# NJOMBE REGION, ADMINISTRATIVE BOUNDARIES

## Foreword

The 2022 Population and Housing Census (PHC) for the United Republic of Tanzania had its reference as the midnight of the 22<sup>nd</sup>/23<sup>rd</sup> August 2022. This was the Sixth and the first digital Census after the Union of Tanganyika

and Zanzibar in 1964. Other post union censuses were carried out in 1967, 1978, 1988, 2002 and 2012. The Sixth Phase Government of Tanzania under the leadership of Her Excellency Dr. Samia Suluhu Hassan and the Eighth Phase Government of Zanzibar under the leadership of His Excellency Dr. Hussein Ali Mwinyi, like the previous phases, have fulfilled their obligation of conducting the 2022 PHC according to the United Nations Principles and Recommendations for the Population and Housing Census. **We owe them much appreciation for their commitment and support during Census implementation.**

The 2022 PHC was conducted in accordance with the Statistics Act Cap 351, which mandates the Government of the United Republic of Tanzania to conduct Population and Housing Census every ten years. It also followed the United Nations Principles and Recommendations for conducting the 2020 Round of Population and Housing Census, including adoption of advanced Information and Communication Technology (ICT) at all stages of Census implementation. Indeed, the country's decision to use more advanced technology to capture data during cartographic mapping, enumeration, data transmission and processing made the 2022 PHC the first ever digital census to be conducted in Tanzania.

The Government of the United Republic of Tanzania conducted for the first time the 2022 Tanzania Buildings Census (2022 TBC), an exercise done concurrently with the 2022 Population and Housing Census. Buildings are amongst the most important infrastructure in the lives of people in Tanzania and around the world. Buildings help to preserve and promote the lives of individuals, families and society at large in the economic, social, political and cultural spheres. Moreover, buildings as part of premises are an important criterion for measuring the state of a non-income economy for an individual or community concerned. The main uses of

buildings in the lives of rural and urban people include residential, commercial, commercial-residential, institutional and industrial. Apart from addressing the long-time challenges of lack of information on buildings in the country, the 2022 TBC has been conducted to meet the requirements of various national, regional and international policies pertaining to human settlements development. This huge national undertaking has been made practical due to a clear understanding that, buildings census is the primary means of accessing complete, accurate, adequate, timely and reliable building information.

The 2022 PHC and TBC results are for integrated plans and sustainable development of the country and will increase awareness and transparency in allocation of resources at all levels of administration based on the actual population. The results will be used by the Government and stakeholders in monitoring and evaluating various national, regional and international development frameworks including the Tanzania Development Vision 2025 and Zanzibar Development Vision 2050; the Third National Five-Year Development Plan 2021/22 - 2025/26 and Zanzibar Development Plan 2021/22 - 2025/26; the East African Community Vision 2050; Southern African Development Community Vision 2050 and the African Development Agenda 2063.

Furthermore, the results will enable the country to evaluate the progress of implementation of Sustainable Development Goals (United Nation Agenda 2030); goals that aim at achieving equality and eradicating poverty of all kinds including extreme poverty by 2030 by ensuring no one is left behind. The census data will also provide a basis for the computation of several indicators such as enrolment and literacy rates, infant and maternal mortality rates, unemployment rate and others.

The Regional Basic Demographic and Socio-Economic Profile reports are the sixth in a series of major planned publications for the 2022 PHC. The major reports that have been produced so far are Administrative Units Population Distribution Reports, Age and Sex Reports, The Tanzania Basic Demographic and Socio-Economic Profile and *Ripoti ya Idadi ya Watu katika Majimbo ya Uchaguzi (Constituency Population Distribution Report)* in two volumes of United Republic of Tanzania and Tanzania Zanzibar. The first three major reports are in three volumes for the United Republic of Tanzania, Tanzania Mainland and Tanzania Zanzibar. The main

purpose of this report is to provide a short descriptive analysis and related tables on main thematic areas covered in the 2022 Population and Housing Census. Areas covered include population and household characteristics, as well as social and economic activities. Other reports in the series of planned Census publications will be Thematic Reports.

The success of both 2022 PHC and TBC depended on the cooperation and contributions from the Government, specifically Census Committees from national to the lowest administrative level. These include the National Central Census Committee; National Census Advisory Committee; National Census Technical Committee; Census Committees at regional, district, wards, village/mtaa and hamlet. There were also forums from Non-States Actors including Collaborators Forum, Private Sector, various institutions and the public at large.

A word of thanks goes to Government leaders at all levels, particularly, Minister for Finance; Minister for Lands, Housing and Human Settlements Development, Minister of State - President's Office, Finance and Planning, Zanzibar; Minister for Lands and Housing Development Zanzibar; Members of Parliament; Members of the House of Representatives; Councillors/Shehas; Regional and District Census Committees chaired by Regional and District Commissioners of respective areas; Census Coordinators (National and Zanzibar); Regional and District Census Coordinators; Supervisors; Enumerators; Local leaders and all respondents (heads of households, members of households and other individuals).

Special gratitude is extended to the following Development Partners:- United Nations Population Fund (UNFPA); World Bank (WB); United Nations Children's Fund (UNICEF); UN-Women; International Organization for Migration (IOM); United States Agency for International Development (USAID); Foreign, Commonwealth and Development Office (FCDO); United States Census Bureau (USCB), The Republic of South Korea, The People's Republic of China and other Development Partners for providing equipment, expertise, training and financial support in making the 2022 Population and Housing Census a success. We also thank religious, traditional and political leaders, non-governmental organization leaders, the media and all citizens and non-citizens in general for their participation and contributions in the successful implementation of the Census.

Special thanks also go to Honourable Anne Semamba Makinda - Census Commissar for Tanzania Mainland and Former Speaker of the National Assembly and Honourable Ambassador Mohamed Haji Hamza - Census Commissar for Tanzania Zanzibar, for their effective leadership and management in educating and sensitizing all citizens and non-citizens to participate in the 2022 Population and Housing Census, thus resulting in enhanced quality, smooth and timely execution of the Census exercise. We also thank the Chairperson of the Governing Board of the National Bureau of Statistics (NBS), Dr. Amina Msengwa and the Chairperson of the Statistics Board of Zanzibar, Ambassador Amina Salum Ali, for their guidance throughout the implementation of the Census exercise.

Last but not least, we acknowledge the unprecedented efforts and commitment of the management and staff of the National Bureau of Statistics under the leadership of Dr. Albina Chuwa, the Statistician General; and staff of the Office of the Chief Government Statistician, Zanzibar under the leadership of Mr. Salum Kassim Ali; Chief Government Statistician; staff from the Ministry of Lands, Housing and Human Settlements Development; Ministry of Information, Communication and Information Technology; as well as other Government officials who worked tirelessly in ensuring that the 2022 Population and Housing Census was implemented successfully.

**Kassim Majaliwa Majaliwa (MP)**  
Prime Minister of  
The United Republic of Tanzania

**Hemed Suleiman Abdulla (MHR)**  
Second Vice President of Zanzibar

## Acknowledgement

The National Bureau of Statistics and Office of the Chief Government Statistician, Zanzibar conducted the 2022 PHC and TBC to provide necessary information for policy implementation, planning, monitoring and evaluation of development processes. The Census collected detailed information on demographic characteristics, fertility, mortality, migration, orphanhood, disabilities, possession of national documents, education, economic activities, land ownership and information related to ICT ownership and use, housing ownership and assets, agriculture, community facilities and buildings. Some information on physical addresses were also collected.

This report presents basic demographic and socio-economic indicators from regional to Council level. The report will facilitate users of Census data to make evidence-based decisions for social and economic development. We therefore express our appreciation to all experts who have put their time and efforts to produce this report. In particular, we would like to thank Ruth Davison Minja, the Director of Population Census and Social Statistics; Fahima Mohamed Issa, Director of Social Statistics, Census and Survey, (OCGS); Seif Ahmad Kuchengo, the National Census Coordinator; Abdul-majid Jecha Ramadhan, the Tanzania Zanzibar Census Coordinator, National Census Technical Team, Statisticians, Demographers, Information Technology and Geographic Information System officers for their commitment which led to successful completion of this report.

Our appreciation is as well extended to all professionals, regional and district supervisors, enumerators and field supervisors as well as the media for their dedicated work. Certainly, without their commitment and dedication, the census would not have been successful. We would also like to thank the public for their cooperation during the entire period of the Census.

**Dr. Albina Chuwa**  
Statistician General  
National Bureau of Statistics

Statistician, Zanzibar

## Executive Summary

---

The 2022 Njombe Region Basic Demographic and Socio-Economic Profile provides a short descriptive analysis and related tables on main thematic areas covered in the 2022 Population and Housing Census as well as the 2022 Buildings Census. Areas covered are population size, growth and distribution; age and sex profile; household composition; marital status; national identification documents and citizenship; survival of parents; education, literacy and numeracy; employment and economic activities; disability; land ownership; housing characteristics, asset ownership and environmental control; access and use of Information and Communication Technology (ICT) by individuals and households; and Information on buildings. In many cases, information has been disaggregated by place of residence and where possible comparisons have been made with previous Census(es) to observe the trend over time. New topics covered in the 2022 PHC for the first time to fill the national data gaps include; national identification documents, numeracy, land title deed status, production and disposal of Electronic and Electric Equipment Waste (EEEW), forestry and ICT. The report also provides policy recommendations emanating from key findings on areas covered by the 2022 PHC.

**Chapter One** presents an overview of the 2022 PHC. It gives a brief history of census undertaking in the country and the main objective of the 2022 PHC. It also highlights on preparatory and implementation of census activities at different levels as well as the legal framework, census organisation structure, development of census instruments, cartographic work, pilot census, census publicity and advocacy campaigns. Furthermore, this Chapter elaborates on census enumeration activities including recruitment and training of personnel, distribution of enumeration materials and the actual enumeration exercise. Post enumeration activities (data processing and quality control procedures) are also discussed in this Chapter.

**Chapter Two** gives a user of this publication an understanding on the size, growth and distribution of Njombe Region population from the 2022 PHC and previous censuses. Njombe Region has a population of 889,946 persons, out of those 420,533 are males and 469,413 are females. Population of Njombe Region grew at an average annual growth rate of 2.4 percent from 2012 to 2022 representing an increase of 26.8 percent over a 10-year period. At this rate, the population of Njombe Region is expected to double in the next 29 years. The Region's

population remains predominantly rural, with 70.4 percent of its total population living in rural areas and 29.6 percent living in urban areas.

**Chapter Three** is about age and sex profile of Njombe Regional population. The chapter presents population by sex and major age groups. The data depict a young population age structure with a median age of 20.7 years. More than thirty eight percent (38.1%) of the population is aged below 15 years. The percentage of the working age population (15 - 64 years) has increased from 51.5 percent in 2002 Census to 56.8 percent in 2022. Results from 2022 PHC also show that the proportion of the working age population is higher (60.8%) in urban areas compared with rural areas (55.2%), and the age dependency ratio for the region is 75.9. The percentage of the elderly population aged 65 years and above in Njombe Region increased from 4.1 percent to 5.0 percent in 2022.

**Chapter Four** presents information on household composition whereby results show that Njombe Region has 244,579 private households, out of which 76,541 (31.3%) are in urban areas. This is an increase from 23.8 percent in 2012 PHC indicating increasing urbanization in the region. Female-headed households in the Region increased from 38.0 percent in 2012 to 39.5 percent in 2022. Furthermore, the percentage of female headed households is higher (42.1%) in urban areas than in rural areas (38.4%). The average household size for the region decreased from 4.1 persons in 2012 to 3.6 persons in 2022.

**Chapter Five** presents the census results on marital status for persons aged 15 years and above. About 47.7 percent of persons aged 15 years and above in Njombe Region are married, where males are more likely (48.9%) to be married than females (46.8%). About 7.5 percent of persons aged 15 years and above are widowed; the percentage of widowed females is significantly higher (12.0%) than that of males (2.1%). The results further show that females get married at a younger age than males. The Mean Age at First Marriage in Njombe Region is 26.9 years for males and 23.8 years for females. The Mean Age at First Marriage for both males and females has increased from 25.2 percent to 26.9 percent and 22.1 years to 23.8 years in 2012 and 2022 censuses respectively.

**Chapter Six** provides information on national identification documents and citizenship. The majority of the population (61.8%) in Njombe Region have neither birth certificates nor birth notifications. Only 35.1 percent have birth certificates and a mere 2.2 percent have birth notifications. Analysis by age indicates that, the population aged 5 – 9 years has the highest percentage (67.6%) of individuals with birth certificates, followed by under-five (63.7%) population. Results on other national identification documents show that, 33.2 percent of persons aged 18 years and above have national identification cards and 14.5 percent of persons have national identification numbers. It is also noted that only 80,392 persons (9.2%) out of 875,640 persons in private households in the region have health insurance from National Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF).

Results show that 889,946 persons (99.9%) enumerated in Njombe Region are Tanzanians. The majority of non-Tanzanians are from other African countries (540 persons) followed by other East African countries (321 persons) and Outside Africa(141).

**Chapter Seven** presents information on survival of parents. Results indicate that about nine out of ten children (89.5%) under 18 years in Njombe Region have both parents alive. Almost one out of ten (10.6%) children under 18 years are orphans with proportionately higher in urban areas (10.9%) than rural areas (10.4%). More than eight percent (8.2%) of children under 18 years are orphans with one parent dead while two percent (2.4%) are orphans with both parents dead. Makete District Council has the highest percentage (12.3%) of orphans (with at least one parent dead) compared with other councils in Njombe Region.

**Chapter Eight** presents information on education, literacy and numeracy. Adult literacy rate for persons aged 15 years and above in Njombe Region is 90.0 percent. Literacy rate is higher among males (93.1%) than females (87.4%). Numeracy rate among persons aged five years and above is 87.5 percent and it is higher (88.4%) among males than females (86.7%). The Net Enrolment Rate (NER) for primary schools is 95.5 percent. It is higher among females (96.7%) than males (94.3%). Majority (72.7%) of population aged four years and above attained primary education, 19.9 percent attained ordinary level secondary education and 4.9 percent attained university education and other related education level.

**Chapter Nine** presents information on employment and current economic activities for persons aged 15 years and above. There are 406,941 (75.7%) persons in employment. The current unemployment rate in Njombe Region using Internationally relaxed definition is 6.1 percent. Females in urban have higher unemployment rate (13.4%) than males (8.5%). The overall Labour Force Participation Rate (LFPR) for Njombe Region is 80.6 percent.

**Chapter Ten** highlights statistics on disability status in Njombe Region. For the purposes of this report, Persons With Disabilities (PWDs) are those with physical, mental, intellectual or sensory impairment which may hinder or limit their full and effective participation in society on an equal footing with others. About eleven percent (10.7%) of the total population aged 7 years and above is living with some form of disability. Difficulty in seeing (2.5%) and walking (1.9%) are the most common types of disabilities in Njombe Region.

**Chapter Eleven** focuses on status of land ownership including information on persons owning land, type of ownership and legal documents possession. More than forty-five percent (45.1%) of the population aged 15 years and above in Njombe Region own land for different uses, including agriculture, residential, commercial or industrial. The proportion of females owning land is lower (43.4%) than that of males (47.2%). More than fifty nine percent (59.3%) of persons aged 15 years and above in Njombe Region own land without legal documents. Among the land owners with legal documents in Njombe Region, majority of them own land jointly (23.7%) followed by those owning land alone (15.5%).

**Chapter Twelve** presents information on housing characteristics, assets ownership and environmental control in Njombe Region. More than seven out of ten (70.6%) households in Njombe Region live in their own houses. More than one-third (38.8%) of households have no legal rights over the land where their houses are built. More than sixty seven percent (67.3%) of households are living in houses with improved floor covering materials. More than eighty percent (80.4%) of households in Njombe Region use improved sources of drinking water. More than eighty percent (80.3%) of households in Njombe Region use improved toilet facilities

The majority of households in Njombe Region use firewood (66.4%) and charcoal (21.7%) as main sources of energy for cooking. The main source of energy for lighting is solar energy used by 41.8 percent of households. Percentage of households using electricity from the national

grid for lighting increased from 11.9 percent in 2012 to 35.9 percent in 2022. About four out of ten (38.7%) households in Njombe Region use burning of solid waste as the main method of solid waste disposal and 55.1 percent of households mix electronic waste with other refuse.

**Chapter Thirteen** highlights the households and individuals Access and Use of Information and Communication Technology (ICT), including Ownership of ICT equipment and the Type of Use of ICT equipment in Njombe Region. It is shown that there is a significant mobile phones penetration in this region, with 85.2 percent of persons aged 15 years and above who own any mobile phone whereby more than two thirds (67.4%) of them own only non-smartphones. Usage of ICT equipment for communication is similarly high (85.4%) for persons aged 15 years and above. The non-smartphones are mostly used by individuals who attained training after primary education (98.8%). About four percent (3.9%) of persons aged 15 and above in Njombe Region use laptops and two percent (2.3%) use desktop computers.

**Chapter Fourteen** provides information on the number of buildings, types of buildings, main uses of buildings and the number of units in residential and commercial-residential buildings in Njombe Region and Councils levels as per the 2022 Tanzania Building Census (2022 TBC). Findings indicate that 73.8 percent of all buildings/units in Njombe Region are occupied by the owners themselves, and 11.3 percent are occupied by tenants. More than sixty-four percent (64.3%) of all individually owned buildings in Njombe Region are owned by males, 24.7 percent by females and 7.7 percent are jointly owned. About fifty six percent (55.5%) of all buildings have permanent flooring materials (sand-cement, Tiles (marble/ceramic/PVC) and Terrazzo).

About seventy-two percent (71.9%) percent of all buildings in Njombe Region are built on un-surveyed land. More than forty five percent (45.6%) of all buildings/units in Njombe Region are constructed on land that does not have legal documents. About twenty-two percent (21.7%) of all buildings in Njombe Region are connected to the national grid electricity, while 38.0 percent are powered by other sources. About thirty five percent (35.3%) of all buildings have water services and nearly six percent (5.6%) of all buildings/units in Njombe Region have infrastructure for the Persons With Disabilities.

# TABLE OF CONTENTS

<b>CHAPTER 1</b> .....	<b>11</b>
<b>OVERVIEW OF THE 2022 POPULATION AND HOUSING CENSUS</b> .....	<b>11</b>
1.1 INTRODUCTION.....	11
1.1.1 A Brief History of Census Undertaking in Tanzania.....	11
1.2 OBJECTIVES OF THE 2022 PHC.....	12
1.2.1 Specific Objectives of the 2022 PHC.....	12
1.3 PREPARATIONS FOR THE 2022 PHC.....	12
1.3.1 Legal Framework.....	12
1.3.2 Census Organisation.....	13
1.3.3 Development of Census Instruments.....	13
1.3.4 Cartographic Work.....	14
1.3.5 Pilot Census.....	15
1.3.6 Census Publicity and Advocacy Campaign.....	17
1.4 CENSUS ENUMERATION ACTIVITIES.....	18
1.4.1 Recruitment and Training.....	18
1.4.2 Other Preparations for Enumeration.....	18
1.4.3 Enumeration.....	18
1.4.4 Post Enumeration Activities.....	19
1.5 DATA PROCESSING.....	19
1.6 QUALITY CONTROL PROCEDURES.....	20
<b>CHAPTER 2</b> .....	<b>21</b>
<b>POPULATION SIZE, GROWTH AND DISTRIBUTION</b> .....	<b>21</b>
2.1 INTRODUCTION.....	21
2.2 POPULATION SIZE.....	21
2.2.1 Population Size by Council.....	22
2.2.2 Rural and Urban Population.....	23
2.3 POPULATION CHANGE AND GROWTH.....	24
2.3.1 Population Change.....	24
2.3.2 Annual Population Growth Rate and Trends.....	24
<b>CHAPTER 3</b> .....	<b>26</b>
<b>AGE AND SEX PROFILE</b> .....	<b>26</b>
3.1 INTRODUCTION.....	26
3.2 QUALITY OF AGE AND SEX DATA.....	27
3.2.1 Population Distribution by Five Year Age Groups.....	28
3.2.2 Population Pyramid.....	30
3.3 POPULATION DISTRIBUTION BY SELECTED AGE GROUPS.....	33
3.3.1 Children Under Five Years.....	34
3.3.2 Young Population (0-14 Years).....	35
3.3.3 Young Population (0-17 Years).....	35
3.3.4 Youth Population (15-24 Years).....	36
3.3.5 Youth Population (15 - 35 Years).....	37
3.3.6 Working Age Population (15-64 Years).....	38
3.3.7 Elderly Population.....	38
3.3.8 Age Dependency Ratio.....	40
<b>CHAPTER 4</b> .....	<b>41</b>
<b>HOUSEHOLD COMPOSITION</b> .....	<b>41</b>
Key points.....	41

4.1 INTRODUCTION .....	41
4.2 NUMBER OF HOUSEHOLDS .....	42
4.3 AVERAGE HOUSEHOLD SIZE .....	45
4.4 HOUSEHOLD HEADSHIP .....	46
4.4.1 Households Living in Improved or Unimproved Houses .....	49
4.4.2 Heads of Households by Marital Status and Occupation .....	51
4.4.3 Heads of Household by Type of Toilet Facility .....	53
4.4.4 Heads of Households by Source of Drinking Water .....	57
4.4.4.1 Household Heads with Children Under 18 Years .....	59
<b>CHAPTER 5.....</b>	<b>63</b>
<b>MARITAL STATUS.....</b>	<b>63</b>
5.1 INTRODUCTION .....	63
5.2 MARITAL STATUS.....	64
5.2.1 Marital Status for Selected Age Groups .....	68
5.3 MEAN AGE AT FIRST MARRIAGE .....	72
<b>CHAPTER 6.....</b>	<b>75</b>
<b>NATIONAL IDENTIFICATION DOCUMENTS AND CITIZENSHIP .....</b>	<b>75</b>
6.1 INTRODUCTION .....	75
6.2 NATIONAL IDENTIFICATION DOCUMENTS.....	75
6.2.1 Birth Certificate .....	76
6.2.2 Birth Notification.....	76
6.2.3 Other National Identification Documents .....	80
6.2.3.1 National Identification Cards.....	80
6.2.3.2 Health Insurance .....	82
6.3 CITIZENSHIP .....	83
<b>CHAPTER 7.....</b>	<b>85</b>
<b>SURVIVAL OF PARENTS .....</b>	<b>85</b>
7.1 INTRODUCTION .....	85
7.2 SURVIVAL OF PARENTS.....	86
7.2.1 Survival of Parents by Council .....	88
7.3 ORPHANHOOD.....	89
<b>CHAPTER 8.....</b>	<b>92</b>
<b>EDUCATION, LITERACY AND NUMERACY .....</b>	<b>92</b>
8.1 INTRODUCTION .....	92
8.2 LITERACY.....	92
8.2.1 Literacy for Selected Age Groups .....	96
8.2.2 Adult Literacy.....	96
8.2.3 Adult Literacy in Different Languages .....	99
8.3 NUMERACY .....	102
8.3.1 Adult Numeracy Rates .....	105
8.4 EDUCATION.....	106
8.4.1 School Attendance Status.....	107
8.4.2 Net and Gross School Enrolment.....	118
8.4.3 Gross Enrolment Rate .....	120
8.4.4 Education Attainment.....	122
<b>CHAPTER 9.....</b>	<b>123</b>
<b>EMPLOYMENT AND ECONOMIC ACTIVITIES .....</b>	<b>123</b>
9.1 INTRODUCTION .....	123

9.2 CURRENT ECONOMIC ACTIVITY STATUS.....	123
9.3 CURRENT UNEMPLOYMENT .....	126
9.4 LABOUR FORCE PARTICIPATION RATE .....	127
9.5 EMPLOYMENT BY INDUSTRY .....	127
9.6 OCCUPATION STATUS.....	129
9.6.1 Employment by Sector.....	129
9.7 INFORMAL NON-AGRICULTURAL ECONOMIC ACTIVITIES.....	130
<b>CHAPTER 10.....</b>	<b>132</b>
<b>DISABILITY .....</b>	<b>132</b>
10.1 INTRODUCTION.....	132
10.2 PREVALENCE OF DISABILITY .....	135
10.2.1 Prevalence of Disability by Councils .....	135
10.2.2 Prevalence of Disability by Sex and Council .....	137
10.2.3 Prevalence of Disabilities by Age and Sex .....	138
10.3 PREVALENCE OF PERSON WITH ALBINISM .....	138
10.4 POPULATION WITH OTHER TYPES OF DISABILITY .....	140
10.5 CAUSES OF DISABILITIES.....	142
10.6 USE OF ASSISTIVE DEVICES .....	144
<b>CHAPTER 11.....</b>	<b>145</b>
<b>LAND OWNERSHIP .....</b>	<b>145</b>
11.1 INTRODUCTION.....	145
11.2 LAND OWNERSHIP STATUS .....	145
11.3 POSSESSION OF LEGAL DOCUMENTS.....	150
<b>CHAPTER 12.....</b>	<b>152</b>
<b>HOUSING CHARACTERISTICS, ASSETS OWNERSHIP AND ENVIRONMENTAL CONTROL ...</b>	<b>152</b>
12.1 INTRODUCTION.....	152
12.2 HOUSING OWNERSHIP AND TENURE STATUS.....	152
12.2.1 Legal Ownership of Land .....	154
12.3 HOUSEHOLD CHARACTERISTICS .....	154
12.3.1 Roofing Materials.....	154
12.3.2 Floor Covering Materials .....	156
12.3.3 Wall Materials .....	159
12.3.4 Rooms for Sleeping .....	159
12.4 WATER AND SANITATION.....	161
12.4.1 Source of Drinking Water.....	161
12.4.2 Sanitation Facilities.....	166
12.5 SOURCES OF ENERGY .....	168
12.5.1 Sources of Energy for Cooking .....	168
12.5.2 Sources of Energy for Lighting.....	170
12.6 HOUSEHOLD ENVIRONMENTAL CONTROL .....	174
12.6.1 Waste Disposal.....	174
12.6.2 Waste Collection Authorities .....	175
12.6.3 Electronic Waste Disposal .....	176
12.7 OWNERSHIP OF ASSETS.....	178
12.7.1 Transport Assets.....	178
12.7.2 Housing and Cooking Assets .....	179
12.7.3 Agricultural Assets .....	179
<b>CHAPTER 13.....</b>	<b>181</b>
<b>ACCESS AND USE OF INFORMATION AND COMMUNICATION TECHNOLOGY BY INDIVIDUALS AND HOUSEHOLDS.....</b>	<b>181</b>

13.1 INTRODUCTION .....	181
13.2 HOUSEHOLDS WITH RADIO .....	182
13.3 OWNERSHIP OF TELEVISION .....	182
13.4 HOUSEHOLDS WITH LANDLINE TELEPHONE .....	183
13.5 HOUSEHOLDS WITH INTERNET FACILITY .....	183
13.6 MOBILE PHONES .....	185
13.6.1 Ownership of Mobile Phones by Individuals .....	185
13.6.2 Ownership of Mobile Phones by Households .....	191
13.6.3 Ownership of Mobile Phones by Age Groups and Sex .....	191
13.6.4 Ownership of Mobile Phones by Level of Education .....	194
13.6.5 Usage of Mobile Phones by Individuals .....	198
13.6.6 Usage of Mobile Phones by Type, Age Group and Sex .....	198
13.6.7 Type of Use of ICT Equipment .....	201
13.6.8 Usage of Mobile Phone .....	203
13.6.9 Usage of Mobile Phone by Employment Status and Sex .....	207
13.6.10 Usage of Mobile Phones by Occupation .....	211
13.7 COMPUTERS .....	215
13.7.1 Ownership of Computers by Individuals .....	215
13.7.2 Usage of Computers by Individuals .....	215
13.7.3 Usage of Computers by Age Group and Sex .....	216
13.7.4 Usage of Computers by Highest Level of Education attained and Sex .....	217
13.7.5 Usage of Computers by Employment Status and Sex .....	221
<b>CHAPTER 14.....</b>	<b>229</b>
<b>INFORMATION ON BUILDINGS .....</b>	<b>229</b>
14.1 INTRODUCTION .....	229
14.2 NUMBER OF BUILDINGS .....	230
14.2.1 Buildings with Physical Addresses .....	233
14.2.2 Type of Buildings .....	234
14.2.3 Main Uses of Buildings .....	235
14.2.4 Number of Units in Building .....	238
14.3 BUILDING ATTRIBUTES .....	240
14.3.1 Building Categories .....	240
14.3.2 Construction Status of Buildings .....	241
14.3.3 Building Occupancy Status .....	242
14.3.4 Building Construction Materials .....	243
14.3.4.1 Floor Materials .....	244
14.3.4.2 Wall Materials .....	244
14.3.4.3 Roofing Materials .....	246
14.3.5 Number of Bedrooms .....	247
14.4 BASIC SERVICES IN BUILDINGS .....	248
14.4.1 Electricity .....	249
14.4.2 Water .....	250
14.4.3 Toilets .....	250
14.5 ACCESSIBILITY OF THE BUILDING .....	251
14.5.1 Access Roads .....	252
14.5.2 Infrastructure for Persons with Disabilities .....	252
14.6 TENURE STATUS OF BUILDINGS .....	253
14.6.1 Building Ownership Status .....	253
14.6.2 Building Ownership by Sex .....	254
14.6.3 Building Occupancy Tenure Status .....	256
14.6.4 Building Land Survey Status .....	258
14.6.5 Building Land Ownership Documents .....	259
<b>CHAPTER 15.....</b>	<b>261</b>

<b>SUMMARY OF KEY FINDINGS, IMPLICATION AND RECOMMENDATIONS .....</b>	<b>261</b>
15.1 INTRODUCTION .....	261
15.2 KEY FINDINGS .....	261
15.2.1 Population Size and Growth.....	261
15.2.2 Age Profile .....	262
15.2.3 Marital Status and Early Marriages .....	263
15.2.4 Possession of National Identification Documents.....	264
15.2.5 Orphanhood.....	265
15.2.6 Literacy and Education .....	266
15.2.7 Employment and Economic Activities .....	267
15.2.8 Persons With Disabilities .....	268
15.2.9 Land Ownership.....	269
15.2.10 Drinking Water .....	270
15.2.11 Sanitation.....	271
15.2.12 Energy .....	272
15.2.13 Information and Communication Technology (ICT) Access and Use by Individuals and Households .....	273
15.2.14 Information on Buildings .....	274
<b>ANNEX TABLES .....</b>	<b>276</b>
<b>BIBLIOGRAPHY.....</b>	<b>284</b>

## List of Tables

Table 2.1: Number and Percentage Distribution of Population by Sex and Council; Njombe Region, 2022 PHC .....	22
Table 2.2: Number and Percentage Distribution of Population by Place of Residence, Sex and Council; Njombe Region, 2022 PHC.....	23
Table 2.3: Population Size and Growth Indicators by Sex; Njombe Region, 2012 and 2022 PHCs ...	24
Table 3.1: Number and Percentage Distribution of Population by Sex and Five-Year Age Groups; Njombe Region, 2022 PHC .....	28
Table 3.2: Number and Percentage Distribution of Population by Sex and Five-Year Age Groups; Njombe Rural, 2022 PHC .....	29
Table 3.3: Number and Percentage Distribution of Population by Sex and Five-Year Age Groups; Njombe Urban, 2022 PHC.....	30
Table 3.4: Number and Percentage Distribution of Population by Place of Residence, Selected Age Groups and Sex; Njombe Region, 2022 PHC.....	33
Table 4.1: Number and Percentage of Private Households by Place of Residence, Sex of Head of Household and Age Group; Njombe Region, 2022 PHC .....	43
Table 4.2: Number and Percentage of Private Households by Place of Residence and Council; Njombe Region, 2022 PHC .....	44
Table 4.3: Population in Private Households, Number of Households and Average Household Size by Place of Residence and Council; Njombe Region, 2012 and 2022 PHCs.....	46
Table 4.4: Percentage Distribution of Households by Sex of Household Head, Place of Residence and Council; Njombe Region, 2012 and 2022 PHCs .....	47
Table 4.5: Distribution of Population in Private Households by Sex of Household Head, Number of Households, Average Household Size, Place of Residence and Council; Njombe Region, 2022 PHC .....	48
Table 4.6: Percentage Distribution of Households living in Improved/ Un improved Houses by Sex of Household Head, Place of Residence and Council; Njombe Region, 2022 PHC .....	50
Table 4.7: Percentage Distribution of Households living in Improved/Unimproved Houses by Sex of Household Head and Age Group; Njombe Region, 2022 PHC .....	51
Table 4.8: Number of Male Heads of Households by Marital Status and Occupation; Njombe Region, 2022 PHC .....	52
Table 4.9: Percentage Distribution of Male Heads of Households by Marital Status and Occupation; Njombe Region, 2022 PHC .....	52
Table 4.10: Number of Female heads of Households by Marital Status and Occupation Njombe Region, 2022 PHC .....	53
Table 4.11: Percentage Distribution of Female heads of Households by Marital Status and Occupation Njombe Region, 2022 PHC .....	53
Table 4.12: Percentage Distribution of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head, Place of Residence and Council, Njombe Region, 2022 PHC .....	56
Table 4.13: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head, Place of Residence and Council; Njombe Region, 2022 PHC.....	59

Table 4.14: Percentage Distribution of Households by Sex of Household Head, Number of Children under 18 Years, Place of Residence and Council; jombe Region, 2022 PHC.....	62
Table 5.1: Percentage Distribution of the Population Aged 15 Years and Above by Place of Residence, Sex and Marital Status; Njombe Region, 2022 PHC .....	64
Table 5.2: Percentage Distribution of the Population Aged 15 Years and Above by Marital Status and Five-Year Age Groups; Njombe Region, 2022 PHC .....	66
Table 5.3: Percentage Distribution of Male Population Aged 10 Years and Above by Marital Status and Five-Year Age Groups; Njombe Region, 2022 PHC .....	67
Table 5.4: Percentage Distribution of Female Population Aged 10 Years and Above by Marital Status and Five-Year Age Groups; Njombe Region, 2022 PHC .....	68
Table 5.5: Percentage Distribution of the Population Aged 10 Years and Above by Marital Status and Selected Age Groups; Njombe Region, 2022 PHC.....	69
Table 5.6: Percentage Distribution of Male Population Aged 15 Years and Above by Marital Status and Five-Year Age Groups; Njombe Region, 2022 PHC .....	69
Table 5.7: Percentage Distribution of Female Population Aged 15 Years and Above by Marital Status and Five-Year Age Groups; Njombe Region, 2022 PHC .....	70
Table 5.8: Percentage Distribution of Population Aged 15 Years and Above by Marital Status, Place of Residence and Council; Njombe Region, 2022 PHC.....	71
Table 5.9: Mean Age at First Marriage by Sex, Place of Residence and Council; Njombe Region, 2012 and 2022 PHCs.....	73
Table 6. 1: Percentage Distribution of Population by Birth Certificate Status, Sex and Age Groups; Njombe Region, 2022 PHC .....	77
Table 6.2: Percentage Distribution of Population by Status of Birth Certificate, Sex and Age Groups; Njombe Rural, 2022 PHC .....	78
Table 6. 3: Percentage Distribution of Population by Status of Birth Certificate, Sex and Age Groups; Njombe Urban, 2022 PHC.....	79
Table 6. 4: Percentage Distribution of Population by Status of Birth Certificate, Sex and Council; Njombe Region, 2022 PHC .....	80
Table 6. 5: Percentage of Population Possessing National Identification Documents by Selected Age Groups, Place of Residence and Council; Njombe Region, 2022 PHC.....	82
Table 6. 6: Percentage Distribution of Population by Type of Health Insurance Card Identification, Sex, Place of Residence and Council; Njombe Region, 2022 PHC .....	83
Table 6.7: Distribution of Population by Place of Residence, Sex and Country of Citizenship; Njombe Region, 2022 PHC .....	84
Table 7. 1: Number and Percentage of Children Under 18 Years by Survival of Parents and Age; Njombe Region, 2022 PHC .....	86
Table 7.2: Number and Percentage Distribution of Male Children Under 18 Years by Survival of Parents and Age; Njombe Region, 2022 PHC .....	87
Table 7. 3: Number and Percentage of Female Children Under 18 Years by Survival of Parents and Age; Njombe Region, 2022 PHC .....	88
Table 7. 4: Percentage Distribution of Children Under 18 Years by Survival of Parents, Place of Residence and Council; Njombe Region, 2022 PHC .....	89

Table 7.5: Percentage Distribution of Population Under 18 Years by Orphanhood, Place of Residence and Council; Njombe Region, 2022 PHC.....	90
Table 8.1: Percentage Distribution of Population Aged Five Years and Above by Literacy Rate, Sex and Five-Year Age Groups; Njombe Region, 2022 PHC .....	93
Table 8.2: Number and Percentage Distribution of Population Aged Five Years and Above by Literacy Rate, Sex and Five-Year Age Groups; Njombe Rural, 2022 PHC.....	94
Table 8.3: Percentage Population Aged Five Years and Above by Literacy Rate, Sex and Five-Year Age Groups; Njombe Urban, 2022 PHC .....	95
Table 8. 4: Literacy Rates by Place of Residence, Sex and Selected Age Groups; Njombe Region, 2022 PHC .....	96
Table 8. 5: Literacy Rates for Persons Aged 15 Years and Above by Sex, Place of Residence and Council; Njombe Region, 2012 and 2022 PHCs .....	99

## List of Figures

---

Figure 2.1: Percentage Distribution of Population by Council; Njombe Region, 2022 PHC.....	22
Figure 2.2: Percentage Distribution of Population by Council and Place of Residence; Njombe Region, 2022 PHC .....	23
Figure 2.3: Average Annual Inter-Censal Population Growth Rates; Njombe Region, 1967–2022 Censuses .....	25
Figure 3.1: Population Distribution by Age in Single Years and Sex – Njombe Region, 2022 PHC....	27
Figure 3.2: Population Pyramid for Five Year Age Groups; Njombe Region, 2022 PHC.....	31
Figure 3.3: Population Pyramid for Five Year Age Groups; Njombe Rural, 2022 PHC.....	31
Figure 3.4: Population Pyramid for Five Year Age Groups; Njombe Urban, 2022 PHC .....	32
Figure 3.5: Population Pyramid for Five Year Age Groups; Njombe Town Council, 2022 PHC.....	32
Figure 3.6: Percentage of Children Under Five Years by Place of Residence; Njombe Region, 2002, 2012 and 2022 PHCs .....	34
Figure 3.7: Percentage of Young Population (0-14 Years); Njombe, 2002, 2012 and 2022 PHCs .....	35
Figure 3.8: Percentage of Young Population Aged 0-17 Years; Njombe, 2002, 2012 and 2022 PHCs .....	36
Figure 3.9: Percentage of Youth Population (15-24 Years); Njombe Region, 2002, 2012 and 2022 PHCs.....	37
Figure 3.10: Percentage of the Youth Population (15-35 Years); Njombe Region, 2002, 2012 and 2022 PHCs.....	37
Figure 3.11: Percentage of the Working Age Population (15-64 Years); Njombe Region, 2002, 2012 and 2022 PHCs.....	38
Figure 3.12: Percentage of the Population Aged 60 Years or Above; Njombe Region, 1988, 2002, 2012 and 2022 PHCs .....	39
Figure 3.13: Percentage of the Population Aged 65 Years or Above; Njombe Region, 2002, 2012 and 2022 PHCs.....	39
Figure 3.14: Age Dependency Ratio by Residence; Njombe Region, 2002, 2012 and 2022 PHCs....	40
Figure 4.1: Percentage Distribution of Private Households by Place of Residence; Njombe Region, 2012 and 2022 PHCs .....	44
Figure 4.2: Average Household Size by Council; Njombe Region, 2022 Census.....	45
Figure 4.3: Percentage Distribution of Household by Sex of Household Head and Place of Residence; Njombe Region, 2022 PHC .....	46
Figure 4.4: Percentage Distribution of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head; Njombe Region 2022 PHC .....	54
Figure 4.5: Percentage of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head and Place of Residence; Njombe Region; 2022 PHC.....	54
Figure 4.6: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head and Place of Residence; Njombe Region, 2022 PHC.....	57
Figure 4.7: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head; Njombe Region, 2022 PHC .....	58
Figure 4.8. Percentage Distribution of Households with Children under 18 Years by Sex of Household Head; Njombe Region, 2022 PHC (correction needed) .....	60
Figure 4.9. Percentage Distribution of Households Having Children under 18 Years by Sex of Household Head, Number of Children and Place of Residence; Njombe Region, 2022 PHC .....	61

Figure 5.1: Percentage Distribution of Population Aged 15 Years and Above by Sex and Marital Status; Njombe Region, 2022 PHC .....	65
Figure 5.2: Percentage Distribution of Population Aged 15 Years and Above by Marital Status; Njombe Region, 2012 and 2022 PHCs.....	71
Figure 5.3: Mean Age at First Marriage by Sex; Njombe Region, 2012 and 2022 PHC .....	72
Figure 5.4: Mean Age at First Marriage by Residence and Sex; Njombe Region, 2012 and 2022 PHC .....	73
Figure 5.5: Mean Age at First Marriage by Council; Njombe Region, 2022 PHC .....	74
Figure 6. 1: Percentage Distribution of Population by Birth Certificate Status and Place of Residence; Njombe Region, 2022 PHC .....	77
Figure 6.2: Percentage Distribution of Population Possessing Other National Identification Documents by Place of Residence and Type; Njombe Region, 2022 PHC .....	81
Figure 7. 1: Orphanhood Status in Njombe Region, 2022 PHC .....	89
Figure 8. 1: Literacy Rates for Persons Aged Five Years and Above by Sex and Place of Residence; Njombe Region, 2022 PHC .....	95
Figure 8. 2: Adult Literacy Rates by Sex and Place of Residence; Njombe Region, 2022 PHC .....	97
Figure 8. 3: Adult Literacy Rates by Sex; Njombe Region, 2012 and 2022 PHCs.....	97
Figure 8. 4: Percentage Distribution of Adult Population Aged 15 Years and Above by Literacy Rate; Njombe Region, 2022 PHC .....	100
Figure 8. 5: Literacy Rates for Adult Population Aged 15 Years and Above; Njombe Rural, 2022 PHC .....	101
Figure 8. 6: Literacy Rates for Adult Population Aged 15 Years and Above; Njombe Urban, 2022 PHC .....	102
Figure 8. 7: Numeracy Rates for Persons Aged Five Years and Above by Sex, and Place of Residence; Njombe Region, 2022 PHC.....	104
Figure 8. 8: Percentage Distribution of Population Aged Four Years and Above by Sex and School Attendance Status; Njombe Region, 2022 PHC .....	107
Figure 8. 9: Percentage Distribution of Population Aged Four Years and Above by School Attendance Status and Place of Residence; Njombe Region, 2022 PHC .....	109
Figure 8. 10: Percentage Distribution of Population Aged Four Years and Above Who Never Attended School by Council; Njombe Region, 2022 PHC .....	112
Figure 8. 11: Net Enrolment Rates in Primary Schools by Council; Njombe Region, 2022 PHC .....	119
Figure 8. 12: Primary School Net Enrolment Rates by Sex; Njombe Region, 2002, 2012 and 2022 PHCs.....	119
Figure 8. 13: Primary School Net Enrolment Rates by Place of Residence; Njombe Region, 2002, 2012 and 2022 PHCs .....	120
Figure 8. 14: Primary Schools Gross Enrolment Rates by Place of Residence and Sex; Njombe Region, 2022 PHC .....	121
Figure 8. 15: Primary School Gross Enrolment Rates by Sex; Njombe Region, 2012 and 2022 PHCs .....	121

Figure 9. 1: Percent Distribution of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment) and Councils; Njombe Region, 2022 PHC .....	124
Figure 9. 2: Current Unemployment Rate of Persons Aged 15 Years and Above by Sex and Place of Residence; Njombe Region, 2022 PHC.....	126
Figure 9. 3: Labour Force Participation Rates for Persons Aged 15 Years and Above by Place of Residence and Sex; Njombe Region, 2022 PHC.....	127
Figure 10. 1: Prevalence of Disability for Persons Aged 7 Years and Above by Council; Njombe Region, 2022 PHC .....	137
Figure 10. 2: Prevalence of Disability by Age Groups and Sex; Njombe Region, 2022 PHC .....	138
Figure 11. 1: Percentage Distribution of Persons aged 15 Years and Above by Land Ownership Status and Sex; Njombe Region, 2022 PHC. ....	147
Figure 11. 2: Percentage Distribution of Population Aged 15 Years and Above by Land Ownership Status, Place of Residence and Council; Njombe Region, 2022 PHC .....	150
Figure 11. 3: Percentage Distribution of Persons Aged 15 Years and Above by Legal Documents Status, Place of Residence and Council; Njombe Region, 2022 PHC .....	151
Figure 12. 1: Percentage Distribution of Households by Ownership Status of the Main Dwelling and Place of Residence, Njombe Region, 2022 PHC.....	153
Figure 12. 2: Percentage Distribution of Households with Improved and Unimproved Roofing Material by Council; Njombe Region, 2022 PHC.....	155

## Abbreviations and Acronyms

---

CAPI	Computer Assisted Personal Interviews
CBO	Community Based Organisation
CCRO	Certificate of Customary Right of Occupancy
CEB	Children Ever Born
CHIF	Community Health Insurance Fund
CRO	Certificate of Right of Occupancy
DHS	Demographic Health Surveys
EA	Enumeration Area
FCDO	Foreign, Commonwealth and Development Office
GER	Gross Enrolment Rate
GIS	Geographical Information System
GPS	Global Positioning System
ICT	Information and Communication Technology
ID	Identification
IOM	International Organization for Migration
ISIC	International Standard Industrial Classification of All Economic Activities
LFPR	Labour Force Participation Rate
MAFM	Mean Age at First Marriage
MDAs	Ministry, Departments and Agencies
NA	Not Applicable
NBS	National Bureau of Statistics
NER	Net Enrolment Rate
NGOs	Non-Governmental Organizations
NHC	National Housing Corporation
NHIF	National Health Insurance Fund
NIDA	National Identification Authority
OCGS	Office of Chief Government Statistician
PHC	Population and Housing Censuses
PWDs	Persons with Disabilities
SG	Statistician General
SMAM	Singulate Mean Age at First Marriage
TASCO	Tanzania Standard Classification of Occupations
TBA	Tanzania Building Agency
TBC	Tanzania Building Census

TFR	Total Fertility Rate
TOT	Training of Trainers
UN	United Nations
UNFPA	United Nations Population Fund
UNICEF	United Nations Children's Fund
USAID	United States Agency for International Development
USCB	United States Census Bureau
URT	United Republic of Tanzania
VIP	Ventilated Improved Pit Latrine
WB	World Bank
ZAN ID	Zanzibar Identification Card
ZBA	Zanzibar Building Agency
ZHC	Zanzibar Housing Corporation

# Concepts and Definitions

---

## Population and Housing Census

**Census Night** is a reference point for Census enumeration and all questions in the census relate to that night. According to the Tanzania 2022 Population and Housing Census, the Census night was the night of 22nd /23rd August, 2022.

**De facto Methodology** means persons were enumerated where they slept on the Census night.

**Enumeration Area (EA)** is a designated area with an average of 60 to 100 households.

**Geographical Information System (GIS)** is a system designed to capture, store, manipulate, analyse, manage and present all types of geographical data.

**Population and Housing Census (PHC)** is defined as the total process of collecting, compiling, evaluating, analysing and publishing or otherwise disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country or in a well delineated part of a country (United Nations definition).

**Quality Control** refers to observations, techniques and activities used to fulfil requirements for quality.

## Population Size, Growth and Distribution

**Population growth** refers to the change in population over time, and can be quantified as the change in the number of individuals in a population using "per unit time" for measurement.

**Population Growth Rate** refers to the change in population over a unit time period, often expressed as a percentage of the number of individuals in the population at the beginning of that period. Growth rate in this book is expressed as an exponential rate of growth of population from year 2012 to 2022 and is termed as average annual intercensal population growth rate.

## **Age and Sex Profile**

**Age** is the number of years one had lived as at last birthday i.e., in reference to the census night.

**Age-Dependency Ratio** is the ratio of people in the “dependent” ages (those under age 15 and age 65 and older) to those in the “working age population” (15-64 years).

**Elderly Population** refers to persons aged 65 years and above (according to international definition). However, according to Tanzania National Ageing Policy, an elderly is individual who is 60 years and above.

**Median Age** is the age at which exactly half the population is older and half is younger.

**Population Pyramid** is a graphical presentation of population’s age and sex composition. Horizontal bars present the numbers or proportions of males and females in each age group.

**Sex Ratio** is the ratio of males to females in a given population usually expressed as the number of males for every 100 females.

**Working Age Population** in Census is the population age 15 to 64 years (international definition).

**Young People** comprise the population aged 0 to 14 years.

**Youth Population** comprises the population aged 15-24 years (international definition). However, according to Tanzania’s Youth Policy, youth population refers to the population aged 15 to 35 years.

## **Household Composition**

**Average Household Size** is the average number of persons per private household. Average household size is obtained by dividing the total number of persons living in private households by the total number of private households.

**A Collective Household** is one in which a group of persons reside in one dwelling or compound and have no head of household. Boarding schools, hospitals and camps are examples of collective households.

**Head of Household** is a person who is acknowledged as such by other household members.

**Household** refers to a person or group of persons who reside in the same homestead or compound but not necessarily in the same dwelling unit, have same cooking arrangement, and are answerable to the same household head except for collective household.

**Private Household** is defined as a person or group of persons who reside in the same homestead or compound but not necessarily in the same dwelling unit, having the same cooking arrangement, and are answerable to the same household head.

## **Marital Status**

**Divorced Persons** are those persons who were once married but their marriages were permanently terminated and have not remarried since then. Note that in polygamous marriages the divorce of one or more wives does not categorize the husband as divorced if he still lives with the other wife (wives).

**Living Together** is an act of persons who are not formally married but are in a consensual union or are living in a socially recognized stable union.

**Marriage** is an act of persons who are living together or separately but are formally married irrespective of the type of marriage, which may be customary, civil or religious marriage.

**Mean Age at First Marriage** is defined as the average length of single life expressed in years among those who marry before age 50.

**Never Married** means persons who have remained single all their lives and exclude persons who have lived with a spouse but are now living alone.

**Separated** is the act of persons who were once married but now are living apart. Those who live apart because their spouses are employed far away from home or for similar reasons are considered to be married.

**Widowed** is the act of persons whose marriages were terminated by death and have not remarried since. Note that in polygamous marriages the death of one or more wives does not make the husband a widower if he still has other wife (wives).

## **National Identification Documents and Citizenship**

**Birth Certificate** is a vital record that documents the birth of a child. The term "birth certificate" can refer to either the original document certifying the circumstances of the birth or to a certified copy of or representation of the ensuing registration of that birth.

**Birth Registration** is the process by which a child's birth is recorded in the civil register by Government authority.

**National Identification** is any official document that may be used to prove a person's identity such as the bearer's full name, birth date, address, an identification number, card number, sex, citizenship and more.

## **Survival of Parents**

**Orphanhood** is the condition of being a child without living parents. In other words, the term 'orphan' is understood to mean a person whose parents are both dead. However, United Nations definition that was adopted by the Tanzanian Government identifies an orphan as a child under 18 years of age who has lost one or both parents.

## **Literacy, Numeracy and Education**

**Educational Attainment** is the highest grade completed according to the country's educational system. A grade is a stage of instruction usually covered in the course of a school year.

**Gross Enrolment Rate (GER)** is defined as the number of children attending primary school regardless of age divided by the total number of children age 7-13 years.

**Literacy** is the ability to read and write with an understanding of a short simple sentence in everyday life.

**Literacy Rate** is the percentage of a population that can read and write in Kiswahili, English, both Kiswahili and English or in any other language(s)

**Net Enrolment Rate (NER)** is defined as the number of children age 7-13 years who are attending school divided by the total number of children in that age group.

**Numeracy** is the ability to access, use, interpret and communicate simple mathematical information and ideas, to engage in and manage basic mathematical demands for a range of situations in adult life.

**Numeracy Rate** is the percentage of a population with the ability to access, use, interpret and communicate simple mathematical information and ideas.

**School Attendance** refers to attendance at any regular authorized or licensed educational institution or programme for organized learning at any level of education at the time of the Census.

## **Employment and Economic Activities**

**Economic activity status** refers broadly to economically active population which includes those employed and unemployed. It also includes inactive population covering all persons who were without work during the reference period and were not available for work.

**Labour Force Participation Rate (LFPR)** is defined as the number of persons in the labour force as a percentage of the population aged 15 years and above.

**Informal Non-Agricultural Economic Activities** are activities that are unregulated and often without formal recorded business transactions, and are normally outside the framework of formal business regulations and system.

**Unemployed persons** comprise those who in the last seven days prior to the census enumeration were not engaged in any economic activity but were available for work regardless of whether they took any effort to look for work. (According to the relaxed international definition of unemployment).

## **Disability**

Disability is defined as a loss or limitation of opportunities to take part in the normal life in the community on an equal level with others due to physical, mental or social factors. All the three (physical, mental and social factors) use the concept of activity limitation in defining disability rather than physical impairment.

## **Land Ownership**

**Certificate of Right of Occupancy** is a formalized land tenure system. It allows individuals or entities to acquire rights to use and occupy land for specific purposes, such as agriculture, residential, commercial or industrial.

**Customary land tenure** is the form of land ownership based on customary practices and traditional land rights.

**Land ownership** is a process of acquiring land or right of occupancy from a relevant Government authority. It is categorized into three main tenure systems namely Customary Land Tenure, Right of Occupancy and Government Land.

**Land Title Deed** is a legal document that states and proves a person's legal right to own a piece of land

## **Housing Characteristics, Assets Ownership and Environmental Control**

**Improved roofing materials** are durable roofing materials used for roofing which include iron sheets, tiles, concrete and asbestos. Unimproved roofing materials include grass or leaves, mud and leaves, plastics or box and tent.

**Improved floor covering materials** are long lasting flooring materials such as cement, ceramic tiles, parquet or polished wood, terrazzo, vinyl or asphalt strips. Non-improved materials include wood planks, palm or bamboo, earth or sand, dung, containers or tents.

**Room for sleeping** is defined as any space within a dwelling which is currently used for sleeping by household members. Any space within a dwelling can be termed as a

room for sleeping if currently used by any household members for sleeping purposes and can be a sitting room, a dining room or even a store.

**Improved sources of drinking water** include sources that, by nature of their construction or through active intervention, are protected from outside contamination, particularly faecal matter. It comprises piped water, tube well or borehole, protected dug well, protected spring, rainwater, bottled water, carts with small tank/drum and tanker truck. Unimproved sources of drinking water include unprotected dug well, unprotected spring and surface water.

**Improved sanitation facilities** are the facilities that ensure hygienic separation of human excreta from human contact. They include flush or pour flush toilet that flushes the water and waste to a piped sewer system, septic tank, pit latrine or unknown destination; ventilated improved pit (VIP) latrine, pit latrine with washable slab and pit latrine without slab. Unimproved facilities include pit latrine without slab (open pit) and bucket.

**Solid waste disposal** refers to the collection, sorting, transport and treatment of waste as well as its storage and tipping above or burying, as well as the transformation operations necessary for its re-use, recovery or recycling.

**Electronic waste (E-waste)** describes discarded electrical or electronic devices. It is also known as waste electrical and electronic equipment (WEEE) or end-of-life (EOL) electronics. It also refers to discarded, recycled or refurbished electrical and electronic products.

## **Access and Use of Information and Communication Technology by Individuals and Households**

**Radio** refers to a device capable of receiving broadcast signals using frequencies in the FM, AM, LW and SW bands. A radio can be a standalone unit or integrated into other devices, including alarm clocks, audio players, mobile telephones or computers.

**Television** refers to a device capable of receiving broadcast signals using standard access methods, including radio frequency (over-the-air), cable, and satellite. A television set is usually a standalone unit but may be integrated into other devices, such as computers or mobile telephones.

**The Internet** is a vast global network of interconnected computers and other electronic devices, allowing them to share information and communicate through a standardised set of protocols known as the Internet Protocol Suite (TCP/IP). It provides access to several communication services, including the World Wide Web and carries e-mail, news, entertainment and data files, irrespective of the device used.

**Landline Telephone** is a communication device that transmits and receives sound, typically the human voice, through physical wire or fibre optic cable connections.

**A mobile (cellular) telephone** also known as a cell phone, is a portable device that allows for voice and data communication over a wireless cellular network. Mobile phones have become essential devices in daily life, profoundly impacting on how we communicate, access information, and interact with the world around us.

**Smart Mobile Phone (Smartphone)** refers to a device that performs many computer functions, typically having a touch screen interface, broadband Internet access, and an operating system capable of running apps such as Facebook, WhatsApp or YouTube.

**Non-Smartphone (Feature phone)** refers to a device that performs only basic functions such as making and receiving calls, sending/receiving text messages and browsing Internet.

**Computer** is an electronic device designed to process, store, and manipulate data according to a set of instructions known as programs. It can perform a wide range of tasks, from simple calculations to complex operations involving data analysis, graphics design, and more.

**Desktop Computer** is a personal computing device designed for regular use at a single location. Unlike portable devices like laptops and tablets, desktop computers typically

comprise separate components, including a monitor (screen), a keyboard, a mouse, and a central processing unit (CPU) housed in a tower or desktop case.

**Laptop** is a portable computer that integrates all the components of a traditional desktop computer into a single compact unit. Laptops are designed for convenience and mobility, making them ideal for use in various settings, such as at home, in the office, while travelling, or in educational environments.

**Tablet** is a portable computing device with a touchscreen interface, allowing users to interact with digital content and applications through touch gestures. Tablets are larger than smartphones but smaller and more compact than laptops, making them highly portable while offering a screen size that enhances the experience of browsing the Internet, reading digital books, watching videos, and playing games.

## Information on Buildings

**Access Road** means any road whether public or private and includes any street, square, court, alley, beach, footway, path, passage or highway whether a thoroughfare or not.

**Building Census** is the act of collecting, analysing and disseminating buildings' data for specific time.

**Building** means any structure or erection and any part of any structure or erection of any kind whatsoever whether permanent, temporary or movable, and whether completed or uncompleted.

**Building Parastatals** are government institutions whose functions are to provide and or facilitate the provision of housing and other buildings in Tanzania.

**Building Stock** refers to the total number of buildings in a particular area.

**Certificate of Customary** means the certificate of right of occupancy issued to land Right of Occupancy under customary tenure as stipulated under Section 27 of the Land Act No.5 of 1999.

**Certificate of Right** refers to a legal land certificate of occupation granted under Occupancy the Land Act No. 4 of 1999 in Tanzania and Land Tenure Act No. 12 of 1992 of Tanzania Zanzibar.

**Detached house** refers to a building that stands alone from the foundation to roof level. Does not share walls with other houses. The building could be single or multi-storey.

**Non-residential Use** means a building or structure of any kind whatsoever used, designed or intended to be used for other than a residential use.

**Partly Complete House** refers to a building where one part is complete and can be occupied and other part is still under construction.

**Physical Address** means the mailing address, including a zip code which details the actual location (building number and street name) of a person, business or physical property.

**Regularised Settlement** is the legalised tenure status in the informal or unplanned settlements through a deliberate process aimed at bringing the informal and unauthorised settlements within the official legal (formal) and administrative systems of land to guarantee secure tenure for the concerned population.

**Residential Building** means a structure used or constructed or adapted to be used primarily for human habitation; such buildings may be available as apartments, quarters and similar facilities or accommodation.

**Residential License** confers upon the licensee the right to occupy land in non-hazardous land, land reserved for public utilities and surveyed land, urban or peri-urban area for the period of time for which it has been granted as provided in Section 23 of the Land Act No.4 of 1999.

**Single Storey** refers to a building consisting of ground floor only.

**Stand Alone** refers to a single house that is separate and detached from other buildings.

**Surveyed Settlement** refers to human settlements that cadastral surveying has been undertaken to each land parcel to determine its location, the extent of its boundaries and surface area, and to indicate its separate identity, both graphically on a map or in a record as well as physically on the ground.

**Tenure** is defined as institutions and rules which regulate property rights and resource use, and determine who can use what resource, under what conditions and for how long.

**Terrace/Row of Houses** refers to a terraced house is a row of more than two similar houses under one roof joined together by their side walls. The house could be single or multi-storey

**Unit for the purpose of this publication**, a unit is a house or part of the house with all necessary amenities. A building can have more than one unit.

## Chapter 1

# Overview of the 2022 Population and Housing Census

---

### 1.1 Introduction

The United Nations defines a population census as the total process of collecting, compiling, evaluating, analysing, publishing and disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country or in a well delineated part of a country. It is the primary source of detailed data on the size, distribution and composition of the population. It covers all population groups including those in private households, institutions, the homeless and migrants for all geographic and/or administrative units in a country.

Additionally, the term “Housing Census” is used to imply the collection of information related to housing conditions such as the number of households, access to basic household amenities and living conditions. By combining population and housing data, policy makers and researchers are provided with valuable insights about demographic trends, social conditions and housing patterns, enabling them to make informed decisions and develop appropriate policies to address the needs of the population.

#### 1.1.1 A Brief History of Census Undertaking in Tanzania

The history of population counts in Tanzania dates back to 1910. The first population census was conducted in 1958. Other censuses were conducted in 1967, 1978, 1988, 2002 and 2012 after the union of Tanganyika and Zanzibar in 1964. Since 1967, the country has conducted decennial Population and Housing Censuses (PHC) on a *de-facto* basis in accordance with the United Nations (UN) Principles and Recommendations for Conducting Population and Housing Censuses.

Unlike previous censuses, the 2022 PHC is the first digital census in Tanzania, whereby mobile technology was used at all stages of Census implementation. In the first phase, mobile GIS technology was used to facilitate demarcation of enumeration areas and transmission of census cartographic information to the servers located at NBS and OCGS Headquarters. Likewise, in the second phase, Computer Assisted Personal Interviews (CAPI) technology was used for data capture and transmission of information from the field to the servers during enumeration. Mobile devices (tablets) were programmed with a data capture system developed using CSEntry (a CSpro tool for data capture) that runs on Android Operating System. Development of the applications and programming of the devices were done by Tanzanian experts. The third phase of Census implementation which

includes data processing, analysis and dissemination is based on the use of more advanced technologies such as mobile phones for broadcasting census results and more iterative dashboards for data sharing.

## **1.2 Objectives of the 2022 PHC**

The main objective of conducting the 2022 PHC was to provide the Government and other stakeholders with information on the size, distribution, composition and other social economic characteristics of the population, environment and information on housing conditions. This information contributes to the improvement of quality of life for Tanzanians through provision of current and reliable data for policy formulation, development planning, evidence-based decision making and service delivery. Census information is also used for monitoring and evaluating population and socio-economic programmes in the country.

### **1.2.1 Specific Objectives of the 2022 PHC**

Specific objectives of the 2022 PHC were to:

- a) Increase availability and accessibility of accurate, timely and reliable data on demographic, socio-economic characteristics and environment;
- b) Enhance knowledge of stakeholders on socio-economic, demographic characteristics and environment of the Tanzanian population as well as patterns and trends of population growth; and
- c) Strengthen capacity of the National Bureau of Statistics (NBS) and the Office of the Chief Government Statistician (OCGS) in carrying out population and housing censuses, in areas of planning, collecting, processing, analysing, disseminating, utilising and archiving population and housing census and other statistical data.

## **1.3 Preparations for the 2022 PHC**

### **1.3.1 Legal Framework**

The 2022 PHC was carried out in accordance with the Statistics Act CAP 351. The Act, inter alia, mandates the NBS, in collaboration with OCGS Zanzibar, to conduct population and housing censuses within the United Republic of Tanzania every ten years. In this respect, the Statistician General (SG) of NBS is responsible for planning the overall organisation and technical administration of the Census. Furthermore, SG is the Accounting Officer and in charge of all Census operations. The Order to conduct the 2022 Population and Housing Census on 23<sup>rd</sup> August, 2022 was made by H.E. Dr. Samia Suluhu Hassan, President of the United Republic of Tanzania, on 21<sup>st</sup> March, 2022 and was published in the Tanzania Government Gazette of the 29<sup>th</sup> April, 2022 as directed by the Act.

### **1.3.2 Census Organisation**

A Population and Housing Census is a massive undertaking that needs careful planning coupled with an appropriate organisational, administrative arrangements and procedures. These are necessary in ensuring that, extensive human and material resources mobilized for the census are effectively and efficiently used and that the census tight schedules and massive logistic requirements are met. During the 2022 Census, a well-planned decentralized census organisation was formed with a primary role of coordinating all census activities from the national down to the grass root level.

Preparations for the 2022 PHC were facilitated by various committees at national, regional, district, ward/shehia and village/mitaa levels to guide and monitor the Census processes. The committees drew members from Ministries, Departments and Agencies (MDAs), Higher Learning Institutions, Private Sector and Non-Governmental Organizations (NGOs). The main committees were: - National Census Central Committee, National Census Advisory Committee, Census Collaborators Forum, Technical Advisory Committee as well as Regional and Districts Census Committees.

The Prime Minister's Office of the United Republic of Tanzania and the Second Vice President's Office for the Government of Zanzibar, were responsible for overseeing the overall operations of the 2022 PHC. The Regional and District Census Committees chaired by Regional and District Commissioners respectively were responsible for ensuring that all Census activities were successfully undertaken in their areas of jurisdiction.

The Population and Housing Census Commissars, one from each side of the United Republic of Tanzania, were responsible for publicity and advocacy activities such as educating, sensitising and mobilising the public for census exercise. They were also responsible for resource mobilisation and a link between census technical personnel and other stakeholders as well as enhancing political buy-in of the Census.

### **1.3.3 Development of Census Instruments**

The Census instruments (questionnaires, manuals and other census documents) were developed in collaboration with national experts from MDAs, higher learning and research institutions, private sector and Non-State Actors. The 2022 PHC questionnaires were developed in accordance with the United Nations Principles and Recommendations for the 2020 Round of Population Censuses. They included topics from previous censuses for comparison purposes (both national, regional and international) and new topics to cater for the country's current data needs (Tanzania Development Vision 2050) and to feed into regional and international programmes (i.e., East African Community Vision 2050; the

Southern African Development Community Vision 2050; African Development Agenda 2063; and 2030 Agenda for Sustainable Development). The draft questionnaires were shared widely with various stakeholders both in Tanzania Mainland and Tanzania Zanzibar through stakeholders' workshops and the Census Committees. The final questionnaires were approved by the Central Census Committee.

The 2022 PHC had three main digital tools for data collection. The first one was a community questionnaire, which collected information on all social amenities; land use patterns and environmental or natural features and available community infrastructure. The second tool was the main census questionnaire which collected detailed information on demographics, including fertility, mortality, migration, orphanhood, and disabilities; possession of national documents, education level and economic activities. It also collected information on land ownership and information related to ICT ownership and use, housing, utilities, ownership of assets and agriculture. The third tool was a questionnaire for special population groups such as diplomats and travellers.

#### **1.3.4 Cartographic Work**

The 2022 PHC enumeration was preceded by extensive cartographic work covering the entire country. The main objective of the cartographic work was to delineate the entire country into Enumeration Areas (EAs) in order to produce maps required for Census operations. In urban areas, EA sizes ranged from 50 to 150 households while for rural areas, a hamlet was considered as an EA.

Unlike in previous censuses, the 2022 Population and Housing Census used modern technology (Arc-GIS) in demarcating enumeration areas. The Arc-GIS technology enabled the use of digital based maps (Satellite images) instead of analogue -based maps. Delineation of EA boundaries was done using Global Positioning System (GPS). In addition, coordinates of prominent features existing in each particular EA were also recorded as shown on Map 1.1. Overall, 2,168 EAs were delineated in Njombe Region (390 EAs in urban areas and 1,778 EAs (hamlets) in rural areas).

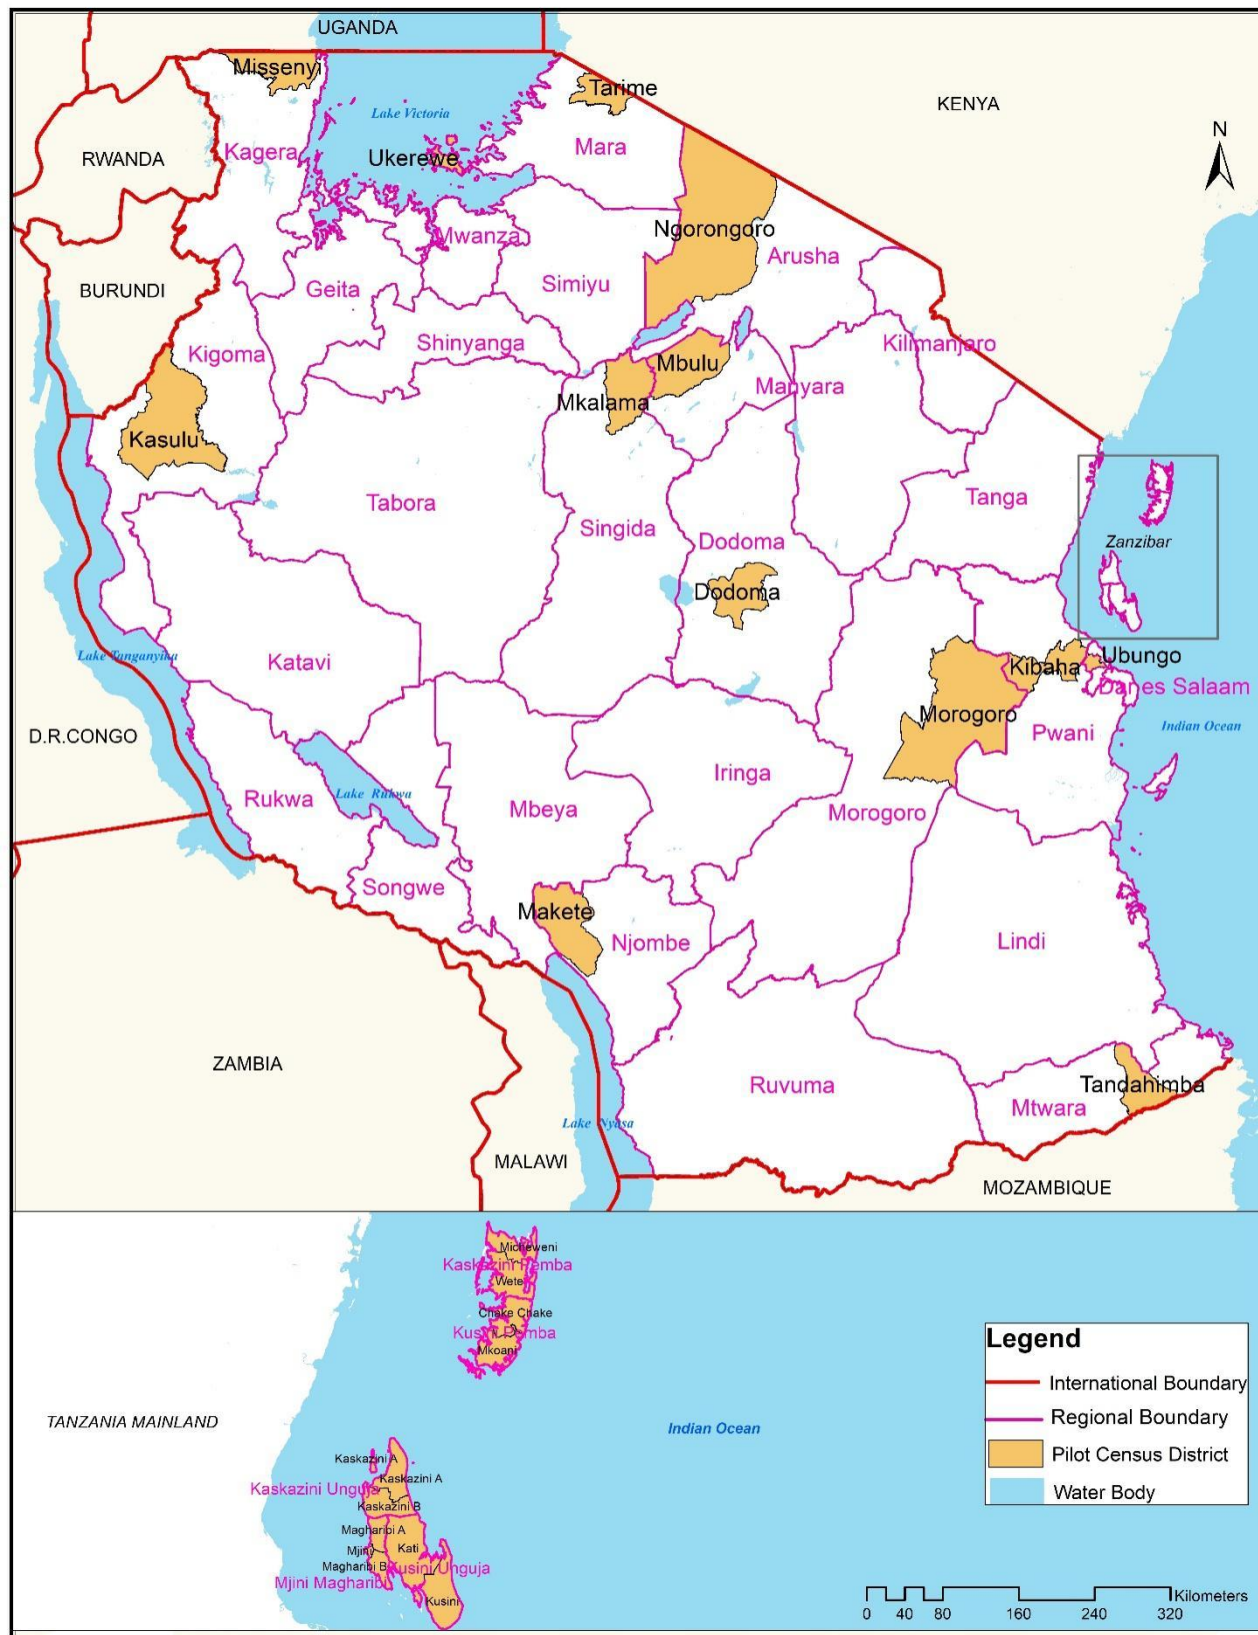

**Map 1.1: A Typical Enumeration Area Map for 2022 PHC**

**1.3.5 Pilot Census**

According to the United Nations requirements and guidelines, NBS/OCGS conducted a Pilot Census in September, 2021; one year before the actual census. The main purpose of the Pilot Census was to test the effectiveness of the entire Census mechanism that would be used during implementation of the 2022 Population and Housing Census. The Pilot was conducted in 18 purposively selected regions, of which 13 were in Tanzania Mainland and five in Tanzania Zanzibar (Map 1.2). The experience and obtained results provided valuable inputs which were used to improve Census instruments and logistics in the final preparations towards the 2022 Population and Housing Census enumeration.

**Map 1.2: Selected Areas for the 2021 Pilot Census**

### 1.3.6 Census Publicity and Advocacy Campaign

The 2022 PHC used intensive and extensive publicity and advocacy programmes to educate, sensitise and mobilise the public to participate in the Census process. There were two Census Commissars one for Tanzania Mainland and the other for Tanzania Zanzibar. The main function of the Commissars was to publicise the implementation of the Population and Housing Census and Advocacy activities. Other functions were to collaborate with committees at all administrative levels to motivate community participation and ensure timely and sufficient availability of human and financial resources as well as equipment.

To standardise publicity and advocacy campaigns throughout the country, the NBS and OCGS developed publicity guidelines that were used during the Census publicity and advocacy operations. The guidelines explained in brief, the meaning and purpose of the Census as well as broad topics covered.

Given the importance of Census publicity, resources were availed to regional authorities for the purpose of educating, sensitising and mobilising the public to participate in the census in their respective areas.

Image 1.1: Hon. Anne Semamba Makinda, Census Commissar for Tanzania Mainland speaking to citizens living on the border of Tanzania and Rwanda at Rusumo during the 2022 census publicity campaign on 14<sup>th</sup> June, 2022.

## **1.4 Census Enumeration Activities**

Several activities were undertaken in preparation for the main enumeration exercise, including recruitment and training of field personnel and distribution of enumeration materials to all regions and districts.

### **1.4.1 Recruitment and Training**

Recruitment of census enumerators and supervisors followed procedures set by NBS and OCGS and approved by the Central Census Committee. The process was coordinated by Regional and District Census Committees in their respective administrative areas. A total of 205,000 enumerators and supervisors were recruited and trained.

Training for census enumeration was conducted at three levels namely: - Training of Trainers (TOT) at national level; training of trainers at regional level; and training of supervisors and enumerators at district level. Trainings were conducted from June to August 2022 and covered theoretical and field practical trainings. The training enabled participants to conceptualise the topics covered in the Census questionnaires; build common understanding of all questions, understand techniques of asking questions and probing where necessary. Furthermore, participants were trained on the use of ICT during data collection, particularly the use of tablets to collect the required information. Trainers were provided with training manuals while supervisors and enumerators were provided with instruction manuals to be used as reference materials.

### **1.4.2 Other Preparations for Enumeration**

A range of other preparatory activities were carried out in the second and third week of August 2022. The activities included distribution of enumeration materials to supervisors and enumerators, physical identification of EA boundaries and meeting local authorities in the respective areas. Activities at regional and district levels were coordinated by Regional and District Census Coordinators in collaboration with respective Census Committees.

### **1.4.3 Enumeration**

The targeted population for the 2022 PHC was all persons who spent the night of 22<sup>nd</sup>/23<sup>rd</sup> August, 2022 within the borders of Tanzania. The actual enumeration was conducted by enumerators and supervisors in their respective assigned areas. There were enumerators stationed at mass transit points (the night of 22<sup>nd</sup>/23<sup>rd</sup>) to enumerate passengers on buses, trains, airports and ships. Special enumeration cards were issued to each traveller after enumeration to avoid double-counting. Arrangements were also made to enumerate the homeless during the same night. During enumeration, enumerators were submitting data to

their supervisors every day and the supervisors in turn were transferring them to the server at NBS after checking their quality.

The duration for enumeration, as per the Presidential Order, was seven days from 23<sup>rd</sup> to 29<sup>th</sup> August, 2022. Enumeration exercise was completed by 93.45 percent within the planned period of seven days. However, in some areas, enumeration could not be completed within the seven days' period due to various reasons. Reasons for not completing enumeration within the allocated time included; scattered households, EAs having more households than expected and difficulty to reach EAs. Nevertheless, by the 5<sup>th</sup> September, 2022 the enumeration exercise had been completed by 99.99 percent in all EAs.

Image:1.2 H.E. Dr. Samia Suluhu Hassan, President of the United Republic of Tanzania being enumerated at the State House, Dodoma on 23<sup>rd</sup> August, 2022.

#### **1.4.4 Post Enumeration Activities**

After enumeration, all tablets and their accessories, quality control forms and notebooks were collected for safe custody at respective Regional Census Offices from where they were transported to NBS and OCGS headquarters for further logistics.

#### **1.5 Data Processing**

The whole process of compiling basic counts and basic data analysis was completed in 45 days after completion of the enumeration exercise. Initial results of the 2022 PHC at National level were released in Dodoma by H.E. Dr. Samia Suluhu Hassan, President of the United Republic of Tanzania on 30<sup>th</sup> October, 2022.

## **1.6 Quality Control Procedures**

Quality control is an essential component of the Census undertaking. Quality control standards and procedures were developed and observed throughout all steps of the census undertaking to ensure collection of quality data. All supervisors and coordinators were trained on quality control standards and procedures during training sessions of the census.

## Chapter 2

# Population Size, Growth and Distribution

---

### Key Points

- Njombe Region has a population of 889,946 persons; (420,533 males and 469,413 females).
- The regional population grew at an average annual growth rate of 2.4 percent between 2012 and 2022. At this rate, Njombe Regional population is expected to double in the next 29 years; that is in year 2051.
- The regional population remains predominantly rural with 70.4 percent of its total population living in rural areas and 29.6 percent living in urban areas.

### 2.1 Introduction

This chapter presents information on population size, distribution by place of residence and sex, population growth and the annual average intercensal growth rates in Njombe Region. Population size is the first demographic fact that any population census intends to obtain. Determining population size is important for planning, monitoring and establishing required resources for socio-economic development of any country. The growth and distribution of the population determines the demand for and location of essential social services, such as education, health, water, transport and housing. Therefore, understanding population size, growth and distribution is important for decision makers, planners, researchers, implementers of development programmes and the public in general. These statistics facilitate making evidence-based decisions, optimal resources allocation, planning, monitoring and evaluation of development frameworks.

### 2.2 Population Size

Njombe Region has a population of 889,946 persons and is among the regions which have population under one million in Tanzania Mainland. More than half (52.7%) of this population are females (469,413 persons) and 47.3 percent (420,533 persons) are males (Table 2.1).

## 2.2.1 Population Size by Council

Administratively, Njombe Region has 6 Councils, out of those, four (4) are District Councils and two (2) are Town Councils. Wanging'ombe District Council has the largest population (191,506 persons) in the Region compared with other Councils. Other Councils with large population Njombe Town (182,127 persons) and Ludewa District (151,361 persons). Thus, about 59 percent of the total population in the Region live in the mentioned three councils. Councils with least population in Njombe Region are Makambako Town (146,481 persons), Njombe District (109,311 persons), and Makete District (109,160 persons) (Table 2.1 and Figure 2.1).

**Table 2.1: Number and Percentage Distribution of Population by Sex and Council; Njombe Region, 2022 PHC**

Council	Population size				
	Both sexes	Male		Female	
		Number	Percent	Number	Percent
<b>Total</b>	<b>889,946</b>	<b>420,533</b>	<b>47.3</b>	<b>469,413</b>	<b>52.7</b>
Njombe District	109,311	52,044	47.6	57,267	52.4
Njombe Town	182,127	86,333	47.4	95,794	52.6
Makambako Town	146,481	67,876	46.3	78,605	53.7
Ludewa District	151,361	72,445	47.9	78,916	52.1
Makete District	109,160	52,180	47.8	56,980	52.2
Wanging'ombe District	191,506	89,655	46.8	101,851	53.2

**Figure 2.1: Percentage Distribution of Population by Council; Njombe Region, 2022 PHC**

## 2.2.2 Rural and Urban Population

The population of Njombe Region is predominantly rural, with 70.4 percent of its population living in rural areas and 29.6 percent living in urban areas. Across the Council, Wanging'ombe District has the largest percent of its population residing in rural areas. Other Councils with large population residing in rural areas are Ludewa 90.3% and Njombe District 89.6%. Further results show that Makambako Town is the most urbanized Council with almost eighty percent (79.3%) its population residing in urban (Figure 2.2 and Table 2.2).

**Figure 2.2: Percentage Distribution of Population by Council and Place of Residence; Njombe Region, 2022 PHC**

**Table 2.2: Number and Percentage Distribution of Population by Place of Residence, Sex and Council; Njombe Region, 2022 PHC**

Council	Total			Rural			Urban				
	Both Sexes	Male	Female	Both Sexes		Male	Female	Both sexes		Male	Female
				Number	Percent			Number	Percent		
<b>Total</b>	<b>889,946</b>	<b>420,533</b>	<b>469,413</b>	<b>626,507</b>	<b>70.4</b>	<b>298,824</b>	<b>327,683</b>	<b>263,439</b>	<b>29.6</b>	<b>121,709</b>	<b>141,730</b>
Njombe District	109,311	52,044	57,267	97,938	89.6	46,738	51,200	11,373	10.4	5,306	6,067
Njombe Town	182,127	86,333	95,794	89,590	49.2	43,425	46,165	92,537	50.8	42,908	49,629
Makambako Town	146,481	67,876	78,605	30,249	20.7	14,385	15,864	116,232	79.3	53,491	62,741
Ludewa District	151,361	72,445	78,916	136,628	90.3	65,528	71,100	14,733	9.7	6,917	7,816
Makete District	109,160	52,180	56,980	94,549	86.6	45,389	49,160	14,611	13.4	6,791	7,820
Wanging'ombe District	191,506	89,655	101,851	177,553	92.7	83,359	94,194	13,953	7.3	6,296	7,657

## 2.3 Population Change and Growth

### 2.3.1 Population Change

The population of Njombe Region has increased by 26.8 percent from 702,097 persons in 2012 to 889,946 persons in 2022. This is an indication of increasing population growth rate over the two decades) (Table 2.3).

### 2.3.2 Annual Population Growth Rate and Trends

Njombe Region population grew at an annual growth rate of 2.4 percent between 2012 and 2022. This growth is below the national average of 3.2 percent. At this rate, the population is expected to double in the next 29 years, that is in year 2050. The growth rate for male population (2.4%) which is the same as that of the total population while for female population is 2.3 percent (Table 2.3).

**Table 2.3: Population Size and Growth Indicators by Sex; Njombe Region, 2012 and 2022 PHCs**

Sex	Population Size		Percentage Changes 2012-2022	Percentage Growth Rate (per annum) 2012-2022	Doubling Time from 2022 (Years)
	2012	2022			
Total	702,097	889,946	26.8	2.4	29
Male	329,359	420,533	27.7	2.4	28
Female	372,738	469,413	25.9	2.3	30

Figure 2.3 shows that the trend of the Njombe Region population average annual intercensal growth rate has remained below the national average since 2012. However, the growth rate has increased to 2.4 percent in 2022 population census whereby the growth rate of 2012 population census was below one percent (0.7).

**Figure 2.3: Average Annual Intercensal Population Growth Rates; Njombe Region, 2002–2022 Censuses**

## Chapter 3

### Age and Sex Profile

---

#### Key Points

- About thirty eight percent (38.1%) of the Njombe Region population is aged below 15 years and 5.0 percent is aged 65 years and above, thus making a youthful age structure.
- The median age of the Njombe Regional population is 20.7 years.
- The percentage of the working age population (15 - 64 years) in Njombe Region has increased from 51.5 percent in 2002 Census to 56.8 percent in 2022.
- The percentage of the population aged 60 years and above in Njombe Region is 7.3
- The age dependency ratio for Njombe Region is 75.9.

#### 3.1 Introduction

This chapter discusses quality of age and sex data, presents age and sex profiles as well as population distribution by selected age groups and respective demographic attributes in Njombe Region. The Tanzania 2022 PHC collected information on age in completed years for all persons who spent the census night in the country. Age and sex are the most fundamental demographic characteristics of human populations. They are important variables in the study of population dynamics, demographic analysis, social functions and responsibilities in socio-economic development processes.

Age, in particular, is an important variable for planning and making important decisions in public administration for different population groups. For instance, age is used as an essential input in population projections, planning for social economic development and provision of social services including health, education, food security and energy. Despite its importance, the results from previous censuses and the experience from most developing countries, show that age and sex information are affected by misreporting.

### 3.2 Quality of Age and Sex Data

The quality of age and sex data in the 2022 PHC was examined using an array of conventional methods and indices and was observed to have suffered errors associated with age misreporting which cannot be neglected. Based on experience gained from previous censuses, age data are characterized by a significant clustering at ages ending in digits “0”, “5” and “8” and to a lesser extent to ages ending with even numbers, with corresponding deficiencies at ages ending in digits “1”, “3”, “7” or “9”. The tendency of respondents to report ages ending with certain digits at the expense of other digits is called age heaping, age preference or digit preference. Age misreporting is most pronounced among populations or population sub-groups with no birth registration systems or low literacy rates.

The 2022 Census results in Njombe Region show a significant heaping in ages ending with digits “0”, “2” and “6”, and avoidance of ages ending with digits “1”, “3”, and “9”. There is a clear indication that, age misreporting for digit 5 is insignificant. This might be due to improved data collection techniques used in the 2022 Census, specifically the use of tablets, improved probing of age data and the use of National Identification Cards during enumeration to reconfirm the stated ages. The observed jagged edged pattern is a typical feature of single-year age distributions in most developing countries’ census data depicting age misstatements. Digit preference is observed to be relatively higher among females than males (Figures 3.1).

**Figure 3.1: Population Distribution by Age in Single Years and Sex – Njombe Region, 2022 PHC**

### 3.2.1 Population Distribution by Five Year Age Groups

Tables 3.1, 3.2 and 3.3 present the distribution of population by five-year age groups and sex for Njombe Region. The data depict a young population age structure with 38.1 percent of the population aged below 15 years and 5.0 percent aged 65 years and above. The median age of the Njombe Region population is 20.7 years. The results also portray a higher number of females than males in all age groups except age group 15 – 19.

Sex ratio by age groups provides an important index of possible age misreporting. Under normal circumstances, the general trend of sex ratio is a gradual decrease with age, eventually falling below 100, whereby the number of females begins to exceed the number of males and the difference increases with advancing ages. The overall sex ratio for Njombe Region is about 90 males for every 100 females (91 for rural areas and 86 for urban) indicating more females than males. The sex ratio of the population aged 10 - 19 years in rural areas is relatively high (102 to 110 boys per 100 girls). On the other hand, the sex ratio of the population of the same age in urban areas is relatively low (93 to 84 boys per 100 girls).

**Table 3.1: Number and Percentage Distribution of Population by Sex and Five-Year Age Groups; Njombe Region, 2022 PHC**

### 3.2.2 Population Pyramid

A population pyramid is a graphical representation of the age and sex composition of a specific population. It provides a snapshot of the population's age and sex structure. It also provides useful insights into the patterns of vital events (birth and death rates). The pyramid of Njombe Region as per the 2022 PHC has a broad base indicative of high fertility and a youthful age structure (Figures 3.2 to 3.5). Njombe Region population structure resembles other regional structures in the country.

However, pyramids for major urban centres may have a different structure. For example, the pyramid for Njombe Town Council (Figure 3.5), the headquarter of the Region, shows a bulge in ages 20-29 years, an indication of youth in-migration from other parts of the country.

**Figure 3.2: Population Pyramid for Five Year Age Groups; Njombe Region, 2022 PHC**

**Figure 3.3: Population Pyramid for Five Year Age Groups; Njombe Rural, 2022 PHC**

**Figure 3.4: Population Pyramid for Five Year Age Groups; Njombe Urban, 2022 PHC**

**Figure 3.5: Population Pyramid for Five Year Age Groups; Njombe Town Council, 2022 PHC**

### 3.3 Population Distribution by Selected Age Groups

The 2022 PHC reveals that, Njombe Region has a young population consisting 38.1 percent of the total population below 15 years of age and 5.0 percent of the population aged 65 years and above (Table 3.4). The broad-based structure is an indication of a development stage where a population succeeds in reducing infant mortality while fertility remains high.

**Table 3.4: Number and Percentage Distribution of Population by Place of Residence, Selected Age Groups and Sex; Njombe Region, 2022 PHC**

Age Group	Total		Rural		Urban

### 3.3.1 Children Under Five Years

The 2022 PHC results show that, the population under five years in Njombe Region is 12.9 percent. Figure 3.6 indicates that the percentage of population under five years in the Region has declined from 15.1 percent in 2002 to 12.9 percent in 2022. This moderate decline indicates a slow pace of fertility decline in the Region during the specified period.

**Figure 3.6: Percentage of Children Under Five Years by Place of Residence; Njombe Region, 2002, 2012 and 2022 PHCs**

### 3.3.2 Young Population (0-14 Years)

Njombe Regional population is characterised by a young age structure, with 38.1 percent of the total regional population below 15 years of age. Figure 3.7 shows that the percentage of population below 15 years of age has declined from 44.4 percent in 2002 to 38.1 percent in 2022.

**Figure 3.7: Percentage of Young Population (0-14 Years) by Place of Residence; Njombe Region, 2002, 2012 and 2022 PHCs**

### 3.3.3 Young Population (0-17 Years)

Figure 3.8 shows that 44.4 percent of the population in Njombe Region is below 18 years. The percentage of population aged 0-17 years in Njombe Region has declined from 51.2 percent in 2002 to 44.4 percent in 2022.

**Figure 3.8: Percentage of Young Population Aged 0-17 Years by Place of Residence;; Njombe Region, 2002, 2012 and 2022 PHCs**

### 3.3.4 Youth Population (15-24 Years)

The National Youth Development Policy, 2007 defines a youth as “a boy or girl who is in transition from childhood to adulthood”. According to the Policy, a youth is defined as a person aged 15 – 35 years. However, according to the United Nations, a youth is defined as a person aged 15 - 24 years. In this chapter the analysis has employed both definitions

Figure 3.9 indicates that the youth population (15 – 24 years) in Njombe Region account for 18.5 percent of the total regional population. The percentage of youth population (15-24 years) in the Region has declined slightly during the 2002 - 2022 period (19.4% in 2002, to 18.5% in 2022).

**Figure 3.9: Percentage of Youth Population (15-24 Years) by Place of Residence;; Njombe Region, 2002, 2012 and 2022 PHCs**

### 3.3.5 Youth Population (15 - 35 Years)

The 2022 PHC results show that the youth population as per the National Youth Development Policy, 2007 (15 - 35 years) accounts for 34.9 percent of the Njombe regional population. The percentage of persons aged 15-35 years has increased slightly from 34.7 in 2002 to 34.9 percent in 2022 (Figure 3.10).

**Figure 3.10: Percentage of the Youth Population (15-35 Years) by Place of Residence; Njombe Region, 2002, 2012 and 2022 PHCs**

### 3.3.6 Working Age Population (15-64 Years)

The working age population (15 – 64 years) in Njombe Region is 56.8 percent of the total regional population. The percentage of working age population in the region has increased from 51.5 percent in 2002 Census to 56.8 percent in 2022 (Figure 3.11).

**Figure 3.11: Percentage of the Working Age Population (15-64 Years) by Place of Residence; Njombe Region, 2002, 2012 and 2022 PHCs**

### 3.3.7 Elderly Population

According to the international definition, elderly population refers to a persons aged 65 years and above. However, according to the Tanzania National Ageing Policy of 2003, elderly is a person aged 60 years and above. In this chapter the analysis has taken into account both definitions.

#### Population Aged 60 Years and Above

Findings indicate that, the elderly constitute a small segment of Njombe regional population. The percentage of the population aged 60 years and above in Njombe Region is 7.3 percent. The percentage of the elderly population in Njombe Region has increased steadily from 6.1 percent in 2002 to 7.3 percent in 2022 censuses (Figure 3.12). The percentage of elderly population in the region is also higher in rural areas than in urban for all censuses.

**Figure 3.12: Percentage of the Population Aged 60 Years and Above by Place of Residence; Njombe Region, , 2002, 2012 and 2022 PHCs**

### Population Aged 65 Years and Above

Findings indicate that, the elderly population constitute a small segment (5.0%) of Njombe regional population. The percentage of the elderly population aged 65 years and above in the region increased from 4.1 percent in 2002 to 5.0 percent in 2022 (Figure 3.13).

**Figure 3.13: Percentage of the Population Aged 65 Years and Above by Place of Residence; Njombe Region, 2002, 2012 and 2022 PHCs**

### 3.3.8 Age Dependency Ratio

Age-dependency ratio is the proportion of persons in the “dependent” ages (those under 15 years of age plus those aged 65 years and above) to the “working age population” (15-64 years). It is expressed as a number of dependents per 100 persons of the working age population. Ratios higher than 100 are undesirable. The age-dependency ratio is a proxy indicator of the economic burden and responsibility borne by the working age population.

According to the 2022 PHC results, the dependency ratio for Njombe Region is 75.9 implying that there are about 76 dependants per 100 non-dependants. Results further show that the age dependency ratio in the region has declined in two decades from 94.2 in the 2002 census to 75.9 in the 2022 census (Figure 3.17).

**Figure 3.14: Age Dependency Ratio by Place of Residence; ; Njombe Region, 2002, 2012 and 2022 PHCs**

## Chapter 4

### Household Composition

---

#### Key points

- Most of private households in Njombe Region (68.7%) are in rural areas.
- The average household size in Njombe Region is 3.6 persons; in rural areas it is 3.7 persons while in urban areas it is 3.3 persons.
- There is a decline in average household size from 4.1 persons in 2012 to 3.6 in 2022.
- The average number of persons per household in male-headed households is 3.9 and 3.1 in female-headed households.
- Female-headed households in Njombe Region increased from 38.0 percent in 2012 to 39.5 percent in 2022.

#### 4.1 Introduction

This chapter presents information on private households including household composition, number of households, average household size and household headship. Although the 2022 PHC collected information from private and collective households, the analysis is based on private households only.

A private household refers to a person or group of persons living together, having the same cooking arrangements and answerable to one household head, but not necessarily in the same dwelling unit. Since the 2022 PHC enumeration was *de facto* some modifications were made to this definition. For instance, visitors present in the household on census night were also included as members of the household. Further, usual members of the household who spent the census night elsewhere due to being on duty were included as members of the household. On the other hand, collective households are those with members not necessarily related to each other, such as students in hostels, orphanages, prisons and patients in hospital wards.

#### **4.2 Number of Households**

The 2022 PHC reveals that Njombe Region has a total of 244,579 private households out of which 76,541 (31.3%) are in urban areas and 168,038 (68.7%) in rural areas. Female headed households account for 39.5 percent of all private households. The percentage of female headed households is slightly higher in urban areas (42.1%) than in rural areas (38.4%) (Table 4.1 and 4.2).

**Table 4.1: Number and Percentage of Private Households by Place of Residence, Sex of Head of Household and Age Group; Njombe Region, 2022 PHC**

## Basic Demographic and Socio-Economic Profile

Results further reveal that, Njombe Town has the highest number of private households accounting for 21.6 percent of total private households in the region. Other Councils with relatively higher number of private households are Wanging'ombe (21.3%), Makambako (16.6%), and Ludewa (16.2%). On the other hand, Njombe District has the smallest number of private households (11.5%) in the region (Table 4.2).

**Table 4.2: Number and Percentage of Private Households by Place of Residence and Council; Njombe Region, 2022 PHC**

Council	Total		Rural		Urban	
	Number	Percent	Number	Percent	Number	Percent
<b>Total</b>	<b>244,579</b>	<b>100</b>	<b>168,038</b>	<b>68.7</b>	<b>76,541</b>	<b>31.3</b>

Wanging'ombe District	52,125	21.3	48,033	92.1	4,092	7.9

Figure 4.1 shows an increase of the private households in urban areas from 23.8 percent in 2012 to 31.3 percent in 2022 PHC.

**Figure 4.1: Percentage Distribution of Private Households by Place of Residence; Njombe Region, 2012 and 2022 PHCs**

### 4.3 Average Household Size

Average household size is the mean number of persons in a private household. The average household size in the region decreased from 4.1 in 2012 to 3.6 persons in 2022. Average household size is higher in rural (3.7 persons per household) than in urban areas (3.3 persons). Average household size also declined from 4.2 persons in 2012 to 3.7 in 2022 in rural areas while in urban areas the decline is from 4.1 persons in 2012 to 3.3 in 2022. Moreover, the average household size varies across Councils, ranging from 3.4 persons per household in Njombe Town Council to 3.8 persons in Njombe and Ludewa District Councils (Figure 4.2 and Table 4.3).

**Figure 4.2: Average Household Size by Council; Njombe Region, 2022 PHC**

**Table 4.3: Population in Private Households, Number of Households and Average Household Size by Place of Residence and Council; Njombe Region, 2012 and 2022 PHCs**

Place of Residence	Population		Number of Households		Average Household Size	
	2012	2022	2012	2022	2012 <sup>2</sup>	2022
<b>Total</b>	<b>702,097</b>	<b>875,640</b>	<b>168,982</b>	<b>244,579</b>	<b>4.1</b>	<b>3.6</b>
Rural	536,189	619,857	128,712	168,038	4.2	3.7
Urban	165,908	255,783	40,270	76,541	4.1	3.3
<b>Council</b>

Wanging'ombe District	161,816	189,986	39,855	52,125	4.1	3.6

#### 4.4 Household Headship

A household head is the individual member of the household who is normally recognized by other household members as their head. The 2022 PHC results show that, of the total private households in Njombe Region, 60.5 percent are headed by males and 39.5 percent are headed by females (Figure 4.3 and Table 4.4).

**Figure 4.3: Percentage Distribution of Household by Sex of Household Head and Place of Residence; Njombe Region, 2022 PHC**

<sup>2</sup> Data from Njombe Region Basic Demographic and Social-Economic Profile, 2012 PHC

## Basic Demographic and Socio-Economic Profile

Results further reveal that percentage of male-headed households has slightly decreased from 62.0 in 2012 to 60.5 percent in 2022 while female-headed households increased from 38.0 in 2012 to 39.5 percent in 2022. A similar pattern is observed across Councils (Table 4.4).

**Table 4.4: Percentage Distribution of Households by Sex of Household Head, Place of Residence and Council; Njombe Region, 2012 and 2022 PHCs**

Place of Residence	2012		2022	
	Male Headed	Female-Headed	Male Headed	Female-Headed
<b>Total</b>	<b>62.0</b>	<b>38.0</b>	<b>60.5</b>	<b>39.5</b>
Rural	61.7	38.3	66.8	34.7
Urban	63.0	37.0	61.5	33.2
<b>Council</b>				
Njombe District	62.1	37.9	62.7	37.3
Njombe Town	63.6	36.4	60.2	39.8
Makambako Town	63.4	36.6	58.9	41.1
Ludewa District	63.3	36.7	63.4	36.6
Makete District	59.7	40.3	59.6	40.4
Wanging'ombe District	60.5	39.5	59.0	41.0

In Njombe Region, the average number of persons in male headed households is higher (3.9 persons) than in female headed households (3.1 persons). A similar pattern is observed in rural areas. However, in urban areas the average household size is higher (3.5 persons) for male headed than for female headed households (3.1 persons). Irrespective of sex of head, Njombe and Ludewa Districts has the highest average household size (3.8 persons each) while Makete District and Njombe Town has the lowest (3.4 persons) (Table 4.5).

**Table 4.5: Distribution of Population in Private Households by Sex of Household Head, Number of Households, Average Household Size, Place of Residence and Council; Njombe Region, 2022 PHC**

Place of Residence	Population			Number of Household			Average Household Size

#### **4.4.1 Households Living in Improved or Unimproved Houses**

This sub section discusses the heads of households and the type of building materials used to build the main dwellings (houses). For the purpose of this report, an improved house means a house that is built using improved building materials in at least two of the following; roofing, walling and flooring materials.

Table 4.6 shows that 95.8 percent of households in Njombe Region live in improved houses, a percentage which is about the same for male headed and female headed households (95.8% and 95.7% respectively). Results show further that the percentage of household which live in improved houses is higher (99.0%) in urban areas compared with rural areas (94.3%). However the difference between male headed and female headed households is only slight (95.8% versus 95.7% respectively).

All Councils in the region has more than 50 percent of households living in improved houses. A similar pattern is also observed for both male headed and female headed households (Table 4.6).

**Table 4.6: Percentage Distribution of Households living in Improved/ Unimproved Houses by Sex of Household Head, Place of Residence and Council; Njombe Region, 2022 PHC**

Place of Residence	Total			Male Headed			Female Headed		
	Total	Improved House	Unimproved House	Total	Improved House	Unimproved House	Total	Improved House	Unimproved House
<b>Total</b>	<b>244,579</b>	<b>95.8</b>	<b>4.2</b>	<b>147,867</b>	<b>95.8</b>	<b>4.2</b>	<b>96,712</b>	<b>95.7</b>	<b>4.3</b>
Rural	168,038	94.3	5.7	103,540	94.5	5.5	64,498	94.1	5.9
Urban	76,541	99.0	1.0	44,327	98.9	1.1	32,214	99.1	15.2
<b>Council</b>									
Njombe District	28,196	95.4	4.6	17,687	95.8	4.2	10,509	94.8	5.2
Njombe Town	52,813	98.1	1.9	31,779	98.0	2.0	21,034	98.3	1.7
Makambako Town	40,576	98.2	1.8	23,907	98.2	1.8	16,669	98.2	1.8
Ludewa District	39,578	90.7	9.3	25,095	91.0	9.0	14,483	90.3	9.7
Makete Distict	31,291	93.9	6.1	18,662	93.8	6.2	12,629	94.1	5.9
Wanging'ombe Distict	52,125	96.7	3.3	30,737	96.9	3.1	21,388	96.4	3.6

The findings in Table 4.7 show that as age of household head increases the chances of living in improved house decreases. For example, while 96.5 percent of household heads aged 30-34 years live in improved houses, such percentage decreases to 94.4 percent for those household heads aged 80 years and above. This observation holds for both males headed and female headed households.

#### 4.4.2 Heads of Households by Marital Status and Occupation

The 2022 PHC results reveal that in Njombe Region, majority of male heads of household regardless of their marital status (56,382 or 48.3%) are employed as agricultural and fishery workers, followed by those engaged as crafts and related workers (26,095 or 22.3%) and those in elementary occupations (17,329 or 14.8%). Among the 2,857 widowed males (1,717 or 3.0%) are engaged in agricultural and fishery; 2.5 percent are elementary workers and 2.2% percent are craft and related workers. Results further reveal that, among all male heads of households who are engaged as agricultural and fishery workers, 3.0 percent are widowed (Table Table 4.8 and Table 4.9).

**Table 4.8: Number of Male Heads of Households by Marital Status and Occupation; Njombe Region, 2022 PHC**

On the other hand, results reveal that 35,053 (52.7%) female heads of household regardless of their marital status are employed as agricultural and fishery workers, followed by Craft and related workers (12,974 or 19.5%). Among the 19,589 widowed females (12,415 or 34.5%) are engaged in agricultural and fishery; 3,723 or 28.7 percent are Craft and related workers. (Table 4.10). Among the 35,053 female heads of households who are engaged as agricultural and fishery workers, 12,415 or 35.4 percent are widowed (Table 4.11).

#### 4.4.3 Heads of Household by Type of Toilet Facility

In Njombe Region, percentage of households using improved toilet facilities is 80.4 percent for the male headed and 80.1 percent for the female headed households. On the other hand, with respect to households with no toilet facilities, there is slightly difference between female headed and male headed households (Figure 4.4).

**Figure 4.4: Percentage Distribution of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head; Njombe Region 2022 PHC**

Results show that the percentage of households using improved toilet facilities is higher in urban than in rural areas, with a percentage point difference of 93.3 for female headed households and 93.2 for the male headed. However, there is hardly any difference between male headed and female headed households for both rural and urban areas. In contrast, results further reveal that, households that use unimproved toilet facilities as well as those without toilet facilities are mostly found in rural areas (Figure 4.5 and Table 4.10).

**Figure 4.5: Percentage of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head and Place of Residence; Njombe Region; 2022 PHC**

Across Councils, results reveal that Njombe District has the highest percentage of both male and female headed households with improved toilet facilities (93.6% and 94.2% respectively). Other Councils with high percentage of male and female headed households using improved toilet facilities are Makambako Town (87.0% and 87.4%), Njombe Town (86.5% and 86.6%) and Makete District (82.5% and 83.3%).

Councils with high percentage of male headed households with unimproved toilet facilities are Ludewa District (36.6%), Wanging'ombe District (25.1%) and Makete District (16.7%). On the other hand, Councils with high percentage of female headed households with Unimproved toilet facilities are Ludewa District (38.7%), Wanging'ombe (27.4%) and Makete District (16.1%) (Table 4.12).

**Table 4.12: Percentage Distribution of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head, Place of Residence and Council, Njombe Region, 2022 PHC**

#### 4.4.4 Heads of Households by Source of Drinking Water

The results show that, in urban areas there is a slight difference between male headed households that use improved source of drinking water (76.5%) compared with female headed households (76.3%). The same pattern is also observed in rural areas whereby the proportion of male headed households that use improved source of drinking water is 36.5 percent and 35.5 percent for female headed households.

Both male and female headed households using improved source of drinking water are more dominant in urban areas than rural areas. The proportion of households that use unimproved source of drinking water is slightly lower for male than female headed households in rural areas (23.5% and 23.7% respectively) (Figure 4.6).

**Figure 4.6: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head and Place of Residence; Njombe Region, 2022 PHC**

The results also reveal that the percentage of female headed households that use improved source of drinking water is higher (81.3%) compared with that of male headed households (79.8%) (Figure 4.7).

**Figure 4.7: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head; Njombe Region, 2022 PHC**

Across Councils, Makete District has the highest percentage of both male and female headed households that use improved sources of drinking water (92.3% and 92.0% respectively). Other councils with relatively high percentages of male and female headed households using improved sources of water for drinking are Makambako Town (88.9% and 90.4% respectively) and Wanging’ombe District (83.1% and 84.2% respectively)

On the other hand, Councils with high percentages of male headed households using unimproved sources of drinking water are Njombe District (34.6%), Ludewa District (28.5%) and Njombe Town (22.8%). Female headed households with high proportion of households using unimproved sources of water for drinking are Njombe District (32.6%), Ludewa District (27.8%), and Njombe Town (22.1%) (Table 4.13).

**Table 4.13: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head, Place of Residence and Council; Njombe Region, 2022 PHC**

#### 4.4.4.1 Household Heads with Children Under 18 Years

Results show that percentage of female headed households with one to three children under 18 years is higher (57.9%) than that of male headed households (53.0%). The percentage of male headed households with no child under 18 years is about the same (32.8%) as that of female headed households (32.1%). On the other hand, the percentage of male headed households with more than 3 children under 18 years is higher (14.2%) compared with that of female headed households (10.0%) (Figure 4.8). The results also show that, the majority of households in the region with children under 18 years have one to three such children.

**Figure 4.8. Percentage Distribution of Households with Children under 18 Years by Sex of Household Head; Njombe Region, 2022 PHC (correction needed)**

Results further indicate that, most of female headed household's (57.1%) in rural areas have one to three children under 18 years compared with 54.2 percent of male headed households. The same pattern is observed in urban areas. About fifteen percent (15.4%) of male headed households with more than three children reside in rural areas compared with 10.5 percent of female headed households. On the other hand, the proportion of male headed households with no children under 18 years is higher in urban areas (38.4%) compared with those living in rural areas (30.4%) (Figure 4.9 and Table 4.14).

Across councils, Makambako Town has the highest percentage of households (56.3%) with one to three children, followed by Njombe District with 56.1 percent, while Makete District has the lowest percentage of households with one to three children (52.8%) (Table 4.14).

## Chapter 5

### Marital Status

#### Key Points

- Nearly half (47.7%) of the population aged 15 years and above in Njombe Region are married.
- About eight percent (7.5%) of persons aged 15 years and above are widowed. The percentage of females widowed is higher (12.0%) than that of males (2.1%).
- About two percent (1.7%) of persons aged 15 years and above are divorced. Females are more likely to be divorced (2.1%) than males (1.3%).
- Mean Age at First Marriage in Njombe Region is 25.2 years. Females are getting married at a younger age (23.8 years) than males (26.9 years).

#### 5.1 Introduction

This chapter focuses on analysis of marital status and Singulate Mean Age at First Marriage (SMAM). The term "marital status" refers to the state of being married, unmarried, widowed, separated or divorced. Marital status is one of the most important factors in population dynamics as it affects fertility and other social and economic characteristics such as school attendance and labour force participation. The information on marital status helps Government, agencies and other users to understand marriage trends and forecast future needs of programmes that have spousal benefits. It also measures the effects of policies that focus on the well-being of families, including financial assistance plans.

In the 2022 PHC questions on marital status were asked to all persons aged 10 years and above. However, in order to allow comparison of the 2022 Census results with the 2012 results, analysis is mainly focused on the population aged 15 years and above. Six categories namely never married, married, living together, separated, divorced and widowed were adopted to classify marital status. Data on marital status for the 2022 PHC is disaggregated by age, sex, rural and urban areas and councils.

## 5.2 Marital Status

In Njombe Region, results show that 47.7 percent of persons aged 15 years and above are married and the percentage is higher among males (48.9%) than females (46.8%). Proportionately, the percentage of married persons have a slight (0.4%) difference among married persons in rural areas (47.9%) compared with those in urban areas (47.5%). Furthermore, about one third (33.4%) of persons aged 15 years and above are never married; males are 38.8 percent while females are 28.9 percent. The results also show notable (8.9%) differences between rural and urban areas for the never married persons (30.7% and 39.6% respectively).

Results further show that, the percentage of persons aged 15 years and above who are widowed is 7.5 percent which is higher (12.0%) among females than males (2.1%). In Njombe Region, the percentage of widowed in rural areas is 8.5 percent while in urban areas it is 5.1 percent. The large number of females who are widowed compared with males might be contributed by the tendency of most males to remarry early after death of their wives. This difference might also be due to the fact that males are more subjected to risky tasks, hence they are more likely to die at younger ages than females. As a result, there are fewer widowed males than females. Moreover, biologically females live longer than males. However, further studies are needed to ascertain the root causes of the aforementioned disparities (Table 5.1 and Figure 5.1).

**Table 5.1: Percentage Distribution of the Population Aged 15 Years and Above by Place of Residence, Sex and Marital Status; Njombe Region, 2022 PHC**

**Figure 5.1: Percentage Distribution of Population Aged 15 Years and Above by Sex and Marital Status; Njombe Region, 2022 PHC**

The percentage of married persons increased sharply with age from 3.6 percent for persons aged 15-19 years to 69.4 percent for those aged 40-44 and thereafter declines gradually as age increases. Percentage of the divorced persons increases with age from 0.1% for those aged 15–19 years to 3.1% for those aged 40-44 years and started to decline gradually up to 0.9% for those aged 80+ years. The widowed persons increase steadily as age increases from 0.1 percent for those aged 20-24 years to 61.4 percent for those aged 80+ years (Table 5.2).

Results show that 49.7 percent of the male population aged 10 years and above are never married, 40.2 percent are married and 6.2 percent are living together. Across age groups, almost all male children in Njombe Region (99.9%) aged 10 - 14 years and 99.0 percent of those aged 15 -19 are never married. The percentage of never married persons decreases as age increases (Table 5.3).

### 5.2.1 Marital Status for Selected Age Groups

Table 5.5 shows the percentage of population by marital status for selected age groups. Results reveal that, the percentage of married persons aged 15-64 years in Njombe Region is 48.0 percent while for age group 65 years and above is 44.5 percent. The percentage of widowed persons aged 65 years and above is 44.1 percent. Results further show that by age 65 and above, only 2.8 percent of the population aged 10 years and above are single implying that marriage in Njombe Region is almost universal. The proportions of persons living together in age group 15 – 35 years is (7.0%) and those aged 15-64 years is (7.9%).

**Table 5.5: Percentage Distribution of the Population Aged 10 Years and Above by Marital Status and Selected Age Groups; Njombe Region, 2022 PHC**

Selected Age Group	Total Population	Marital Status					
		Never Married	Married	Living Together	Divorced	Separated	Widowed
<b>Total</b>	<b>660,539</b>	<b>44.5</b>	<b>39.8</b>	<b>6.4</b>	<b>1.5</b>	<b>1.5</b>	<b>6.2</b>

Table 5.8 highlights the council variations of marital status for the persons aged 15 years and above. Results show that the percentage of the never married category ranges from 29.2 percent in Makete District to 37.5 percent in Njombe Town Councils. For the married category the range is from 29.0 percent in Njombe District to 55.8 percent in Makete District District Council. The percentage of persons in the widowed category ranges from 5.7 percent in Makambako Town to 9.7 percent in Makete District Council.

Figure 5.2 presents comparison of marital status of persons aged 15 years and above for the 2012 and 2022 Censuses. The results show an increase in the proportion of persons in the categories of living together, separated and widowed. On the other hand, a decreasing proportion is revealed for married (6.1%) category and a slight decreasing proportion is revealed for the never married (0.2%), and divorced (0.1%) categories.

**Figure 5.2: Percentage Distribution of Population Aged 15 Years and Above by Marital Status; Njombe Region, 2012 and 2022 PHCs.**

### 5.3 Mean Age at First Marriage

The Mean Age at First Marriage (MAFM) which is defined as the average length of single life (before marriage) expressed in years among those who marry before age 50, is one of the proxy determinants of fertility. The mean age at first marriage is estimated using the Singulate Mean Age at First Marriage (SMAM). A population with a low age at first marriage tends to have early childbearing and high fertility.

The results show that, MAFM in 2022 is 25.2 years; females are getting married at a younger age (23.8 years) than males (26.9 years). Results further show that there is an insignificant increase (1.7%) in the MAFM for females from 22.1 years in 2012 to 23.8 years in 2022. During the same period, the MAFM for males increased from 25.2 years in 2012 to 26.9 years in 2022 (Figure 5.3).

**Figure 5.3: Mean Age at First Marriage by Sex; Njombe Region, 2012 and 2022 PHC**

Furthermore, the MAFM is higher in urban areas compared with rural areas among both males and females and for both censuses (Figure 5.4).

**Figure 5.4: Mean Age at First Marriage by Place of Residence and Sex; Njombe Region, 2012 and 2022 PHC**

Table 5.9 shows that, the MAFM for females and males in Njombe Region are increasing slightly, from 22.1 years in 2012 for females to 23.8 years in 2022 and for males it has increased from 25.2 years in 2012 to 26.9 years in 2022. Generally, there is slight increase for MAFM in urban areas compared with rural areas for males and females in both censuses.

**Table 5.9: Mean Age at First Marriage by Sex, Place of Residence and Council; Njombe Region, 2012 and 2022 PHCs**

## Chapter 6

### National Identification Documents and Citizenship

---

#### Key Points

- About 62 percent (61.8%) of the population in Njombe Region have neither birth certificate nor birth notification.
- About sixty-four percent of children (63.7%) under-fives have birth certificates
- About 15 percent of persons (14.5%) aged 18 years and above have national identification numbers and 33.2 percent have national identification cards.
- Out of 875,640 persons in Njombe Region 80,392 have health insurance from national Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF).

#### 6.1 Introduction

This chapter presents information on possession of national identification documents, which include birth certificate and notification, National Identification Card (NIDA), Zanzibar Identification Card (ZAN ID), Driving License, Voter's ID, Travel Passport and Small Entrepreneur ID. The chapter also presents citizenship status. The objective of national identification documents is to help eligible citizens to access various services including financial, health and education.

#### 6.2 National Identification Documents

A national identification document is any official document that may be used to prove a person's identity such as the bearer's full name, birth date, address, an identification number, card number, sex, citizenship and the like. If issued in a small, standard smart card size, it is usually called an identity card or citizen card. Alternatively, it is issued in other formats such as Tanzania travel permit or passport. For a national identification document to be valid it should be issued by an authorized government/state institution.

### **6.2.1 Birth Certificate**

A birth certificate is a vital record that is used to document the birth of a child. The term "birth certificate" can refer to either the original document certifying the circumstances of the birth or to a certified copy or a representation of the ensuing registration of that birth.

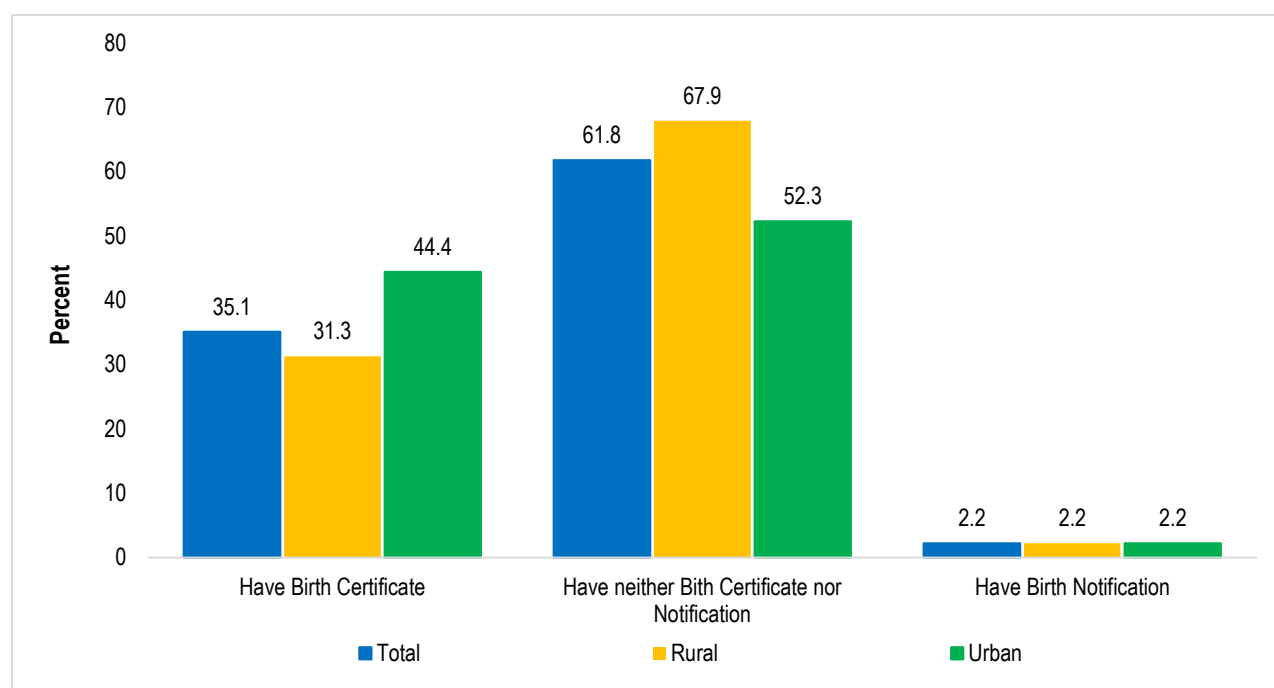

In the 2022 PHC, data on birth certificates were collected from all respondents regardless of their age. Results show that, in Njombe Region 35.1 percent of persons have birth certificates while the majority (61.8%) of the population have neither birth certificates nor birth notifications. There is an increase percentage of the population with birth certificates from age group 0 – 4 years (63.7%) to age group 5 – 9 years (67.6%) while there is declining percentage of population from younger to older age group 10 – 14 years (45.1%) to age group 80+ years (2.0) (Tables 6.1).

The percentage of persons with birth certificates is larger (44.4%) in urban than in rural areas (31.3%). The result also shows that the percentage of males with birth certificate is slightly higher (36.6%) than females (33.8%). Further results show that, 46.4 percent of males and 42.7 percent of females living in urban areas have birth certificates compared with males and females living in rural areas (32.7% and 30.0 % respectively) (Tables 6.2 and 6.3).

### **6.2.2 Birth Notification**

Birth notification is a document issued by a health facility to confirm the occurrence of birth. It is an initial document in the process of registering a child's birth. It provides the first legal recognition of the child and is generally required for the child to obtain a birth certificate and other legal documents and rights. The results show that, in Njombe Region, 2.2 percent of the population have birth notifications, and the same percentage is observed in both rural and urban areas (Table 6.1, 6.2, 6.3 and Figure 6.1).

**Figure 6.1: Percentage Distribution of Population by Birth Certificate Status and Place of Residence; Njombe Region, 2022 PHC**

### 6.2.3 Other National Identification Documents

Tanzania Population and Housing Census 2022 collected information on travel passport, national health insurance/community health insurance and other health insurance schemes from all persons regardless of their age. On the other hand, information on national identification card, national identification number, Zanzibar identification card, driving license and voters' identification card were collected for all persons aged 18 years and above. In addition, persons aged 15 years and above provided information on possession of small entrepreneur identification card and those aged 60 years and above provided information if they have cards for treatment of the elderly

#### 6.2.3.1 National Identification Cards

Table 6.5 and Figure 6.2 indicate that 33.2 percent (160,105) of persons aged 18 years and above in Njombe Region have national identification cards while 14.5 percent have only national identification numbers. Moreover, results show a higher percentage (35.1%) of persons in rural areas with national identification cards than in urban areas (28.6%). Additionally, results reveal that, 66.6 percent of persons have voters' identification cards. Further results reveal that more than nine percent (9.4%) of persons aged 15 years and above who are engaged in Informal Activities have a small entrepreneur identification card.

**Figure 6.2: Percentage Distribution of Population Possessing Other National Identification Documents by Place of Residence and Type; Njombe Region, 2022 PHC**

### 6.2.3.2 Health Insurance

Table 6.6 indicates that 9.2 percent persons in private households in Njombe Region have health insurance from the National Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF). Njombe Town council has the highest percentage (12.6%) of persons who possess NHIF/CHIF insurance (22,555); followed by Ludewa District Council (10.5%); (15,737) persons) and lastly Wanging'ombe District with (6.3%); (12,031 persons). In addition, 1.2 percent (10,844 persons) in the region have health insurance from other health insurers. Further analysis indicates that there is a higher proportion of persons in urban areas 34,070 (13.3%) with NHIF/CHIF cards than in rural areas with 46,322 persons (7.5%). On the other hand, 6,938 (1.1%) persons in rural areas have other health insurance schemes compared with 3,906 (1.5%) persons in urban areas.

### 6.3 Citizenship

Tanzania citizenship is governed by the Tanzania Citizenship Act, Chapter 357 (Revised Edition of 2002) and its Regulations of 1997. The 2022 PHC collected information on citizenship status.

The results show that 888,801 persons (99.9%) out of 889,946 enumerated in Njombe Region are Tanzanians. The majority of non-Tanzanians are from other African countries (540 persons) followed by other East African countries (321 persons) and Outside Africa (284 persons) (Table 6.7).

**Table 6.7: Distribution of Population by Place of Residence, Sex and Country of Citizenship; Njombe Region, 2022 PHC**

## Chapter 7

### Survival of Parents

---

#### Key Points

- About nine out of ten (89.5%) children under 18 years have both parents alive.
- Almost one out of ten (10.6%) children under 18 years is orphan with proportionately higher in urban areas (10.9%) than rural area (10.4%).
- About eight percent (8.2%) of children under 18 years are orphans with one parent dead.
- More than two percent (2.4%) of children under 18 years are orphans with both parents dead.
- Makete District Council has the highest proportion (12.3%) of orphans (at least one parent dead) compared with other councils in Njombe Region.

#### 7.1 Introduction

This chapter presents information on survival of parents at national and regional levels. The information helps to determine the extent of orphanhood in a society for making evidence-based decisions. In Tanzania, an orphan is defined as a child under 18 years of age who has lost one or both parents. This definition is consistent with the United Nation definition. The death of parents has a significant negative impact on the wellbeing and survival of young children, especially those who are young and most vulnerable (under 5 years old). The death of a mother if other factors remain unchanged, has a substantial impact and is associated with 2 to 50 times increased risk of death among the under-5 children left behind<sup>3</sup>. Orphans with no family or community support face risky life situations including: having no family social network; lacking food and healthcare and sometimes having to assume the role of heads of household and taking care of their younger siblings. Furthermore, information on survival of parents was collected from all children under 18 years with respect to a child's biological parents and not adopting or fostering parents.

## 7.2 Survival of Parents

Results indicate that 89.5 percent of all children under 18 years in Njombe Region have both parents alive. The percentage of children with both parents' alive decreases with increasing age from 95.8 percent for children under one year to 78.6 percent for children aged 17 years. The results further show that the percentage of children with their fathers dead and mothers alive is higher (6.1%) than those with their fathers alive and mothers dead (2.1%). In addition, the patterns of survival of parents are similar for both male and female children (Tables 7.1, 7.2 and 7.3).

### 7.2.1 Survival of Parents by Council

Results from Table 7.4 show that survival of both parents for children under 18 years across councils in Njombe Region ranges from 87.7 percent to 90.4 percent. Across Councils, Ludewa District has the highest percentage of children with both parents alive (90.4%) while Makete District Council has the lowest (87.7%).

The results further show that Makete District Council has the highest percentage (7.1%) of children with Father Dead and Mother Alive compared with other councils while all councils have the same percentage of children with Father Alive and Mother Dead (2.0%) except Ludewa council with percentage (1.8%) and Makete council has the highest percentage of children with both Father Dead and Mother Dead (3.0%) followed by Njombe District (2.7%).

### 7.3 Orphanhood

The 2022 PHC results reveals that, Njombe Region has 10.6 percent of children under 18 years are orphans. Further results show that, more than eight percent (8.2%) of children lost either father or mother and more than two percent (2.4%) lost both parents. The percentage of children who are orphans is slightly higher(10.9%) in urban areas than in rural areas (10.4%). The percentage of orphans ranging from 9.6 percent in Ludewa District to 12.3 percent in Makete District (Figure 7.1).

## Chapter 8

### Education, Literacy and Numeracy

---

#### Key Points

- More than three quarters (90.3%) of persons aged 15 years and above in Njombe Region are literate; 87.8 percent in rural and 96.0 percent in urban areas.
- Numeracy rate among persons aged five years and above is 87.5 percent; males (88.4%) and females (86.7%)
- About ninety six percent (95.5%) of the primary school population age (7-13 years) are attending school and 2.5 percent had never been to school.
- Net Enrolment Rate (NER) for primary schools is 95.5 percent. It is higher in urban (96.6%) and lower in rural (95.1%) areas.
- Majority (72.7%) of population aged four years and above attained primary education and 19.9 percent completed ordinary level secondary school education.
- About four percent (4.9%) of the population aged four years and above attained university education and other related education level.

#### 8.1 Introduction

Education is one of the most important factors in social and economic development of any society. This chapter presents the status of education, literacy and numeracy for the persons aged five years and above. It also provides information on school attendance, school dropout and education attainment for persons aged four years and above.

#### 8.2 Literacy

Literacy is the ability to read and write with an understanding of a short simple sentence in any language. It excludes the ability to only write or sign one's own name or write memorised phrases. The literacy rate in 2022 PHC is measured for persons aged five years and above who could read and write in: Kiswahili only; English only; both Kiswahili and English or any other languages. No test was administered to verify those who were really literate.

Results show that out of 775,544 persons aged five years and above 694,975 persons (89.6%) in Njombe Region are literate. The literacy rate is higher among males (91.3%) than females (88.1%). Literacy rates are generally higher among the young population compared with the older population. The highest literacy rate of 97.2 percent is observed for age group 10-14 years. Literacy rates below 60 percent are observed among persons aged 75 years and above. These results indicate a positive impact of the universal primary education and increased enrolment in secondary education resulting from free education programme (Table 8.1).

Literacy rate in urban areas is substantially higher (95.4%) than in rural areas (87.2%). Males are more literate than females in both rural and urban areas as presented in Tables 8.2, 8.3 and Figure 8.1.

### 8.2.1 Literacy for Selected Age Groups

Results show that youth (using national and international definition) have literacy rate above 95.8 percent and the rate is the highest (97.2%) among secondary school age population (age group of 14-17 years) Literacy rates are higher in urban than in rural areas, and for most of the selected age groups, females are more literate than males in both rural and urban areas.

Literacy rate among population in primary school age in Njombe Region is 94.6 percent and among secondary school age population is 97.2 percent. The literacy rate among primary and secondary population is higher among females than males in both rural and urban areas (Table 8.4).

**Table 8.4: Literacy Rates by Place of Residence, Sex and Selected Age Groups; Njombe Region, 2022 PHC**

Selected Age Group	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female

### 8.2.2 Adult Literacy

The results show that, adult literacy rate for persons aged 15 years and above is 90.0 percent. The literacy rate is higher among males (93.1%) than females (87.4%). Furthermore, results reveal that in urban areas the adult literacy rate is higher (95.9%) than in rural areas (87.4%). Males are more literate than females in both rural and urban areas (Figure 8.2).

**Figure 8.2: Adult Literacy Rates for Persons Aged 15 Years and Above by Sex and Place of Residence; Njombe Region, 2022 PHC**

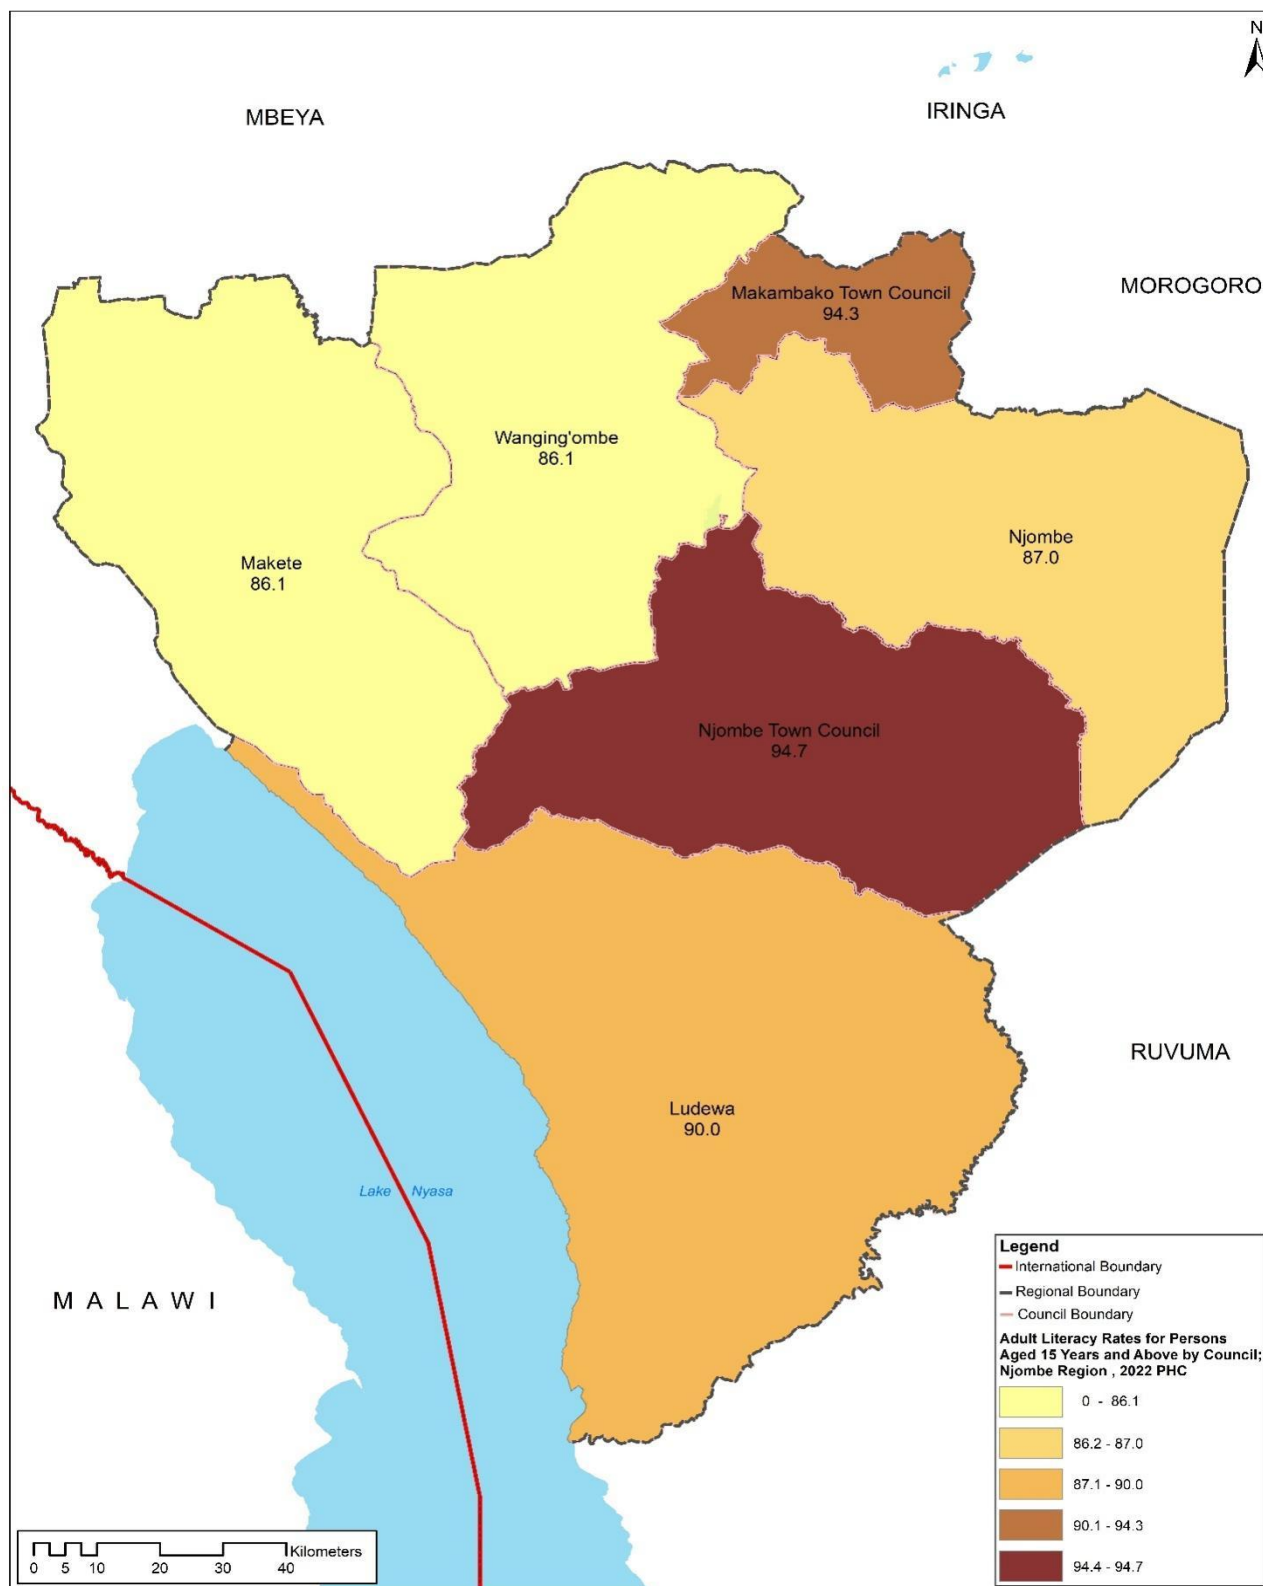

Literacy rates among adults increased from 81.9 percent in 2012 to 90.0 percent in 2022. Results also indicate that, the increase in adult literacy rate is more pronounced among females (10.6 percentage point difference) than males (5.0 percentage point difference) (Figure 8.3).

**Figure 8.3: Adult Literacy Rates for Persons Aged 15 Years and Above by Sex; Njombe Region, 2012 and 2022 PHCs**

Adult literacy rates vary across councils, ranging from 86.1 percent in Wanging'ombe District to 94.7 percent in Njombe Town.

**Map 8.1: Adult Literacy Rates for Persons Aged 15 Years and Above by Council; Njombe Region, 2022 PHC**

Results reveal that, adult literacy rates increased from 81.9 percent in 2012 to 90.0 percent in 2022 censuses with an overall percentage point difference of 8.1 percent. Across councils, the highest percentage point change is 11.0 percent in Makete District (Table 8.5).

**Table 8.5: Literacy Rates for Persons Aged 15 Years and Above by Sex, Place of Residence and Council; Njombe Region, 2012 and 2022 PHCs**

### 8.2.3 Adult Literacy in Different Languages

The results in Table 8.6 and Figure 8.4 show that in Njombe Region, literacy rate is 90.0%. It is highest in Kiswahili only (67.9%), followed by both Kiswahili and English (21.3%) and is low for other languages (0.3%). In addition, results show that illiteracy rate increases with age.

**Table 8.6: Percentage Distribution of Adult Population Aged 15 Years and Above by Literacy Status and Five-Year Age Groups; Njombe Region, 2022 PHC**

**Figure 8.4: Percentage Distribution of Adult Population Aged 15 Years and Above by Literacy Rate; Njombe Region, 2022 PHC**

Table 8.7, Figures 8.5 and 8.6 show that, the percentage (67.9%) of individuals who are literate in Kiswahili only is higher in rural (70.5%) than in urban areas (61.8%). On the other hand, the percentage of those who are literate in both Kiswahili and English is higher in urban (33.1%) than in rural areas (16.1%). In urban areas, females are more (63.3%) literate in Kiswahili only than males (60.0%).

**Table 8.7: Literacy Rates for Adult Population Aged 15 Years and Above by Literacy Status, Place of Residence and Sex; Njombe Region, 2022 PHC**

### 8.3 Numeracy

Numeracy is the ability to access, use, interpret and communicate simple mathematical information and ideas, to engage in and manage mathematical demands within a range

situations in adult life. Basic numeracy skills consist of comprehending fundamental arithmetic operations such as addition, subtraction, multiplication and division.

Numeracy rate in this chapter is defined as the percentage of a population aged five years and above who can perform simple arithmetic calculations. No test was administered to verify those who were numerate. The questions on numeracy were asked in private households only.

Out of 762,029 persons aged 5 years and above, 666,808 persons (87.5%) are numerate. The numeracy rate is higher (88.4%) among males than females (86.7%). It is also noted that numeracy rates are higher (over 90%) for youth aged 15 to 34 years and is relatively low (70.9%) for young population (5 -9 years) and older ages (70 years and above) ranging from 50.4 percent to 68.8 percent (80 years and above ) which is 50.4 percent. Numeracy rate is higher (90.9%) in urban areas than in rural areas (86.1%). Furthermore, the rate is higher among males than females in both rural and urban areas (Table 8.9 and Figure 8.7).

**Table 8.9: Numeracy Rates of Population Aged Five Years and Above by Place of Residence, Sex and Five-Year Age Groups; Njombe Region, 2022 PHC**

Age Group	Total			Rural			Urban

**Figure 8.7: Numeracy Rates for Persons Aged Five Years and Above by Sex, and Place of Residence; Njombe Region, 2022 PHC**

The results reveal that numeracy rate for the youth aged 15–35 years is 93.5 percent. The rate is slightly higher (93.8%) for females than males (93.3%) whereas among teenagers the rate is higher (94.9%) females than males (93.1%). Numeracy rate for working age population (15-64 years) is higher (93.7%) in urban than in rural areas (91.2%). A similar pattern is observed for other selected age groups.

Results reveal that numeracy rate for persons in the secondary school age (14-17 years) in Njombe Region is 94.2 percent and 89.0 percent for persons in the primary school age (7–13 years). The rate of numeracy for secondary school age is higher (95.2%) for females than for males (93.2%). A similar pattern is observed in rural and urban areas for persons in both primary and secondary school age groups (Table 8.10).

### 8.3.1 Adult Numeracy Rates

Numeracy rate for persons aged 15 years and above in Njombe Region is 89.8 percent and is higher (92.9%) in urban areas than in rural areas (88.5%). The numeracy rate is higher (92.1% ) for males than females. (88.0%). The rates also vary across councils ranging from 88.1 percent in Ludewa District to 92.8 percent in Makambako Town (Table 8.11 and Map 8.2).

**Table 8.11: Number and Numeracy Rates for Adult Population Aged 15 Years and Above by Sex, Place of Residence and Council; Njombe Region, 2022 PHC**

### 8.4 Education

This section provides information on school attendance status, education attainment, net and gross school enrolment.

### 8.4.1 School Attendance Status

School attendance refers to attendance at any regular authorised or licensed educational institution or programme for organised learning at any level of education at the time of the census. Informal training in particular skills, which is not part of the recognised educational structure was not considered under school attendance.

The 2022 PHC results show that, out of 799,468 persons aged four years and above, 46.8 percent have completed school at different levels of education system, 33.9 percent are attending school, 7.7 percent have dropped out and 11.6 percent have never been to school. Percentage of females who have never been to school is higher (13.6%) compared with males (9.3%). Furthermore, results show that the percentage of dropouts is higher (8.7%) among males than females (6.8%) (Figure 8.8 and Table 8.12).

**Figure 8.8: Percentage Distribution of Population Aged Four Years and Above by Sex and School Attendance Status; Njombe Region, 2022 PHC**

More than ninety five percent (95.5%) of the primary school population age (7-13 years) are attending schools while 2.5 percent had never been to school. Among secondary school aged population (14-17 years), 72.9 percent are attending schools, 2.5 percent had never been to school, while 17.2 percent had completed school. The rate of dropouts is higher among secondary school age population (7.4%) than primary school age population (1.2%) (Table 8.12).

The percentage of persons aged four years and above who had never been to school in rural areas is about twice (13.7%) that of urban (6.5%). Likewise, dropouts are more common in rural (8.1%) than in urban areas (6.7%). However, the proportion of those who completed school is higher (51.9%) in urban areas than in rural areas (44.7%) (Figure 8.9, Table 8.13 and 8.14).

Across councils, Makete District has the highest percentage of persons who had never attended school (15.0%) and the lowest is Njombe Town with 7.3 percent (Figure 8.10). Regarding sex differentials for never attended school category, the percentage is higher for females than males in all councils in both rural and urban areas.

Furthermore, Njombe District council has the highest (8.3%) dropout rate while Makambako Town has the lowest rate (7.0%). Results also show that the percentage of dropouts is higher among males than females in all councils (Tables 8.15, 8.16 and 8.17).

Among persons aged four years and above who joined primary school education, 56.7 percent completed, 35.2 percent are still attending and 8.1 percent dropped out. Those who joined ordinary level secondary school education, 47.6 percent completed, 37.1 percent are still attending and 15.3 percent dropped out. Those who were admitted for university education, 73.2 percent completed, 26.1 percent are still attending and 0.7 percent dropped out. Drop out is minimal at the university level compared with other levels of education. Moreover, slightly more females dropped out at university level (0.7%) than males (0.6%). The percentage of persons who completed primary education, secondary education (ordinary and advanced level) and university level is higher in urban areas compared with rural areas (Tables 8.18, 8.19 and 8.20).

### 8.4.2 Net and Gross School Enrolment

Enrolment rate depicts the proportions of children currently attending school which is an important indicator in assessing access to education among the population. In primary education, Net Enrolment Rate (NER) is defined as the number of children aged 7-13 years who are attending school divided by the total number of children in that age group.. The 7-13 years age group is the official primary school age in Tanzania. On the other hand, Gross Enrolment Rate (GER) is defined as the number of children attending primary school regardless of age divided by the total number of children aged 7-13 years.

#### Net Enrolment Rate

Results show that, for primary schools NER is 95.5 percent; it is higher (96.6%) in urban areas compared with rural areas (95.1%). Furthermore, results show that NER is higher (96.7%) for females than males (94.3%) (Table 8.21).

**Table 8.21: Net Enrolment Rates in Primary Schools by Place of Residence, Sex and Council; Njombe Region, 2022 PHC**

Council	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
<b>Total</b>	<b>95.5</b>	<b>94.3</b>	<b>96.7</b>	<b>95.1</b>	<b>93.6</b>	<b>96.6</b>	<b>96.6</b>	<b>96.3</b>	<b>96.8</b>
Njombe District	94.8	93.5	96.2	94.7	93.3	96.1	95.7	94.8	96.6
Njombe Town	96.4	95.8	96.9	95.8	94.8	96.9	96.9	97.0	96.9
Makambako Town	95.9	95.1	96.8	94.4	91.9	96.9	96.4	96.1	96.7
Ludewa District	95.3	94.3	96.3	95.2	94.1	96.3	96.7	96.7	96.6
Makete District	95.5	94.6	96.5	95.3	94.2	96.5	97.0	97.6	96.4
Wanging'ombe District	95.0	92.9	97.1	95.0	92.8	97.1	96.0	94.3	97.6

NER in primary schools varies across councils ranging from 94.8 percent in Njombe District to 96.4 percent in Wanging'ombe. Two (2) Councils have NER above the regional average of 95.5 percent (Figure 8.11).

**Figure 8.11: Net Enrolment Rates in Primary Schools by Council; Njombe Region, 2022 PHC**

Results show an improvement in net enrolment rates from 2012 to 2022 censuses. The overall NER in primary schools increased from 89.7 percent in 2012 to 95.5 percent in 2022 census. Improvement is more remarkable among males (from 88.0% to 94.3%) compared with females (from 91.3% to 96.7%) as shown in Figure 8.12.

**Figure 8.12: Primary School Net Enrolment Rates by Sex; Njombe Region, 2002, 2012 and 2022 PHCs**

The rural NER in primary schools increased from 88.6 percent in 2012 to 95.1 percent in 2022 and the urban NER increased from 93.9 percent in 2012 to 96.6 percent in 2022 (Figure 8.13).

**Figure 8.13: Primary School Net Enrolment Rates by Place of Residence; Njombe Region, 2012 and 2022 PHCs**

#### 8.4.3 Gross Enrolment Rate

The primary school Gross Enrolment Rate (GER) in Njombe Region is 144.2 percent. GER is higher (152.1%) in urban areas than in rural areas (141.3%) and is higher (148.4%) for females than males (139.9%). A gross rate exceeding hundred percent could be due to over age and under age enrolment of children (Figure 8.14).

**Figure 8.14: Primary Schools Gross Enrolment Rates by Place of Residence and Sex; Njombe Region, 2022 PHC**

Results show GER increased from 107.1 percent in the 2012 to 144.2 percent in 2022. The increase is higher among females (from 107.9 % to 148.4%) compared with males (from 106.2% to 139.9%) as shown in Figure 8.15.

**Figure 8.15: Primary School Gross Enrolment Rates by Sex; Njombe Region, 2012 and 2022 PHCs**

#### 8.4.4 Education Attainment

Education attainment is the highest level completed by an individual within the country's official education system. Table 8.22 shows that, the majority (72.7%) of population aged four years and above attained primary education and 19.9 percent (18.6% males, 21.1% females) completed ordinary level secondary school education. More males had attained primary education (72.8%) compared with females (72.7%). The same pattern is observed in rural areas. Results also show that 3.5 percent attained university education.

## Chapter 9

### Employment and Economic Activities

---

#### Key Points

- The current unemployment rate in Njombe Region is 6.1 percent; the rate is higher (6.9%) for females than for males (5.1%).
- The overall Labour Force Participation Rate (LFPR) of Njombe Region is 80.6 percent; it is higher in urban than in rural areas.
- Agriculture, forestry and fishing industry has the highest proportion (76.4%) of the total employment.
- Majority of employed persons (52.1%) are agricultural and fishery workers.
- Agricultural sector constitutes the highest (72.3%) share of employed persons.
- There are 312,492 persons aged 15 years and above engaged in informal non-agricultural economic activities, with more females (165,282 persons) than males (147,210 persons).

#### 9.1 Introduction

This chapter presents findings on current economic activities for persons aged 15 years and above. In particular, it provides information on participation in economic activities, occupation, sector of employment and industry. Further, information on informal non-agricultural economic activities is also presented. Analysis in this chapter does not include institutional population.

Statistics on employment and economic activities are important inputs for planning labour related policies and programmes to ascertain the size and structure of the working age population and its distribution by main occupation, industry and employment status. Such information from census on employment and economic activities is critical in setting the baseline data for making appropriate interventions to enhance labour force participation.

#### 9.2 Current Economic Activity Status

Economic activity status refers broadly to economically active population which includes employed and unemployed population. It also includes inactive population covering all

persons who were without work during the reference period and were not available for work.

Table 9.1 indicates that, out of 537,780 persons aged 15 years and above, 406,941 persons are in employment, 26,425 are unemployed and 104,414 are economically inactive. Moreover, results show that, there are 288,560 employed persons in rural areas and 118,381 in urban areas. Further, results show that, there are 77,520 inactive persons in rural and 26,894 in urban areas.

**Table 9.1: Number of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment), Sex and Place of Residence; Njombe Region, 2022 PHC**

Sex/ Place of Residence	Economic Activity Status			Total
	Employed	Unemployed	Inactive	
<b>Both Sexes</b>	<b>406,941</b>	<b>26,425</b>	<b>104,414</b>	<b>537,780</b>
Male	191,002	10,313	43,103	244,418
Female	215,939	16,112	61,311	293,362
<b>Place of Residence</b>				
Rural	288,560	11,477	77,520	377,557
Urban	118,381	14,948	26,894	160,223

The results further show that in Njombe Region 75.7 percent of persons aged 15 and above are employed. The council with the highest level of employed persons is Njombe District (81.1%) while the council with the lowest is Wanging’ombe District (71.8%) (Figure 9. 1).

**Figure 9. 1: Percent Distribution of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment) and Councils; Njombe Region, 2022 PHC**

Table 9.2. shows that in rural areas the total number of persons aged 15 years and above who are employed ranges from 13,325 in Makambako Town Council to 76,774 in Wanging'ombe District Council. In urban areas the number ranges from 5,472 in Njombe District Council to 49,467 in Makambako Town Council.

**Table 9.2: Number of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment), Council and Place of Residence; Njombe Region, 2022 PHC**

Place of Residence		Economic Activity Status			Total

65 years and above	28,925	410	14,899	44,234

### 9.3 Current Unemployment

Unemployment is an indicator of labour under-utilization and it is measured as a percentage of the labour force that is currently unemployed. According to the relaxed international definition of unemployment, unemployed persons comprise those who in the seven days prior to the census/survey enumeration were not engaged in any economic activity but were available for work regardless of whether they took any effort to look for work.

Figure 9.2 presents current unemployment rates in Njombe Region based on the relaxed international definition of unemployment. The results reveal that the overall unemployment in Njombe Region is 6.1 percent. The rate is higher (6.9%) in urban than in rural areas (5.1%). Unemployment rate in Urban is higher (13.4%) among females than males (8.5%).

**Figure 9.2: Current Unemployment Rate of Persons Aged 15 Years and Above by Sex and Place of Residence; Njombe Region, 2022 PHC**

### 9.4 Labour Force Participation Rate

The Labour Force Participation Rate (LFPR) provides an estimate of the size of the labour supply currently available for production of goods and services in a country. It is defined as the number of persons in the labour force as a percentage of the population fifteen years and above. It provides important insight into various policy decisions to enhance performance of the labour market.

Figure 9.3 shows that, the overall Labour Force Participation Rate (LFPR) of Njombe Region is 80.6 percent; it is the higher in urban (83.2%) than in rural (79.5) areas. Results also reveal that LFPR is higher for males (82.4%) than for females (79.1%).

**Figure 9.3: Labour Force Participation Rates for Persons Aged 15 Years and Above by Place of Residence and Sex; Njombe Region, 2022 PHC**

### 9.5 Employment by Industry

Employment by industry provides information on relative importance of different economic activities in the labour market. This information is useful for identifying broad shifts in employment and stages of development. Classification of employment by industry in this report is based on the International Standard Industrial Classification of all Economic Activities (ISIC) Revision 4.

Results show that agriculture, forestry and fishing industry has the highest proportion (76.4%) of the total employment. This is followed by the industry of other services activities' industry with 4.5 percent and 'whole sale and retail trade, repair of motor vehicles and motorcycles' with 4.4 percent, (Table 9.4).

**Table 9.4: Percentage Distribution of Employed Population Aged 15 Years and Above by Place of Residence, Sex and Industry of Employment; Njombe Region 2022 PHC**

## 9.6 Occupation Status

This section highlights the distribution of employed persons aged 15 years and above by occupation and sex. The information provides critical insights into the economic, societal and individual aspects of the labour market. It also helps to make right decisions related to labour policies, education and skills training programmes as well as facilitating effective manpower planning. Occupation is classified according to the Tanzania Standard Classification of Occupations (TASCO). Results reveal that the majority of employed persons in Njombe Region (52.1%) are agricultural and fishery workers. The second in this order is craft and related workers (19.4%) followed by elementary occupations (17.3%), (Table 9.5).

**Table 9.5: Percentage Distribution of Employed Population Aged 15 Years and Above by Sex, Place of Residence and Occupation; Njombe Region, 2022 PHC**

Occupation	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
<b>Total Number</b>	<b>406,941</b>	<b>191,002</b>	<b>215,939</b>	<b>288,560</b>	<b>136,054</b>	<b>152,506</b>	<b>118,381</b>	<b>54,948</b>	<b>63,433</b>

### 9.6.1 Employment by Sector

This section presents distribution of employed persons aged 15 years and above by sex and sector of employment. The information is an important component or input for conducting macroeconomic analysis, policy formulation and effective labour interventions. Table 9.6 reveals that agricultural sector accounts for the highest (72.3%) share of employed persons followed by private sector (14.5 %) and household activities (9.2%).

**Table 9.6: Percentage Distribution of Employed Persons Aged 15 Years and Above by Place of Residence, Sex and Sector; Njombe Region, 2022 PHC**

Sector	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
<b>Total</b>	<b>406,941</b>	<b>191,002</b>	<b>215,939</b>	<b>288,560</b>	<b>136,054</b>	<b>152,506</b>	<b>118,381</b>	<b>54,948</b>	<b>63,433</b>
Public	4.1	4.9	3.3	3.1	3.8	2.4	6.5	7.6	5.5
Private	14.5	17.7	11.6	8.0	10.8	5.6	30.1	34.8	26.0

Household activities	9.2	8.8	9.5	8.4	8.3	8.5	11.0	10.0	11.9

### 9.7 Informal Non-Agricultural Economic Activities

The 2022 PHC refers to informal non-agricultural economic activities as activities which are unregulated and often without formal recorded business transactions and normally occurring outside the framework of formal business regulations and systems. It needs small capital and typically involves individuals such as street vendors and small-scale production activities without legal licenses or adhering to formal reporting and taxation requirements. Activities often operate within local communities to cater for immediate needs and therefore contributes to informal sector's overall economic performance.

Table 9.7 shows that there are 312,492 persons aged 15 years and above engaged in informal non-agricultural economic activities, with females (165,282 persons) and males (147,210 persons). Moreover, results reveal that the majority of persons engaged in informal sector are the youth aged 15-35 years; accounting for 57.8 percent of total employment, followed by adults aged 36-64 years with 36.5 percent. The lowest participation in the informal sector is noticed for adults aged 65 years and above with 5.8 percent. A similar pattern is observed in rural and urban areas.

**Table 9.7: Percentage Distribution of Population Aged 15 Years and Above Engaged in Informal Non-Agricultural Economic Activities by Place of Residence, Sex and Selected Age Groups; Njombe Region, 2022 PHC**

Place of Residence	Sex	Age Group (Years)			Total Number

## Chapter 10

### Disability

---

#### Key Points

- There are 77,104 persons in Njombe Region, equivalent to 10.7 percent of the total population aged 7 years and above living with some form of disability.
- Most common type of disability is seeing (2.5%) followed by walking (1.9%).
- Most Persons With Disabilities (49.4%) reported disease as a major cause of their disability.
- Over seven percent (7.6%) of Persons with Disabilities reported accidents as a cause of their disabilities.
- The use of assistive devices among Persons with Disabilities is very low.

#### 10.1 Introduction

This chapter presents information on disability including prevalence of disability by sex and region/council, causes of disability and use of assistive devices. Disability is a broad term with various definitions depending on different aspects at international, regional and national levels. For instance; the Washington Group on disability statistics defines Persons With Disabilities (PWDs) as *“all those persons who are at greater risk than the general population in experiencing restrictions in completing specific tasks or activities due to limitations in their basic functioning such as walking, seeing, hearing or memory – even if such limitations are ameliorated by use of assistive devices, a supportive environment or plentiful resources”* (United Nations, 2001). The World Health Organisation explains that disability refers to an umbrella term covering impairments, activity limitations and participation.

At National level, the Tanzania National Policy on Disability of 2004 defines disability as a loss or limitation of opportunities to take part in the normal life in the community on an equal level with others due to physical, mental or social factors. All three definitions use the concept of activity limitation in defining disability rather than physical impairment.

Tanzania started collecting data on disability through the population census for the first time in 2002. However, the definition of disability used was based on impairment rather than activity limitation. The 2012 and 2022 PHCs used the broad definition of disability that is based on activity limitation to collect disability statistics. More specifically, the 2022 PHC defines PWDs as all persons with physical, mental, intellectual or sensory impairment which may hinder or limit their full and effective participation in society on an equal footing with others.

The main domains of disabilities included in the 2022 PHC were: visual, hearing, communication, mental, physical and self-care. The 2022 PHC also collected information on other types of disabilities, including: albinism, cleft palate, hydrocephalus, spinal bifida, spinal cord injuries, epilepsy psoriasis and storiiasis. Other types were autism, mental health, mental disorder, persons with short stature, leprosy and persons with hunchback. The following are illustrations of some types of “other disabilities”. Ethical clearance for using the pictures on types of disability was obtained from the relevant authority<sup>4</sup>

---

<sup>4</sup> Shirikisho la Vyama vya Watu wenye Ulemavu Tanzania (SHIVYAWATA)

Albinism

Cleft Palate

Hydrocephalus

Spinal bifida

Spinal cord injuries

psoriasis

Storiasis

Autism

Mental health

Persons with short stature

Leprosy

Persons with Hunchback

Disability statistics are important for promotion of evidence-based policy and programming decisions and effective monitoring. Moreover, disability statistics are essential for governments and stakeholders for enhancement of inclusiveness of PWDs in all aspects of life by removing the barriers faced by people with disabilities. Data on disability from the Census also provides a benchmark for collecting disability statistics from other household-based sample surveys.

Note that, population of PWDs and total population used to compute disability prevalence does not include persons that were enumerated in institutions.

## 10.2 Prevalence of Disability

The 2022 PHC results show that 77,104 persons in Njombe Region (35,225 males and 41,879 females), which is equivalent to 10.7 percent of the total regional population aged 7 years and above (717,467 persons) have some form of disability. The rate is slightly higher among those living in rural (11.4%) than in urban areas (9.1%).

Among the six major domains of disabilities, seeing (2.5%) and walking (1.9%) are the most common while self-care is the least with 0.3 percent of the population aged seven years and above reporting this disability. With the exception of communication, other types of disability and self-care, for the remaining types of disability (i.e. seeing, hearing, walking, remembering) the proportion of PWDs is slightly similar for females and males (Table 10.1).

### 10.2.1 Prevalence of Disability by Councils

The prevalence of disability varies across councils, ranging from 9.1 percent in Njombe Town to 12.2 percent in Wanging'ombe District. Three councils (Wanging'ombe, Ludewa and Njombe Districts) have prevalence of disability above the regional average of 10.7 percent (Figure 10.1 and Table 10.1).

**Table 10.1: Disability Prevalence Among Persons Aged 7 Years and Above by Type of Disability, Place of Residence and Council; Njombe Region, 2022 PHC**

**Figure 10.1: Prevalence of Disability for Persons Aged 7 Years and Above by Council; Njombe Region, 2022 PHC**

### 10.2.2 Prevalence of Disability by Sex and Council

The 2022 PHC results show that, prevalence of disability is slightly higher for females than for males in most councils (4 out of 6) in the Region. Makambako Town has the same rate for both males and females (10.1%), while Njombe Town has a higher prevalence of disability among the males (9.2%) than among females (8.9%) (Table 10.2).

**Table 10.2: Disability Prevalence by Sex, Place of Residence and Council; Njombe Region, 2022 PHC**

### 10.2.3 Prevalence of Disabilities by Age and Sex

Results show that disability prevalence increases with age among both males and females. The level of disability prevalence in Njombe Region is almost the same among females and males below 44 years. Thereafter, the rate increases relatively sharply among females than males reaching 48.0 percent among females and 47.9 percent for males aged 80 years and above (Figure 10.2).

**Figure 10.2: Prevalence of Disability by Age Groups and Sex; Njombe Region, 2022  
PHC**

### 10.3 Prevalence of Persons with Albinism

Njombe Region has a total of 1,090 persons with albinism which is 0.12 percent of the total population in the region. Out of that, 629 persons (0.15%) are males and 461 (0.10%) are females. About sixty two percent of persons with albinism are living in rural areas (61.8%). Councils with large numbers of persons with albinism are Njombe Town (255 persons) and Makambako Town (206 persons) (Table 10.3 and Table 10.4).

**Table 10. 3: Percentage of Persons with Albinism by Sex, Place of Residence and Council; Njombe Region, 2022 PHC**

#### **10.4 Population with Other Types of Disability**

The 2022 PHC results reveal that 27,134 persons in Njombe Region which is equivalent to 3.78 percent of the regional population aged seven years and above (717,467 persons) has other types of disability. mental health (0.51%), epilepsy or seizures (0.46%), mental disorders and spinal cord injuries (0.45% each) are the most common types of other disability. The percentage of males with mental health issues and mental health disorders is high among males compared with females. The same pattern is observed in both rural and urban areas (Table 10.5).

**Table 10.5: Percentage of Persons with Other Types of Disability by Place of Residence and Sex; Njombe Region, 2022 PHC**

## 10.5 Causes of Disabilities

There are different causes of disabilities within the population. Some persons are born with disabilities (congenital malformations), or a disability may be a result of a disease, accident, physical violence, drug abuse or pregnancy complications.

The 2022 PHC results reveal that diseases are major causes of disability in Njombe Region. Almost 5 out of 10 PWDs (49.4%) reported disease as a cause of their disability while 23.5 percent were born with disability. Relatively high proportion of PWDs (53.8%) living in urban areas reported diseases as the major cause of their disabilities compared with 48.2 percent in rural areas. Another notable cause of disabilities in the region are accidents (7.6%).

Reported causes of disabilities are almost the same among males and females as observed with diseases, beaten and drug abuse. However, relatively large variations are observed with inborn, accidents and “other causes”; for instance, 10.4 percent of males with disabilities reported accidents as a major cause compared with 5.3 percent for females (Tables 10.6 and 10.7).

**Table 10.6: Percentage Distribution of Persons with Disability by Cause of Disability, Place of Residence and Sex; Njombe Region, 2022 PHC**

## 10.6 Use of Assistive Devices

Assistive devices help PWDs to perform their daily activities more effectively. Devices enable PWDs to participate in social economic activities such as education, employment and hence improve their social and economic conditions.

Results reveal that, the use of assistive devices among PWDs is very low. Except for persons with albinism, of whom 27.2 percent are using assistive devices, for other types of disability, the use is very low. For example, less than two percent of persons with hearing and communication disabilities are using assistive devices. Use of assistive devices is relatively higher in urban than in rural areas for all types of disability (Table 10.8).

**Table 10.8: Percentage of Persons with Disability Using Assistive Devices by Place of Residence, Sex and Type of Disability; Njombe Region, 2022 PHC**

## Chapter 11

### Land Ownership

---

#### Key Points

- More than forty-five percent (45.1%) of the population aged 15 years and above in Njombe Region own land.
- More than forty seven percent (47.2%) of males in Njombe Region own land alone compared with 43.4 percent of females.
- More than fifty nine percent (59.3%) of persons aged 15 years and above who own land in Njombe Region do not possess legal land ownership documents.
- Among the land owners possessing legal documents in Njombe Region, 15.5 percent own land alone.

#### 11.1 Introduction

This chapter describes the status of land ownership which includes information on persons owning land, type of ownership and possession of legal land ownership documents. Land ownership is a process of acquiring land tenure or right of occupancy from a relevant Government authority. The process provides legal notes or documents to own or occupy the land. Land ownership in Tanzania can be categorized into three main tenure systems namely Customary Land Tenure, Right of Occupancy (ROO) and Government Land.

Respondents were asked about possession of any legal documents pertaining to land ownership. Legal documents for land ownership in this chapter comprise Certificate of Right of Occupancy (title deed), residential license, letter of offer/acknowledgment of payment, customary ownership, contract, land registration card (Zanzibar) and official documents from Mtaa/Village/Shehia.

#### 11.2 Land Ownership Status

Information on land ownership status was collected from individuals in private households only and is categorised into individuals owning land alone; jointly; both alone and jointly; or do not own land. In this report land ownership is irrespective of type of use.

Results reveal that 45.1 percent of persons aged 15 years and above in Njombe Region ownland. Ownership of land is higher (52.1%) among rural population than the urban population (28.7%). Land ownership by sex reveals that proportions of females owning land are lower than that of males (Table 11.1).

**Table 11.1: Number and Percentage Distribution of Persons Aged 15 Years and Above Owning Land by Place of Residence and Sex; Njombe Region, 2022 PHC**

Place of Residence	Sex	Land Ownership		Percentage of Persons Owning Land
		Total Population	Number of Individuals Owning Land	
Total	<b>Both Sexes</b>	<b>537,780</b>	<b>242,756</b>	<b>45.1</b>
	Male	244,418	115,400	47.2
	Female	293,362	127,356	43.4
Rural	<b>Both Sexes</b>	<b>377,557</b>	<b>196,768</b>	<b>52.1</b>
	Male	173,857	93,096	53.5
	Female	203,700	103,672	50.9
Urban	<b>Both Sexes</b>	<b>160,223</b>	<b>45,988</b>	<b>28.7</b>
	Male	70,561	22,304	31.6
	Female	89,662	23,684	26.4

About fifty-four percent (53.6%) of persons aged 15 years and above do not own land, 18.3 percent own land alone and 25.5 percent own land jointly. The ownership pattern in Njombe Region reveals that the percentage of females owning land alone (16.5%) is lower than that of males (20.4%). However, the percentage of females owning land jointly is 25.7 percent which is almost the same as that of males (25.3%). The results further show that the percentage of females owning land jointly is slightly higher in rural areas (30.4%) than that of males (29.5%). However, the percentage of females owning land jointly is slightly lower in urban areas compared with that of males (15.0% and 15.2% respectively) (Table 11.2).

**Table 11.2: Percentage Distribution of Persons Aged 15 Years and Above by Land Ownership Status, Place of Residence and Sex; Njombe Region, 2022 PHC.**

Place of Residence	Sex	Total	Land Ownership Status				
			Alone	Jointly	Both alone and jointly	Does not own	Don't Know
Total	<b>Both Sexes</b>	<b>537,780</b>	<b>18.3</b>	<b>25.5</b>	<b>1.4</b>	<b>53.6</b>	<b>1.2</b>
	Male	244,418	20.4	25.3	1.5	51.6	1.2
	Female	293,362	16.5	25.7	1.2	55.3	1.2
Rural	<b>Both Sexes</b>	<b>377,557</b>	<b>20.6</b>	<b>30.0</b>	<b>1.6</b>	<b>46.7</b>	<b>1.1</b>
	Male	173,857	22.4	29.5	1.7	45.3	1.1
	Female	203,700	19.1	30.4	1.5	48.0	1.1
Urban	<b>Both Sexes</b>	<b>160,223</b>	<b>12.8</b>	<b>15.0</b>	<b>0.9</b>	<b>69.8</b>	<b>1.4</b>
	Male	70,561	15.5	15.2	1.0	67.0	1.4
	Female	89,662	10.7	15.0	0.8	72.1	1.5

Results show that the percentage of persons who do not own land in Njombe Region is 53.6%, while those who own land (alone or jointly or both) is 45.2 percent. Out of all persons who own land, the proportion is higher (47.2%) for males than for females (43.4%) (Figure 11.1).

**Figure 11.1: Percentage Distribution of Persons aged 15 Years and Above by Land Ownership Status and Sex; Njombe Region, 2022 PHC.**

Table 11.3 presents land ownership status for persons aged 15 years and above among those owning land disaggregated into broad age groups and place of residence. It is observed that land is mostly owned by persons aged 20-64 years (83.9%) followed by those aged 65 years and above (12.2%). Similar ownership patterns by age with differentiated magnitudes are observed in rural and urban areas for 20-64 years (82.8% and 88.5% respectively). On the other hand, the proportion of persons aged 15-19 years owning land in urban areas is lower (3.0%) than those in rural areas (4.2%). Regardless of whether a person lives in rural or urban areas, both males and females of age group 20-64 are more likely to own land than any other age group. (Table 11.3).

Findings reveal that Ludewa District Council has a relatively higher proportion (52.1%) of persons aged 15 years and above owning land compared with other councils. On the other hand, a council with small proportion of persons owning land is Makambako Town Council (34.4%) (Figure 11.2).

**Figure 11. 2: Percentage Distribution of Population Aged 15 Years and Above by Land Ownership Status and Council; Njombe Region, 2022 PHC**

**11.3 Possession of Legal Land Ownership Documents**

The 2022 PHC results show that 59.3 percent of persons aged 15 years and above in Njombe Region own land without any legal documents. Among those possessing legal documents, 15.5 percent own land alone, 23.7 percent own land jointly and 1.4 percent own land alone and jointly. The results further reveal that ownership of legal documents is in favour of females owning land jointly (25.1%) compared with males (22.1%) (Table 11.4).

Further, about two thirds (63.7%) of persons owning land in rural areas do not have any legal documents compared with 40.4 percent of persons in urban areas. Among persons with legal documents in rural areas, 21.8 percent and 13.2 percent own land jointly and alone respectively. On the other hand, 25.6 percent of persons possessing legal documents in urban areas own land alone while 31.8 percent own land jointly. Results also show that in rural areas, possession of legal documents is notable among females owning land jointly

(22.8%) whereas in urban areas, it is notable (35.0%) among males owning land alone (Table 11.4).

**Table 11.4: Percentage Distribution of Persons Aged 15 Years and Above by Sex, Place of Residence and Legal Documents Status; Njombe Region, 2022 PHC.**

Ownership of Legal Document	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female

## Chapter 12

# Housing Characteristics, Assets Ownership and Environmental Control

---

### Key Points

- Seven in ten (70.6%) households in Njombe Region own houses they live in.
- More than eighty percent (80.4%) of households use improved sources of drinking water.
- More than eighty percent (80.3%) of households use improved toilet facilities.
- About sixty seven percent (66.9%) of households in rural areas and 65.7 percent in urban areas use firewood for cooking.
- Percentage of households using electricity from national grid for lighting increased from 11.9 percent in 2012 to 35.9 percent in 2022.
- Nearly four in ten (38.7%) households use burning of solid waste as the main method of solid disposal.

### 12.1 Introduction

The 2022 PHC collected information on household ownership and characteristics as an indicator on household wealth information. This chapter presents information on tenure and ownership status of the household's main dwelling; legal right over the ownership of land where the main dwelling is built; building materials for the main dwelling and number of rooms available for sleeping. In addition, it also presents information on the main source of drinking water; sanitation; main source of energy used for cooking and lighting; environmental control methods used by households; ownership of assets and equipment. The questions on housing characteristics, assets ownership and environmental control were asked in private households only.

### 12.2 Housing Ownership and Tenure Status

Households were asked about the ownership of houses where they live and the availability of legal documents over the land where the house is built. In Njombe Region, 70.6 percent of private households are living in their own houses; the percentages in rural and urban areas are almost the same (70.9% and 70.3%). The percentages of male and female headed households owning houses is higher among males (79.4%) than females (51.5%).

Across councils, Njombe District has the highest percentage (82.0 %) of households living in their own houses while Makambako Town has the lowest percentage (56.4%) (Figure 12.1 and Table 12.1).

**Figure 12.1: Percentage Distribution of Households by Ownership Status of the Main Dwelling and Place of Residence, Njombe Region, 2022 PHC**

### 12.2.1 Legal Ownership of Land

In Njombe Region, 38.8 percent of the households do not have legal documents for the land where their houses are built while 8.3 percent have title deed. Most households have customary type of ownership (41.6%). Female-headed households are more likely (8.8%) to have title deeds than male-headed households (8.0%). Across councils the percentage of households with title deeds ranges from 1.5 percent in Njombe District to 16.7 percent in Makambako Town (Table 12.2).

**Table 12.2: Percentage Distribution of Households Living in Own Houses by Type of Legal Rights, Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

### 12.3 Household Characteristics

Household characteristics describe the living conditions of households that are useful in guiding policy interventions. The living conditions include the type of building materials for roofing, walls and floor as well as number of rooms for sleeping.

#### 12.3.1 Roofing Materials

In Njombe Region, 96.3 percent of households are living in houses with improved roofing materials (iron sheet, tiles, concrete and asbestos). At the council level, more than 90 percent of households in all councils are living in houses with improved roofing materials (Figure 12.2).

**Figure 12.2: Percentage Distribution of Households with Improved and Unimproved Roofing Material by Council; Njombe Region, 2022 PHC**

Table 12.3 show that, the majority of households in urban areas (98.9%) are living in houses roofed with iron sheets compared with 94.8 percent of households in rural areas. The percentage of households living in houses roofed with iron sheets ranges from 90.7 percent in Ludewa District to 98.5 percent in Makambako Town. The council with the highest percentage (8.7%) of households living in houses roofed with grass or leaves is Ludewa District.

**Table 12.3: Percentage Distribution of Households by Type of Roofing Material of Main Dwelling, Place of Residence and Council; Njombe Region, 2022 PHC**

Place of Residence	Total Number of Household	Type of Roofing Materials							
		Iron sheets	Tiles	Concrete	Asbestos	Grass/Leaves	Mud and Leaves	Plastics/Box	Tent

### 12.3.2 Floor Covering Materials

The percentage of households in Njombe Region living in houses with improved floor covering materials (cement, ceramic tiles, parquet or polished wood, terrazzo, vinyl or asphalt strips) is 67.3 while 32.7 percent live in houses with non-improved materials (wood planks, palm or bamboo, earth or sand, dung, containers or tents). Across councils, households with improved floor covering materials range from 50.1 percent in Ludewa District to 81.5 percent in Njombe Town (Figure 12.3).

**Figure 12. 3: Percentage Distribution of Households Living in Households with Improved and Unimproved Floor Covering Materials by Council; Njombe Region, 2022 PHC**

The results further show that, 62.9 percent of households in Njombe Region are living in cement floors followed by earth or sand materials (32.0%). In urban areas, eight out of ten households (80.3%) are living in houses with cement as floor covering materials followed by ceramic Tiles and earth or sand (9.5% each). On the other hand, in rural areas, 55.0 percent of households are living in houses with cement as floor covering materials followed by earth or sand (42.2%).

Percentage of households living in houses with cement as floor covering materials in the main dwelling is highest (73.9%) in Njombe Town Council followed by Makambako Town Council (73.3%) and the lowest percentage is found in Ludewa district council (47.7%)

**Table 12.4: Percentage Distribution of Households by Type of Floor Covering Material of Main Dwelling, Place of Residence and Council; Njombe, 2022 PHC**

<sup>5</sup> Others include households living in containers or tents.

### 12.3.3 Wall Materials

Most households in Njombe Region, have their house walls built with baked bricks (78.3%), followed by sundried bricks (13.4%) and cement/rock bricks (5.0%). In urban areas, 72.4 percent of the households are living in houses built with baked bricks followed by sundried bricks (13.8%). In rural areas, 80.9 percent of the households are living in houses built with baked bricks followed by sundried bricks (13.2%).

Both Wanging'ombe and Ludewa Districts have the highest (91.4%) percentage of households with houses built using baked bricks. Njombe Town has the lowest (55.1%) percentage of households with houses built using baked bricks (Table 12.5).

**Table 12. 5: Percentage Distribution of Households by Type of Wall Materials of Main Dwelling, Place of Residence and Council; Njombe Region, 2022 PHC**

### 12.3.4 Rooms for Sleeping

The number of people sleeping in a room is a major determinant of crowding and hence affects household members' health. A room for sleeping in the 2022 PHC is defined as any space within or outside the dwelling of the household which is currently used by household members for sleeping. This implies that any space within the dwelling can be termed as a room for sleeping if currently used by household members for sleeping purpose. By this definition any other space such as a sitting room, dining room or even stores were included if they were used for sleeping.

Two in ten (22.1%) households have one room for sleeping, 27.2 percent have two rooms and 29.2 percent have three rooms. On the other hand, 21.4 percent of households have more than three rooms for sleeping. The Percentage of Female headed households with one room for sleeping is significantly higher (33.3%) compared with male headed households (17.0%).

The proportion of households with only one room for sleeping is higher (23.5%) in urban than in rural areas (21.2%). Makambako Town has the highest (30.3%) percentage of households with one room for sleeping compared with other councils. The Council with the lowest percentage of households with one room for sleeping is Ludewa District (15.0%) (Figure 12.4 and Table 12.6).

**Figure 12.4: Percentage Distribution of Households by Number of Rooms for Sleeping and Place of Residence; Njombe Region, 2022 PHC**

## 12.4 Water and Sanitation

Inadequate and inequitable access to water and sanitation services along with inappropriate hygiene practices at household level, largely contributes to barriers that hinder efforts to support realisation of rights to live in a safe and clean environment.

### 12.4.1 Source of Drinking Water

Sources of drinking water are categorised into improved and unimproved sources. Improved sources of water include piped water, tube well/borehole, protected dug well, protected spring, rainwater, bottled water, carts with small tank/drum and tanker truck. On the other hand, unimproved sources include unprotected dug well, unprotected spring and surface water.

Results show that in Njombe region 80.4 percent of households use improved sources of drinking water. Across councils, Makete District (92.2%) has the highest percentage of households using improved sources of drinking water while Njombe District (66.2%) have lowest percentage of households using improved sources of drinking (Figure 12.5).

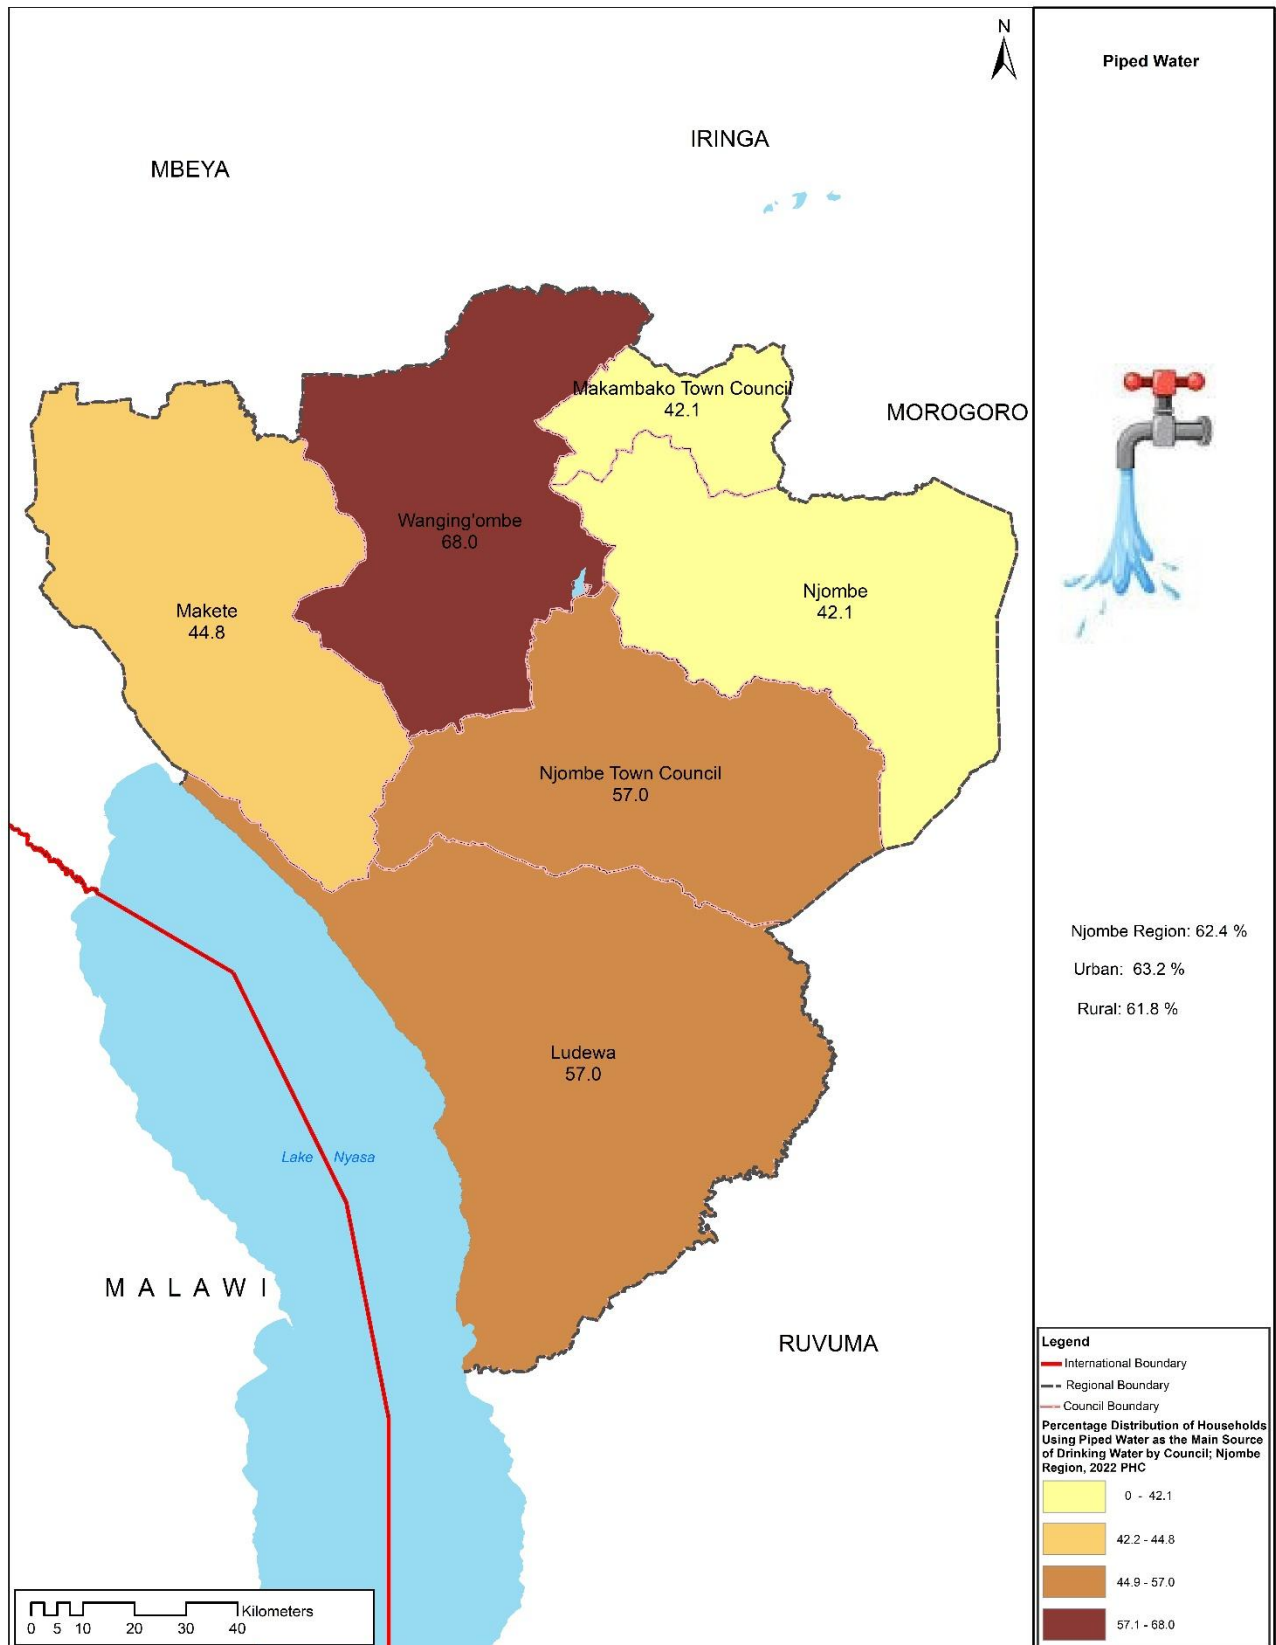

**Figure 12.5: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Council; Njombe Region, 2022 PHC**

Piped water is one of the improved water sources which include piped water into dwelling, piped water in the yard/plot, public tap/standpipe, neighbours tap or standpipe. Overall, more than sixty percent of households (62.4%) in Njombe Region are using piped water as the main source of drinking water (Map 12.1).

**Map 12.1: Percentage Distribution of Households Using Piped Water as the Main Source of Drinking Water by Council; Njombe Region, 2022 PHC**

Households in urban areas having piped water into their dwelling or yard is 19.6 percent, while 6.2 percent are getting water from a neighbours' piped supply and 26.0 percent from a public tap. In rural areas, 19.5 percent of households have piped water into their dwelling or yard, 5.2 percent get drinking water from a neighbours' piped supply and 26.1 percent from a public tap. Percentage of households using piped water ranges from 42.1 percent in Njombe District council to 91.1 percent in Makete District Council (Map 12.1 and Table 12.7).

**Table 12. 7: Percentage Distribution of Households by Main Source of Drinking Water, Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

Note: Surface water includes river, dam, lake, pond, stream, charco, canal and irrigation channels

### 12.4.2 Sanitation Facilities

The 2022 PHC collected information on toilet facilities used by households. Toilet facilities are categorised into two groups; improved and unimproved. Improved facilities include flush or pour flush toilet that flushes the water and waste to a piped sewer system, septic tank, covered pit or unknown destination; ventilated improved pit (VIP) latrine, pit latrine with washable slab and with lid, pit Latrine with washable slab without lid and pit latrine without washable slab (soil slab). Unimproved facilities include pit latrine without slab (open pit) and bucket.

About eighty percent (80.3%) of households in Njombe Region use improved toilet facilities. In rural households' 74.4 percent are using improved toilet facilities; this is slightly below the Third Tanzania Five Years Development Plan target of 75 percent by 2025/26. Njombe District Council has the highest percentage (93.8%) of households using improved toilet facilities, while Ludewa District Council has the lowest (62.1%). The most commonly (29.5%) used toilet facilities in private households are flush/pour flush to covered pit. A higher proportion of households using flush/pour flush to covered pit are in urban than in rural areas (47.1% in urban and 21.5% rural). The percentage of households without toilet facilities (open defecation) ranges from 0.2 percent in Njombe Town Council to 0.7 percent in Makete District Council (Figure 12.6 and Table 12.8).

**Figure 12.6: Percentage Distribution of Households with Improved, Unimproved and without Toilet Facility by Council; Njombe Region, 2022 PHC**

**Table 12.8: Percentage Distribution of Households by Main Type of Toilet Facility, Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

## 12.5 Sources of Energy

The 2022 PHC collected information on households' main source of energy for cooking and lighting. The collected information enabled assessment of access to clean sources of energy (electricity, solar energy and gas). Use of clean energy as an alternative source has two benefits which are (a) to reduce the heavy reliance on wood as the main source of fuel for cooking hence protecting the environment and (b) to improve the health of the population especially women through reduced exposure to smoke from wood fuels.

### 12.5.1 Sources of Energy for Cooking

Table 12.9 shows that the majority of households use firewood (66.4%) as the main source of energy for cooking followed by charcoal (21.7%). In rural areas 66.9 percent of households use firewood for cooking while in urban is 65.7 percent. The percentage of households using charcoal for cooking in rural areas is 20.8 and in urban areas it is 23.1 percent.

Across councils, the percentage of households using firewood for cooking ranges from 33.0 percent in Makambako Town to 83.8 percent in Ludewa District . On the other hand, the percentage of households using charcoal for cooking ranges from 6.3 percent in Ludewa District to 52.3 percent in Makambako Town (Table 12.9).

**Table 12.9: Percentage Distribution of Households by Main Source of Energy for Cooking, Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

Clean energy includes electricity, gas, biogas, solar, generator or private sources and wind generated electricity. The use of clean energy for cooking by households has increased from 0.8 percent in 2012 to 11.1 percent in 2022. At council level, there is high increase of households using clean energy in Makambako Town from 1.6 percent in 2012 to 13.8 percent in 2022 and Njombe Town from 1.3 percent in 2012 to 12.9 percent in 2022 (Figure 12.7).

**Figure 12.7: Percentage Distribution of Households Using Clean Energy for Cooking by Council; Njombe Region, 2012 and 2022 PHCs**

**12.5.2 Sources of Energy for Lighting**

Results show that, 41.8 percent of households use solar energy as the main source of energy for lighting, followed by 35.9 percent of households using electricity from the national grid (TANESCO). Use of electricity for lighting ranges from 15.7 percent in Ludewa District Council to 64.1 percent in Makambako Town Council.

Councils with low percentages of households using electricity as the main source for lighting have relatively high percentages of households using solar energy. The Councils with the highest percentage of households using solar as the main source of lighting is Wanging’ombe District (56.2%) followed by Ludewa District (53.1%) (Figure 12.8).

**Figure 12.8: Percentage Distribution of Households Using Electricity and Solar as Main Sources of Energy for Lighting by Council; Njombe Region, 2022 PHC**

Figure 12.9 shows that, there is an increase in use of national grid electricity for lighting in Njombe Region. Percentage of households using electricity from national grid for lighting increased from 11.9 percent in 2012 to 35.9 percent in 2022. A similar increase is observed in all councils.

**Figure 12.9: Percentage Distribution of Households Using Electricity from National Grid for Lighting by Council; Njombe Region, 2012 and 2022 PHCs**

**Table 12.10: Percentage Distribution of Households by Main Source of Energy for Lighting, Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

## 12.6 Household Environmental Control

### 12.6.1 Waste Disposal

Waste disposal is a collection, processing and recycling or deposition of the waste materials generated by human being. Waste materials are either in form of liquid or solid and effect of their components may be either hazardous or inert on health and environment. Improper disposal of waste is a burden to public health provision. This section discusses the major means used by households in disposing solid and electronics waste.

Nearly four out of ten (38.7%) of households use burning of solid waste as the main method of solid disposal, followed by burying or pit (37.4%). In urban areas, 38.1 percent of private households use burning as means of disposing solid waste, followed by burying or pit (36.2%) and regularly collected (17.0%). In rural areas 39.1 percent of households use burning followed by burying or pit (38.2%) and regularly collected (14.4%). Makambako Town Council has the highest percentage (45.5%) of households using regular collection of solid waste followed by Njombe Town Council (21.4%) (Table 12.11).

**Table 12.11: Percentage Distribution of Households by Main Means of Solid Waste Disposal, Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

Place of Residence /Headship	Total Number of Households	Means of Solid Waste Disposal								
		Regularly Collected	Irregularly Collected	Burnt	Roadside Dumping	Burying/ Pit	Open Space	Ocean/ Lake/ River/ Shore	In the Farm/ Manure	Bush/ Ravine

## 12.6.2 Waste Collection Authorities

The results show that Councils (67.9%) and private individuals (27.2%) are the authorities that usually collect solid waste in private households. and Out of the total households which reported that household waste is collected, households in rural and urban areas are more likely to use councils than private collectors (Figure 12.10 and Table 12.12).

**Figure 12.1 Percentage Distribution of Households by Type of Authorities Collecting Waste and Place of Residence; Njombe Region, 2022 PHC**

**Table 12.12: Percentage Distribution of Households by Type of Authorities Collecting Waste, Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

### 12.6.3 Electronic Waste Disposal

Electronic waste (e-waste) refers to electronic products that are unwanted, not working and approaching or at the end of their useful life. Electronic waste are products that have exhausted their utility value through either redundancy, replacement, or breakage and include goods such as computers, televisions, radios, cell phones, copiers, fax machines, refrigerators, washing machines and microwaves. The method through which households use to dispose their electronic waste can pose a risk to public health.

Results show that 55.1 percent of households mix electronic waste with other refuse. Households living in urban areas (56.1%) and 54.4 percent of those in rural areas mix electronic waste with other refuse. The percentage of households mixing electronic waste with other refuse as the main method of disposal is highest (72.1%) in Makambako Town Council followed by Njombe Town Council (56.1%). All councils have more than 50 percent of their households mixing electronic waste with other refuse except for Njombe District Council (45.6%) and Ludewa District Council (47.7%) (Table 12.13).

**Table 12.13: Percentage Distribution of Households by Methods of Disposing Electronic Waste by Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

## 12.7 Ownership of Assets

Ownership of assets refers to possession of any personal property regardless of the purpose it serves. Any asset owned by any member of the household was treated as a household asset in the 2022 PHC. The information collected about assets in this section are in three groups: transport, housing and agricultural equipment. Questions on ownership of specific assets aim at obtaining non-monetary poverty indicators.

### 12.7.1 Transport Assets

Transport assets are motorised equipment (i.e., motor vehicles, motorcycles or vespa and tri-motorcycles), non-motorised equipment (i.e., bicycles and tricycle) and draft animals (i.e., donkey or camel). In Njombe Region, a bicycle is the main transportation asset owned by households (20.4%) followed by motorcycles (11.1%) and motor vehicles (2.7%). The percentage of households owning bicycles is higher in female-headed households (21.5%) compared with male-headed households (19.9%). The percentage of bicycle owners is higher (25.5%) in households living in rural areas than in urban areas (12.6%). Across councils, the percentage of households owning bicycles ranges from 7.3 percent in Ludewa District Council to 35.3 percent in Makambako Town Council (Table 12.14).

**Table 12. 14: Percentage Distribution of Households by Type of Transport Assets owned, Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

Place of Residence/Headship	Total Number of Households	Types of Assets

### 12.7.2 Housing and Cooking Assets

Housing and cooking assets include a house, electric or charcoal iron, electric or gas cooker and refrigerator or freezer. The 2022 PHC results show that, 72.1 percent of households own houses. The percentage of households owning houses is slightly higher (73.7%) in rural than in urban areas (69.7%). The percentage of male headed households owning houses is higher (81.4%) than for female headed households (51.8%). Other assets owned by households are charcoal iron (12.9%), electric iron (9.6%), electric or gas cooker (7.2%) and refrigerator or freezer (1.9%) (Table 12.15).

**Table 12.15: Percentage Distribution of Households by Type of Housing and Cooking Assets Owned, Place of Residence, Headship and Council; Njombe Region, 2022 PHC**

### 12.7.3 Agricultural Assets

Agricultural assets include plough, power tiller, hand hoe, oxen, land or farm and tractor. In Njombe Region, 76.0 percent of households own land or farm and 71.5 percent own a hand hoe. Ownership of land or farm is slightly higher among households living in rural areas (78.2%) than in urban areas (72.5%) Households in rural areas are also more likely to own hand hoes than those in urban areas (73.6% versus 68.1%).

Across councils, ownership of land or farm ranges from 59.9 percent in Makambako Town Council to 85.1 percent in Njombe District Council. On the other hand, the percentage of

households' own hand hoe ranges from 55.3 percent in Makambako Town Council to 85.6 percent in Njombe District Council (Table 12.16).

## Chapter 13

### Access and Use of Information and Communication Technology by Individuals and Households.

---

#### Key Points

- Almost nine out of ten (85.2%) persons aged 15 years and above own mobile phones.
- Almost two out of ten (17.2%) of persons aged 15 years and above own both smart phones and non-smart phones.
- Less than one percent (0.6%) of persons aged 15 years and above own only smart phones or tablets.
- About two thirds (67.4%) of persons aged 15 years and above own only non-smart phones.
- Almost nine out of ten households (86.3%) have at least one person aged 4 or above who owns a mobile phone in Njombe Region.
- About one percent (1.1%) of persons aged 15 years and above own desktop and about two percent (2.2%) own laptop computers.
- Nine out of ten (85.4%) of persons aged 15 years and above use ICT equipment for communication.
- Non-smartphones are mostly owned by individuals with training after secondary education (98.4%).
- Smartphones are mostly owned by individuals with university and other related education level (77.9%).

#### 13.1 Introduction

Information, Communication and Technology (ICT) is increasingly setting the pace of global socio-economic development. Countries are prioritising investment in the digital ecosystem to transform and modernise their economies in recognising ICT's developmental role in facilitating and accelerating overall development. ICT statistics have been an agenda in the International statistical community for many years, and it has been receiving increasing attention due to its impact on the economy and society in general.

Availability of ICT infrastructure and its use continues to grow. The Internet, in particular, is transforming society through the growing amount of information and related tools available. These advances and recognition that ICTs drive society and economic development have led to the need for reliable, comprehensive and comparable statistics to support Government decisions.

This chapter describes the status of individuals and household access and the use of Information and Communication Technology (ICT), which includes ownership and use of ICT equipment in Njombe Region. Although the information on ICT access and use by households and individuals was collected from all persons aged four years and above, for the purpose of this report, some indicators are analysed based on persons aged 15 years and above to facilitate national, regional comparisons of ICT Indicators. In addition, ICT indicators in this report comply with the International Telecommunication Union (ITU) Guidelines for Measuring ICT Access and Usage by Individuals and Households.

Information collected during 2022 PHC, includes access and usage of radios, televisions, computers, mobile phones, fixed-line telephones and internet facilities for all individuals aged 4 years and above. Access, usage and ownership of ICT equipment are key in linking communities, facilitating businesses and empowering communities socially and economically.

### **13.2 Households with Radio**

The 2022 PHC results reveal that 49.7 percent of households in Njombe Region have a radio. Higher proportion of households with radios are in urban areas (60.5%) than in rural areas (44.8%). The Council with the highest percentage of households with radios is Njombe District (100%), followed by Njombe Town (61.0%) and Makete District (41.5%). Ludewa District Council has the lowest percentage of households with radios (30.1%) (Table 13.1).

### **13.3 Ownership of Television**

According to the 2022 PHC results, 23.9 percent of the households in Njombe Region own televisions. Analysis by place of residence indicates that urban areas have a higher proportion (42.7%) of households with television sets than rural areas (15.3%). Across councils, Makambako Town has the highest proportion of households owning television

(33.4%), followed by NjombeTown (33.2%) and Njombe District (28.6%). On the other hand Ludewa Council has the smallest proportion (13.2%), followed by Wanging'ombe District (15.9%) (Table 13.1).

### **13.4 Households with Landline Telephone**

According to the Tanzania Communications Regulatory Authority (TCRA) communication statistics report, landline telephone market is characterised by general stagnation, manifested by drastically decreasing subscriptions from 176,367 fixed telephone lines in 2012 to 85,976 in 2022.

The 2022 PHC results reveal that about one percent (1.04%) of households in Njombe Region has landline telephones. Households with landline telephone is proportionately higher in rural areas (1.1%) than in urban areas (0.8%). Njombe District has the highest percentage of households with landline telephone (4.8%). There is no significant difference for percentages of households owning landline telephones for the remaining councils. (Table 13.1).

### **13.5 Households with Internet Facility**

The 2022 PHC results reveal that 0.3 percent of households in Njombe Region have Internet facilities. Urban areas have a higher proportion (0.5%) of households with Internet facilities than in rural areas (0.2%). Njombe Town has the highest percentage of households with internet facilities (0.4%), followed by Makambako Town (0.3%) while Njombe District, Ludewa, Makete and Wanging'ombe Districts have relatively small percentages of households with internet facilities (0.2%) each (Table 13.1).

**Table 13.1: Percentage Distribution of Households Owning Selected ICT Equipment and Selected Household Attributes by Place of Residence and Council; Njombe Region, 2022 PHC**

Place of Residence	Total Number of Households	Percentage of Household

## 13.6 Mobile Phones

### 13.6.1 Ownership of Mobile Phones by Individuals

An individual owns a mobile cellular telephone if he/she has a mobile phone device with at least one active SIM card for personal use. It includes those with a mobile phone for personal use that is not registered under his/her name but it excludes individuals with only active SIM cards (s) and not mobile phones.

Results reveal that 85.2 percent of the population aged 15 years and above in Njombe Region own any mobile phone. Individuals in urban areas reported higher mobile phone ownership (89.6%) than rural areas (83.3%). Ownership of mobile phones is higher among males (88.6%) than females (82.3%) (Figure 13.1 and Table 13.2).

**Figure 13.1: Percentage Distribution of Persons aged 15 Years and Above Owning Mobile Phones by Sex and Councils ; Njombe Region, 2022 PHC**

**Map 13.4: Percentage Distribution of Persons Aged 15 Years and Above Owning Only Non-Smart Phones by Council; Njombe Region, 2022 PHC.**

### 13.6.2 Ownership of Mobile Phones by Households

Ownership by phone type indicates that in Njombe Region 86.3 percent of households with at least one member aged four years and above owns any type of mobile phone. The proportion of households owning a mobile phone is higher (93.3%) in urban areas than in rural areas (83.1%). In urban areas, the proportion of households that own smart mobile phones is 24.8 percent and 81.6 percent for non-smartphones. The proportion of households owning smartphones is higher (42.7%) in urban than in rural areas (16.7%) while there is no significant difference for ownership of non-smartphones between urban and rural areas.

Across all councils, the proportion of households with smartphones is less than 50 percent. Results also indicate that Njombe Town has the highest percentage of households that owns smart mobile phones (35.4%), followed by Makambako Town (33.6%) while Ludewa District recorded 16.6 percent which is the lowest (Table 13.3).

**Table 13.3: Percentage Distribution of Households with at Least One Member Aged Four Years and Above Owning Mobile Phone by Type, Place of Residence and Council; Njombe Region, 2022 PHC**

### 13.6.3 Ownership of Mobile Phones by Age Groups and Sex

Non-smartphone is the most widely owned phone type among persons aged four years and above in Njombe Region; it is owned by 58.3 percent of all individuals (59.0% males and

57.7% females). When the data is disaggregated by locality, 56.5 percent of individuals in rural areas own a non-smartphone compared with 62.8 percent in urban areas (Table 13.4).

Ownership of smartphone is the highest for individuals aged 20 - 29 years while for non-smartphone, it is the highest for individuals aged 25 -59 years. The results also show that the proportion of ownership of non-smart phones increases steadily from age group 5-9 years and attains its maximum point for individuals aged 25 -59 years, thereafter decreases steadily to persons of age groups 80 and above. Ownership of smart phone increases from age group 5 – 9 years and attains its maximum position for individuals aged 20 - 29 years and then steadily decreases to older age groups (Figure 13.2).

**Figure 13. 2: Percentage Distribution of Individuals Owning Mobile Phone by Type and Age Group; Njombe Region, 2022 PHC**

#### **13.6.4 Ownership of Mobile Phones by Level of Education**

The 2022 PHC results reveal that non-smartphones are mostly owned by individuals with training after secondary education (98.4%) compared with other levels of education and least owned by those with Secondary School O - level (75.2%). Analysis by sex shows that, non-smartphones ownership is higher among males than females in all education levels (Table 13.5).

**Table 13.5: Number and Percentage Distribution of Population Aged 15 Years and Above Owning Non-smartphones by Place of Residence, Sex and Education Level Attained ; Njombe Region, 2022 PHC**

### 13.6.5 Usage of Mobile Phones by Individuals

Results reveal that 87.9 percent of individuals aged 15 years and above in Njombe Region are using non-smartphones and 18.3 percent are using smartphones. The proportions are higher in urban areas than in rural areas. Generally, the proportion of males who are using mobile phones is slightly higher than that of females for both smart and non-smart mobile phones.

Across all councils, the proportion of individuals using mobile phone is highest in Njombe Town (91.4% non-smartphone and 27.3% smartphone), followed by Makambako Town (87.8% non-smartphone and 26.0% smartphone). On the other hand, all councils in Njombe Region have proportions of individuals using smartphones above 86 percent (Table 13.7).

**Table 13.7: Percentage Distribution of Population Aged 15 Years and Above Using Mobile phones by Type, Sex, Place of Residence and Council, Njombe Region; 2022 PHC**

### 13.6.6 Usage of Mobile Phones by Type, Age Group and Sex

Majority of persons (62.4%) aged four years and above mostly used non-smartphones in the last three months before Census in Njombe Region. Use of Non smartphones by sex is almost the same among males (62.3%) and females (62.4%). Non-smartphone usage among individuals in rural areas is lower with 61.0 percent compared with individuals in urban areas (65.9%). However, the usage of smart phones is significantly higher (24.6%) in urban areas than in rural areas (8.3%) (Table 13.8).

Non-smart phones are mostly used by individuals aged 20-74 years while smart phones are mostly used by individuals aged 20–29 years. The use of non-smartphones increases steadily from age 5-14 years before peaking at age group 40-44, thereafter declines to 82.8 percent for those aged 65 and above (Figure 13.3 and Table 13.8).

### 13.6.7 Type of Use of ICT Equipment

The Census further sought to establish the use of ICT equipment (mobile phones and computers) for all persons aged 15 years and above. The results show that majority of persons aged 15 and above years in Njombe Region mostly use ICT equipment for communication (85.4%), followed by sending and receiving money (56.6%), while online businesses recorded about four percent (4.3 %) which is the least (Table 13.9).

Results show that persons who are living in both rural and urban areas mostly use ICT equipment for communication (84.0% for rural and 88.6% for urban), followed by sending and receiving money (52.9% in rural and 65.5% in urban) and searching or receiving information (34.0% in rural and 48.7% in urban). However, the likelihood of using ICT equipment for any purpose is higher in urban areas than in rural areas (Table 13.9). The use of ICT equipment by individuals aged 15 years and above varies across Councils. The most common use of ICT equipment across councils is for communication followed by sending and receiving money and searching/receiving information. ICT equipment was least used for online business across councils (Table 13.9).

### **13.6.9 Usage of Mobile Phone by Employment Status and Sex**

Results reveal that, in Njombe Region, the percentage of individuals who use non-smartphones ranges between 96.4 percent among self-employed with employees and 99.1 percent among paid employees. Regarding the usage of mobile phones across Employment status by sex and place of residence, results show that there is no significant difference in the usage of mobile phones for paid employees, Self-employed without employees and Casual labourer between males and females. Furthermore, the same situation is observed for self-employed and workers not classified by status. (Table 13.12).

**Table 13.12: Number and Percentage Distribution of Population Aged 15 Years and Above Using Non-smartphones by Place of Residence, Sex and Employment Status; Njombe Region, 2022 PHC**

Employment Status	Percentage of Non-smartphone Usage									Number of Persons								
	Total			Rural			Urban			Total			Rural			Urban

## 13.7 Computers

### 13.7.1 Ownership of Computers by Individuals

Table 13.16 presents information on persons aged 15 years and above owning computers by type, sex, place of residence and Council. Results show that at least two percent (2.2%) of persons aged 15 years and above in Njombe Region own laptops and more than one percent (1.1%) own desktop computers. Njombe Town Council has the highest percentage of persons owning desktop computers (1.5%), followed by Makambako Town (1.3%). Njombe Town Council has the highest percentage of persons owning laptops (3.2%). The Council with the lowest percentage of persons owning desktop computers and laptop is Njombe District (0.7% and 1.5 % respectively).

**Table 13. 16: Percentage Distribution of Persons Aged 15 Years and Above Owning Computers by Type, Sex, Place of Residence and Council; Njombe Region, 2022 PHC**

### 13.7.2 Usage of Computers by Individuals

Results, reveal that about four percent (3.9%) of person aged 15 years and above in Njombe Region use laptops and almost two percent (2.3%) use desktop computers. Generally, the proportion of males that use laptops and/or desktop computers is slightly higher than the proportion of females.

Use of computers by individuals varies across councils, with Njombe Town having the highest percentage (3.8% use desktop and 5.9% use laptop) of individuals using computers, followed by Makambako Town (2.8 % use desktop and 4.2% use laptop. Njombe District Council has the smallest percentage of individuals using computers (Table 13.17).

### 13.7.3 Usage of Computers by Age Group and Sex

Computer usage includes the use of all types of computers, namely personal computers, laptops or portable electronic boards. Details on distribution of usage of computers during the 3 months period prior to the Census are given in Table 13.18. The table shows that Njombe Region has about two percent (1.8%) and three percent (3.1%) of individuals aged 4 years and above that used desktop and laptop computers respectively, during the reference period. The proportion of persons that used both desktop and laptop computers has been increasing from age 4 years and attains the maximum point at age group 30 – 34 years.

The proportion of persons aged 4 years and above who reported having used a laptop computer within 3 months preceding the Census is higher across all age groups than those who reported having used a desktop.

The proportion of persons aged 4 years and above that use laptop and desktop computers is higher among males than females from age 15 years and above (Table 13.18).

**Table 13.18: Percentage of Persons Aged 4 Years and Above, Using Computers by Type, Sex and Age Groups; Njombe Region, 2022 PHC**

#### 13.7.4 Usage of Computers by Highest Level of Education attained and Sex

The results reveal that, the highest proportion of persons aged 15 years and above who used desktop computers in the last three months prior to the census in Njombe Region had attained university and other related education (27.2%) and is higher for males (33.0%) than females (20.3%).

The results further show that the percentage of persons who used desktop computers is higher among males than females for most levels of education except for those who attained training after primary where the percentage of males is lower than of females.

The percentage of persons who used desktops is higher for persons living in urban areas than in rural areas across all levels of education except for those who attained Pre-primary level. (Table 13.19).

**Table 13. 19: Percentage of Persons Aged 15 Years and Above Who Used Desktop Computers in the Three Months Prior to the Census Date by Place of Residence, Sex and Education Level; Njombe Region, 2022 PHC**

### **13.7.5 Usage of Computers by Employment Status and Sex**

Results reveal that the percentage of persons who used desktop computers in the last three months prior to the Census' date ranges from 2.2 percent for workers not classified by status to 4.8 percent for Self-employed with employee's category. Regarding the usage of desktop computers across employment status categories, results show that the percentage of persons who used desktop computers is slightly higher among males than females across most employment categories.

Furthermore, results show that the proportion of persons who used desktop computers is higher for persons living in urban than in rural areas for all types of employment categories (Table 13.21).

**Table 13.21: Percentage of Persons Aged 15 Years and Above Who Used Desktop Computers in the Last Three Months Prior to the Census Date by Place of Residence, Sex and Employment Status; Njombe Region, 2022 PHC**

Results reveal that the percentage of persons who used laptop computers in the last three months prior to the Census' date ranges from 2.9 percent for Workers not classified by status to 5.0 percent for Self-employed with employees' category. Regarding the usage of laptop computers across employment status categories, results show that the percentage of persons who used laptop computers is higher among males than females across all employment status categories.

Furthermore, results show that the proportion of persons who used laptop computers is higher among persons living in urban than in rural areas with regard to all types of employment status categories (Table 13.22).

### **13.7.6 Usage of Computers by Occupation**

The 2022 PHC results reveal that Legislators administrators and managers have the highest percentage (8.6 percent) among persons who used desktop computers in the last three months prior to the census date than other occupations in Njombe Region, while craft and related workers and persons with elementary occupations recorded the lowest percentage (1.0% each).

The percentage of persons who used desktop computers is higher among males than females across most occupations except for plant and machine operators and assemblers where males accounted for 2.2% and females accounted for 2.7%. The percentage of persons who used desktop computers is more common among persons who live in urban than in rural areas across all occupation categories (Table 13.23).

**Table 13.23: Percentage of Persons Aged 15 Years and Above Who Used Desktop Computers in the Last Three Months Prior to the Census Date by Place of Residence, Sex and Occupation Status; Njombe Region, 2022 PHC**

The 2022 PHC results reveal that Professionals have the highest percentage (32.0%) among persons who used laptop computers in the last three months prior to the census date compared with other occupations in Njombe Region, while Agricultural and fishery workers recorded the least (2.5% each).

The percentage of persons who used laptop computers is higher among males than among females across all occupations. The percentage of persons who used laptop computers is more pronounced among persons who live in urban than in rural areas across all occupation categories (Table 13.24).

## Chapter 14

### Information on Buildings

#### Key Points

- About fifty six percent (55.6%) of all buildings have permanent flooring materials (sand-cement, tiles (marble/ceramic/PVC) and Terrazzo).
- More than twenty-two percent (22.1%) of all buildings in Njombe Region are connected to the national grid electricity, while 38.7 percent are powered by other sources.
- Thirty - six percent (36.0%) of all buildings have water services.
- About six percent (5.7%) of all buildings in Njombe Region have infrastructure for the people with disabilities.
- More than sixty-eight percent (68.1%), of all individually owned buildings in Njombe Region are owned by men, 25.1 percent by women, and 6.6 percent are jointly owned.
- More than eighty-four percent (84.4%) of all buildings in Njombe Region are used by the owners themselves, and 8.3 percent are used by tenants.
- About seventy-two percent (71.9%) of all buildings in Njombe Region are built on un-surveyed land.
- About forty-six percent (45.5%) of all buildings in Njombe Region are constructed on land that does not have legal documents.

#### 14.1 Introduction

This chapter provides information on the number of buildings, types of buildings, main uses of buildings and the number of units in residential and commercial-residential buildings in Njombe Region and Council levels as per the 2022 Tanzania Building Census (2022TBC) results. It also presents findings on buildings information which constitutes building categories, occupancy status, building ownership, construction status, building materials used for construction, number of bedrooms, building tenure status and buildings condition. In addition, the chapter presents information on basic services which are categorized as services within the

building (electricity, water, and toilets) and accessibility of buildings (roads) and infrastructure for People with Disabilities (PWD). Furthermore, it provides an overview of building ownership status, land surveying, and the presence of legal documents for land ownership where the buildings are built.

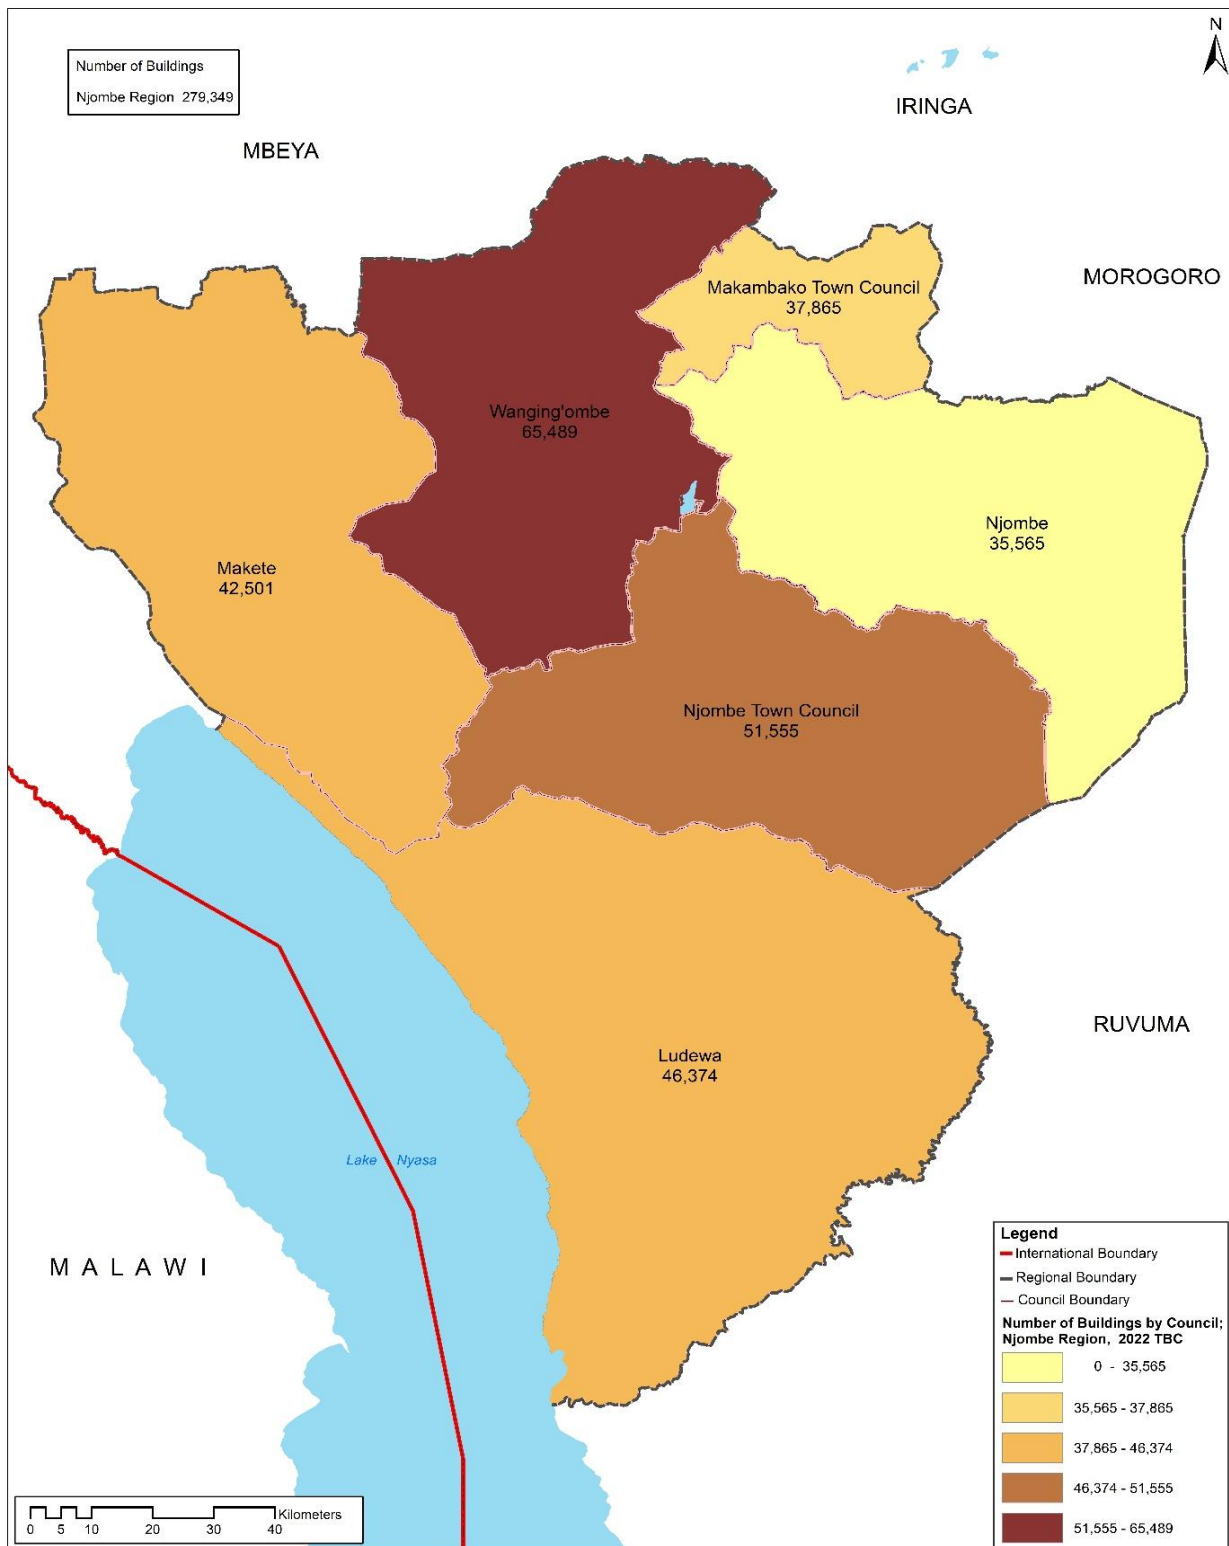

#### **14.2 Number of Buildings**

The results show that Njombe Region has a total of 279,349 buildings whereby 212,301 are in rural and 67,048 in urban areas. Wanging'ombe District has a large number of buildings (65,489 buildings) followed by Njombe Town (51,555 buildings). On the other hand, Njombe District has the smallest number of buildings (35,565). Further results show that Njombe Town has the largest number (139) of multi-storey buildings, followed by Makambako Town (63) while Njombe (19) and Wanging'ombe (21) Districts have relatively few multi-storey buildings (Map 14.1 and Table 14.1).

**Table 14.1: Number of Buildings/Units by Place of Residence, Type, Place of Residence and Council; Njombe Region, 2022  
TBC**

**Map 14.1: Number of Buildings by Councils; Njombe Region, 2022 TBC**

### 14.2.1 Buildings with Physical Address

The results show that 87.7 percent of all buildings in Njombe Region have physical addresses. The percentage of buildings with physical address is relatively high in Urban (88.1%) than in rural areas (87.6%) (Figure 14.1 and Table 14.2).

**Figure 14.1: Percentage Distribution of Buildings with and without Physical Address by Place of Residence; Njombe Region, 2022 TBC**

Across councils, results show that, percentage of buildings with physical addresses ranges from 82.9 percent in Njombe District to 91.6 percent in Wanging'ombe District (Table 14.2 and Figure 14.2).

**Table 14.2: Number of Buildings by Place of Residence, Physical Address and Council; Njombe Region, 2022 TBC**

**Figure 14.2: Percentage Distribution of Buildings with Physical Address by Council: Njombe Region, 2022 TBC**

### 14.2.2 Type of Buildings

Building types are categorized into single storey buildings (one floor buildings) and multi-storey buildings (more than one floor buildings). Information on buildings under construction including those at foundation stage was also collected.

The results reveal that, 96.8 percent of all buildings in Njombe Region are single storey and only less than one percent (0.1%) are multi-storey. The percentage of multi-storey buildings is slightly higher (0.3%) in urban than in rural areas (0.1%). Results further reveal that three percent (3.0%) of all buildings in the region are under construction; the percentage of buildings undergoing construction in urban areas (4.6%) is almost twice compared with those in rural areas (2.6%) (Figure 14.3).

**Figure 14.3: Percentage Distribution of Buildings by Type, Place of Residence, Njombe Region, 2022 TBC**

### 14.2.3 Main Uses of Buildings

The main uses of buildings are divided into three groups, which are residential, commercial-residential and non-residential uses. The results show that 88.3 percent of buildings in Njombe Region are used for residential purpose, 3.2 percent for residential and commercial and 8.5 percent for non-residential. The pattern of the use of buildings is almost similar in rural and urban areas.

At the Council level, Ludewa District Council has the highest proportion of residential buildings (89.8%) compared with Makete District Council, which has the lowest (87.1%). With regard to non-residential buildings, Makete District Council has the highest proportion (11.0%) while Makambako Town Council has lowest (6.2%) (Table 14.3).

**Table 14.3: Percentages Distribution of Buildings by Main Use, Council and Place of Residence; Njombe Region, 2022 TBC**

Councils	Place of Residential	Main Use			
		Total Buildings	Residential	Residential and Commercial	Non-residential use
Total	Total	279,349	88.3	3.2	8.5
	Rural	212,301	88.7	2.5	8.9

	Rural	61,110	88.7	2.3	9.0
	Urban	4,379	84.8	5.6	9.6

The main usage of non-residential buildings in Njombe Region is for commercial purposes (52.4%), followed by institutional services (14.0%) and places of worship (13.8%) (Table 14.4). Wanging'ombe District Council has the largest number of buildings (3,438; 58.1%) used for commercial purposes followed by Makete District Council (2,551; 54.8%), while Makambako Town Council has the smallest (1,049; 44.9%) number of buildings used for commercial purposes. On the other hand, Njombe Town Council which is the headquarter of Njombe Region, has the largest number of buildings (90; 2.1%) used for industrial purposes while Wanging'ombe District has the smallest number of buildings (30; 0.5%) used for industrial purposes (Table 14.4).

#### **14.2.4 Number of Units in Building**

Information on the number of units in the building was collected only in residential and commercial-residential buildings. Results show that, most of these buildings in Njombe Region (95.8%) have one unit. The pattern of distribution of buildings with one unit is higher in rural (96.2%) than in urban (94.8%) areas (Table 14.5).

At the council level, Wanging'ombe District Council has highest (97.2%) proportion of buildings with single unit, while Njombe Town Council has lowest (94.1%). Results further show that, the percentage of buildings with two units ranges from 1.3 percent in Wanging'ombe District Councils to 2.6percent in Njombe Town Council (Table 14.5 and Figure 14.4).

**Table 14.5: Percentage Distribution of Residential and Commercial-Residential Buildings by Number of Units, Place of Residence and Council; Njombe Region, 2022 TBC**

Council	Number of Units																				
	Total							Rural							Urban

### 14.3 Buildings' Attributes

This section presents findings on building attributes which constitute categories, occupancy status, ownership, construction status, materials used for construction, number of bedrooms, tenure status and condition of buildings. Buildings in this section refers to all buildings irrespective of their use and ownership.

#### 14.3.1 Building Categories

For the purpose of 2022 TBC, the building categories are semi-detached, terrace or row of houses, and detached or stand-alone buildings. The results show that most (88.4%) of the buildings in Njombe Region are detached or stand-alone buildings. The same pattern is observed in rural and urban areas and across all councils in Njombe Region (Table 14.6).

**Table 14.6: Percentage Distribution of Buildings by Building Category, Place of Residence and Council; Njombe Region, 2022 TBC**

Place of Residence	Building Category						
	Total Number of Buildings	Semi-detached	Percent	Terrace/ Row of Houses	Percent	Detached /Stand Alone	Percent
<b>Total</b>	<b>279,349</b>	<b>14,861</b>	<b>5.3</b>	<b>17,435</b>	<b>6.2</b>	<b>247,053</b>	<b>88.4</b>
Rural	212,301	11,432	5.4	12,121	5.7	188,748	88.9
Urban	67,048	3,429	5.1	5,314	7.9	58,305	87.0
<b>Council</b>							
Njombe District	35,565	1,334	3.8	1,407	4.0	32,824	92.3
Njombe Town	51,555	2,935	5.7	3,439	6.7	45,181	87.6
Makambako Town	37,865	1,943	5.1	2,237	5.9	33,685	89.0

Wanging'omba District	65,489	4,515	6.9	4,545	6.9	56,429	86.2

### 14.3.2 Construction Status of Buildings

The construction status of buildings is divided into four categories, namely completed, partly completed, under construction and temporary buildings. The 2022 TBC results show that, 76.3 percent of all buildings in Njombe Region have been completed and 9.7 percent are partly completed. Buildings under construction account for 11.5 percent while temporary buildings account for 2.5 percent. The results also indicate that, 76.8 percent of all buildings in rural areas are completed compared with 74.8 percent in urban.

Makete District Council has the highest percentage of completed buildings (81.5%) while Wanging'ombe District Council has the lowest (72.0%). Two-point five percent of buildings in Njombe Region are temporary. Percentage of temporary buildings range from 1.9 percent in Njombe Town Council to 3.5 in Makete District Council (Figure. 14.5 and Table 14.7).

**Table 14.7: Percentage Distribution of Buildings by Construction Status, Place of Residence and Council; Njombe Region, 2022 TBC**

Place of Residence	Total Number of Buildings	Completed	Partly Completed	Under Construction	Temporary Building
<b>Total</b>	<b>279,349</b>	<b>76.3</b>	<b>9.7</b>	<b>11.5</b>	<b>2.5</b>
Rural	212,301	76.8	10.2	10.4	2.6
Urban	67,048	74.8	8.2	14.9	2.1
<b>Council</b>					
Njombe District	35,565	77.7	9.1	10.7	2.4
Njombe Town	51,555	78.7	8.6	10.8	1.9

Wanging'omba District	65,489	72.0	11.8	13.9	2.2

**Figure 14.5: Percentage Distribution of Buildings by Construction Status and Place of Residence; Njombe Region, 2022 TBC**

### 14.3.3 Building Occupancy Status

The occupancy status of buildings is determined by checking whether the building is in use or vacant. The results show that 83.2 percent of all buildings in Njombe Region are in use, while 16.8 percent are vacant. Furthermore, the results indicate that rural areas have a higher proportion of buildings in use (83.5%) compared with urban areas

(82.3%). Ludewa District Council has the highest percentage (85.9%) of buildings in use while Makete District Council has lowest (80.7%) (Figure 14.6 and Table 14.8).

**Table 14.8: Percentage Distribution of Buildings by Occupancy Status, Place of Residence and Council; Njombe Region, 2022 TBC**

Place of Residence	Total Number of Buildings	Percent	
		Occupied	Vacant
<b>Total</b>	<b>279,349</b>	<b>83.2</b>	<b>16.8</b>
Rural	212,301	83.5	16.5
Urban	67,048	82.3	17.7
<b>Council</b>			
Njombe District	35,565	82.4	17.6

Makambako Town	37,865	81.7	18.3
Ludewa District	46,374	85.9	14.1
Makete District	42,501	80.7	19.3
Wanging'omba District	65,489	83.1	16.9

**Figure 14.6: Percentage Distribution of Buildings by Place of Residence and Occupancy Status; Njombe Region, 2022 TBC**

#### 14.3.4 Building Construction Materials

This section describes the types of building materials used in flooring, walling and roofing. Analysis in this section is based on buildings and not households as presented in Chapter Twelve of this publication.

#### 14.3.4.1 Floor Materials

Materials used for floor include cement, PVC tiles, ceramic tiles (marble), terrazzo, clay, earth/sand, hard plastic or bitumen, polished wood, cow dung, wood planks, or bamboo or plant residues. Over fifty percent of buildings in Njombe Region (52.8%), have sand-cement floors, followed by earth/sand floors (32.7%) and 11.4% buildings have no floor.

Furthermore, in rural areas, buildings with cement floor constitute 47.8 percent of all buildings while in urban areas it is 68.6 percent. Njombe Town Council has the highest percentage (64.4%) of buildings with cement floor while Ludewa District Council has the lowest percentage of 38.3 percent (Table. 14.9).

**Table 14.9: Percentage of Buildings by Type of Flooring Materials, by Place of residence and Council; Njombe Region, 2022 TBC**

Place of Residence	Total	Flooring Materials								No Floor
		Sand-cement	Ceramic tiles	Parquet or polished wood	Terrazzo	PVC tiles	Wood planks	Earth/sand/soil	Cow dung	
<b>Total</b>	<b>279,349</b>	<b>52.8</b>	<b>2.7</b>	<b>0.0</b>	<b>0.1</b>	<b>0.0</b>	<b>0.2</b>	<b>32.7</b>	<b>0.2</b>	<b>11.4</b>
Rural	212,301	47.8	1.1	0.0	0.0	0.0	0.2	39.2	0.2	11.4
Urban	67,048	68.6	7.7	0.1	0.3	0.0	0.1	12.0	0.1	11.3
<b>Council</b>										
Njombe District	35,565	48.7	1.6	0.0	0.0	0.0	0.2	36.4	0.1	13.1
Njombe Town	51,555	64.4	5.4	0.1	0.2	0.0	0.2	20.1	0.1	9.6
Makambako Town	37,865	59.8	5.3	0.1	0.2	0.0	0.1	22.0	0.1	12.5

Wanging'omba District	65,489	55.8	1.4	0.0	0.1	0.0	0.0	31.2	0.1	11.3

**Note:** Other flooring materials are PVC tiles, parquet or polished wood, wood planks, terrazzo or cow dung

#### 14.3.4.2 Wall Materials

Materials used in wall construction include stones, cement or stone blocks, sun-dried clay bricks, burnt clay bricks, glass, wood, iron sheets, bamboo/poles/mud and poles/grass or tents. Most of the buildings in Njombe Region have walls built with burnt bricks (81.2%), followed by sundried bricks (12.6%). Over fifty percent of buildings in urban and rural areas (76.2% and 82.8% respectively) have walls constructed with burnt bricks followed by sundried bricks (12.5% and 12.6 respectively). Ludewa District

Council has the highest percentage (93.2%) of buildings built with burnt bricks while Njombe Town Council has the lowest percentage (56.0%) (Table 14.10).

**Table 14.10: Percentage Distribution of Buildings by Type of Wall Materials, Place of Residence and Council; Njombe Region, 2022 TBC**

Place of Residence	Total	Wall Materials									
		Stones	Cement blocks/ Stone blocks	Sundried bricks	Burnt Bricks	Glass	Wood and Iron Sheets	Bamboo poles/ wood planks	Grass	Tent/ container	No Walls
<b>Total</b>	279,349	0.6	2.4	12.6	81.2	0.02	0.19	1.84	0.18	0.01	1.01
Rural	212,301	0.3	1.0	12.6	82.8	0.02	0.20	2.20	0.22	0.01	0.73

Wanging'ombe	65,489	0.1	0.9	3.8	92.9	0.02	0.09	1.04	0.12	0.01	0.98

**Note:**

"No walls" refers to buildings that were under construction (at foundation stage) during Census enumeration

### 14.3.4.3 Roofing Materials

Construction materials used for roofing can be permanent or temporary. Permanent construction materials include corrugated iron sheets, tiles, concrete and asbestos, while temporary roofing materials are grass (leaves or palm leaves), mud/grass and poles, plastics, tarpaulin and straw.

The results show that, the highest percentage (91.2%) of all buildings in Njombe Region are roofed with corrugated iron sheets, followed by grass/ leaves (3.4%). In urban areas, 92.5 percent of all buildings are roofed with corrugated iron sheets compared with 90.8 percent in rural areas. Njombe Town Council has the highest percentage (94.1%) of buildings roofed with corrugated iron sheets while Ludewa District Council has the lowest (86.9) (Table 14.11).

**Table 14.11: Percentage Distribution of Buildings by Type of Roofing Materials, Place of Residence and Council; Njombe Region, 2022 TBC**

Place of Residence	Total	Roofing Material								No roof
		Corrugated Iron sheets	Tiles	Concrete	Asbestos	Grass/leaves	Mud and leaves	Plastics/Tins	Tent/Container

#### 14.3.5 Number of Bedrooms

This section provides information on the number of bedrooms in residential and commercial-residential buildings only. The results show that 14.9 percent of such buildings/units in Njombe Region have one bedroom, 28.6 percent have two bedrooms, 33.8 percent have three bedrooms, and 22.7 percent have four or more bedrooms.

Furthermore, in rural areas, the proportion of buildings/units with one bedroom is higher (16.9%) compared with (8.6%) in urban areas. The results reveal that, in urban area most (36.6%) of buildings/units have three bedrooms, followed by those with two bedrooms (20.8%) (Table 14.12 and Figure 14.7).

**Table 14.12: Percentages of Residential and Commercial-Residential Buildings/Units by Number of Bedrooms, Place of Residence and Council; Njombe Region, 2022 TBC**

Region/Council	Number of Buildings/Units	Bedrooms						
		1	2	3	4	5	6	7+
<b>Total</b>	<b>285,359</b>	<b>14.9</b>	<b>28.6</b>	<b>33.8</b>	<b>13.3</b>	<b>4.7</b>	<b>2.4</b>	<b>2.3</b>

**Figure 14.7: Percentage Distribution of Residential and Commercial -Residential Buildings/Units by Number of Bedrooms and Place of Residence; Njombe Region, 2022 TBC**

#### 14.4 Basic Services in Buildings

This section presents information on basic services in buildings/units. The services are electricity, water and toilets.

### 14.4.1 Electricity

Electricity service in buildings/units is divided into two main groups: - electricity from the national grid (TANESCO) and electricity from alternative sources such as solar energy and generators.

The results indicate that 21.7 percent of all buildings/units in Njombe Region are connected to the national grid. Almost half (49.7%) of all buildings in urban areas are connected to the national grid compared with 12.7 percent in rural areas. Among the councils of Njombe Region, Makambako Town has the highest proportion (40.3%) of buildings/units connected to the national grid while Ludewa District has the lowest percentage (8.8%) (Figure 14.8 and Table 14.13).

**Figure 14.8: Percentage Distribution of Buildings/Units with Electricity from the National Grid (TANESCO) by Council; Njombe Region, 2022 TBC**

Alternative sources of electricity include all other sources such as solar electricity and generators. The results reveal that 38.0 percent of all buildings/units in Njombe Region have alternative sources of electricity. The percentage of buildings/units with alternative source of electricity is higher in rural areas (43.8%) than in urban areas (20.3%).

Percentage of buildings/units with alternative sources of energy is generally high in Councils with low percentage of buildings/units connected to the national grid, ranging

from 23.5 percent in Makambako Town Council to 47.1 percent in Ludewa District Council. (Table 14.13).

#### 14.4.2 Water

According to 2022 TBC, water service in a building/unit means the presence of water inside the building and/or on the premises of the relevant building/unit. The results reveal that 35.3 percent of all buildings/units in Njombe Region have water service. Proportion of buildings/units with water services is higher in urban (56.6%) than in rural areas (28.4%). Across councils, Makambako Town has the highest percentage (48.4%) of buildings/units with water service while, Njombe District Council has the lowest percentage (24.4%) (Figure 14.9 and Table 14.13).

**Figure 14.9: Percentage Distribution of Buildings/Units with Water Services by Council; Njombe Region, 2022 TBC**

#### 14.4.3 Toilets

Toilet service in a building/unit includes the presence of a toilet inside the building and/or on the premises of the concerned building/unit. The results reveal that 81.9 percent of all buildings/units in Njombe Region have toilet facility. The percentage of buildings/units with toilet facilities in rural areas is higher (82.1%) than in urban areas (81.2%). On the other hand, the percentage of buildings/units with toilet facilities

across councils, ranging from 79.8 percent in Makete District to 84.1 percent in Ludewa District. (Figure 14.10 and Table 14.13).

**Figure 14.10: Percentage Distribution of Buildings/Units with Toilet Facility by Council; Njombe Region, 2022 TBC**

**Table 14.13: Distribution of Buildings/Units by Type of Basic Services, Place of Residence and Council; Njombe Region, 2022 TBC**

Place of Residence	Number of Buildings/Units	Electricity		Water	Toilet
		National Grid	Alternative source		
<b>Total</b>	<b>285,359</b>	<b>21.7</b>	<b>38.0</b>	<b>35.3</b>	<b>81.9</b>
Rural	215,600	12.7	43.8	28.4	82.1
Urban	69,759	49.7	20.3	56.6	81.2
<b>Council</b>					
Njombe District	36,059	17.2	38.2	24.4	82
Njombe Town	53,089	32.6	37.4	40.8	82.9
Makambako Town	38,913	40.3	23.5	48.4	80.5
Ludewa District	47,282	8.8	47.1	33.3	84.1
Makete District	43,685	19.5	30.8	44.5	79.8
Wanging'ombe District	66,331	15.4	45.3	24.6	81.7

### 14.5 Accessibility of the Building

This section provides information on the accessibility of buildings by road and the presence of infrastructure for Persons With Disabilities.

### 14.5.1 Access Roads

The results indicate that 85.3 percent of all buildings in Njombe Region are accessible by road. Notably, most of the buildings (89.7%) in urban areas are accessible by road, while it is 83.8 percent in rural areas. Njombe District Council has the highest percentage (93.7%) of buildings accessible by road while Ludewa District Council has the lowest (73.2%) (Figure 14.11).

**Figure 14.11: Percentage Distribution of Buildings with Access Road by Council; Njombe Region, 2022 TBC**

### 14.5.2 Infrastructure for Persons With Disabilities

Results reveal that 5.6 percent of all buildings/units in Njombe Region have infrastructure for Persons with Disabilities (PWDs). Buildings with infrastructure for PWDs account for 6.2 percent and 5.5 percent of buildings in urban and rural areas respectively. Makete District Council has the highest percentage (10.2%) of buildings with infrastructure for PWDs while Wanging'ombe District Council has the lowest percentage (3.5%) (Figure 14.12).

**Figure 14.12: Percentage Distribution of Buildings with Infrastructure for Persons With Disabilities by Council; Njombe Region, 2022 TBC**

## 14.6 Tenure Status of Buildings

This section provides an overview of building/unit ownership status, land surveying and the presence of legal documents for land ownership where the building is built.

### 14.6.1 Buildings Ownership Status

The results reveal that the majority (84.6%) of buildings in Njombe Region are individually owned, followed by 9.6 percent of co-owned buildings. The same pattern is observed in rural and urban areas (Figure 14.11).

**Figure 14.13: Percentage Distribution of Buildings by Ownership Status and Place of Residence; Njombe Region, 2022 TBC**

#### 14.6.2 Buildings Ownership by Sex

Ownership by sex considers only individually owned buildings/units. Ownership status may be categorised by males only, female only or jointly. The results show that most of the buildings/units in Njombe Region are owned by males only (64.3%), followed by females only (24.7%) and 7.7 percent by male(s) and female(s) jointly. The same pattern is observed in rural and urban areas.

Makete District Council has the highest proportion (26.6%) of buildings/units owned by females alone while Njombe District Council has the lowest proportion (22.8%) (Table 14.14).

**Table 14. 14: Percentage Distribution of Individually Owned Buildings/Units Status by Place of Residence, Sex of Owner and Council; Njombe Region, 2022 TBC**

Council	Total						Rural						Urban					
	Number of Buildings /Units	Male	Female	Male(s) and Female(s)	Males Only Jointly	Females Only Jointly	Number of Buildings /Units	Male	Female	Male(s) and Female(s)	Males Only Jointly	Females Only Jointly	Number of Buildings /Units	Male	Female	Male(s) and Female(s)	Males Only Jointly	Females Only Jointly

### **14.6.3 Buildings Occupancy Tenure Status**

The 2022 TBC results indicate that 73.8 percent of all buildings/units in Njombe Region are occupied by the owners alone, followed by tenants alone (11.3%).

In rural areas, the results reveal that 76.9 percent of all buildings/units are occupied by owners alone followed by tenants alone and live in without paying rent (8.8% each). The same pattern is observed in urban areas; However, the proportion of buildings/units occupied by tenants (18.9%) is substantially higher than that in rural areas.

Ludewa District Councils has the highest percentage (78.4%) of buildings/units occupied by owners alone, while Makambako Town Council has the lowest percentage (68.8%). In addition, Makambako Town Councils have the highest percentage (15.1%) of tenant-occupied buildings/units while Ludewa Council has the lowest (8.8%) (Table 14.15).

**Table 14.15: Percentage Distribution of Building/Units by Occupancy Tenure Status, Place of Residence and Council; Njombe Region, 2022 TBC**

Council	Total					Rural					Urban

#### 14.6.4 Buildings Land Survey Status

Results reveal that the majority of buildings in Njombe Region (71.9%) are built on un-surveyed land, 20.6 percent on surveyed land and 5.4 percent on regularized land. Moreover, 50.4 percent of urban buildings are built on surveyed land compared with 11.2 percent of rural buildings. Njombe District Council has the highest percentage (87.8%) of buildings built on un-surveyed land while the Njombe Town Council has the lowest (58.1%) (Table 14.16).

**Table 14.16: Percentage Distribution of Building Plots by Place of Residence, Land Survey Status and Council; Njombe Region, 2022 TBC**

Council	Total					Rural					Urban

#### **14.6.5 Buildings Land Ownership Documents**

Information on land ownership status includes title deeds, residential licenses, letters of offer or acknowledgments of payment, certificates of customary right of occupancy (CCRO in Mainland), agreements or contracts, registration card (Zanzibar), and local government documents. Results show that 45.6 percent of all buildings/units are built on land without legal documents, 30.0 percent are built on land with certificate of customary right of occupancy and 8.1 percent have title deeds (Table 14.17).

**Table 14.17: Number of Buildings/Units and Land Ownership Status by Council; Njombe Region, 2022 TBC**

## Chapter 15

### Summary of Key Findings, Implication and Recommendations

---

#### 15.1 Introduction

This chapter presents key findings of the 2022 PHC results with the aim of informing Regional, Local Government Authorities as well as stakeholders on the key findings, implications and recommendations for policies and programmes to realise socio-economic development of Njombe Region.

#### 15.2 Key Findings

Key findings summarized here are on the selected areas of Njombe Region Basic Demographic and Socio-Economic Profile Report, considered to be of high priority for policy and programmes implementation by councils in this region. Further details and specific results, relevant statistics and full references are found in respective chapters of this report.

##### 15.2.1 Population Size and Growth

###### **Key Findings**

- i. Population of Njombe Region has increased from 702,097 persons in 2012 to 889,946 persons in 2022; and
- ii. Population of Njombe Region has been growing at an average annual growth rate of 2.4 percent during the 2012 – 2022 intercensal period;

###### **Implications for Policies and Programmes**

- i. With the current annual growth rate of 2.4 percent (which is below the national average of 3.2%), the region's population is expected to double in the next 29 years;
- ii. On the positive side, annual growth rate of 2.4 percent may lead to greater human capital, higher economic growth and higher economies of scale; and
- iii. On the negative side, growth of 2.4 percent annually may lead to increased pressure on social services, contribute to depletion of natural and environmental resources as well as increased pressure on land use, urban housing and other urban infrastructure.

## **Recommendations**

- i. Regional, Local Government Authorities and stakeholders need to supervise and implement effectively respective national and sector policies while advocating for planned and balanced approach to population growth and economic development;
- ii. Regional and Local Government Authorities need to consistently undertake land use and planning as well as putting in place effective supervision and implementation mechanisms to ensure compliance; and
- iii. Regional and Local Government Authorities as well as stakeholders should strengthen enforcement mechanisms including by laws to protect and safeguard the environment in line with the National Environmental Policy (2022) on environment to ensure that negative impact caused by human activities on environment is minimized.

### **15.2.2 Age Profile**

#### **Key Findings**

- i. About thirteen percent (12.9%) of Njombe regional population is aged below five years;
- ii. More than forty four percent (44.4 %) of total population in Njombe regional is below 18 years of age;
- iii. About thirty five percent (34.9%) of Njombe regional population are youths aged 15 – 35 years; and
- iv. Percentage of persons aged 60 years and above increased from 6.7 percent in 2012 to 7.3 percent in 2022.of total regional population.

#### **Implications for Policies and Programmes**

- i. High proportion of children under five years implies increased demand for Mother and Child Health Services as well as potential demand in social services including education and healthcare;
- ii. High proportion of persons under 18 years of age implies increased demand for education, healthcare and other social services leading to strain in resources and infrastructure. This may lead to higher unemployment rates, which is likely to contribute to social unrest and political instability;

- iii. High proportion of youths (15 – 35 years) exerts pressure on the economy to create more jobs and skills to absorb a growing youth population. However, high proportion of youth population, means a potential labour force that can actively contribute to economic growth, especially when they are educated and skilled and corresponding investments are made in human capital development; and
- iv. The increased proportion of elderly persons indicate an increased demand for social protection which includes universal pension, health insurance and housing;

### **Recommendations**

- i. Regional and Local Government Authorities to strengthen implementation of policies and enforcement of laws related to child and youth development and protection;
- ii. Regional and Local Government Authorities to facilitate provision of skills for youth employability and to put in place enabling environment for new programmes and businesses;
- iii. Regional and Local Government Authorities to ensure allocation of enough resources to cater for education, health, social security and protection of young people; and
- iv. Regional and Local Government Authorities to effectively implement policies and programmes that are intended to provide services to the elderly as indicated in related national and sectoral policies.

### **15.2.3 Marital Status and Early Marriages**

#### **Key Findings**

- i. About seven percent (6.5%) of the female population aged 15 - 19 in Njombe Region is married; and
- ii. Twelve percent (12.0%) of females aged 15 years and above is widowed.

#### **Implications for Policies and Programmes**

- i. Early marriages have potentially lifelong harmful consequences such as, early pregnancies, child and maternal mortality, and domestic violence. Young

women who marry early are also denied education, economic opportunity opportunities and can experience psychological consequences; and

- ii. Widowhood may lead to social and economic difficulties, such as declining economic growth and increasing poverty levels as well as to change of family formation, unbalanced child upbringing.

## **Recommendations**

- i. Regional and Local Government Authorities should strengthen supervision and implementation of national and sector policies related to girl child education and welfare;
- ii. Regional and Local Government Authorities need to scale up measures to enforce laws and regulations that prohibit incidences of early marriage; and
- iii. The Regional and Local Government Authorities to develop supportive programmes for widows including cash transfer and public works programmes like those implemented under Tanzania Social Action Fund (TASAF).

### **15.2.4 Possession of National Identification Documents**

#### **Key Findings**

- i. About thirty percent (29.5%) of children under five years of age in Njombe Region have neither birth certificate nor birth notification;
- ii. About one third (31.7%) and 10.5 percent of persons aged 18 years and above have national identification cards (NIDA) and national identification numbers respectively; and
- iii. More than nine percent (9.2%) of persons in Njombe Region have health insurance from National Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF).

#### **Implications for Policies and Programmes**

- i. National identification documents are important for citizens to access services and fulfil their rights and obligations. They also help in association of information in the national databases, national security issues and law enforcement. Moreover, birth and national certification is mandatory for every citizen and

therefore high proportion of persons without birth certificate is contrary to Births and Deaths Registration Act, (CAP 108, R.E 2002) and Registration and Identification of Persons Act of 1986 (R.E 2012);

- ii. Birth certificate is a crucial document for children to access services before the age of 18 years, which is the minimum age for acquiring the National Identification Card; and
- iii. Health Insurance Identification card is important for ensuring accessibility to quality health care services.

### **Recommendations**

- i. Regional and Local Government Authorities as well as other stakeholders need to regularly sensitize the public, especially the youths on the importance of national identification documents; and
- ii. Regional and local government authorities as well as stakeholders need to educate and regularly sensitive the public on the importance and benefits of Universal Health Insurance Act of 2023.

### **15.2.5 Orphanhood**

#### **Key Findings**

About eleven percent (10.6%) of children under age 18 in Njombe Region are orphans (8.2% with one parent dead and 2.4% both parents' dead).

#### **Implications for Policies and Programmes**

- i. Orphans are likely to become victims of violence, human trafficking and exploitation, as well as likelihood to experience mental health challenges; and
- ii. The orphanhood may lead to increased costs of care to families, households, communities and councils.

#### **Recommendations**

- i. Regional and Local Government Authorities as well as stakeholders need to sensitize the communities on the plight of orphaned children and take actions to minimize their sufferings; and

- ii. Regional and Local Government Authorities to sustain mobilization and allocation of adequate resources to support plans and programmes regarding orphanage services including education subsidies and running cost of caring centres.

### 15.2.6 Literacy and Education

#### Key Findings

- i. More than ninety percent (90.3%) of population aged 15 years and above in Njombe Region is literate;
- ii. Net Enrolment Rate (NER) in primary school increased from 89.7 percent in 2012 to 95.5 percent in 2022;
- iii. About fifty-nine percent (58.8%) of Persons With Disabilities (PWDs) dropped out of education for people with mental health challenges; and
- iv. Primary school education Gross Enrolment Ratio (GER) increased from 107.1 in 2012 to 144.2 percent in 2022.

#### Implications for Policies and Programmes

- i. High adult literacy rate in the region signifies the presence of knowledgeable population that may lead to healthier population, higher and sustainable economic growth and labour market participation;
- ii. Net Enrolment Rate (NER) for Njombe Region indicates that a large proportion of children of official primary school age are enrolled in primary education, signifying a higher access to primary education in the region, which also translate into better education outcomes for region's children in general and in a long-term resulting to reduction in poverty and inequality;
- iii. Increased rate of net enrolment in primary schools implies increased resources required to finance education sector as a result of increased capitation grant, facilities and human resources;
- iv. Persons With Disabilities are already disadvantaged, this coupled with lack or poor education aggravates their level of poverty leading to an increase in intergenerational poverty; and
- v. Increase of Gross Enrolment Ratio implies that region is able to accommodate most of its school age population in its education system. However, the increase also shows that the challenges of achieving GER of 100 percent by

year 2025/26 as stipulated in the Third Five Year Development Programme still exists. These challenges include under and over age school registration.

## **Recommendations**

- i. Regional and Local Government Authorities need to sustain gains in education outcomes in order to achieve national targets on education in time and address disparities among councils;
- ii. Regional and Local Government Authorities need to put in place effective mechanisms to ensure supervision and implementation of provision of skills training as emphasized in the National Education Policy (2023);
- iii. Regional and Local Government Authorities as well as other stakeholders to support measures to strengthen education system for PWDs and raise awareness of parents and guardians of PWDs to address the issue of high drop-out rates, and
- iv. Regional and Local Government Authorities to raise awareness of parents and guardians of PWDs on the importance of supporting their educational development initiatives.

## **15.2.7 Employment and Economic Activities**

### **Key Findings**

- i. The current unemployment rate in Njombe Region is 6.1 percent; the rate is higher in urban (6.9%) than in rural (5.1%) areas;
- ii. Agriculture, forestry and fishing industry has the highest proportion (76.4%) of the total employment in Njombe Region; and
- iii. About fifty-eight (57.8%) of youth population aged 15 - 35 are engaged in informal non-agricultural economic activities.

### **Implications for Policy and Programmes**

- i. Unemployment can lead to a reduction in economic growth, as unemployed individuals have less disposable income to spend on goods and services, which can lead to a decrease in demand for goods and services. The 6.1 percent unemployment rate for Njombe Region is below the national level (7.8%) and

is considered moderate, which indicates that its impact on economic growth is also moderate;

- ii. Unemployment can also have a negative impact on individuals and families such as financial hardship, social isolation, and a loss of self-esteem. Unemployed persons may also experience negative health outcomes including depression, anxiety, and stress;
- iii. Agriculture, forestry and fishing industry is a key sector for employment in the region. Therefore, interventions to develop the sector will lead to more job creation and sustenance of the employment; and
- iv. Informal sector is a significant youth employing sector in Njombe Region. This sector generates income for youth leading to poverty reduction. The sector also leads to local community development. However, the informal sector is insecure and lack of social protection.

### **Recommendations**

- i. Regional and Local Government Authorities to put in place measures aimed at improving agriculture, forestry and fishing industry in line with national policies so as to increase sector productivity;
- ii. Regional and Local Government Authorities in collaboration with other stakeholders to develop programs and projects that promote entrepreneurship and self-employment, access to education and vocational training for the youth; and
- iii. Regional and Local Government Authorities to create conducive business environment by streamlining bureaucratic procedures, regulations, and facilitate access to affordable credit.

### **15.2.8 Persons With Disabilities**

#### **Key Findings**

- i. About eleven percent (10.7%) of the total Njombe Region population aged 7 years and above has some form of disability;
- ii. Most Persons With Disabilities (49.4%) reported diseases as major cause of their disabilities;

- iii. Almost eight percent (7.6%) of Persons With Disabilities (PWDs), reported their disability to have been caused by accidents; and
- iv. Use of assistive devices among PWDs is very low.

### **Implications for Policies and Programmes**

- i. Although prevalence of disability is moderate, its presence implies additional cost of care for the household and the society at large;
- ii. People with Disabilities are more likely to experience adverse social economic outcome such as poor health and poverty due to barriers to education, employment, earnings and weak social protection mechanisms. However, use of assistive devices reduces the negative effects of disability; and
- iii. Poor PWDs are caught in vicious cycle of poverty and disability, each being cause and consequence of the other.

### **Recommendations**

- i. Regional and Local Government Authorities need to ensure that all programs and projects in councils integrate issues of PWDs so that they can fully participate in their own development using resources available in the region;
- ii. Regional and Local Government Authorities and stakeholders to strengthen poor health and nutrition programs for prevention and cure so as to reduce incidence of disease leading to reduction prevalence of disability in the region;
- iii. Regional and Local Government Authorities should put in place effective supervision mechanism for organs responsible with safety issues including road and occupational places; and
- iv. Regional and local Government authorities to undertake regular sensitization, advocacy and awareness raising campaigns programmes on the use of assistive devices and facilitate access to these devices.

### **15.2.9 Land Ownership**

#### **Key Findings**

- i. About six out of ten households (59.3%) of persons aged 15 years and above in Njombe Region own land without any legal documents; the percentage ranges

from 71.1 percent in Njombe District Council to 43.9 in Makambako Town Council;  
and

- ii. The proportion of males aged 15 years and above who own land alone is higher (20.4%) than that of females (16.5%).

### **Implications for Policies and Programmes**

- i. The overall aim of the National Land Policy is to promote and ensure a secure land tenure system, to encourage the optimal use of land resources, and to facilitate broad-based social and economic development without upsetting or endangering the ecological balance of the environment;
- ii. Gender inequality in land ownership is a critical issue in Njombe region, with significant implications;
- iii. Existence of gender inequality in land ownership lead to unequal economic opportunities;
- iv. Women who own land can engage in income generating activities leading to empowerment, poverty reduction and better livelihood; and
- v. Lack of legal documents for land ownership leads to insecurity of land properties and inaccessibility to economic opportunities.

### **Recommendations**

- i. Regional and Local Government Authorities to strengthen monitoring implementation of the 1997 Land Policy to accelerate land ownership process by strengthening capacities of responsible institutions;
- ii. Regional and Local Government Authorities need to address gender disparity in land ownership to guarantee economic empowerment and achieve human rights outcomes; and
- iii. Regional, Local Authorities and other stakeholders should continue conducting education and awareness campaigns about benefits of joint land ownership to promote gender equality for sustainable development and poverty reduction;

### **15.2.10 Drinking Water**

#### **Key Findings**

- i. About eight out of ten private households (80.4%) in Njombe Region is using drinking water from improved sources; with disparity between councils ranging

from 66.2 percent in Njombe District to 92.2 percent in Makete District Council; and

- ii. There is a significant disparity between urban (89.3%) and rural (76.4%) areas on percentage of private households in Njombe Region using improved sources of drinking water.

### **Implications for Policy and Programmes**

Use of water from unimproved sources has implication on human health as these sources are easily contaminated leading to poor health outcomes. About twenty percent of private households in Njombe Region is using water from unimproved sources for drinking, hence a likelihood of poor health outcome emanating from water usage.

### **Recommendations**

- i. Region and Local Government Authorities needs to initiate new water supply projects especially in underserved rural areas and Councils; and
- ii. Region and Local Government Authorities should allocate enough resources to rural areas and councils that are lagging behind in the use of improved source of water for drinking.

## **15.2.11 Sanitation**

### **Key Findings**

More than eighty percent (80.3%) of households in Njombe Region is using improved toilet facility; with significant disparities between councils, ranging from 62.1 percent in Ludewa District to 93.8 percent in Njombe District.

### **Implication for Policies and Programmes**

Use of unimproved toilet facilities contributes to the spread of infectious diseases such as cholera, diarrhoea, dysentery, hepatitis A, typhoid, and polio. These diseases can lead to serious illness (morbidity) and even death (mortality).

## **Recommendations**

- i. Regional and Local Government Authorities need to supervise and implement effectively sanitation projects at local/community level to avoid adverse effects of poor sanitation; and
- ii. Regional and Local Government Authorities in collaboration with stakeholders to undertake sanitation and hygiene education awareness campaigns in the community.

### **15.2.12 Energy**

#### **Key Findings**

- i. More than sixty-six percent (66.4%) and 21.7 percent of private households in Njombe Region use firewood and charcoal respectively as the main source of energy for cooking;
- ii. About eleven percent (11.1%) of households in Njombe Region use clean energy for cooking;
- iii. Slightly over one third (35.9%) of households use electricity from national grid for lighting; with significant disparity between councils ranging from 15.7 in Ludewa District to 64.1 percent in Makambako Town Council; and
- iv. About forty two percent (41.8%) of households in Njombe Region use solar energy for lighting.

#### **Implications for Policy and Programmes**

- i. High proportion of households using firewood and charcoal as main source of energy for cooking lead to detrimental impact on environment by perpetuating deforestation, land degradation, soil erosion, air pollution and loss of forest resources and therefore contributing to climate change;
- ii. Use of clean energy signals the potential of addressing environmental destruction and natural resources;
- iii. Access to national grid in Njombe Region is generally low, which implies constrained economic opportunities/potentials for the region and councils; and
- iv. Disparities in energy access between councils lead to unequal development due to unlocked income generating opportunities due to unavailability of reliable energy from the national grid.

## **Recommendations**

- i. Regional and Local Government Authorities to support national campaign on the use of gas as an alternative source to charcoal and firewood;
- ii. Regional and Local Government Authorities to sensitizing communities the importance of using clean energy, negative effects of dirty energy and deforestation which is one of the main causes of climate change; and
- iii. Regional and Local Government Authorities in collaboration with TANESCO and REA to identify and put in place plan to hasten distribution and installation of electricity to households and communities.

### **15.2.13 Information and Communication Technology (ICT) Access and Use by Individuals and Households**

#### **Key Findings**

- i. Almost nine out of ten households (86.3%) in Njombe Region have at least one member aged 4 years and above who owns a mobile phone;
- ii. Less than one percent of both males (0.5%) and females (0.6%) aged 15 years and above own a smartphone or tablet;
- iii. More than one (1.1%) and two (2.2%) percent of persons aged 15 years and above own a desktop and laptop computer respectively; and
- iv. Almost fifty percent (49.7%) of households in Njombe Region own a radio while 23.9 percent own television with notable disparities between councils, ranging from 30.1 percent in Ludewa District to 100 percent in Njombe District (Radio) and from 13.2 percent in Ludewa District to 33.4 percent in Makambako Town (Television set).

#### **Implications for Policies and Programmes**

- i. The level of adoption of ICT services among households and individuals shows that the sector is growing in the right direction. Despite this growth, evidence from other sources (administrative data) shows that the digital divide gap is still high. For instance, though the broadband population coverage in Tanzania, was 72 percent in 2022, only around 45 percent of the population used broadband services;

- ii. Ownership and usage of ICT smart devices (smartphones, tablets and computer) are low which contribute to low speed of broadband services uptake; and
- iii. Access and use of ICT services are generally low among females compared to males as well as between urban and rural areas.

### **Recommendations**

- i. Regional and Local Government Authorities need to promote and supervise digital literacy programmes in education curriculum at pre-primary, primary and secondary education levels; and
- ii. Regional and Local Government Authorities need to raise awareness in communities to establish digital networks where they can share communication facilities and promote access to communication service and digital skills.

### **15.2.14 Information on Buildings**

#### **Key Findings**

- i. About eighty eight percent (87.7%) of all buildings in Njombe Region have physical addresses;
- ii. About sixty percent (59.7%) of all buildings in Njombe Region have electricity services, of which 21.7 percent are connected to the national grid and 38.0 percent are powered by other sources;
- iii. More than thirty five percent (35.3%) of all buildings have water service;
- iv. About six percent (5.6%) of all buildings in Njombe Region have infrastructure for Persons With Disabilities;
- v. About seventy-two percent (71.9%) of all buildings in Njombe Region are built on un-surveyed land with disparity between councils ranging from 82.8 percent in Wanging'ombe District to 58.1 percent in Njombe Town; and
- vi. About forty-six percent (45.6%) of all buildings in Njombe Region are constructed on land that do not have legal documents.

#### **Implications for Policies and Programmes**

- i. Physical address is crucial for accessing emergency services, facilitate commerce and government taxes such as property tax. It is also, useful for

- enforcing regulation and management of land planning and use as well as provision and billing of utilities (water, electricity and gas);
- ii. The presence of a small percentage of buildings with electricity and water services, affects the implementation of economic activities for individual citizens in accessing opportunity to increase income and enhancing their development;
  - iii. Large percentage of buildings that do not have friendly infrastructure for Persons With Disabilities causes difficulty for this group to reach and use the buildings, thus depriving them the basic rights to access services provided in those buildings;
  - iv. Buildings without legal ownership documents indicate that: - The National Programme of Land Planning, Surveying and Titling has not yet been able to reach many beneficiaries, a loss of Government revenue, tenure insecurity among land holders, increase in land related conflicts and inability of land owners to use their land as a mortgage for obtaining loans; and
  - v. Presence of many buildings in unplanned and un-surveyed areas signifies escalation of informal settlements, lack of social services and infrastructure.

### **Recommendations**

- i. Regional and Local Government Authorities to support national efforts to ensure each house has physical address by regularly conducting the exercise of placement of addresses;
- ii. Regional and Local Government Authorities to facilitate efforts by utility companies to provide electricity and water services in a manner that will enable low-income clients to be connected to these services;
- iii. Regional and Local Government Authorities to strengthen supervision and enforce laws that require buildings to have friendly infrastructure for PWDs;
- iv. Regional and Local Government Authorities to strengthen supervision of implementation of the National Programme of Land Use Planning, Surveying and Titling together with Land Tenure Improvement Programme (LTIP); and
- V.** Regional and Local Government Authorities to strengthen and strategically manage land use plans and surveying projects.

## Annex Tables
