents in Dodoma Region, 18.5 percent own land alone.

11.1 Introduction

This chapter describes the status of land ownership which includes information on persons owning land, type of ownership and possession of legal documents. Land ownership is a process of acquiring land tenure or right of occupancy from a relevant Government authority. The process provides the legal notes or documents to own or occupy the land. Land ownership in Tanzania can be categorized into three main tenure systems namely Customary Land Tenure, Right of Occupancy (ROO) and Government Land.

Respondents were asked about possession of any legal documents pertaining to land ownership. Legal documents for land ownership in this chapter comprise Certificate of Right of Occupancy (title deed), residential license, letter of offer/acknowledgment of payment, customary ownership, contract, land registration card (Zanzibar) and official documents from Mtaa/Village/Shehia.

11.2 Land Ownership Status

Information on land ownership status was collected from individuals in private households only and is categorised into individuals owning land alone; jointly; both alone and jointly; or do not own land. In this report land ownership is irrespective of type of use.

Results reveal that 41.8 percent of persons aged 15 years and above in Dodoma Region owns land. Ownership of land is higher (47.7%) among rural population compared with the urban population (32.4%). Land ownership by sex reveals that proportions of females owning land is lower than that of males (Table 11.1 and Figure 11.1).

Table 11.1: Percentage Distribution of Persons Aged 15 Years and Above Owning Land by Place of Residence and Sex; Dodoma Region, 2022 PHC

Place of Residence	Sex	Land Ownership		Percentage of Persons Owning Land
		Total Population	Number of Individuals Owning Land	
Total	Both Sexes	1,752,814	732,737	41.8
	Male	839,444	379,271	45.2
	Female	913,370	353,466	38.7
Rural	Both Sexes	1,077,343	514,076	47.7
	Male	517,071	261,025	50.5
	Female	560,272	253,051	45.2
Urban	Both Sexes	675,471	218,661	32.4
	Male	322,373	118,246	36.7
	Female	353,098	100,415	28.4

While in 1.4 percent of the cases it was not possible to establish land ownership status, about fifty seven percent (56.8%) of persons aged 15 years and above do not own land, 18.2 percent own land alone and 22.6 percent own land jointly. The ownership pattern in Dodoma Region reveals that the percentage of females owning land alone (14.3%) is significantly below that of males (22.4%). However, the percentage of females owning land jointly is slightly higher (23.5%) than that of males (21.7%). The results further show that the percentage of females owning land jointly is higher in both rural and urban areas (29.3% and 14.2% respectively) compared with that of males (27.2% and 12.9% respectively) (Table 11.2).

Table 11.2: Percentage Distribution of Persons Aged 15 Years and Above by Land Ownership Status, Place of Residence and Sex; Dodoma Region, 2022 PHC.

	Female	353,098	13.5	14.2	0.7	70.0	1.6

Results show that percentage of persons who do not own land in Dodoma Region is 56.8 percent, while those who own land (alone, jointly or both) is 41.8 percent. Out of all persons who own land, the proportion is higher (45.2%) for males than for females (38.7%) (Figure 11.1).

Figure 11.1: Percentage Distribution of Persons aged 15 Years and Above by Land Ownership Status and Sex; Dodoma Region, 2022 PHC.

Table 11.3 presents land ownership status for persons aged 15 years and above disaggregated into broad age groups and place of residence. It is observed that land is mostly owned by persons aged 20-64 years (73.3%) followed by those aged 15-19 years (18.2%). Similar ownership patterns by age with differentiated magnitudes are observed in rural and urban areas for 20-64 years (71.4% and 76.5% respectively). On the other hand, the proportion of persons aged 15-19 years owning land in rural areas is slightly higher (18.9%) than those in urban areas (17.1%). Regardless of whether a person lives in rural or urban areas, both males and females of age group 20-64 are more likely to own land than any other age group

Findings reveal that Bahi District Council has a relatively higher proportion (50.5%) of persons aged 15 years and above owning land compared with other councils. On the other hand, the council with lowest proportion of persons owning land is Dodoma City (31.7%) (Figure 11.2).

Figure 11.2: Percentage Distribution of Population Aged 15 Years and Above by Land Ownership Status, and Council; Dodoma Region, 2022 PHC

11.3 Possession of Legal Land Ownership Documents

The 2022 PHC results show that 57.9 percent of persons aged 15 years and above in Dodoma Region own land without any legal documents. For those possessing legal documents, 18.5 percent own land alone, 22.3 percent own land jointly and 1.2 percent own land both alone and jointly. The results further reveal that ownership of legal documents is in favour of females owning land jointly (25.2%) compared with males (19.5%) (Table 11.4).

Further, about sixty-four percent (64.1%) of persons owning land in rural areas do not have any legal documents compared with 43.3 percent of persons in urban areas. For those

possessing legal documents in rural areas, 22.1 percent and 12.6 percent own land jointly and alone respectively. On the other hand, 32.3 percent of persons possessing legal documents in urban areas own land alone while 22.7 percent own land jointly. Results also show that in rural areas, possession of legal documents is higher among females owning land jointly (24.4%) whereas in urban areas, it is higher (36.9%) among males owning land alone (Table 11.4).

The Council with the highest proportion of land owners with legal documents is Dodoma City (60.2%) followed by Kondoa Town (44.4%). On the other hand, council with the lowest proportion of land owners with legal documents is Kondoa District (29.4%) (Figure 11.3).

Figure 11.3: Percentage Distribution of Persons Aged 15 Years and Above by Legal Documents Status, and Council; Dodoma 2022 PHC

Chapter 12

Housing Characteristics, Assets Ownership and Environmental Control

Key Points

- About seven in ten (72.8%) households in Dodoma Region own houses they live in.
- More than sixty seven percent (67.8%) of households use improved sources of drinking water.
- More than a half (54.5%) of households use improved toilet facilities.
- More than eighty six percent (86.8%) of households in rural areas and 32.0 percent in urban areas use firewood for cooking.
- Percentage of households using electricity from national grid for lighting increased from 22.9 percent in 2012 to 28.9 percent in 2022.
- Nearly four in ten (39.7%) households use burning of solid waste as the main method of solid disposal.

12.1 Introduction

The 2022 PHC collected information on household ownership and characteristics as an indicator on household's wealth information. This chapter presents information on tenure and ownership status of the household's main dwelling; legal right over the ownership of land where the main dwelling is built; building materials for the main dwelling and number of rooms available for sleeping. In addition, it also presents information on the main source of drinking water; sanitation; main source of energy used for cooking and lighting; environmental control methods used by households; ownership of assets and equipment. The questions on housing characteristics, assets ownership and environmental control were asked in private households only.

12.2 Housing Ownership and Tenure Status

Households were asked about the ownership of houses where they live and the availability of legal documents over the land where the house is built. In Dodoma Region, 72.8 percent of private households are living in their own houses; it is higher (82.7%) in rural areas than in urban (57.4%). The percentages of female headed households owning houses is nearly the same as male headed household (72.9% and 72.8% respectively). Across councils,

Bahi District has the highest percentage (86.6 %) of households living in their own houses while Dodoma City has the lowest percentage (52.7 %) (Figure 12.1 and Table 12.1).

12.2.1 Legal Ownership of Land

In Dodoma Region, 42.2 percent of the households do not have legal documents for the land where their houses are built while 8.4 percent have title deeds. Among households that live in their own houses 37.3 percent have customary type of ownership households in urban areas are more likely (21.9%) to have title deed documents than those in rural areas (2.3%). On the other hand, rural household living in their own houses are more likely (43.0%) to have customary type of ownership than those living in urban areas (24.3%). Female-headed households are more likely (8.6%) to have title deeds than male-headed households (8.2%).

Across councils the percentage of households with title deed ranges from 2.3 percent in Bahi Districts to 27.6 percent in Dodoma City (Table 12.2).

12.3 Household Characteristics

Household characteristics describe the living conditions of households that are useful in guiding policy interventions. The living conditions include the type of building materials for roofing, walls and floor as well as number of rooms for sleeping.

12.3.1 Roofing Materials

In Dodoma Region, 86.6 percent of households are living in houses with improved roofing materials (iron sheet, tiles, concrete and asbestos). At the council level, more than 80.0 percent of households in all councils are living in houses with improved roofing materials except for Chemba District (76.1%) and Bahi District (58.7%) (Figure 12.2).

Figure 12.2: Percentage Distribution of Households with Improved and Unimproved Roofing Material by Council; Dodoma Region, 2022 PHC

Table 12.3 show that, the majority of households in urban areas (97.3%) are living in houses roofed with iron sheets compared with 79.2 percent of households in rural areas. The percentage of households living in houses roofed with iron sheets ranges from 58.5 percent in Bahi District Council to 97.5 percent in Dodoma City. The Council with the highest percentage (34.6%) of households living in houses roofed with Mud or leaves is Bahi District.

Table 12.3: Percentage Distribution of Households by Type of Roofing Material of Main Dwelling, Place of Residence and Council; Dodoma Region, 2022 PHC

12.3.2 Floor Covering Materials

The percentage of households in Dodoma Region living in houses with improved floor covering materials (cement, ceramic tiles, parquet or polished wood, terrazzo, vinyl or asphalt strips) is 45.9 while 54.1 percent live in houses with non-improved materials (wood planks, palm or bamboo, earth or sand, dung, containers or tents). Across councils, households with improved floor covering materials range from 21.7 percent in Bahi District to 81.0 percent in Dodoma City (Figure 12.3).

Figure 12.3: Percentage Distribution of Households Living in Households with Improved and Unimproved Floor Covering Materials by Council; Dodoma Region, 2022 PHC

The results further show that, 53.1 percent of households in Dodoma Region are living in dwellings with earth or sand floors followed by cement (39.2%). In urban areas, six out of ten households (60.5%) are living in houses with cement as floor covering materials followed by those living in dwelling with earth or sand floors (23.6%). In rural areas, majority of households (72.0%) are living in houses that have earth or sand as the floor covering material followed by those living in houses with cement floors (25.5%).

Percentage of households living in houses with cement as floor covering materials in the main dwelling is highest (61.6%) in Dodoma City Council followed by Kondoa Town Council (52.8%). The council with the lowest percentage of households living in houses with cement as floor covering materials in the main dwelling are Bahi District (20.7%) (Table 12.4).

⁷ Others include households living in containers or tents.

12.3.3 Wall Materials

Most households in Dodoma Region, have their house walls built with sundried bricks (33.2%), followed by cement bricks/rock bricks (25.3%) and baked bricks (20.1%). In urban areas, more than a half of households (57.1%) use cement bricks/rock bricks as wall materials, followed by sundried bricks (23.3%). In rural areas, 39.5 percent of the households are living in houses built with sundried bricks as the main wall materials, followed by pole and mud (27.7%). Dodoma City Council has the highest (68.8%) percentage of households with houses built using cement bricks/rock bricks followed by Kondoia Town Council (36.5%). The remaining six District Councils have less than 10 percent of households living in houses built with cement bricks/rock bricks (Table 12.5).

12.3.4 Rooms for Sleeping

The number of people sleeping in a room is a major determinant of crowding and hence affects household members' health. A room for sleeping in the 2022 PHC is defined as any space within or outside the dwelling of the household which is currently used by household members for sleeping. This implies that any space within the dwelling can be termed as a room for sleeping if currently used by household members for sleeping purpose. By this definition any other space such as a sitting room, dining room or even stores were included if they were used for sleeping.

About Three in ten (33.4%) households in Dodoma Region have one room for sleeping, 34.7 percent have two rooms and 21.7 percent have three rooms. On the other hand, about ten percent (10.1%) of households have more than three rooms for sleeping. There is no difference between male and female headed households in regard ro the average number of rooms for sleeping.

The proportion of households with only one room for sleeping is higher (40.2%) in urban than in rural areas (29.1%). Dodoma City Council has the highest (43.5%) percentage of households with one room for sleeping compared with other councils. The Council with the lowest percentage of households with one room for sleeping is Mpwapwa District (25.8%) (Figure 12.4 and Table 12.6).

Figure 12.4: Percentage Distribution of Households by Number of Rooms for Sleeping and Place of Residence; Dodoma Region, 2022 PHC

12.4 Water and Sanitation

Inadequate and inequitable access to water and sanitation services along with inappropriate hygiene practices at household level, largely contributes to barriers that hinder efforts to support realisation of personal rights to live in a safe and clean environment.

12.4.1 Source of Drinking Water

Sources of drinking water are categorised into improved and unimproved sources. Improved sources of water include piped water, tube well/borehole, protected dug well, protected spring, rainwater, bottled water, carts with small tank/drum and tanker truck. On the other hand, unimproved sources include unprotected dug well, unprotected spring and surface water.

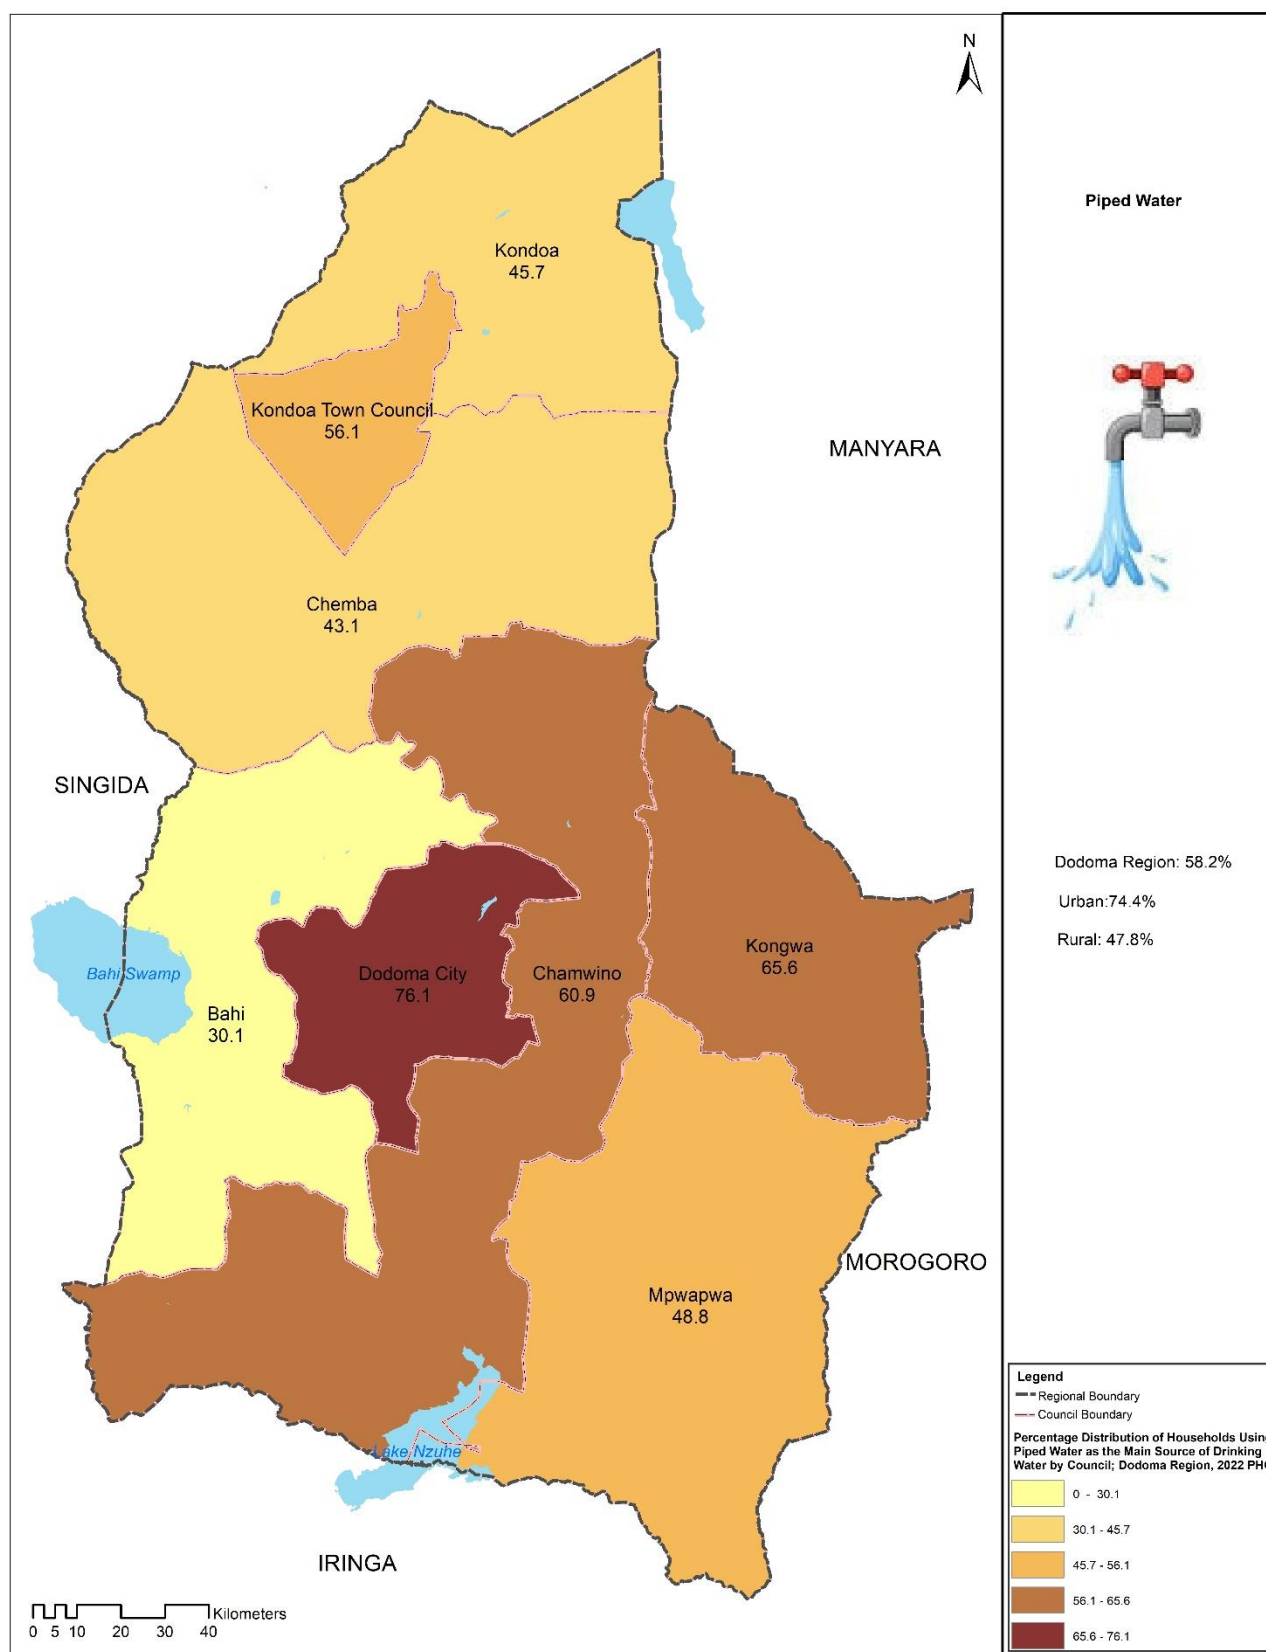

Results show that in Dodoma region 67.8 percent of households use improved sources of drinking water. Across councils, two councils namely Dodoma City (88.0%), and Kongwa District (74.5%) have the highest percentages of households using improved sources of drinking water. On the other hand, only one council with less than 50 percent of their households (Bahi District, 39.3%) using improved sources of drinking water (Figure 12.5).

Figure 12.5: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Council; Dodoma Region, 2022 PHC

Piped water is one of the improved water sources which include piped water into dwelling, piped water in the yard/plot, public tap/standpipe, neighbours tap or standpipe. Overall, more than a half of households (58.2%) in Dodoma Region are using piped water as the main source of drinking water (Map 12.1).

Map 12.1: Percentage Distribution of Households Using Piped Water as the Main Source of Drinking Water by Council; Dodoma Region, 2022 PHC

Households living in urban areas are more likely to use piped water than those living in rural areas (74.3% urban and 47.9% rural). Households in urban areas having piped water into

their dwelling or yard 42.4 percent, while 15.3 percent are getting water from a neighbours' piped supply and 16.6 percent from a public tap. In rural areas, seven (7.4) percent of households have piped water into their dwelling or yard, 4.0 percent get drinking water from a neighbours' piped supply and 36.4 percent from a public tap. Percentage of households using piped water ranges from 30.1 percent in Bahi District Council to 76.1 percent in Dodoma City Council (Map 12.1 and Table 12.7).

Note: Surface water includes river, dam, lake, pond, stream, charco dam, canal and irrigation channels

12.4.2 Sanitation Facilities

The 2022 PHC collected information on toilet facilities used by households. Toilet facilities are categorised into two groups; improved and unimproved. Improved facilities include flush or pour flush toilet that flushes water and waste to a piped sewer system, septic tank, covered pit or unknown destination; ventilated improved pit (VIP) latrine, pit latrine with washable slab and with lid, pit Latrine with washable slab without lid and pit latrine without washable slab (soil slab). Unimproved facilities include pit latrine without slab (open pit) and bucket.

More than a half (54.5%) of households in Dodoma Region use improved toilet facilities. In rural households, 36.7 percent are using improved toilet facilities; this is below the Third Tanzania Five Years Development Plan target of 75 percent by 2025/26. Dodoma City Council has the highest percentage (86.4%) of households using improved toilet facilities, while Bahi District Council has the lowest (32.8%). The most commonly used toilet facility in private households is pit latrine without slab/open pit (39.3 %). There is a higher proportion of households using pit latrines without slab/open pit in rural (54.6%) than in urban areas (15.5%). The percentage of households without toilet facilities (open defecation) ranges from 1.3 percent in Dodoma City to 14.3 percent in Chemba District Council (Figure 12.7 and Table 12.8).

12.5 Sources of Energy

The 2022 PHC collected information on households' main source of energy for cooking and lighting. The information collected enabled assessment of access to clean sources of energy (electricity, solar energy and gas). Use of clean energy as an alternative source has two benefits which are (a) to reduce the heavy reliance on wood as the main source of fuel for cooking hence protecting the environment and (b) to improve the health of the population especially women through reduced exposure to smoke from wood fuels.

12.5.1 Sources of Energy for Cooking

Table 12.9 shows that the majority of households in Dodoma Region use firewood (65.4%) as the main source of energy for cooking followed by charcoal (18.3%). In rural areas 86.8 percent of households use firewood for cooking while in urban is 32.0 percent. The percentage of households using charcoal for cooking in rural areas is 7.2 percent and in urban areas it is 35.6 percent.

Across councils, the percentage of households using firewood for cooking ranges from 25.3 percent in Dodoma City to 86.4 percent in Bahi District. On the other hand, the percentage of households using charcoal for cooking is highest (35.5%) in Dodoma City compared with 6.8 percent in Kondoa District (Table 12.9).

Table 12.9: Percentage Distribution of Households by Main Source of Energy for Cooking, Place of Residence, Headship and Council; Dodoma Region, 2022 PHC

Clean energy includes electricity, gas, biogas, solar, generator or private sources and wind generated electricity. The use of clean energy for cooking by households has increased from one (1.0) percent in 2012 to 14.5 percent in 2022. At council level, there is high increase in percentage of households using clean energy in Dodoma City Council from 3.5 percent in 2012 to 35.7percent in 2022. and in Kondoa District Council from 0.6 percent in 2012 to 7.6 percent in 2022 (Figure 12.7).

Figure 12.7: Percentage Distribution of Households Using Clean Energy for Cooking by Council; Dodoma Region, 2012 and 2022 PHC

12.5.2 Sources of Energy for Lighting

Results show that, 34.0 percent of households in Dodoma Region use solar as the main source of energy for lighting, followed electricity from the national grid (28.9%). Electricity is predominantly used in the urban households (55.7%) compared with the rural households (11.8%). Use of electricity for lighting ranges from 9.3 percent in Bahi District Council to 60.3 percent in Dodoma City Council. Councils with lower percentages of households using electricity as the main source of energy for lighting have relatively high percentages of households using solar energy. The Council with the highest percentage of households

using solar as the main source are Kondo District (52.2%) followed by Chamwino District (40.2%) and Kongwa District (40.0%) (Figure 12.8, Figure 12.9 and Table 12.10).

Figure 12.8: Percentage Distribution of Households Using Electricity and Solar as Main Sources of Energy for Lighting by Council; Dodoma Region, 2022 PHC

Figure 12.12 shows that, there is an increase in use of national grid electricity for lighting in Dodoma Region. Percentage of households using electricity from the national grid for lighting increased from 22.9 percent in 2012 to 28.9 percent in 2022. A similar increase is observed in all councils.

Figure 12.9: Percentage Distribution of Households Using Electricity from National Grid for Lighting by Council; Dodoma Region, 2012 and 2022 PHCs

12.6 Household Environmental Control

12.6.1 Waste Disposal

Waste disposal is the collection, processing and recycling or deposition of waste materials generated by human being. Waste materials are either in form of liquid or solid and the effect of their components may be either hazardous or inert on health and environment. Improper disposal of waste is a burden to public health provision. This section discusses the major means used by households in disposing solid and electronics waste.

About four out of ten (39.7%) of households in Dodoma Region use burning of solid waste as the main method of solid disposal, followed by burying/pit collection methods (26.5%). In urban areas, 35.7 percent of private households use burning as means of disposing solid waste, followed by regular collection methods (32.3%) and burying/pit collection (18.8%). In rural areas 42.3 percent of households use burning followed by burying/pit (31.4%) and open space (9.1%). Dodoma City Council has the highest percentage (41.0%) of households using regular collection of solid waste followed by Kondoa Town Council (11.2%) (Table 12.11).

Table 12.11: Percentage Distribution of Households by Main Means of Solid Waste Disposal, Place of Residence, Sex of Household Head and Council; Dodoma Region, 2022 PHC

Place of Residence/ Headship	Number of Households	Means of Solid Waste Disposal

12.6.2 Waste Collection Authorities

The results show that Councils (38.0%) and private individuals 28.5% are the main authorities that usually collected solid waste in private households. Out of the total households which reported that household waste is collected, households in rural areas are more likely to use private individuals (73.0%) as waste collectors while urban households are more likely to use waste collecting group (42.3%) (Figure 12.10 and Table 12.12).

12.6.3 Electronic Waste Disposal

Electronic waste (e-waste) refers to electronic products that are unwanted, not working and nearing or at the end of their useful life. Electronic waste are products that have exhausted their utility value through either redundancy, replacement, or breakage and include goods such as computers, televisions, radios, cell phones, copiers, fax machines, refrigerators, washing machines and microwaves. The method through which households use to dispose their electronic waste can pose a risk to public health.

Results show that 64.1 percent of households in Dodoma Region mix electronic waste with other refuse. Households living in urban areas (74.1%) and 57.7 percent of those in rural areas mix electronic waste with other refuse. The percentage of households mixing electronic waste with other refuse as main method of disposal is highest (78.1%) in Dodoma City Council followed by Kongwa District Council (69.4%). All councils have more than 50 percent of their households mixing electronic waste with other refuse except Kondoa District with 46.4 percent (Table 12.13).

Table 12.13: Percentage Distribution of Households by Methods of Disposing Electronic Waste by Place of Residence, Sex of Household Head and Council; Dodoma Region, 2022 PHC

12.7 Ownership of Assets

Ownership of assets refers to possession of any personal property regardless of the purpose it serves. Any asset owned by any member of the household was treated as a household asset in the 2022 PHC. The information collected about assets in this section are in three groups: transport, housing and agricultural equipment. Questions on ownership of specific assets aim at obtaining non-monetary poverty indicators.

12.7.1 Transport Assets

Transport assets are motorised equipment (i.e., motor vehicles, motorcycles or vespa and tri-motorcycles), non-motorised equipment (i.e., bicycles and tricycle) and draft animals (i.e., donkey or camel). In Dodoma Region, bicycle is the main transportation asset owned by households (21.7%) followed by motorcycles (8.7%) and donkey/Camel (3.1%). The percentage of households owning bicycles is higher in male-headed households (26.0%) compared with female-headed households (13.8%). The percentage of households owning bicycle is higher (23.6%) in rural areas than in urban areas (18.8%). Across councils, the percentage of households owning bicycles ranges from 15.0 percent in Mpwapwa District to 30.2 percent in Kongwa District (Table 12.14).

Table 12.14: Percentage Distribution of Households by Type of Transport Assets by Type Owned, Place of Residence, Sex of Household Head and Council; Dodoma Region, 2022 PHC

12.7.2 Housing and Cooking Assets

Housing and cooking assets include a house, electric or charcoal iron, electric or gas cooker and refrigerator or freezer. The 2022 PHC results show that, 72.5 percent of households own houses. The percentage of households in Dodoma Region owning houses is higher (82.2%) in rural than in urban areas (57.3%). The percentage of male headed households owning houses is slightly higher (73.5%) than for female headed households (70.7%). Other housing and cooking assets owned by households are electric or gas cooker (12.9%), electric iron (12.0%), charcoal iron (7.9%), and refrigerator or freezer (7.2%). Except for ownership of houses, households living in urban areas are more likely to own housing and cooking assets than households living in rural areas (Table 12.15).

Table 12.15: Percentage Distribution of Households by Type of Housing and Cooking Assets Owned Place of Residence, Headship and Council; Dodoma Region, 2022 PHC

12.7.3 Agricultural Assets

Agricultural assets include plough, power tiller, hand hoe, oxen, land or farm and tractor. In Dodoma Region, 73.3 percent of households own land or farm and 63.8 percent own a hand hoe. The percentage of household Owning land or farm is higher (82.4%) among households living in rural areas than in urban (59.1 %). Households in rural areas are also more likely (72.9%) to own hand hoes than those in urban areas (49.6%).

Across councils, ownership of land or farm ranges from 55.9 percent of households in Dodoma City to 86.8 percent of households in Bahi District Council. On the other hand, the percentage of households owning hand hoe ranges from 43.5 percent in Dodoma City Council to 77.7 percent in Kondoa District Council (Table 12.16).

Chapter 13

Access and Use of Information and Communication Technology by Individuals and Households.

- About eight out of ten (81.9%) of persons aged 15 years and above own mobile phones.
- About seventeen percent (16.8%) of persons aged 15 years and above own both smart phone and non-smart phone.
- Less than one percent (0.6%) of persons aged 15 years and above own only smart phones or tablets.
- Almost two thirds (64.5%) of persons aged 15 years and above own only non-smart phones.
- About eight out of ten households (82.1%) have at least one person aged 4 or above who own a mobile phone in Dodoma Region.
- Non-smartphones are mostly owned by individuals with training after secondary education (98.4%).
- Smartphones are mostly owned among individuals with university and other related education level (82.9%).
- About one percent (1.1%) of persons aged 15 years and above own desktop and 2.8 percent own laptop computers.
- Majority of persons aged 15 years and above (84.3%) use ICT equipment for communication.

13.1 Introduction

Information and Communication Technology (ICT) is increasingly setting the pace of global socio-economic development. Countries are prioritising investment in the digital ecosystem to transform and modernise their economies in recognising ICT's developmental role in facilitating and accelerating overall development. ICT statistics have been an agenda in the International statistical community for many years, and it has been receiving increasing attention due to its impact on the economy and society in general.

The availability of ICT infrastructure and its use continues to grow. The Internet, in particular, is transforming society through the growing amount of information and related tools available. These advances and recognition that ICTs drive society and economic

development have led to the need for reliable, comprehensive and comparable statistics to support Government decisions.

This chapter describes the status of individuals and household's access and the use of Information and Communication Technology (ICT) in Dodoma Region, which includes ownership and use of ICT equipment in Dodoma Region. Although the information on ICT access and use by households and individuals was collected from all persons aged four years and above, for the purpose of this report, some indicators are analysed based on persons aged 15 years and above to facilitate national and regional comparisons of ICT indicators. In addition, ICT indicators in this report comply with the International Telecommunication Union (ITU) Guidelines for Measuring ICT Access and Usage by Individuals and Households.

Information collected during 2022 PHC, includes access and usage of radios, televisions, computers, mobile phones, fixed-line telephones and internet facilities for all individuals aged 4 years and above. Access, usage and ownership of ICT equipment are key in linking communities, facilitating businesses and empowering communities socially and economically.

13.2 Households with Radio

The 2022 PHC results reveal that 32.6 percent of households in Dodoma Region have a radio⁸. Higher proportions of households with radios are in urban areas (41.4%) than rural areas (27.0%). The Council with the highest percentage of households with radio is Kondoa District (63.3%), followed by Dodoma City (42.9%) and Kondoa Town (32.3%). Chemba District Council has the lowest percentage of households with radio (17.5%) (Table 13.1).

13.3 Ownership of Television

According to the 2022 PHC results, 19.7 percent of the households in Dodoma Region owns televisions. Analysis by the place of residence indicates that urban areas have a higher proportion (33.8%) of households with television sets than rural areas (10.7%). Across councils, Kondoa District Council has the highest proportion of households owning television (45.9%), followed by Dodoma City (36.4%). On the other hand, councils with the lowest percent are Chemba District (7.2%) and Bahi District (6.0%) (Table 13.1).

⁸ For the purpose of the 2022 PHC, radio was limited to a standalone unit only.

13.4 Households with Landline Telephone

According to the Tanzania Communications Regulatory Authority (TCRA) communication statistics report, landline telephone market is characterised by general stagnation, manifested by drastically decreasing subscriptions from 176,367 fixed telephone lines in PHC 2012 to 85,976 in PHC 2022.

The 2022 PHC results reveal that about one percent (1.1%) of households in Dodoma Region have landline telephones. The percentage of households with landline telephones in rural areas (1.1%) are almost proportionately similar compared with Urban areas (1.0%). Kondoa District has the highest percentage of households with landline telephone (6.9%), followed by Dodoma City (1.2%). Mpwapwa District and Chamwino District councils have the smallest percentage of households with landline telephones (0.3% each) (Table 13.1).

13.5 Households with Internet Facility

The 2022 PHC results reveal that less than one percent (0.7%) of households in Dodoma Region have Internet⁹ facilities. Urban areas have higher proportion (1.5%) of households with Internet facilities than in rural areas (0.2%). Dodoma City Council has the highest percentage of households with internet facilities (1.8%), followed by Kondoa Town (0.8%) and Chamwino (0.3%) while other remaining councils have 0.2 percent each (Table 13.1).

⁹ 'Household with Internet access' means that the Internet is generally available for use by all members of the household at any time, regardless of whether it is actually used.

13.6 Mobile Phones

13.6.1 Ownership of Mobile Phones by Individuals

An individual is considered to own a mobile cellular telephone if he/she has a mobile phone device with at least one active SIM card for personal use. It includes those with a mobile phone for personal use that is not registered under his/her name but it excludes individuals with only active SIM cards (s) and not mobile phones.

Results reveal that 81.9 percent of the population aged 15 years and above in Dodoma Region own mobile phones. Individuals in urban areas reported higher proportions of households owning mobile phone (88.7%) than in rural areas (77.6%). Ownership of mobile phones is higher among males (87.8%) than females (76.5 %) (Figure 13.1 and Table 13.2).

Figure 13.1: Percentage Distribution of Persons aged 15 years and above Owning Mobile Phones by Council and Sex; Dodoma Region, 2022 PHC

Map 13.4: Percentage of Persons Aged 15 Years and Above Owning only Non-Smart Phones by Council; Dodoma Region, 2022 PHC.

13.6.2 Ownership of Mobile Phones by Households

Ownership of mobile phones by phone type indicates that in Dodoma Region 82.1 percent of households have at least one member aged four years and above owning any type of mobile phone. The proportion of households owning mobile phones is higher (90.4%) in urban areas than in rural areas (76.8%). In urban areas, the proportion of households that own smart mobile phone is 43.6 percent and 79.4 percent for non-smartphone; whereas in rural areas it is 10.4 percent and 75.6 percent respectively).

Across all councils, the proportion of households with smartphones is less than 50 percent of all households in Dodoma Region. Results also indicate that Dodoma City has the highest percentage (49.3%) of households that owns smart mobile phones while Bahi District has the lowest (9.5%) (Table 13.3).

Table 13.3: Number and Percentage Distribution of Households with at Least One Member Aged Four Years and Above Owning Mobile Phone by Type, Place of Residence and Council; Dodoma Region, 2022 PHC

Chemba District	74,986	79.4	12.5	78.1

13.6.3 Ownership of Mobile Phones by Age Groups and Sex

Non-smartphone is the most widely owned phone type among persons aged four years and above in Dodoma Region by 53.4 percent of all individuals (56.4% of males and 50.5% of females). When the data is disaggregated by locality, 48.3 percent of individuals in rural areas own non-smartphones compared with 62.7 percent of those in urban areas (Table 13.4).

The proportion of ownership of smartphone is the highest (29.8%) for individuals in the age group 25-29 years while for non-smartphone (89.6%) it is in the age group 55 -59 years. The results also show that proportional of ownership of non-smart phone increases steadily from age 4 years, then sharply from age group 10-14 to 25-29 years. It attains its maximum point at aged 55- 59, thereafter declines steadily to persons of age groups 80 years and above. On the other hand, ownership of smart phones increases from age group 5–9 years and attained its maximum position in the age group 25 -29 and then steadily declines to older age groups (Figure 13.2).

13.6.4 Ownership of Mobile Phones by Level of Education

The 2022 PHC results reveal that non-smartphones are mostly owned by individuals who attained Training After Secondary education (98.4%) compared with other levels of education and least owned by those who attained Pre-Primary level (69.8%). Analysis by sex shows that, non-smartphone ownership is higher among males than female in all level of education (Table 13.5).

The 2022 PHC results reveal that, smartphones in Dodoma Region are mostly owned by individuals who attained university and other related levels of education (82.9%) and least owned by those attained pre-primary education (5.9%). The percentage of ownership of Smartphone is higher for males than female from those attained pre-primary to secondary school A-level but it is lower for males than females to the remaining levels of education.

Ownership of smartphone in Dodoma Region is higher in urban areas than in rural areas for all education levels (Table 13.6).

13.6.5 Usage of Mobile Phones by Individuals

Results reveal that 86.5 percent of individuals aged 15 years and above in Dodoma Region are using non-smartphones and 18.1 percent are using smartphones. The proportion of individuals using non smartphones is higher (90.9%) in urban areas than in rural areas (83.3%). A similar situation is observed in the usage of smartphones, where the proportion of individuals using smartphones in urban areas (34.7%) is higher than that of rural areas (7.7%). Generally, proportion of males who are using mobile phones is higher than that for females for both smart and non-smart mobile phone.

Across all councils, the proportion of individuals who use mobile phones is the highest in Dodoma City (91.4% non-smartphone and 40.0% smartphone). On the other hand, the Council with the lowest proportion of individuals who use mobile phones is Bahi District (80.1% non-smartphone and 7.4% smartphones) (Table 13.7).

Table 13.7: Number and Percentage Distribution of Population Aged 15 Years and Above Using Mobile Phones by Type, Sex, Place of Residence and Council, Dodoma Region; 2022 PHC

13.6.6 Usage of Mobile Phones by Type, Age Group and Sex

Majority of persons (59.9%) aged four years and above in Dodoma Region used non-smartphones in the three months prior the 2022 PHC. The proportion of males (61.3%) using of non-smartphones is slightly higher than females (58.5.9%). Non-smartphone usage

among individuals in rural areas is lower with 55.5 percent than individuals in urban areas (68.0%). Similar situation is observed in the usage of smart phone where the proportion of population that use smart phone is higher in urban areas (26.4%) than rural areas (5.1%) (Table 13.8).

Non-smart phones are mostly used by individuals aged 30-64 years while smart phones are mostly used by individuals aged 20 to 34 years. The use of non-smartphones increases steadily from age 4 years before peaking at age group 55 – 59, thereafter declines to older ages (Figure 13.3).

13.6.7 Type of Use of ICT Equipment

The Census further sought to establish the use of ICT equipment (mobile phones and computers) for all persons aged 15 years and above. The results show that majority of persons aged 15 years and above years in Dodoma Region mostly use ICT equipment for communication (84.3%), followed by 52.7 percent of person using ICT equipment for sending and receiving money (52.7%), and 30.8 percent of person using ICT equipment for Search/receive information (Table 13.9).

Results further show that proportionately more persons who are living in urban areas use ICT equipment for communication compared with those in rural areas (81.1% for rural and 89.3% for urban). The pattern is the same for sending and receiving money (42.2% for rural and 69.5% for urban) and searching or receiving information (22.3% for rural and 44.2% for urban). Generally, the likelihood of using ICT equipment for any purpose is higher in urban areas than in rural areas. The use of ICT equipment by individuals aged 15 years and above varies across Councils. The most common use of ICT equipment across councils is for communication followed by sending and receiving money and searching/receiving information. Online business was the least use of ICT equipment across councils. The data further reveals that Dodoma City has the highest percentage in all ICT uses compared with other councils (Table 13.9).

13.7 Computers

13.7.1 Ownership of Computers by Individuals

Table 13.16 presents information on persons aged 15 years and above owning computers by type, sex, place of residence and Council in Dodoma Region. Results show that about three percent (2.8%) of persons aged 15 years and above in Dodoma Region own laptops and one percent (1.1%) own desktop computers. Dodoma City Council has the highest percentage of persons owning computers (2.1% desktop and 7.0% laptop), followed by Kondo Town (0.9% desktop and 2.3 laptop). The Council with the lowest percentage of persons owning desktop and laptop computers (0.6% and 0.9% respectively) is Bahi District.

Table 13.16: Percentage of Persons Aged 15 and Above Owning Computers by type, Sex, Place of Residence and Council; Dodoma Region, 2022 PHC

13.7.3 Usage of Computers by Age Group and Sex

Use of computers includes the use of all types of computers, namely personal computers, laptops or portable electronic boards. Details on distribution of person that used of computers during the three months period prior to the Census are given in Table 13.18. The table shows that during the reference period, Dodoma Region has about four percent (3.5%) and two percent (1.8%) of individuals aged 4 years and above that used laptop and desktop computers respectively. The proportion of persons that used desktop or laptop computers in the reference period increased from age 4 years and attains the maximum point at age group 30 – 34 for desktop and 25-29 years for laptop and then decreased to older ages.

The proportion of persons aged 4 years and above that reported to have used laptop computers in the three months preceding the Census is higher across all age groups than those who reported to have used desktops.

The proportion of persons aged 4 years and above that use desktop and/or laptop computers is higher among males than females from age groups 20 – 24 years (Table 13.18).

Chapter 14

Information on Buildings

Key Points

- About thirty-five percent (34.6%) of all buildings have permanent flooring materials (sand-cement or Tiles/with cement or tiles(ceramic/marble/PVC) and Terrazzo.
- About eighteen percent (17.9%) of all buildings/units in Dodoma Region are connected to the national grid electricity, while 26.3 percent are powered by other sources.
- About fourteen percent (14.3 %) of all buildings/units have water services.
- Three percent (3.2%) of all buildings in Dodoma Region have infrastructure for the people with disabilities.
- Sixty seven percent (67.0%), of all individually owned buildings/units in Dodoma Region are owned by men, 24.5 percent by women and 5.9 percent are jointly owned.
- About seventy-eight percent (77.5%) of all buildings/units in Dodoma Region are used by the owners themselves, and 9.6 percent are used by tenants.
- Seventy-one percent (71.0%) of all buildings in Dodoma Region are built on un-surveyed land.
- About forty-seven percent (46.7 %) of all buildings/units in Dodoma Region are constructed on land that does not have legal documents.

14.1 Introduction

This chapter provides information on the number of buildings, types of buildings, main uses of buildings and the number of units in residential and commercial-residential buildings in Dodoma Region and Council levels as per the 2022 Tanzania Building Census (2022 TBC) results. It also presents findings on buildings information which constitutes building categories, occupancy status, building ownership, construction status, building materials used for construction, number of bedrooms, building tenure status and buildings condition. In addition, the chapter presents information on basic services which are categorized as services within the building (electricity, water, and toilets) and accessibility of buildings (roads) and

availability of infrastructure for People with Disabilities (PWD). Furthermore, it provides an overview of building ownership status, land surveying, and the presence of legal documents for land ownership where the buildings are built.

14.2 Number of Buildings

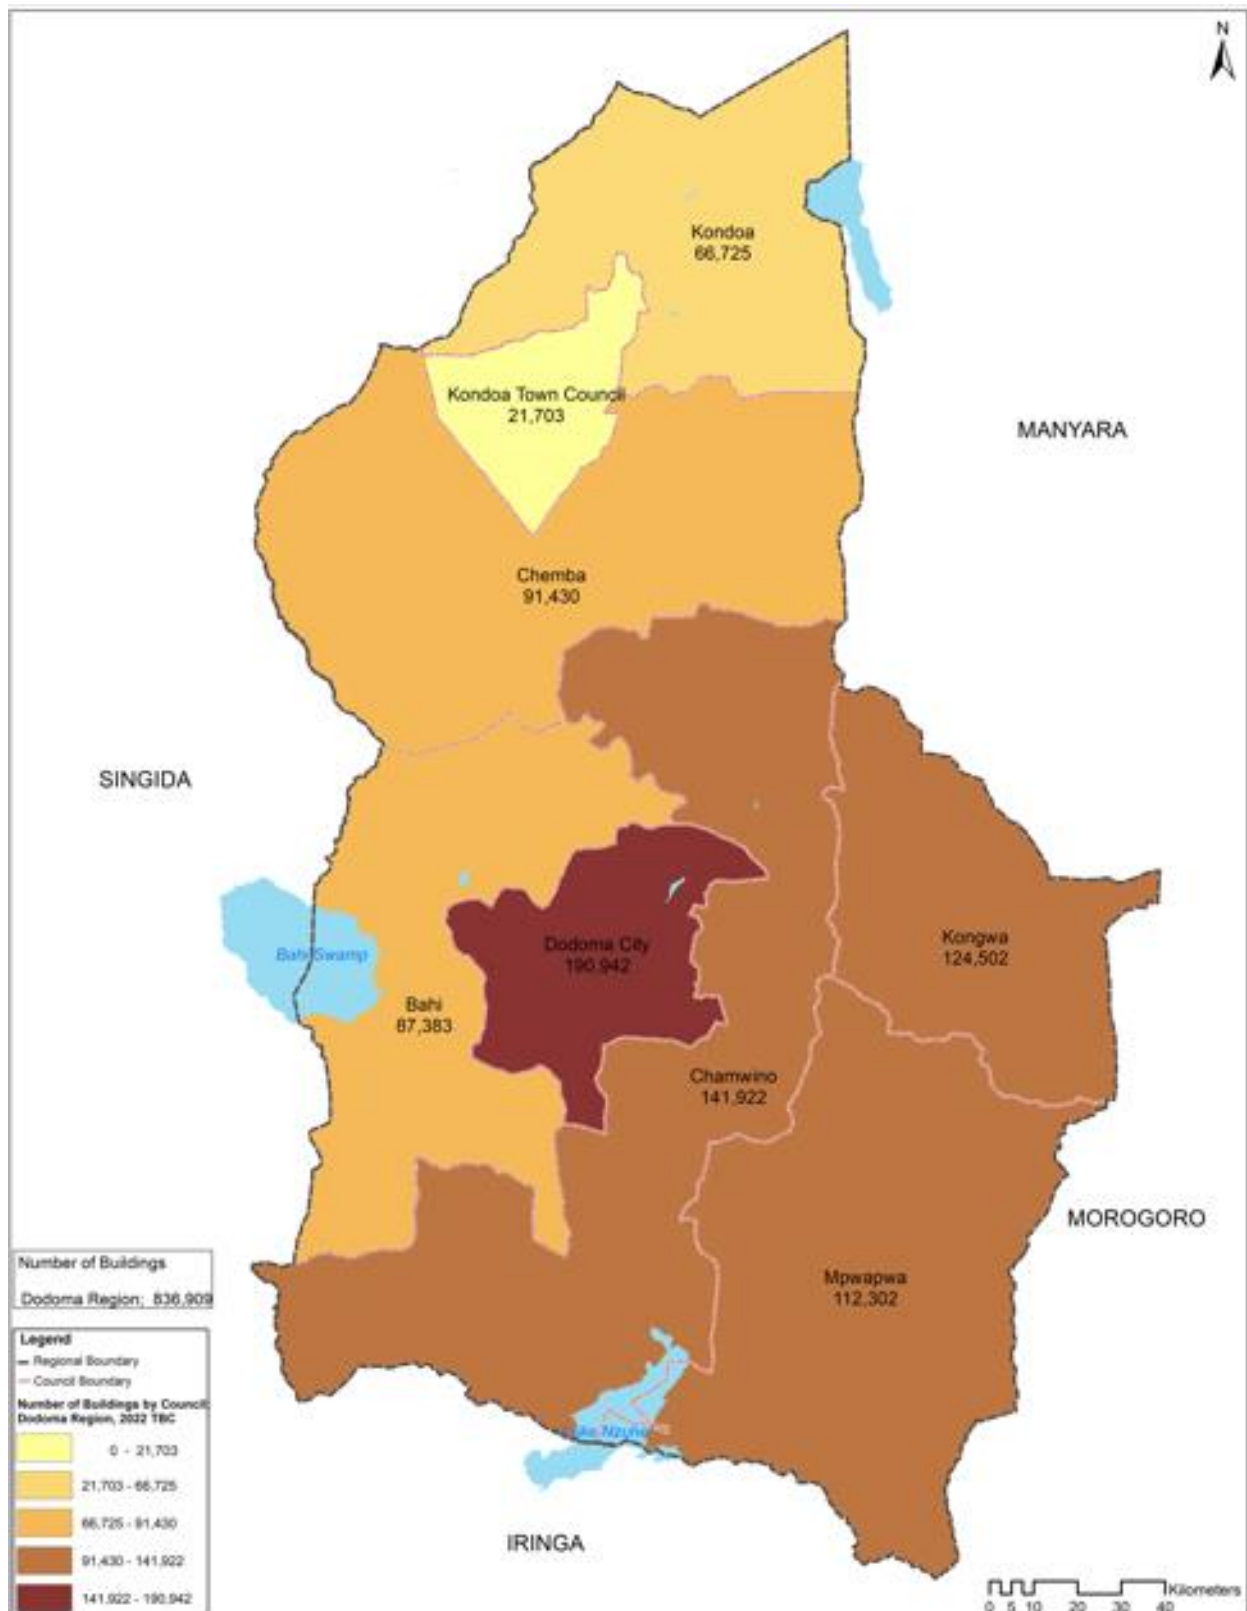

The results show that Dodoma Region has a total of 836,909 buildings whereby 552,220 buildings are in rural and 284,689 are in urban areas. Dodoma City Council has the largest number of buildings (190,942 buildings) in the region followed by Chamwino District Council (141,922 buildings) and Kongwa District Council (124,502 buildings). On the other hand, Kondoa District and Kondoa Town councils have fewer numbers of buildings (66,725 and 21,703 respectively).

Further results show that Dodoma City Council has the largest number (1,256) while of multi-storey buildings, followed by Chamwino District Council (60), Kondoa Town and Kongwa District Council (30 each) while Kondoa District Council (6) have relatively small numbers of multi-storey buildings (Map 14.1 and Table 14.1).

Table 14.1: Number of Buildings by Place of Residence, Type, and Council; Dodoma Region, 2022 TBC

Map 14.1: Number of Buildings by Council; Dodoma Region, 2022 TBC

14.2.1 Buildings with Physical Addresses

The results show that 63.5 percent of all buildings in Dodoma Region have physical addresses. The percentage of buildings with physical addresses is relatively high in rural (66.3%) than in urban areas (57.9%) (Figure 14.1 and Table 14.2).

Figure 14.1: Percentage Distribution of Buildings With and Without Physical Addresses by Place of Residence; Dodoma Region, 2022 TBC

Across councils, results show that, percentage of buildings with physical addresses ranges from 51.1 percent in Dodoma City to 79.3 percent in Kondoa Town (Table 14.2 and Figure 14.2).

14.2.2 Type of Buildings

Building types are categorized into single storey buildings (one floor buildings) and multi-storey buildings (more than one floor buildings). Information on buildings under construction including those at foundation stage was also collected.

The results reveal that, 94.9 percent of all buildings in Dodoma Region are single storey and only less than one percent (0.2%) are multi-storey. The percentage of multi-storey buildings is slightly higher (0.5%) in urban than in rural areas (0.0%). Results further reveal that about five percent (4.9%) of all buildings in the region are under construction. Percentage of buildings under construction in urban areas is higher (6.9%) than in rural areas (3.9%) (Figure 14.3).

Figure 14.3: Percentage Distribution of Buildings by Type, and Place of Residence; Dodoma Region, 2022 TBC

14.2.3 Main Uses of Buildings

The main uses of buildings are divided into three groups, which are residential, commercial-residential and non-residential uses. The results show that 92.0 percent of buildings in Dodoma Region are used for residential purpose, 3.0 percent for commercial-residential and 5.0 percent for non-residential. The pattern of use of building is almost similar in rural and urban areas.

At the Council level, Mpwapwa District has the highest proportion of residential buildings (93.5%) compared with Dodoma city, which has the lowest (89.0%). With regard to non-residential buildings, Dodoma City has the highest proportion (6.1%) while Mpwapwa and Chemba Districts have lowest (4.3% each) (Table 14.3).

The main usage of non-residential buildings in Dodoma Region is for commercial purposes (45.5%), followed by places of worship (16.0%) and institutional services (15.7%). Chamwino District Council has the highest percentage of buildings (53.2%; 3,727 buildings) used for commercial purposes followed by Bahi District Council (52.8%; 2,193 buildings) while Kondoa Town Council has the lowest (21.3%; 229 buildings). Kongwa District Council, has the highest percentage of buildings (2.2%; 136 buildings) used for industrial purposes (Table 14.4).

14.2.4 Number of Units in a Building

Information on the number of units in the building was collected only in residential and commercial-residential buildings. Results show that, most buildings in Dodoma Region (94.0%) have one unit. The pattern of distribution of buildings by number of units is almost similar for both rural and urban areas.

At the council level, Mpwapwa District has highest (96.7%) proportion of buildings with single unit, while Dodoma City has lowest (89.4%). Results further show that, percentage of buildings with two units range from 1.2 percent in Mpwapwa District to about four percent (3.9%) in Dodoma City (Table 14.5 and Figure 14.4).

14.3 Buildings' Attributes

This section presents findings on attributes of buildings which constitute categories, occupancy status, ownership, construction status, materials used for construction, number of bedrooms, tenure status and condition of buildings. Buildings in this section refers to all buildings irrespective of their use and ownership.

14.3.1 Buildings' Categories

For the purpose of 2022 TBC, the categories of building are semi-detached, terrace or row of houses, and detached or stand-alone buildings. The results show that most (95.6%) of the buildings in Dodoma Region are detached or stand-alone buildings. The same pattern is observed in rural and urban areas and across all councils in Dodoma Region (Figure 14.7 and Table 14.6).

Table 14.6: Number and Percentage Distribution of Buildings by Building Category, Place of Residence and Council; Dodoma Region, 2022 TBC

Place of Residence	Building Category						
	Total Number of Buildings	Semi-detached	Percent	Terrace/Row of Houses	Percent	Detached/Stand Alone	Percent

14.3.2 Construction Status of Buildings

The construction status of buildings is divided into four categories, namely completed, partly completed, under construction and temporary buildings. The 2022 TBC results show that, 72.4 percent of all buildings in Dodoma Region have been completed and 7.4 percent are partly completed. Buildings under construction account for 14.7 percent while temporary buildings accounts for 5.6 percent. The results also indicate that, 73.9 percent of all buildings in the rural areas are completed compared with 69.5 percent in urban areas.

Kongwa District Council has the highest percentage of completed buildings (81.7%) while Kondoa District Council has the lowest (62.4%). About fifteen percent (14.7%) of buildings in Dodoma Region are temporary. Percentage of temporary buildings ranges from 2.6 percent in Kongwa District Council to 16.8 percent in Bahi District Council (Figure. 14.8 and Table 14.7).

Table 14.7: Percentage Distribution of Buildings by Construction Status, Place of Residence and Council; Dodoma Region, 2022 TBC

Council	Total Number of Buildings	Completed	Partly Completed	Under Construction	Temporary Buildings
Total	836,909	72.4	7.4	14.7	5.6

Figure 14.5: Percentage Distribution of Buildings by Construction Status and Place of Residence; Dodoma Region, 2022 TBC

14.3.3 Building Occupancy Status

The occupancy status of buildings refers to is determined by checking whether the building is in use or vacant. The results show that 87.1 percent of all buildings in Dodoma Region are in use, while 12.9 percent are vacant. Furthermore, the results indicate that rural areas have a higher proportion of buildings in use (89.6 %) compared with urban areas (82.1 %). Chemba District Council has the highest

percentage (90.1%) of buildings in use while Dodoma City Council has the lowest (80.6%) (Figure 14.9 and Table 14.8).

Table 14.8: Percentage Distribution of Buildings by Occupancy Status, Place of Residence and Council; Dodoma Region, 2022 TBC

14.3.4 Building Construction Materials

This section describes the types of building materials used in flooring, wall and roofing. Analysis in this section is based on buildings and not on households as presented in chapter twelve of this publication.

14.3.4.1 Floor Materials

Materials used for floor include cement, PVC tiles, ceramic tiles (marble), terrazzo, clay, earth/sand, hard plastic or bitumen, polished wood, cow dung, wood planks, or bamboo or plant residues. Almost forty five percent of buildings in Dodoma Region (45.4%), have mud/soil or sand floors, followed by cement floors (30.3%) and tiles or marble floors (4.3%).

Furthermore, in rural areas, buildings with cement floor constitute 21.9 percent of all buildings in rural area while in urban areas it is 46.6 percent. Dodoma City Council has the highest percentage (46.7%) of buildings with Sand cement floor while Bahi and Chemba District Councils have lower percentage of about 17 and 23 percent respectively (Table. 14.9).

Table 14.9: Percentage of Buildings by Type of Flooring Material, by Place of Residence and Council; Tanzania, 2022 TBC

Note: Other flooring materials are PVC tiles, parquet or polished wood, wood planks, terrazzo or cow dung

14.3.4.2 Wall Materials

Materials used in wall construction include stones, cement or stone blocks, sun-dried clay bricks, burnt clay bricks, glass, wood, iron sheets, bamboo/poles/mud and poles/grass or tents. Most of the buildings in Dodoma Region have walls built with Sundried bricks (34.1 %), followed by Cement blocks/Stone blocks (22.4%). Over fifty percent (52.8%) of all buildings in urban areas have walls constructed with cement blocks or stone blocks followed by Sundried bricks (24.6 %). However, in rural areas, most of the buildings (39.0%) in rural areas are constructed using Sundried bricks followed by burnt bricks (26.7%). Dodoma City Council has the highest percentage (65.3 %) of buildings with cement blocks or stone blocks walls while Kondoa District Council has the lowest percentage (3.4%) (Table 14.10).

Note:

"No walls" refers to buildings that were under construction (at foundation stage) during Census enumeration

14.3.4.3 Roofing Materials

Construction materials used for roofing can be permanent or temporary. Permanent construction materials include corrugated iron sheets, tiles, concrete and asbestos, while temporary roofing materials are grass (leaves or palm leaves), mud/grass and poles, plastics, tarpaulin and straw.

The results show that, the highest percentage (80.2%) of all buildings in Dodoma Region are roofed with corrugated iron sheets, followed by Mud and leaves (9.9%). In urban areas, 87.2 percent of all buildings are roofed with corrugated iron sheets compared with 76.6 percent in rural areas. The percentage of buildings roofed with corrugated iron sheets ranging from 57.7 percent in Bahi District Council to 91.2 percent in Kondoa District Council (Table 14.11).

14.3.5 Number of Bedrooms

This section provides information on the number of bedrooms in residential and commercial-residential buildings only. The results show that 29.1 percent of such buildings/units in Dodoma Region have one bedroom, 36.6 percent have two bedrooms, 24.2 percent have three bedrooms, and almost eleven percent (10.2) percent have four or more bedrooms.

Furthermore, in rural areas, the proportion of buildings/units with two bedroom is higher (40.1%) compared with 33.1 percent those with one bedroom. In urban areas, most (29.9%) of buildings have two bedrooms, followed by those with three bedrooms (29.7%) (Figure 14.7 and Table 14.12).

Figure 14.7: Percentage Distribution of Residential and Commercial Residential Buildings/Units by Number of Bedrooms and Place of Residence; Dodoma Region, 2022 TBC

14.4 Basic Services in Buildings

This section presents information on basic services in buildings/units. The services are electricity, water and, toilets.

14.4.1 Electricity

Electricity service in buildings is divided into two main groups: - electricity from the national grid (TANESCO) and electricity from alternative sources such as solar energy and generators.

The results indicate that 17.9 percent of all buildings/units in Dodoma Region are connected to the national grid. About thirty-seven (35.6%) of all buildings in urban areas are connected to the national grid compared with 8.6 percent in rural areas. Across the councils of Dodoma Region, Dodoma City and Kondoa Town have the highest proportion (38.1% and 31.2% respectively) of buildings connected to the national grid while Bahi District has the lowest percentage (6.8%) (Figure 14.8 and Table 14.13).

Figure 14.8: Percentage Distribution of Buildings/Units with Electricity from the National Grid (TANESCO) by Council; Dodoma Region, 2022 TBC

Alternative sources of electricity include all other sources such as solar electricity and generators. The results reveal that 26.3 percent of all buildings/units in Dodoma Region have alternative sources of electricity. The percentage of buildings with alternative sources of electricity is high in rural areas (28.6%) than in urban area (22.1%).

Percentage of buildings with alternative source of energy is generally high in Councils with low percentage of buildings connected to the national grid, ranging from about twenty-two percent (21.8%) in Dodoma City Council to 40.2 percent in Kondoa District Council. (Table 14.13).

14.4.2 Water

According to the 2022 TBC, water service in a building means the presence of water inside the building and/or on the premises of the relevant building. The results reveal that 14.3 percent of all buildings/units in Dodoma Region have water service. Proportion of buildings with water services is higher in urban (29.1%) than in rural

areas (6.4%). Across councils, Dodoma City has the highest percentage (33.8%) of buildings with water service while Chemba District have the lowest percentage (6.2%) (Figure 14.9 and Table 14.13).

Figure 14.9: Percentage Distribution of Buildings/Units with Water Services by Council; Dodoma Region, 2022 TBC

14.4.3 Toilets

Toilet service in a building/unit includes the presence of a toilet inside the building and/or on the premises of the concerned building. The results reveal that 77.2 percent of all buildings/units in Dodoma Region have toilet facilities. The percentage of buildings with toilet facilities in urban areas is slightly higher (77.3%) than in rural areas (77.2%). There are marked disparities in percentage of Buildings with toilet facilities across councils, ranging from 70.2 percent in Chemba District to 82.3 percent in Mpwapwa District council (Figure 14.10 and Table 14.13).

Figure 14.10: Percentage Distribution of Buildings/Units with Toilet Facility by Council; Dodoma Region, 2022 TBC

14.5 Accessibility of the Building

This section provides information on the accessibility of buildings by road and the presence of infrastructure for Person With Disabilities.

14.5.1 Access of Roads

The results indicate that 69.4 percent of all buildings in Dodoma Region are accessible by road. Notably, most of the buildings (80.4%) in urban areas are accessible by road, while it is 63.7 percent in rural areas. Kondoa Town Council has the highest percentage (83.8%) of buildings accessible by road while Bahi District Council has the lowest (53.7%) (Figure 14.11).

Figure 14.11: Percentage Distribution of Buildings with Access Road by Council; Dodoma Region, 2022 TBC

14.5.2 Infrastructure for Persons with Disabilities

Results reveal that 3.2 percent of all buildings in Dodoma Region have infrastructure for Persons with Disabilities (PWDs). Buildings with infrastructure for PWDs account for 3.9 percent and 2.9 percent of buildings in urban and rural areas respectively. Kongwa District Council has the highest percentage (4.5%) of buildings with infrastructure for PWDs while Chemba District Council has the lowest percentage (2.1%) (Figure 14.12).

Figure 14.12: Percentage Distribution of Buildings With Infrastructure for Persons With Disabilities by Council; Dodoma Region, 2022 TBC

14.6 Tenure Status of Buildings

This section provides an overview of building ownership status, land surveying and the presence of legal documents for the land ownership where the building is built.

14.6.1 Building Ownership Status

The results reveal that the majority (87.8%) of buildings in Dodoma Region are individually owned, followed by 9.2 percent of co-owned buildings. The same pattern is observed in rural and urban areas and across all councils in the Region (Figure 14.11 and Table 14.13).

Figure 14.13: Percentage Distribution of Buildings by Ownership Status and Place of Residence; Dodoma Region, 2022 TBC

14.6.2 Building Ownership by Sex

Ownership by sex considers only individually owned buildings. Ownership status may be categorised by male only, female only or jointly. The results show that most of the buildings/units in Dodoma Region are owned by male only (67.0%), followed by female only (24.5%) and 5.9 percent by male(s) and female(s) jointly. The same pattern is observed in rural and urban areas.

Bahi District Council has the highest proportion (26.7%) of buildings owned by females alone while Kondoa District Council has the lowest proportion (20.5%) (Table 14.14).

14.6.3 Building Occupancy Tenure Status

Occupancy tenure status considers only occupied buildings/units. The 2022 TBC results indicate that 77.5 percent of all buildings in Dodoma Region are occupied by the owners themselves, followed by buildings occupied by tenants alone (9.6%).

In rural areas, the results reveal that 83.5 percent of all buildings/units are occupied by owners themselves followed by Live in Without paying rent (7.0%) while in urban areas, the results reveal that 66.3 percent of all buildings/units are occupied by owners alone followed by Occupied by Tenants (17.1%), however the proportion of buildings/units occupied by tenants in urban area (17.1%) is substantially higher than that in rural areas (5.6%).

Bahi District Council has the highest percentage (83.9) of buildings/units occupied by owners themselves, while Dodoma City Council has the lowest percentage (62.9%). In addition, Dodoma City Council has the highest percentage (19.5%) of tenant-occupied buildings/units, while the Kondoa District Council has the lowest (5.2%) (Table 14.15).

14.6.4 Buildings Land Survey Status

Results reveal that the majority of buildings in Dodoma Region (71.0%) are built on un-surveyed land, while 19.9 percent are built on surveyed land and 7.7 percent are built on regularized land. Moreover, 47.9 percent of urban buildings are built on surveyed land compared with 5.4 percent of rural buildings. Bahi District Council has the highest percentage (89.4%) of buildings built on un-surveyed land while the Dodoma City Council has the lowest (24.6 %) (Table 14.16).

14.6.5 Buildings Land Ownership Documents

Information on land ownership status includes title deeds, residential licenses, letters of offer or acknowledgments of payment, certificates of customary right of occupancy (CCRO in Mainland), agreements or contracts, registration card (Zanzibar), and local Government documents. Results show that 46.7 percent of all buildings/units are built on land without legal documents, 27.1 percent are built on land with certificate of customary right of occupancy land ownership documents and 8.5 percent have title deeds (Table 14.17).

Chapter 15

Summary of Key Findings, Implication and Recommendations

15.1 Introduction

This chapter presents key findings of the 2022 PHC results with the aim of informing Regional, Local Government Authorities as well as stakeholders on the key findings, implications and recommendations for policies and programmes to realise socio-economic development of Dodoma Region.

15.2 Key Findings

Key findings summarized here are on the selected areas of Dodoma Region Basic Demographic and Socio-Economic Profile Report, considered to be of high priority for policy and programmes implementation by councils in this region. Further details and specific results, relevant statistics and full references are found in respective chapters of this report.

15.2.1 Population Size and Growth

Key Findings

- i. The population of Dodoma Region has increased from 2,083,558 persons in 2012 to 3,085,625 persons in 2022; and
- ii. Population of Dodoma Region is growing at an average rate of 3.9 percent annually during the 2012-2022 intercensal period.

Implications for Policies and Programmes

- i. With the current annual growth rate of 3.9 percent (which is above the national average of 3.2 %) the population of Dodoma Region is expected to double in the next 18 years;
- ii. On the positive side, high population growth rate of 3.9 percent annually may lead to greater human capital, higher economic growth and higher economies of scale; and
- iii. On the negative side, growth of 3.9 percent may lead to increased pressure on social services, contribute to depletion of natural and environmental resources as well as increased pressure on land use, urban housing and other urban infrastructure

Recommendations

- i. Regional, Local Government Authorities and stakeholders need to implement effectively respective national and sector policies while advocating for planned and balanced approach to population growth and economic development;
- ii. Regional and Local Government Authorities need to consistently undertake land use and urban planning as well as putting in place effective supervision and implementation mechanisms to ensure compliance; and
- iii. Regional and Local Government Authorities as well as stakeholders to strengthen enforcement mechanisms, including by-laws to protect and safeguard the environment in line with the National Environmental Policy (2022) to ensure that negative impact caused by human activities on environment is minimized.

15.2.2 Age Profile

Key Findings

- i. About fifteen percent (14.8%) of Dodoma regional population is aged below five years;
- ii. About forty nine percent (48.8%) of the total regional population is below 18 years of age;
- iii. About one third (33.5%) of Dodoma regional population are youths aged 15 – 35 years; and
- iv. About seven percent (6.9%) of Dodoma Regional population is aged 60 years and above.

Implications for Policies and Programmes

- i. High proportion of children under five years implies increased demand for Mother and Child Health Services as well as potential demand in social services including education and healthcare;
- ii. High proportion of persons under 18 years of age implies increased demand for education, healthcare and other social services leading to strain in resources and infrastructure. This may lead to higher unemployment rates, which can contribute to social unrest and political instability;
- iii. High proportion of youths (15 – 35 years) exerts pressure on the economy to create more jobs and skills to absorb a growing youth population. However, high proportion of youth population, means a potential labour force that can actively

- contribute to economic growth, especially when they are educated and skilled and corresponding investments are made in human capital development; and
- iv. Elderly persons need social protection which includes universal pension, health insurance and housing.

Recommendations

- i. Regional and Local Government Authorities to strengthen implementation of policies and enforcement of laws related to child and youth development and protection;
- ii. Regional and Local Government Authorities to facilitate provision of skills for youth employability and to put in place enabling environment for new programmes and businesses;
- iii. Regional and Local Government Authorities to ensure allocation of enough resources to cater for education, health, social security and protection of young people; and
- iv. Regional and Local Government Authorities to effectively implement policies programmes that are intended to provide services to the elderly as indicated in related national and sectoral policies.

15.2.3 Marital Status and Early Marriages

Key Findings

- i. About three percent (3.4%) percent of the female population aged 15 - 19 in Dodoma Region is married; and
- ii. About nine percent (9.3 %) of female population aged 15 years and above is widowed.

Implications for Policies and Programmes

- i. Early marriages, though relatively low in Dodoma Region, have potentially lifelong harmful consequences such as, early pregnancies, child and maternal mortality and domestic violence. Girls who marry at younger ages are also denied education, economic opportunity as well as resulting to psychological consequences; and

- ii. Widowhood may lead to social and economic difficulties, such as declining economic growth and increasing poverty levels as well as to change of family formation and unbalanced child upbringing.

Recommendations

- i. Regional and Local Government Authorities should strengthen supervision and implementation of national and sector policies related to girl child education and welfare;
- ii. Regional and Local Government Authorities need to scale up measures to enforce laws and regulations that prohibit incidences of early marriage; and
- iii. The Regional and Local Government Authorities to develop supportive programmes for widows such as cash transfer, public works programmes like those implemented under Tanzania Social Action Fund (TASAF).

15.2.4 Possession of National Identification Documents

Key Findings

- i. About thirty eight percent (38.1%) of children under five years of age in Dodoma Region have neither birth certificate nor birth notification;
- ii. About one quarter (25.9%) and 12.6 percent of persons aged 18 years and above have national identification cards (NIDA) and national identification numbers respectively; and
- iii. Ten percent (10.0 %) of persons in Dodoma Region have health insurance from National Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF).

Implications for Policy and Programmes

- i. National identification documents are important for citizens to access services and fulfil their rights and obligations. They also help in association of information in the national databases, national security issues and law enforcement. Moreover, birth and national certification is mandatory for every citizen and therefore high proportion of persons without birth certificate and national identification is contrary to Births and Deaths Registration Act, (CAP 108, R.E 2002) and Registration and Identification of Persons Act of 1986 (R.E 2012);

- ii. Birth certificate is a crucial document for children to access services before the age of 18 years, which is the minimum age for acquiring the National Identification Card; and
- iii. Health Insurance Identification card is important for ensuring accessibility to quality health care services.

Recommendations

- i. Regional Local Government Authorities as well as other stakeholders need to educate and regularly sensitize the public, especially the youths on the importance of national identification documents; and
- ii. Regional Authorities, Local Government Authorities and stakeholders need to educate and regularly sensitize the public on the importance and benefits of Universal Health Insurance Act of 2023.

15.2.5 Orphanhood

Key Findings

- i. About eight percent (8.3%) of children in Dodoma Region are orphans (6.1% with one parent dead and 2.2% both parents dead); and
- ii. Percentage of orphaned children under age 18 range from 2.3 percent in Bahi District Council to 9.8 percent in Bahi District Council.

Implications for Policies and Programmes

- i. Orphans are likely to become victims of violence, human trafficking and exploitation, as well as likelihood to experience mental health challenges; and
- ii. The orphanhood may lead to increased costs of care to families, households, communities and councils.

Recommendations

- i. Regional and Local Government Authorities as well as stakeholders need to sensitize communities on the plight of orphaned children and take actions to minimize their sufferings; and
- ii. Regional and Local Government Authorities to sustain mobilization and allocation of adequate resources to support plans and programmes regarding orphanage services including education subsidies and running cost of caring centres.

15.2.6 Literacy and Education (check)

Key Findings

- i. About three quarters (76.3%) of population aged 15 years and above in Dodoma Region is literate. Literacy rates range from 60.8 percent in Bahi District Council to 90.2 percent Dodoma City Council;
- ii. Net Enrolment Rate (NER) in primary school increased from 67.7 percent in 2012 to 77.4 percent in 2022. The rates for 2022, range from 59.0 percent in Bahi District to 92.3 percent in Kondoa Town;
- iii. About fourteen percent (13.5%) of secondary school age children (14-17 years) dropped out of school;
- iv. About fifty six percent (56.3%) of Persons with Disabilities (PWDs) dropped out of education for people with mental health challenges; and
- v. Primary school Gross Enrolment Ratio is 112.8 percent.

Implications for Policies and Programmes

- i. Adult literacy and enrolment rates in the Region are relatively low when compared with the national averages which signifies the presence of sizeable number of illiterate persons in the region, which may hinder regional and national efforts of achieving development targets;
- ii. Disparities in education (literacy and enrolment) may lead to slow achievement in national development targets and may lead to lack of harmony in the society;
- iii. Increased rate of net enrolment in primary schools implies an increase of resources required to finance education sector as a result of increased capitation grant, facilities and human resources;
- iv. School dropout has significant implication both at the individual and society level. Dropouts lead to cycle of poverty and increased risks of committing crime and may also imply inefficiency in education system; and
- v. Persons With Disabilities are already disadvantaged; this coupled with lack or poor education aggravates their level of poverty leading to an increase in intergenerational poverty.

Recommendations

- i. Regional and Local Government Authorities need to enhance efforts (awareness campaigns, by-laws, resource mobilization and allocation) to raise literacy rates in the region in order to achieve national targets and address disparities among councils;
- ii. Regional and Local Government Authorities need to put in place effective mechanism to ensure supervision and implementation of provision of skills training as emphasised in the National Education Policy (2023);
- iii. Regional and Local Authorities to establish major causes of relatively high drop-out rate in secondary schools, create supportive learning environment, address individual needs and provide resources to keep students engaged and motivated;
- iv. Regional and Local Government Authorities as well as stakeholders to support measures to strengthen education system for PWDs to address the issue of high dropout rate among PWD; and
- v. Regional and Local Government Authorities as well as stakeholders to raise awareness of parents and guardians of PWDs on the importance of supporting their educational development initiatives.

15.2.7 Employment and Economic Activities

Key Findings

- i. The current unemployment rate in Dodoma Region is 5.1 percent; the rate is high in urban (8.3%) than in rural (3.0%) areas;
- ii. Agriculture, forestry and fishing industry has the highest proportion (64.4 %) of the total employment in Dodoma region; and
- iii. About fifty eight percent (58.2%) of youth population aged 15 - 35 are engaged in informal non-agricultural economic activities in Dodoma Region.

Implications for Policies and Programmes

- i. Unemployment can lead to a reduction in economic growth, as unemployed individuals have less disposable income to spend on goods and services, which can lead to a decrease in demand for goods and services. The 5.1 percent unemployment for Dodoma Region is below the national level (7.8%) and is considered moderate, which indicates that its impact on economic growth is also moderate;

- ii. Unemployment can also have a negative impact on individuals and families such as financial hardship, social isolation and a loss of self-esteem. They may also experience negative health outcomes including depression, anxiety and stress;
- iii. Agriculture, forestry and fishing industry is key sector for employment in the region. Therefore, interventions to develop the sector will lead to more job creation and sustenance of employment; and
- iv. Informal sector is a significant youth employing sector in Dodoma Region. This sector generates income for youth leading to poverty reduction and it can also lead to local community development. However, the informal sector is insecure and lacks social protection.

Recommendations

- i. Regional and Local Government Authorities to put in place measures aimed at improving agriculture, forestry and fishing industry in line with national policies so as to increase sector productivity;
- ii. Region and Local Government Authorities in collaboration with other stakeholders to develop programmes and projects that promote entrepreneurship and self-employment, access to education and vocational training for the youth; and
- iii. Region and Local Government Authorities to create conducive business environment for the private sector to thrive by streamlining bureaucratic procedures, regulations, and facilitate access to affordable credit.

15.2.8 People With Disabilities

Key Findings

- i. Over twelve percent (12.3%) of the total population in Dodoma Region aged 7 years and above have some form of disability;
- ii. Most Persons with Disabilities (56.4%) reported diseases as major cause of their disability;
- iii. Almost seven percent (6.5%) of Persons with Disabilities (PWDs), reported their disability to have been caused by accidents; and
- iv. Use of assistive devices among PWDs is low.

Implications for Policies and Programmes

- i. Although prevalence of disability is moderate, its presence implies additional cost of care for the household and the society at large;
- ii. Persons With Disabilities are more likely to experience adverse social economic outcomes such as poor health and poverty due to barriers to education, employment, earnings and weak social protection mechanisms. However, use of assistive devices reduces the negative effects of disability; and
- iii. Poor Persons with Disabilities are caught in vicious cycle of poverty and disability, each being cause and consequence of the other.

Recommendations

- i. Regional and Local Government Authorities need to ensure that all programs and projects in councils integrate issues of PWDs so that they can fully participate in their own development using resources available in the region;
- ii. Regional and Local Government Authorities as well as stakeholders to strengthen health and nutrition education programmes for prevention and cure so as to reduce the incidences of disease leading to reduction of prevalence of disability in the region;
- iii. Regional and Local Government Authorities should put in place effective supervision mechanism for organs responsible with safety issues including road and occupational places; and
- iv. Regional and local Government authorities to undertake regular sensitization, advocacy and awareness raising campaigns on the use of assistive devices and facilitate access to these devices.

15.2.9 Land Ownership

Key Findings

- i. About fifty eight percent (57.9%) of persons aged 15 years and above own land without any legal documents in Dodoma region, with significant disparity between the councils, ranging 70.4 percent in Kondoa District to 39.4 percent in Dodoma City; and
- ii. The proportion of males who own land alone is significantly higher (22.4%) than females (14.3%).

Implications for Policies and Programmes

- i. The overall aim of the National Land Policy is to promote and ensure a secure land tenure system, to encourage the optimal use of land resources, and to facilitate broad-based social and economic development without upsetting or endangering the ecological balance of the environment;
- ii. Gender inequality in land ownership is a critical issue in Dodoma Region, with significant implications;
- iii. Existence of gender inequality in land ownership leads to unequal economic opportunities;
- iv. Lack of legal documents for land ownership leads to insecurity of land properties and inaccessibility to economic opportunities; and
- v. Women who own land can engage in income generating activities leading to empowerment, poverty reduction and better livelihood.

Recommendations

- i. Regional and Local Government Authorities to strengthen monitoring implementation of the 1997 Land Policy to accelerate land ownership process by strengthening capacities of responsible institutions;
- ii. Regional and Local Government Authorities need to address gender disparity in land ownership to guarantee economic empowerment and achieve human rights outcomes; and
- iii. Regional, Local Authorities and other stakeholders should regularly conduct education and awareness campaigns about women's land rights and benefits of joint land ownership to promote gender equality for sustainable development and poverty reduction.

15.2.10 Drinking Water

Key Findings

- i. About sixty eight percent (67.8%) of private households in Dodoma Region use drinking water from improved sources;
- ii. Percentage of households using improved sources of drinking water is higher in urban (85.8%) than in rural areas (56.3%); and
- iii. Percent of households using improved sources of drinking water range from 39.3 percent in Bahi District Council to 88.0 percent in Dodoma City Council.

Implications for Policies and Programmes

Use of water from unimproved sources has implication on human health as these sources are easily contaminated leading to poor health outcomes. About one third of private households in Dodoma Region is using water from unimproved sources for drinking, hence a high likelihood of poor health outcome emanating from water usage.

Recommendations

- i. Region and Local Government Authorities needs to initiate new water supply projects especially in underserved rural areas and councils; and
- ii. Region and Local Government Authorities should allocate enough resources to rural areas and councils that are lagging behind in the use of improved sources of water for drinking.

15.2.11 Sanitation

Key Findings

- i. More than half (54.5%) of household in Dodoma Region use improved toilet facilities; with significant disparities between councils, ranging from 32.8 percent in Bahi District to 86.4 percent in Dodoma City; and
- ii. About five percent (5.3%) of households in Dodoma Region have no toilet facility with notable disparity between councils ranging from 14.3 in Chemba District to 1.3 percent in Dodoma City.

Implications for Policies and Programmes

- i. Use of unimproved or non-use of toilet facilities contributes to the spread of infectious diseases such as cholera, diarrhoea, dysentery, hepatitis A, typhoid, and polio. These diseases can lead to serious illness (morbidity) and even death (mortality); and
- ii. Unsafe sanitation practices can contaminate water sources, soil, and ecosystems. This pollution affects not only human health but also the environment. Proper sanitation facilities help prevent contamination and protect natural resources.

Recommendations

- i. Regional and Local Government Authorities need supervise and implement effectively sanitation projects at local/community level to avoid adverse effects of poor sanitation;
- ii. Regional and Local Government Authorities to strengthen and enforce by-laws for effective implementation of sanitation and hygiene initiatives; and
- iii. Regional and Local Government Authorities in collaboration with stakeholders to undertake sanitation and hygiene education awareness campaigns in the communities.

15.2.12 Energy

Key Findings

- i. About sixty five percent (65.4%) and 18.1 percent of private households in Dodoma Region use firewood and charcoal respectively as the main source of energy for cooking;
- ii. About fourteen percent (14.3%) of households in Dodoma Region use clean energy for cooking;
- iii. Almost twenty nine (28.9%) of households use electricity from national grid for lighting; with significant disparity between councils ranging from 9.3 percent in Bahi District to 60.3 percent in Dodoma City; and
- iv. About one quarter (26.2%) of households in Dodoma Region use solar energy for lighting.

Implications for Policies and Programmes

- i. High proportion of households using firewood and charcoal as main source of energy for cooking lead to detrimental impact on environment by perpetuating deforestation, land degradation, soil erosion, air pollution and loss of forest resources and therefore contributing to climate change;
- ii. Use of clean energy signals the potential of addressing environmental destruction and natural resources;
- iii. Access to national grid in Dodoma Region is generally low, which implies constrained economic opportunities/potentials for the Region and Councils; and
- iv. Disparities in energy access between councils lead to unequal development due to unlocked income generating opportunities due to unavailability of reliable energy from the national grid.

Recommendations

- i. Regional and Local Government Authorities to support national campaign on the use of gas as an alternative source to charcoal and firewood;
- ii. Regional and Local Government Authorities to sensitize communities the importance of using clean energy, negative effects of dirty energy and deforestation which are main causes of climate change; and
- iii. Regional and Local Government Authorities in collaboration with TANESCO and REA to identify and put in place a plan to hasten distribution and installation of electricity to households and communities

15.2.13 Information and Communication Technology (ICT) Access and Use by Individual and Households

Key Findings

- i. Almost eight out of ten households (82.1%) in Dodoma Region have at least one member aged 4 years and above who owns a mobile phone;
- ii. Less than one percent of both males (0.5%) and females (0.7% each) aged 15 years and above own a smartphone or a tablet;
- iii. About one (1.1%) and about three percent (1.7%) of persons aged 15 years and above own a desktop or laptop computer respectively; and
- iv. About one third (32.6%) of households in Dodoma Region own a radio while 19.7 percent own television with notable disparities between councils ranging from 17.5 percent in Chemba District to 63.3 percent in Kondoa District (Radio) and from 6.0 percent in Bahi District to 45.9 percent in Kondoa District (Television set).

Implications for Policy and Programmes

- i. The level of adoption of ICT services among households and individuals shows that the sector is growing in the right direction. Despite this growth, evidence from other sources (administrative data) shows that the digital divide gap is still high. For instance, though the broadband population coverage in Tanzania, was 72 percent in 2022, only around 45 percent of the population used broadband services;

- ii. Ownership and usage of ICT smart devices (smartphones, tablets and computer) are low which contribute to low speed of broadband services uptake;
- iii. Access and use of ICT services is low among females compared to males as well as between urban and rural areas; and
- iv. Low ownership and use of radio and television hinders communication of important information and services.

Recommendations

- i. Regional and Local Government Authorities need to promote and supervise digital literacy programmes in education curriculum at pre-primary, primary and secondary education levels; and
- ii. Regional and Local Government Authorities need to raise awareness in communities to establish digital networks where they can share communication facilities and promote access to communication service and digital skills

15.2.14 Information on Buildings

Key Findings

- i. About sixty four percent (63.5%) of all buildings in Dodoma Region have physical addresses;
- ii. About forty four percent (44.2%) of all buildings in Dodoma Region have electricity services, of which 17.9 percent are connected to the national grid and 26.3 percent are powered by other sources;
- iii. About fourteen percent (14.3%) of all buildings have water services;
- iv. About three percent (3.2%) of all buildings in Dodoma Region have infrastructure for Persons with Disabilities;
- v. Seventy one percent (71.0%) of all buildings in Dodoma Region are built on un-surveyed land; with significant disparities between councils ranging from 24.6 percent in Dodoma City to 89.4 percent in Bahi District.; and
- vi. About forty-seven percent (46.7%) of all buildings in Dodoma Region are constructed on land that does not have legal documents.

Implications for Policies and Programmes

- i. Physical address is crucial for accessing emergency services, facilitate commerce and government taxes such as property tax. Addresses are also useful for enforcing regulation and management of land planning and use as well as provision and billing of utilities (water, electricity and gas);
- ii. Large percentage of buildings that do not have friendly infrastructure for Persons with Disabilities causes difficulty for this group to reach and use the buildings, thus depriving them the basic rights to access services provided in those buildings;
- iii. Buildings without legal ownership documents indicate that: - The National Programme of Land Planning, Surveying and Titling has not yet been able to reach many beneficiaries, a loss of Government revenue, tenure insecurity among land holders, increase in land related conflicts and inability of land owners to use their land as a mortgage for obtaining loans; and
- iv. Presence of many buildings in unplanned and un-surveyed areas signifies escalation of informal settlements, lack of social services and infrastructure.

Recommendations

- i. Regional and Local Government Authorities to effectively supervise the identification and posting of physical addresses and regularly undertake the exercise to take into account growth of settlements;
- ii. Regional and Local Government Authorities to facilitate efforts by utility companies to provide electricity and water services in a manner that will enable low-income clients to be connected to these services;
- iii. Regional and Local Government Authorities to strengthen supervision and enforce laws that require buildings to have friendly infrastructure for PWDs;
- iv. Regional and Local Government Authorities to strengthen supervision of implementation of the National Programme of Land Use Planning, Surveying and Titling together with Land Tenure Improvement Programme (LTIP); and
- v. Regional and Local Government Authorities to strengthen and strategically manage land use plans and surveying projects.
