# TABORA REGION, ADMINISTRATIVE BOUNDARIES

## Foreword

---

The 2022 Population and Housing Census (PHC) for the United Republic of Tanzania had its

reference as the midnight of the 22<sup>nd</sup>/23<sup>rd</sup> August 2022. This was the Sixth and the first digital Census after the Union of Tanganyika and Zanzibar in 1964. Other post union censuses were carried out in 1967, 1978, 1988, 2002 and 2012. The Sixth Phase Government of Tanzania

under the leadership of Her Excellency Dr. Samia Suluhu Hassan and the Eighth Phase Government of Zanzibar under the leadership of His excellency Dr. Hussein Ali Mwinyi, like the previous phases, have fulfilled their obligation of conducting the 2022 PHC according to the United Nations Principles and Recommendations for the Population and Housing Census. **We owe them much appreciation for their commitment and support during Census implementation.**

The 2022 PHC was conducted in accordance with the Statistics Act Cap 351, which mandates the Government of the United Republic of Tanzania to conduct Population and Housing Census every ten years. It also followed the United Nations Principles and Recommendations for conducting the 2020 Round of Population and Housing Census, including adoption of advanced Information and Communication Technology (ICT) at all stages of Census implementation. Indeed, the country's decision to use more advanced technology to capture data during cartographic mapping, enumeration, data transmission and processing made the 2022 PHC the first ever digital census to be conducted in Tanzania.

The Government of the United Republic of Tanzania conducted for the first time the 2022 Tanzania Buildings Census (2022 TBC), an exercise done concurrently with the 2022 Population and Housing Census. Buildings are amongst the most important infrastructure in the lives of people in Tanzania and around the world. Buildings help to preserve and promote the lives of individuals, families and society at large in the economic, social, political and cultural spheres. Moreover, buildings as part of premises are an important criterion for measuring the state of a non-income economy for an individual or community concerned. The main uses of buildings in the lives of rural and urban people include residential, commercial, commercial-

residential, institutional and industrial. Apart from addressing the long-time challenges of lack of information on buildings in the country, the 2022 TBC has been conducted to meet the requirements of various national, regional and international policies pertaining to human settlements development. This huge national undertaking has been made practical due to a clear understanding that, buildings census is the primary means of accessing complete, accurate, adequate, timely and reliable building information.

The 2022 PHC and TBC results are for integrated plans and sustainable development of the country and will increase awareness and transparency in allocation of resources at all levels of administration based on the actual population. The results will be used by the Government and stakeholders in monitoring and evaluating various national, regional and international development frameworks including the Tanzania Development Vision 2025 and Zanzibar Development Vision 2050; the Third National Five-Year Development Plan 2021/22 - 2025/26 and Zanzibar Development Plan 2021/22 - 2025/26; the East African Community Vision 2050; Southern African Development Community Vision 2050 and the African Development Agenda 2063.

Furthermore, the results will enable the country to evaluate the progress of implementation of Sustainable Development Goals (United Nation Agenda 2030); goals that aim at achieving equality and eradicating poverty of all kinds including extreme poverty by 2030 by ensuring no one is left behind. The census data will also provide a basis for the computation of several indicators such as enrolment and literacy rates, infant and maternal mortality rates, unemployment rate and others.

The Regional Basic Demographic and Socio-Economic Profile reports are the sixth in a series of major planned publications for the 2022 PHC. The major reports that have been produced so far are Administrative Units Population Distribution Reports, Age and Sex Reports, The Tanzania Basic Demographic and Socio-Economic Profile and *Ripoti ya Idadi ya Watu katika Majimbo ya Uchaguzi (Constituency Population Distribution Report)* in two volumes of United Republic of Tanzania and Tanzania Zanzibar. The first three major reports are in three volumes for the United Republic of Tanzania, Tanzania Mainland and Tanzania Zanzibar. The main purpose of this report is to provide a short descriptive analysis and related tables on main thematic areas covered in the 2022 Population and Housing Census. Areas covered include

population and household characteristics, as well as social and economic activities. Other reports in the series of planned Census publications will be Thematic Reports.

The success of both 2022 PHC and TBC depended on the cooperation and contributions from the Government, specifically Census Committees from national to the lowest administrative level. These include the National Central Census Committee; National Census Advisory Committee; National Census Technical Committee; Census Committees at regional, district, wards, village/mtaa and hamlet. There were also forums from Non-States Actors including Collaborators Forum, Private Sector, various institutions and the public at large.

A word of thanks goes to Government leaders at all levels, particularly, Minister for Finance; Minister for Lands, Housing and Human Settlements Development, Minister of State - President's Office, Finance and Planning, Zanzibar; Minister for Lands and Housing Development Zanzibar; Members of Parliament; Members of the House of Representatives; Councillors/Shehas; Regional and District Census Committees chaired by Regional and District Commissioners of respective areas; Census Coordinators (National and Zanzibar); Regional and District Census Coordinators; Supervisors; Enumerators; Local leaders and all respondents (heads of households, members of households and other individuals).

Special gratitude is extended to the following Development Partners:- United Nations Population Fund (UNFPA); World Bank (WB); United Nations Children's Fund (UNICEF); UN-Women; International Organization for Migration (IOM); United States Agency for International Development (USAID); Foreign, Commonwealth and Development Office (FCDO); United States Census Bureau (USCB), The Republic of South Korea, The People's Republic of China and other Development Partners for providing equipment, expertise, training and financial support in making the 2022 Population and Housing Census a success. We also thank religious, traditional and political leaders, non-governmental organization leaders, the media and all citizens and non-citizens in general for their participation and contributions in the successful implementation of the Census.

Special thanks also go to Honourable Anne Semamba Makinda - Census Commissar for Tanzania Mainland and Former Speaker of the National Assembly and Honourable Ambassador Mohamed Haji Hamza - Census Commissar for Tanzania Zanzibar, for their

effective leadership and management in educating and sensitizing all citizens and non-citizens to participate in the 2022 Population and Housing Census, thus resulting in enhanced quality, smooth and timely execution of the Census exercise. We also thank the Chairperson of the Governing Board of the National Bureau of Statistics (NBS), Dr. Amina Msengwa and the Chairperson of the Statistics Board of Zanzibar, Ambassador Amina Salum Ali, for their guidance throughout the implementation of the Census exercise.

Last but not least, we acknowledge the unprecedented efforts and commitment of the management and staff of the National Bureau of Statistics under the leadership of Dr. Albina Chuwa, the Statistician General; and staff of the Office of the Chief Government Statistician, Zanzibar under the leadership of Mr. Salum Kassim Ali; Chief Government Statistician; staff from the Ministry of Lands, Housing and Human Settlements Development; Ministry of Information, Communication and Information Technology; as well as other Government officials who worked tirelessly in ensuring that the 2022 Population and Housing Census was implemented successfully.

**Kassim Majaliwa Majaliwa (MP)**  
Prime Minister of  
The United Republic of Tanzania

**Hemed Suleiman Abdulla (MHR)**  
Second Vice President of Zanzibar

## Acknowledgement

---

The National Bureau of Statistics and Office of the Chief Government Statistician, Zanzibar conducted the 2022 PHC and TBC to provide necessary information for policy implementation, planning, monitoring and evaluation of development processes. The Census collected detailed information on demographic characteristics, fertility, mortality, migration, orphanhood, disabilities, possession of national documents, education, economic activities, land ownership and information related to ICT ownership and use, housing ownership and assets, agriculture, community facilities and buildings. Some information on physical addresses were also collected.

This report presents basic demographic and socio-economic indicators from regional to Council level. The report will facilitate users of Census data to make evidence-based decisions for social and economic development. We therefore express our appreciation to all experts who have put their time and efforts to produce this report. In particular, we would like to thank Ruth Davison Minja, the Director of Population Census and Social Statistics; Fahima Mohamed Issa, Director of Social Statistics, Census and Survey, (OCGS); Seif Ahmad Kuchengo, the National Census Coordinator; Abdul-majid Jecha Ramadhan, the Tanzania Zanzibar Census Coordinator, National Census Technical Team, Statisticians, Demographers, Information Technology and Geographic Information System officers for their commitment which led to successful completion of this report.

Our appreciation is as well extended to all professionals, regional and district supervisors, enumerators and field supervisors as well as the media for their dedicated work. Certainly, without their commitment and dedication, the census would not have been successful. We would also like to thank the public for their cooperation during the entire period of the Census.

**Dr. Albina Chuwa**  
Statistician General  
National Bureau of Statistics

**Salum Kassim Ali**

Statistician, Zanzibar

## Executive Summary

---

The 2022 Tabora Region Basic Demographic and Socio-Economic Profiles provides a short descriptive analysis and related tables on main thematic areas covered in the 2022 Population and Housing Census as well as the 2022 Buildings Census. Areas covered are population size, growth and distribution; age and sex profile; household composition; marital status; national identification documents and citizenship; survival of parents; education, literacy and numeracy; employment and economic activities; disability; land ownership; housing characteristics, asset ownership and environmental control; access and use of Information and Communication Technology (ICT) by individuals and households; and information on buildings. In many cases, information has been disaggregated by place of residence and where possible comparisons have been made with previous Census(es) to observe the trend over time. New topics covered in the 2022 PHC for the first time to fill the national data gaps include; national identification documents, numeracy, land title deed status, production and disposal of Electronic and Electric Equipment Waste (EEEW), forestry and ICT. The report also provides policy recommendations emanating from key findings on areas covered by the 2022 PHC.

**Chapter One** presents an overview of the 2022 PHC. It gives a brief history of census undertaking in the country and the main objective of the 2022 PHC. It also highlights on preparatory and implementation of census activities at different levels as well as the legal framework, census organisation structure, development of census instruments, cartographic work, pilot census, census publicity and advocacy campaigns. Furthermore, the Chapter elaborates on census enumeration activities including recruitment and training of personnel, distribution of enumeration materials and the actual enumeration exercise. Post enumeration activities (data processing and quality control procedures) are also discussed in this Chapter.

**Chapter Two** gives a user of this publication an understanding on the size, growth and distribution of Tabora Region population from the 2022 PHC and previous censuses. Tabora Region has a population of 3.3 million persons, out of those, 1,730,508 are females and 1,661,171 are males. Population of Tabora Region grew at an average annual growth rate of 3.9 percent from 2012 to 2022 representing an increase of 48 percent over a 10-year period. At this rate, the population of Tabora Region is expected to double in the next 18 years. The

Region's population remains predominantly rural, with 85.2 percent of its total population living in rural areas and 14.8 percent living in urban areas.

**Chapter Three** is about age and sex profile of Tabora Regional population. The chapter presents population by sex and major age groups. The data depict a young population age structure with a median age of 15.0 years. About forty-nine percent (39.1 %) of the population is aged below 15 years. The percentage of the working age population (15 - 64 years) has decreased from 49.2 percent in 1988 Census to 47.7 percent in 2022. Results from 2022 PHC also show that the proportion of the working age population is higher in urban areas (57.2%) compared with rural areas (46.0%), and the age dependency ratio for the region is 109.7. The percentage of the elderly population aged 65 years and above in Tabora Region decreased from 5.6 percent in 2002 to 4.8 percent in 2012 and thereafter decreased to 3.1 percent in 2022.

**Chapter Four** presents information on household composition whereby results show that Tabora Region has 592,039 private households, out of which 119,587 (20.2%) are in urban areas. This is an increase from 22.2 percent in 2012 PHC indicating increasing urbanization in the region. Female-headed households in the Region increased from 29.9 percent in 2012 to 35.0 percent in 2022. Furthermore, the percentage of female headed households is higher in urban areas (38.2%) than in rural areas (34.2%). The average household size for the Region decreased from 5.9 persons in 2012 to 5.6 persons in 2022.

**Chapter Five** presents the census results on marital status for persons aged 15 years and above. About 57.7 percent of persons aged 15 years and above in Tabora Region are married, where females are more likely (59.8 %) to be married than males (55.4%). Four percent of persons aged 15 years and above are widowed; percentage of widowed females is significantly higher (6.6%) than that of males (1.2%). The results further show that females get married at a younger age than males. The Mean Age at First Marriage in Tabora Region is 24.2 years for males and 19.8 years for females. The Mean Age at First Marriage for males decreased from 25.7 years to 24.2 years, same trend observed on that of females from 22.1 years in 2012 to 19.8 years in 2022.

**Chapter Six** provides information on national identification documents and citizenship. The majority of the population (81.6%) in Tabora Region have neither birth certificates nor birth notifications. Only 15.1 percent have birth certificates and a mere 2.4 percent have birth notification. Analysis by age indicates that the under-five population has the highest percentage (32.5%) of the individuals with birth certificates, followed by 16.5 percent of the population aged 5-9 years. Results on other national identification documents show that 181,491 persons (12.3%) aged 18 years and above have national identification cards and 196,066 persons (13.3%) have national identification numbers. It is also noted that only 121,422 persons (3.6%) out of 333,4165 persons in private households in the Region have health insurance from National Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF).

Results show that 3,388,284 (99.9%) of the persons enumerated in Tabora Region are Tanzanians. The majority of non-Tanzanians are from other East African Countries (1,726 persons) followed by other African Countries (993 persons).

**Chapter Seven** presents information on survival of parents. Results indicate that about nine out of ten (88.4%) children under 18 years in Tabora Region have both parents alive. One out of ten (11.6%) children under 18 years are orphans with a slight difference between urban areas (%) and rural areas (4.8%). About seven percent (6.8%) of children under 18 years are orphan with one parent dead while (4.8%) are orphan with both parent dead. Sikonge District Council has the highest percentage (9.6%) of orphans compared with other councils in Tabora Region.

**Chapter Eight** presents information on education, literacy and numeracy. Adult literacy rate for persons aged 15 years and above in Tabora Region is 68.0 percent. Literacy rate is higher among males (73.2%) than females (63.2%). Numeracy rate among persons aged five years and above is 64.3 percent and it is slightly higher among males (65.3%) than females (63.4%). The Net Enrolment Rate (NER) for primary schools is 63.4 percent. It is higher among females (66.6%) than males (60.2%). Majority (82.4%) of population aged four years and above attained primary education, 13.1 percent attained ordinary level secondary education and about three percent 2.6% attained university and other related education level.

**Chapter Nine** presents information on employment and current economic activities for persons aged 15 years and above. There are 1,267,756 (79.9%) persons in employment. The current unemployment rate in Tabora Region using International relaxed definition is 3.6 percent. The Females unemployment rate is slightly higher (3.9%) than that of males (3.3%). The overall Labour Force Participation Rate (LFPR) for Tabora Region is 83.4 percent.

**Chapter Ten** highlight statistics on disability status in Tabora Region. For the purpose of this report, Persons With Disabilities (PWDs) are those with physical, mental, intellectual or sensory impairment which may hinder or limit their full and effective participation in society on an equal footing with others. Nine percent (9.0 %) of the total population aged 7 years and above are living with some form of disability. Difficulty in seeing (2.4 %) and walking (1.5 %) are the most common types of disabilities in Tabora Region.

**Chapter Eleven** focuses on status of land ownership including information on persons owning land, type of ownership and legal documents possession in Tabora Region. Thirty percent (30.3%) of the population aged 15 years and above in the Tabora Region own land for different uses, including agriculture, residential, commercial or industrial. The proportion of females owning land is lower (26.3 percent) than that of males (34.7%). Forty Five percent (45.4%) of persons aged 15 years and above in Tabora Region own land without legal documents. Among the land owners with legal documents in Tabora Region, majority of them own land jointly (33.6%) followed by those owning land alone (18.7%).

**Chapter Twelve** presents information on housing characteristics, assets ownership and environmental control in Tabora Region. About seven out of ten (69.0%) households in Tabora Region live in their own houses. More than one-third (34.4%) of households have no legal rights over the land where their houses are built. More than forty percent (40.3%) of households are living in houses with improved floor covering materials. More than forty percent (41.9%) of households in Tabora Region use improved sources of drinking water. More than thirty percent (33.8%) of households in Tabora Region use improved toilet facilities.

The majority of households in Tabora Region use firewood (67.2%) and charcoal (24.3%) as main sources of energy for cooking. The main source of energy for lighting is solar energy 47.0 percent followed by electricity from the national grid (TANESCO) (20.2%). Percentage of

households using electricity from the national grid for lighting increased from 10.4 percent in 2012 to 20.2 percent in 2022. About four out of ten (38.9%) households in Tabora Region use burning of solid waste as the main method of solid waste disposal and 56.6 percent of households mix electronic waste with other refuse.

**Chapter Thirteen** highlights the households and individuals Access and Use of Information and Communication Technology (ICT), including Ownership of ICT equipment and the Type of Use of ICT equipment in Tanga Region. It is shown that there is significant mobile phone penetration in this region, with 75.2 percent of person aged 15 years and above own mobile phone where two thirds (66. %) of them own only non-smartphones. Usage proportions are similarly high, with 78.1 % of persons aged 15 years and above use ICT equipment for communication. The non-smartphone is mostly utilised by individuals who attained training after secondary education (98.6 %). About three percent (2.3%) of person aged 15 and above in Tabora Region use laptops and one percent (1.4 %) use desktop computers.

**Chapter Fourteen** provides information on the number of buildings, types of buildings, main uses of buildings and the number of units in residential and commercial-residential buildings in Tabora Region and Councils levels as per the 2022 Tanzania Building Census (2022 TBC) results. Findings indicates that 77.6 percent of all buildings/Units in Tabora Region are occupied by the owners themselves and 9.7 percent are occupied by tenants. Seventy two percent (72.3%) of all individually owned buildings in Tabora Region are owned by males, 19.8 percent by females, and 5.0 percent are jointly owned. About thirty percent (29.6%) of all buildings have permanent flooring materials (sand-cement or, Tiles or marble, Terrazo). Seventy-four percent (74.3 %) percent of all buildings in Tabora Region are built on un-surveyed land. About thirty eight percent (37.7 %) of all buildings in Tabora Region are constructed on land that does not have legal documents. About eleven percent (10.9%) of all buildings/Units in Tabora Region are connected to the national grid electricity, while 39.2 percent are powered by other sources. Nearly 21.0 percent (20.5%) of all buildings have water services. Three percent (3.3%) of all buildings in Tabora Region have infrastructure for Person With Disabilities.

## Census Results in Brief

## TABLE OF CONTENTS

CHAPTER 1 .....	1
OVERVIEW OF THE 2022 POPULATION AND HOUSING CENSUS .....	1
1.1 INTRODUCTION.....	1
1.1.1 <i>A Brief History of Census Undertaking in Tanzania</i> .....	1
1.2 OBJECTIVES OF THE 2022 PHC .....	2
1.2.1 <i>Specific Objectives of the 2022 PHC</i> .....	2
1.3 PREPARATIONS FOR THE 2022 PHC.....	2
1.3.1 <i>Legal Framework</i> .....	2
1.3.2 <i>Census Organisation</i> .....	3
1.3.3 <i>Development of Census Instruments</i> .....	3
1.3.4 <i>Cartographic Work</i> .....	4
1.3.5 <i>Pilot Census</i> .....	5
1.3.6 <i>Census Publicity and Advocacy Campaign</i> .....	7
1.4 CENSUS ENUMERATION ACTIVITIES.....	8
1.4.1 <i>Recruitment and Training</i> .....	8
1.4.2 <i>Other Preparations for Enumeration</i> .....	8
1.4.3 <i>Enumeration</i> .....	8
1.4.4 <i>Post Enumeration Activities</i> .....	9
1.5 DATA PROCESSING .....	9
1.6 QUALITY CONTROL PROCEDURES .....	10
CHAPTER 2 .....	11
POPULATION SIZE, GROWTH AND DISTRIBUTION .....	11
2.1 INTRODUCTION.....	11
2.2 POPULATION SIZE .....	11
2.2.1 <i>Population Size by Council</i> .....	12
2.2.2 <i>Rural and Urban Population</i> .....	13
2.3 POPULATION CHANGE AND GROWTH.....	16
2.3.1 <i>Population Change</i> .....	16
2.3.2 <i>Annual Population Growth Rate and Trends</i> .....	16
CHAPTER 3 .....	18
AGE AND SEX PROFILE .....	18
3.1 INTRODUCTION.....	18
3.2 QUALITY OF AGE AND SEX DATA .....	19
3.2.1 <i>Population Distribution by Five Year Age Groups</i> .....	20
3.2.2 <i>Population Pyramid</i> .....	22
3.3 POPULATION DISTRIBUTION BY SELECTED AGE GROUPS .....	25
3.3.1 <i>Children Under Five Years</i> .....	27
3.3.2 <i>Young Population (0-14 Years)</i> .....	27
3.3.3 <i>Young Population (0-17 Years)</i> .....	28
3.3.4 <i>Youth Population (15-24 Years)</i> .....	29
3.3.5 <i>Youth Population (15 - 35 Years)</i> .....	29
3.3.6 <i>Working Age Population (15-64 Years)</i> .....	30
3.3.7 <i>Elderly Population</i> .....	31
3.3.8 <i>Age Dependency Ratio</i> .....	33
CHAPTER 4 .....	35
HOUSEHOLD COMPOSITION .....	35
<i>Key points</i> .....	35

4. 1 INTRODUCTION.....	35
4. 2 NUMBER OF HOUSEHOLDS .....	36
4. 3 AVERAGE HOUSEHOLD SIZE .....	39
4. 4 HOUSEHOLD HEADSHIP.....	40
4. 4. 1 Households Living in Improved or Unimproved Houses .....	43
4. 4. 2 Heads of Households by Marital Status and Occupation .....	46
4. 4. 3 Heads of Household by Type of Toilet Facility .....	48
4. 4. 4 Heads of Households by Source of Drinking Water .....	50
4. 4. 5 Household Heads with Children Under 18 Years .....	52
CHAPTER 5 .....	56
<b>MARITAL STATUS .....</b>	<b>56</b>
5. 1 INTRODUCTION.....	56
5. 2 MARITAL STATUS.....	57
5. 2. 1 Marital Status for Selected Age Groups .....	60
5. 3 MEAN AGE AT FIRST MARRIAGE .....	64
CHAPTER 6 .....	67
<b>NATIONAL IDENTIFICATION DOCUMENTS AND CITIZENSHIP .....</b>	<b>67</b>
6. 1 INTRODUCTION.....	67
6. 2 NATIONAL IDENTIFICATION DOCUMENTS.....	67
6. 2. 1 Birth Certificate.....	68
6. 2. 2 Birth Notification.....	68
6. 2. 3 Other National Identification Documents .....	72
6. 2. 3. 1 National Identification Cards.....	72
6. 2. 3. 2 Health Insurance.....	74
6. 3 CITIZENSHIP.....	74
CHAPTER 7 .....	77
<b>SURVIVAL OF PARENTS .....</b>	<b>77</b>
7. 1 INTRODUCTION.....	77
7. 2 SURVIVAL OF PARENTS .....	78
7. 2. 1 Survival of Parents by Council .....	80
7. 3 ORPHANHOOD .....	81
CHAPTER 8 .....	84
<b>EDUCATION, LITERACY AND NUMERACY.....</b>	<b>84</b>
8. 1 INTRODUCTION.....	84
8. 2 LITERACY .....	84
8. 2. 1 Literacy for Selected Age Groups .....	87
8. 2. 2 Adult Literacy.....	88
8. 2. 3 Adult Literacy in Different Languages .....	91
8. 3 NUMERACY .....	94
8. 3. 1 Adult Numeracy Rates .....	97
8. 4 EDUCATION .....	98
8. 4. 1 School Attendance Status.....	98
8. 4. 2 Net and Gross School Enrolment .....	112
8. 4. 3 Gross Enrolment Rate .....	114
8. 4. 4 Education Attainment .....	115
CHAPTER 9 .....	117
<b>EMPLOYMENT AND ECONOMIC ACTIVITIES.....</b>	<b>117</b>

9.1 INTRODUCTION.....	117
9.2 CURRENT ECONOMIC ACTIVITY STATUS .....	118
9.3 CURRENT UNEMPLOYMENT .....	120
9.4 LABOUR FORCE PARTICIPATION RATE .....	121
9.5 EMPLOYMENT BY INDUSTRY.....	122

<b>CHAPTER 13 .....</b>	<b>179</b>

ACCESS AND USE OF INFORMATION AND COMMUNICATION TECHNOLOGY BY INDIVIDUALS AND HOUSEHOLDS. .... 179

13.1 INTRODUCTION..... 180

13.2 HOUSEHOLDS WITH RADIO ..... 181

13.3 OWNERSHIP OF TELEVISION..... 181

13.4 HOUSEHOLDS WITH LANDLINE TELEPHONE..... 181

13.5 HOUSEHOLDS WITH INTERNET FACILITY..... 181

13.6 MOBILE PHONES..... 183

    13.6.1 Ownership of Mobile Phones by Individuals ..... 183

    13.6.2 Ownership of Mobile Phones by Households ..... 189

    13.6.3 Ownership of Mobile Phones by Age Groups and Sex ..... 189

    13.6.4 Ownership of Mobile Phones by Level of Education ..... 192

    13.6.5 Usage of Mobile Phones by Individuals ..... 194

    13.6.6 Usage of Mobile Phones by Type, Age Group and Sex ..... 195

    13.6.7 Type of Use of ICT Equipment ..... 197

    13.6.8 Usage of Non-Smartphones ..... 198

    13.6.9 Usage of Mobile Phone by Employment Status and Sex ..... 200

    13.6.10 Usage of Mobile Phones by Occupation ..... 202

13.7 COMPUTERS ..... 205

    13.7.1 Ownership of Computers by Individuals ..... 205

    13.7.2 Usage of Computers by Individuals ..... 205

    13.7.3 Usage of Computers by Age Group and Sex ..... 206

    13.7.4 Usage of Computers by Highest Level of Education attained and Sex ..... 208

    13.7.5 Usage of Computers by Employment Status and Sex ..... 210

CHAPTER 14 ..... 216

INFORMATION ON BUILDINGS..... 216

14.1 INTRODUCTION..... 216

14.2 NUMBER OF BUILDINGS ..... 217

    14.2.1 Buildings with Physical Addresses ..... 219

    14.2.2 Type of Buildings..... 221

    14.2.3 Main Uses of Buildings..... 222

    14.2.4 Number of Units in Building..... 225

14.3 BUILDING ATTRIBUTES..... 228

    14.3.1 Building Categories ..... 228

    14.3.2 Construction Status of Buildings ..... 229

    14.3.3 Building Occupancy Status..... 231

    14.3.4 Building Construction Materials ..... 233

    14.3.5 Number of Bedrooms ..... 239

14.4 BASIC SERVICES IN BUILDINGS ..... 240

    14.4.1 Electricity..... 240

    14.4.2 Water According to the 2022 TBC, water service in a building means the presence of water inside the building and/or on the premises of the relevant building. The results reveal that 20.7 percent of all buildings in Tabora Region have water service. Proportion of buildings with water services is higher in urban (48.3%) than in rural areas (15.6%). Across councils, Tabora Municipal has the highest percentage (44.9%) of buildings with water service while, Uyui District Council has the lowest percentage (12.9%) (Figure 14.9 and Table 14.1).  
..... 242

    14.4.3 Toilets..... 242

14.5 ACCESSIBILITY OF THE BUILDING ..... 244

FIGURE 14. 9: PERCENTAGE DISTRIBUTION OF BUILDINGS WITH WATER SERVICES BY PLACE OF RESIDENCE AND COUNCIL; TABORA, 2022 TBC..... 242

14.5.1 Access Roads .....	244
14.5.1 Infrastructure for Persons with Disabilities .....	245
14.6 TENURE STATUS OF BUILDINGS .....	246
14.6.1 Building Ownership Status .....	246
14.6.2 Building Ownership by Sex .....	248
14.6.3 Building Occupancy Tenure Status .....	250
14.6.4 Building Land Survey Status .....	252
14.6.5 Building Land Ownership Documents .....	228
<b>CHAPTER 15 .....</b>	<b>229</b>
<b>SUMMARY OF KEY FINDINGS, IMPLICATION AND RECOMMENDATIONS .....</b>	<b>229</b>
15.1 INTRODUCTION .....	229
15.2 KEY FINDINGS .....	229
15.2.1 Population Size and Growth .....	229
15.2.2 Age Profile .....	230
15.2.3 Marital Status and Early Marriage .....	231
15.2.4 Possession of National Identification Documents .....	232
15.2.5 Orphanhood .....	233
15.2.6 Literacy and Education .....	234

Table 2.1: Number and Percentage Distribution of Population by Sex and Council; Tanga Region, 2022 PHC.....	12
Table 2.2: Number and Percentage Distribution of Population by Place of Residence, Sex and Council; Tanga Region, 2022 PHC.....	15
Table 2.3: Population Size and Growth Indicators by Sex; Tanga Region, 2002, 2012 and 2022 PHCs.....	16
Figure 2.3: Average Annual Inter-Censal Population Growth Rates; Tanga Region, 1967 - 2022 Censuses.....	17
Table 3.1: Number and Percentage Distribution of Population by Sex and Five-Year Age Groups; Tanga Region, 2022 PHC.....	20
Table 3.2: Number and Percentage Distribution of Population by Sex and Five-Year Age Groups; Tanga Rural, 2022 PHC.....	21
Table 3.3: Number and Percentage Distribution of Population by Sex and Five-Year Age Groups; Tanga Urban, 2022 PHC.....	21
Table 3.4: Number and Percentage Distribution of Population by Place of Residence, Selected Age Groups and Sex; Tanga Region, 2022 PHC.....	25
Table 4.1: Number and Percentage of Private Households by Place of Residence, Sex of Head of Household and Age Group; Tanga Region, 2022 PHC.....	36
Table 4.2: Number and Percentage of Households by Place of Residence and Council; Tanga Region, 2022 PHC.....	37
Table 4.3: Population in Private Households, Number of Households and Average Household Size by Place of Residence and Council; Tanga Region, 2012 and 2022 PHCs.....	40
Table 4.4: Percentage Distribution of Male-Headed and Female-Headed Households by Place of Residence and Council; Tanga Region, 2012 and 2022 PHCs.....	41
Table 4.5: Distribution of Population in Private Households by Sex of Head of Household, Number of Households, Average Household Size, Place of Residence and Council; Tanga Region, 2022 PHC.....	43
Table 4.6: Percentage Distribution of Households living in Improved/ Un improved Houses by Sex of Household Head, Place of Residence and Council; Tanga Region, 2022 PHC.....	44
Table 4.7: Percentage Distribution of Households living in Improved/Unimproved Houses by Sex and Age of Household Head; Tanga Region, 2022 PHC.....	44
Table 4.8: Number of Male Heads of Households by Marital Status and Occupation; Tanga Region, 2022 PHC.....	46
Table 4.9: Percentage Distribution of Male Headed of Households by Marital Status and Occupation; Tanga Region, 2022 PHC.....	46
Table 4.10: Female heads of Households by Marital Status and Occupation Tanga Region, 2022 PHC.....	47
Table 4.11: Percentage Distribution of Female heads of Households by Marital Status and Occupation Tanga Region, 2022 PHC.....	47

Table 4.12: Percentage Distribution of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head, Place of Residence and Council, Tanga Region, 2022 PHC.....	49
Table 4.13: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head, Place of Residence and Council; Tanga Region, 2022 PHC.....	52
Table 4.14: Percentage Distribution of Households with Children under 18 Years by Sex of Household Head, Place of Residence and Council; Tanga Region, 2022 PHC.....	55
Table 5.1: Percentage Distribution of the Population Aged 15 Years and Above by Place of Residence, Sex and Marital Status; Tanga Region, 2022 PHC.....	57
Table 5.2: Percentage Distribution of the Population Aged 15 Years and Above by Marital Status and Five-Year Age Groups; Tanga Region, 2022 PHC.....	58
Table 5.3: Percentage Distribution of Male Population Aged 10 Years and Above by Marital Status and Five-Year Age Groups; Tanga Region, 2022 PHC.....	59
Table 5.4: Percentage Distribution of Female Population Aged 10 Years and Above by Marital Status and Five-Year Age Groups; Tanga Region, 2022 PHC.....	60
Table 5.5: Percentage Distribution of the Population Aged 10 Years and Above by Marital Status and Selected Age Groups; Tanga Region, 2022 PHC.....	61
Table 5.6: Percentage Distribution of Male Population Aged 15 Years and Above by Marital Status and Five-Year Age Groups; Tanga Region, 2022 PHC.....	61
Table 5.7: Percentage Distribution of Female Population Aged 15 Years and Above by Marital Status and Five-Year Age Groups; Tanga Region, 2022 PHC.....	62
Table 5.8: Percentage Distribution of Population Aged 15 Years and Above by Marital Status, Place of Residence and Council; Tanga Region, 2022 PHC.....	63
Table 5.9: Mean Age at First Marriage by Sex, Place of Residence and Council; Tanga Region, 2012 and 2022 PHCs.....	65
Table 6. 1: Percentage Distribution of Population by Birth Certificate Status, Sex and Age Groups; Tanga Region, 2022 PHC.....	69
Table 6. 2: Percentage Distribution of Population by Status of Birth Certificate, Sex and Age Groups; Tanga Rural, 2022 PHC.....	70
Table 6. 3: Percentage Distribution of Population by Status of Birth Certificate, Sex and Age Groups; Tanga Urban, 2022 PHC.....	71
Table 6. 4: Percentage Distribution of Population by Status of Birth Certificate, Sex and Council; Tanga Region, 2022 PHC.....	71
Table 6. 5: Distribution of Population Aged 18 Years and Above Possessing National Identification Documents by Place of Residence and Council; Tanga Region, 2022 PHC.....	73
Table 6. 6: Distribution of Population Possessing Health Insurance Cards by Sex, Place of Residence and Council; Tanga Region, 2022 PHC.....	74
Table 6. 7: Distribution of Population by Place of Residence, Sex and Country of Citizenship; Tanga Region, 2022 PHC.....	76

Table 7. 1: Number and Percentage of Children Under 18 Years by Survival of Parents and Age; Tanga Region, 2022 PHC.....	78
Table 7. 2: Number and Percentage Distribution of Male Children Under 18 Years by Survival of Parents and Age; Tanga Region, 2022 PHC.....	79
Table 7. 3: Number and Percentage of Female Children Under 18 Years by Survival of Parents and Age; Tanga Region, 2022 PHC.....	80
Table 7. 4: Percentage Distribution of Children Under 18 Years by Survival of Parents, Place of Residence and Council; Tanga Region, 2022 PHC.....	81
Table 7. 5: Percentage Distribution of Population Under 18 Years by Orphanhood, Place of Residence and Council; Tanga Region, 2022 PHC.....	82
Table 8. 1: Percentage Distribution of Population Aged Five Years and Above by Literacy Rate, Sex and Five Year Age Groups; Tanga Region, 2022 PHC.....	85
Table 8. 2: Percentage Distribution of Population Aged Five Years and Above by Literacy Rate, Sex and Five Year Age Groups; Tanga Rural, 2022 PHC.....	86
Table 8. 3: Percentage Population Aged Five Years and Above by Literacy Rate, Sex and Five Year Age Groups; Tanga Urban, 2022 PHC.....	86
Table 8. 4: Literacy Rates by Place of Residence, Sex and Selected Age Groups; Tanga Region, 2022 PHC.....	88
Table 8. 5: Literacy Rates for Persons Aged 15 Years and Above by Sex, Place of Residence and Council; Tanga Region, 2012 and 2022 PHCs.....	91
Table 8. 6: Percentage Distribution of Adult Population Aged 15 Years and Above by Literacy Status and Five Year Age Groups; Tanga Region, 2022 PHC.....	91
Table 8. 7: Literacy Rates for Adult Population Aged 15 Years and Above by Literacy Status, Place of Residence and Sex; Tanga Region, 2022 PHC... <b>Error! Bookmark not defined.</b>	
Table 8. 8: Literacy Rates for Adult Population Aged 15 Years and Above by Place of Residence and Council; Tanga Region, 2022 PHC.....	94
Table 8. 9: Percentage Distribution of Population Aged Five Years and Above by Numeracy Rate, Sex and Five Year Age Groups; Tanga Region, 2022 PHC.....	95
Table 8. 10: Numeracy Rates for Selected Age Groups by Place of Residence and Sex; Tanga Region, 2022 PHC.....	96
Table 8. 11: Numeracy Rates for Adult Population Aged 15 Years and Above by Sex, Place of Residence and Council; Tanga Region, 2022 PHC.....	97
Table 8. 12: Percentage Distribution of Population Aged Four Years and Above by Sex, School Attendance Status and Age; Tanga Region, 2022 PHC.....	100
Table 8. 13: Percentage Distribution of Population Aged Four Years and Above by Sex, School Attendance Status and Age; Tanga Rural, 2022 PHC.....	103
Table 8. 14: Percentage Distribution of Population Aged Four Years and Above by Sex, School Attendance Status and Age; Tanga Urban, 2022 PHC.....	104
Table 8. 15: Percentage Distribution of Population Aged Four Years and Above by Sex, School Attendance Status and Council; Tanga Region, 2022 PHC.....	107
Table 8. 16: Percentage Distribution of Population Aged Four Years and Above by Sex, School Attendance Status and Council; Tanga Rural, 2022 PHC.....	108

Table 8. 17: Percentage Distribution of Population Aged Four Years and Above by Sex, School Attendance Status and Council; Tanga Urban, 2022 PHC.....	109
Table 8. 18: Percentage Distribution of Population Aged Four Years and Above by School Attendance Status and Level of Education; Tanga Region, 2022 PHC.....	110
Table 8. 19: Percentage Distribution of Population Aged Four Years and Above by School Attendance Status and Level of Education; Tanga Rural, 2022 PHC.....	110
Table 8. 20: Percentage Distribution of Population Aged Four Years and Above by School Attendance Status and Level of Education; Tanga Urban, 2022 PHC.....	111
Table 8. 21: Net Enrolment Rates in Primary Schools by Place of Residence, Sex and Council; Tanga Region, 2022 PHC.....	112
Table 8. 22: Number and Percentage of Population Aged Four Years and Above by Sex, Level of Educational Attainment and Place of Residence; Tanga Region, 2022 PHC.....	116
Table 9. 1: Number of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment), Sex and Residence; Tanga Region, 2022 PHC....	118
Table 9. 2: Number of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment), Council and Place of Residence Tanga Region, 2022 PHC.....	119
Table 9. 3: Number of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment) and Selected Age Groups; Tanga Region, 2022 PHC	120
Table 9. 4: Percentage Distribution of Employed Population Aged 15 Years and Above by Place of Residence, Sex and Industry of Employment; Tanga Region 2022 PHC.....	123
Table 9. 5: Percentage Distribution of Employed Population Aged 15 Years and Above by Sex and Occupation; Tanga Region, 2022 PHC.....	124
Table 9. 6: Percentage Distribution of Employed Persons Aged 15 Years and Above by Place of Residence, Sex and Sector; Tanga Region, 2022 PHC.....	125
Table 9. 7: Percentage Distribution of Population Aged 15 Years and Above Engaged in Informal Non-Agricultural Economic Activities by Place of Residence, Sex and Selected Age Groups; Tanga Region, 2022 PHC.....	126
Table 10. 1: Disability Prevalence Among Persons Aged 7 Years and Above by Type of Disability, Place of Residence and Council; Tanga Region, 2022 PHC.....	131
Table 10. 2: Disability Prevalence by Sex, Place of Residence and Council; Tanga Region, 2022 PHC.....	132
Table 10. 3: Number and Percentage of Persons with Albinism by Sex, Place of Residence and Council; Tanga Region, 2022 PHC.....	134
Table 10. 4: Number and Percentage of Persons with Albinism by Sex and Five-Year Age Groups; Tanga Region, 2022 PHC.....	134
Table 10. 5: Percentage Distribution of Persons with Other Types of Disability by Place of Residence and Sex; Tanga Region, 2022 PHC.....	135
Table 10. 6: Percentage Distribution of Persons with Disability by Cause of Disability, Place of Residence and Sex; Tanga Region, 2022 PHC.....	136

Table 10. 7: Percentage Distribution of Persons with Disability by Sex, Cause of Disability and Type of Disability; Tanga Region, 2022 PHC.....	137
Table 10. 8: Percentage of Persons with Disability Using Assistive Devices by Sex and Type of Disability; Tanga Region, 2022 PHC.....	138
Table 11. 1:..... Percentage Distribution of Persons Aged 15 Years and Above Owning Land by Place of Residence and Sex; Tanga Region, 2022 PHC.....	140
Table 11. 2: Percentage Distribution of Persons Aged 15 Years and Above by Land Ownership Status, Place of Residence and Sex; Tanga Region, 2022 PHC. ....	141
Table 11. 3: ..... Percentage Distribution of Persons Aged 15 Years and Above by Place of Residence, Age Groups, Land Ownership Status and Sex; Tanga Region, 2022 PHC. ....	143
Table 11. 4: Percentage Distribution of Persons Aged 15 Years and Above by Sex, Place of Residence and Legal Documents Status; Tanga Region, 2022 PHC. ....	144
Table 12. 1: Percentage Distribution of Households by Ownership Status of the Main Dwelling, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	147
Table 12. 2: Percentage Distribution of Households Living in Own Houses by Type of Legal Rights, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	149
Table 12. 3: Percentage Distribution of Households by Type of Roofing Material of Main Dwelling, Place of Residence and Council; Tanga Region, 2022 PHC.....	152
Table 12. 4: Percentage Distribution of Households by Type of Floor Covering Material of Main Dwelling, Place of Residence and Council; Tanga, 2022 PHC.....	155
Table 12. 5: Percentage Distribution of Households by Type of Wall Materials of Main Dwelling, Place of Residence and Council; Tanga Region, 2022 PHC.....	157
Table 12. 6: Percentage Distribution of Households by Number of Rooms for Sleeping, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	159
Table 12. 7: Percentage Distribution of Households by Main Source of Drinking Water, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	161
Table 12. 8: Percentage Distribution of Households by Main Type of Toilet Facility, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	164
Table 12. 9: Percentage Distribution of Households by Main Type of Toilet Facility, Place of Residence and Council; Tanga Region, 2012 and 2022 PHCs... <b>Error! Bookmark not defined.</b>	
Table 12. 10: Percentage Distribution of Households by Main Source of Energy for Cooking, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	166
Table 12. 11: Percentage Distribution of Households by Main Source of Energy for Lighting, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	170
Table 12.12: Percentage Distribution of Households by Main Means of Solid Waste Disposal, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	172
Table 12. 13: Percentage Distribution of Households by Type of Authorities Collecting Waste, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	173
Table 12.14: Percentage Distribution of Households by Methods of Disposing Electronic Waste by Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	175
Table 12. 15: Percentage Distribution of Households Owning Transport Assets by Type, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	176

Table 12. 16: Percentage Distribution of Households Owning Housing and Cooking Assets by Type, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	177
Table 12. 17: Percentage Distribution of Households Owning Agricultural Assets by Type, Place of Residence, Headship and Council; Tanga Region, 2022 PHC.....	178
Table 13. 1: Number and Percentage Distribution of Households Owning Selected ICT Equipment and Selected Household Attributes by Place of Residence and Council; Tanga Region, 2022 PHC.....	182
Table 13. 2: Number and Percentage Distribution of Population aged 15 years and above Owning Mobile Phones by Type, Sex, Place of Residence and Council; Tanga Region, 2022 PHC .....	184
Table 13. 3: Number and Percentage Distribution of Households with at Least One Member Aged Four Years and Above Owning Mobile Phone by Type, Place of Residence and Council; Tanga Region, 2022 PHC.....	189
Table 13. 4: Number and Percentage Distribution of Population Aged Four Years and Above Owning Mobile Phone by Type, Place of Residence, Sex and Age Group; Tanga Region, 2022 PHC .....	191
Table 13. 5: Number and Percentage Distribution of Population Aged 15 Years and Above Owning Non-smartphone by Place of Residence, Sex and Education Level Attained, Tanga Region; 2022 PHC.....	192
Table 13. 6: Number and Percentage Distribution of Population Aged 15 Years and Above Owning Smartphone by Place of Residence, Sex and Education Level Attained, Tanga Region; 2022 PHC.....	193
Table 13. 7: Number and Percentage Distribution of Population Aged 15 Years and Above Using Mobile phone by Type, Sex, Place of Residence and Council, Tanga Region; 2022 PHC	194
Table 13. 8: Percentage Distribution of Population Aged 4 Years and Above Using Mobile Phone by Type, Place of Residence, Sex and Age Group; Tanga Region, 2022 PHC. ....	196
Table 13. 9: Percentage Distribution of Persons Aged 15 Years and Above Using ICT Equipment by Type of Use, Sex, Place of Residence and Council; Tanga Region, 2022 PHC .	198
<b>Table 13. 10: Number and Percentage Distribution of Population Aged 15 Years and Above Using Non-smartphones by Place of Residence, Sex and Education Level; Tanga Region, 2022 PHC ..</b>	<b>199</b>
Table 13. 11: Number and Percentage Distribution of Population Aged 15 Years and Above Using Smartphone by Place of Residence Sex and Education Level; Tanga Region, 2022 PHC	200
Table 13. 12: Number and Percentage Distribution of Population Aged 15 Years and Above Using Non-smartphone by Place of Residence, Sex and Employment Status; Tanga Region, 2022 PHC.....	201
Table 13. 13: Number and Percentage Distribution of Population Aged 15 Years and Above Using Smartphones by Place of Residence, Sex and Employment Status; Tanga Region, 2022 PHC .....	202
Table 13. 14: Number and Percentage Distribution of Population Aged 15 Years and Above Using Non-Smartphone by Place of Residence, Sex and Occupation; Tanga Region, 2022 PHC	203
Table 13. 15: Number and Percentage Distribution of Population Aged 15 Years and Above Using Smart Phones by Place of Residence, Sex and Occupation; Tanga Region, 2022 PHC..	204

Table 13. 16: Percentage Distribution of Persons Aged 15 and Above Owning Computers by Type, Sex, Place of Residence and Council; Tanga Region, 2022 PHC.....	205
Table 13. 17: Number and Percentage Distribution of Persons Aged 15 and Above Using Computers by Type, Sex, Place of Residence and Council; Tanga Region, 2022 PHC.....	206
Table 13. 18: Number of Persons Aged 4 Years and Above, Using Computers by type, Sex and Age Group; Tanga Region, 2022 PHC.....	207
Table 13. 19: Number and Percentage Distribution of Persons Aged 15 Years and Above Who Used Desktop Computers in the Last Three Months Prior to the Census Date by Place of Residence, Sex and Education Level; Tanga Region, 2022 PHC.....	208
Table 13. 20: Number and Percentage Distribution of Persons Aged 15 Years and Above Who Used Laptop Computers in the Last Three Months Prior to the Census Date by Place of Residence, Sex and Education Level; Tanga Region, 2022 PHC.....	209
Table 13. 21: Number and Percentage Distribution of Persons Aged 15 Years and Above Who Used Desktop Computers in the Last Three Months Prior to the Census Date by Place of Residence, Sex and Employment Status; Tanga Region, 2022 PHC.....	210
Table 13. 22: Number and Percentage Distribution of Persons Aged 15 Years and Above Who Used Laptop Computers in the Last Three Months Prior to the Census Date by Sex and Employment Status; Tanga Region, 2022 PHC.....	212
Table 13. 23: Number and Percentage Distribution of Persons Aged 15 Years and Above Who Used Desktop Computers in the Last Three Months Prior to the Census Date by Place of Residence, Sex and Occupation Status; Tanga Region, 2022 PHC.....	214
Table 13. 24: Number and Percentage Distribution of Persons Aged 15 Years and Above Who Used Laptop Computers in the Last Three Months Prior to the Census Date by Place of Residence, Sex and Occupation Status; Tanga Region, 2022 PHC.....	215
Table 14. 1: Number of Buildings by Place of Residence, Type, Place of Residence and Council; Tanga Region, 2022 TBC.....	218
Table 14. 2: Number of Buildings by Place of Residence, Physical Address and Council; Tanga Region, 2022 TBC.....	220
Table 14. 3: Distribution of Buildings by Main Use, Council and Place of Residence; Tanga Region, 2022 TBC.....	222
Table 14. 4: Distribution of Non-Residential Buildings by Type of Use, Place of Residence and Council; Tanga Region, 2022 TBC.....	224
Table 14. 5: Distribution of Buildings by Number of Units, Place of Residence and Council; Tanga Region, 2022 TBC.....	226
Table 14. 6: Percentage Distribution of Buildings by Building Category, Place of Residence and Council; Tanga Region, 2022 TBC.....	228
Table 14. 7: Percentage Distribution of Buildings by Construction Status, Place of Residence and Council; Tanga Region, 2022 TBC.....	230
Table 14. 8: Percentage Distribution of Buildings by Occupancy Status, Place of Residence and Council; Tanga Region, 2022 TBC.....	232
Table 14. 9: Percentage of Buildings by Types of Flooring Materials, by Place of residence and Council; Tanzania, 2022 TBC.....	233

Table 14. 10: Percentages Distribution of Buildings by Types of Wall Materials, by Place of Residence and Council; Tanga Region, 2022 TBC.....	235
Table 14. 11: Percentage Distribution of Buildings by Type of Roofing Materials, Place of Residence and Council; Tanga Region, 2022 TBC.....	238
Table 14. 12: Percentages of Buildings by Number of Bedrooms, by Place of Residence and Council; Tanga Region, 2022 TBC.....	239
Table 14. 13: Distribution of Buildings by Type of Basic Services, Place of Residence and Council; Tanga Region, 2022 TBC.....	<b>Error! Bookmark not defined.</b>
Table 14. 15: Percentage Distribution of Building Ownership Status by Place of Residence, Sex and Council; Tanga Region, 2022 TBC.....	248
Table 14. 16: Percentage Distribution of Building by Occupancy Tenure Status, Place of Residence and Council; Tanga Region, 2022 TBC.....	251
Table 14. 17: Percentage Distribution of Building Plots by Place of Residence, Land Survey Status and Council; Tanga Region, 2022 TBC.....	227
Table 14. 18: Number of Buildings and Land Ownership Status by Council; Tanga Region, 2022 TBC.....	228

## List of Figures

Figure 2.1: Percentage Distribution of Population by Council; Tanga Region, 2022 PHC...	13
Figure 2.2: Percentage Distribution of Population by Council and Place of Residence; Tanga Region, 2022 PHC.....	14
Figure 3.1: Population Distribution by Age in Single Years and Sex - Tanga Region, 2022 PHC.....	19
Figure 3.2: Population Pyramid for Five Year Age Groups; Tanga Region, 2022 PHC.....	23
Figure 3.3: Population Pyramid for Five Year Age Groups; Tanga Rural, 2022 PHC.....	24
Figure 3.4: Population Pyramid for Five Year Age Groups; Tanga Urban, 2022 PHC.....	24
Figure 3.5: Population Pyramid for Five Year Age Groups; Tanga City Council, 2022 PHC..	25
Figure 3.6: Percentage of Children Under Five Years by Place of Residence; Tanga Region, 2002, 2012 and 2022 PHCs.....	27
Figure 3.7: Percentage of Young Population (0–14 Years); Tanga, 2002, 2012 and 2022 PHCs	28
Figure 3.8: Percentage of Young Population Aged 0–17 Years; Tanga, 2002, 2012 and 2022 PHCs.....	28
Figure 3.9: Percentage of Youth Population (15–24 Years); Tanga Region, 2002, 2012 and 2022 PHCs.....	29
Figure 3.10: Percentage of the Youth Population (15–35 Years); Tanga Region, 2002, 2012 and 2022 PHCs.....	30
Figure 3.11: Percentage of the Working Age Population (15–64 Years); Tanga Region, 1988, 2002, 2012 and 2022 PHCs.....	30
Figure 3.12: Percentage of the Population Aged 60 Years or Above; Tanga Region, 1988, 2002, 2012 and 2022 PHCs.....	32
Figure 3.13: Percentage of the Population Aged 65 Years or Above; Tanga Region, 2002, 2012 and 2022 PHCs.....	33
Figure 3.14: Age Dependency Ratio by Residence; Tanga Region, 1988, 2002, 2012 and 2022 PHCs.....	34
Figure 4.1: Percentage Distribution of Private Households by Place of Residence; Tanga Region, 2012 and 2022 PHCs.....	<b>Error! Bookmark not defined.</b>
Figure 4.2: Average Household Size by Council; Tanga Region, 2022 Census.....	39
Figure 4.3: Percentage Distribution of Households by Sex of Head and Place of Residence; Tanga Region, 2022 PHC.....	41
Figure 4.4: Percentage Distribution of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head; Tanga Region 2022 PHC.....	48
Figure 4.5: Percentage of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head and Place of Residence; Tanga Region; 2022 PHC.....	49
Figure 4.6: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head and Place of Residence; Tanga Region, 2022 PHC.	51
Figure 4.7: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head; Tanga Region, 2022 PHC.....	51

Figure 4.8. Percentage Distribution of Households with Children under 18 Years by Sex of Household Head; Tanga Region, 2022 PHC.....	53
Figure 4.9. Percentage Distribution of Households Having Children under 18 Years by Sex of Household Head, Number of Children and Place of Residence; Tanga Region, 2022 PHC.....	54
Figure 5.1: Percentage Distribution of Population Aged 15 Years and Above by Sex and Marital Status; Tanga Region, 2022 PHC.....	58
Figure 5.2: Percentage Distribution of Population Aged 15 Years and Above by Marital Status; Tanga Region, 2012 and 2022 PHCs.....	63
Figure 5.3: Mean Age at First Marriage by Sex; Tanga Region, 2012 and 2022 PHC.....	64
Figure 5.4: Mean Age at First Marriage by Residence and Sex; Tanga Region, 2012 and 2022 PHC.....	65
Figure 5.5: Mean Age at First Marriage by Council; Tanga Region, 2022 PHC.....	66
Figure 6. 1: Percentage Distribution of Population by Birth Certificate Status and Place of Residence; Tanga Region, 2022 PHC.....	69
Figure 6. 2: Percentage Distribution of Population Possessing Other National Identification Documents by Place of Residence and Type; Tanga Region, 2022 PHC.....	73
Figure 7. 1: Orphanhood Status in Tanga Region, 2022 PHC.....	82
Figure 8. 1: Literacy Rates for Persons Aged Five Years and Above by Sex and Place of Residence; Tanga Region, 2022 PHC.....	87
Figure 8. 2: Adult Literacy Rates by Sex and Place of Residence; Tanga Region, 2022 PHC	89
Figure 8. 3: Adult Literacy Rates by Sex; Tanga Region, 2012 and 2022 PHCs.....	89
Figure 8. 4: Percentage Distribution of Adult Population Aged 15 Years and Above by Literacy Rate; Tanga Region, 2022 PHC.....	92
Figure 8. 5: Literacy Rates for Adult Population Aged 15 Years and Above; Tanga Rural, 2022 PHC.....	93
Figure 8. 6: Literacy Rates for Adult Population Aged 15 Years and Above; Tanga Urban, 2022 PHC.....	93
Figure 8. 7: Numeracy Rates for Persons Aged Five Years and Above by Sex, and Place of Residence; Tanga Region, 2022 PHC.....	95

## Abbreviation/Acronym

---

CAPI	Computer Assisted Personal Interviews
CBO	Community Based Organisation
CCRO	Certificate of Customary Right of Occupancy
CEB	Children Ever Born
CHIF	Community Health Insurance Fund
CRO	Certificate of Right of Occupancy
DHS	Demographic Health Surveys
EA	Enumeration Area
FCDO	Foreign, Commonwealth and Development Office
GER	Gross Enrolment Rate
GIS	Geographical Information System
GPS	Global Positioning System
ICT	Information and Communication Technology
ID	Identification Card
IOM	International Organization for Migration
ISIC	International Standard Industrial Classification of All Economic Activities
LFPR	Labour Force Participation Rate
MAFM	Mean Age at First Marriage
MDAs	Ministry, Departments and Agencies
NA	Not Applicable
NHC	National Housing Corporation
NBS	National Bureau of Statistics
NER	Net Enrolment Rate
NGOs	Non-Governmental Organizations
NHIF	National Health Insurance Fund
NIDA	National Identification Authority
OCGS	Office of Chief Government Statistician
PHC	Population and Housing Census
PWDs	Persons with Disabilities
SG	Statistician General
SMAM	Singulate Mean Age at First Marriage
TASCO	Tanzania Standard Classification of Occupations

TBA	Tanzania Building Agency
TBC	Tanzania Building Census
TFR	Total Fertility Rate
TOT	Training of Trainers
UN	United Nations
UNFPA	United Nations Population Fund
UNICEF	United Nations Children's Fund
URT	United Republic of Tanzania
USAID	United States Agency for International Development
USCB	United State Census Bureau
VIP	Ventilated Improved Pit latrine
WB	World Bank
WHC	Watumishi Housing Company
ZAN ID	Zanzibar Identification Card
ZBA	Zanzibar Building Agency
	Zanzibar Housing Corporation
ZHC	

## Concepts and Definitions

---

### Population and Housing Census

**Census Night** is a reference point for Census enumeration and all questions in the census relate to that night. According to the Tanzania 2022 Population and Housing Census, the Census night was the night of 22nd /23rd August, 2022.

**De facto Methodology** means persons were enumerated where they slept on the Census night.

**Enumeration Area (EA)** is a designated area with an average of 60 to 100 households.

**Geographical Information System (GIS)** is a system designed to capture, store, manipulate, analyse, manage and present all types of geographical data.

**Population and Housing Census (PHC)** is defined as the total process of collecting, compiling, evaluating, analysing and publishing or otherwise disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country or in a well delineated part of a country (United Nations definition).

**Quality Control** refers to observations, techniques and activities used to fulfil requirements for quality.

### **Population Size, Growth and Distribution**

**Population growth** refers to the change in population over time, and can be quantified as the change in the number of individuals in a population using "per unit time" for measurement.

**Population Growth Rate** refers to the change in population over a unit time period, often expressed as a percentage of the number of individuals in the population at the beginning of that period. Growth rate in this book is expressed as an exponential rate of growth of population from year 2012 to 2022 and is termed as average annual intercensal population growth rate.

### **Age and Sex Profile**

**Age** is the number of years one had lived as at last birthday i.e., in reference to the census night.

**Age-Dependency Ratio** is the ratio of people in the "dependent" ages (those under age 15 and age 65 and older) to those in the "working age population" (15-64 years).

**Elderly Population** refers to persons aged 65 years and above (according to international definition). However, according to Tanzania National Ageing Policy, an elderly is individual who is 60 years and above.

**Median Age** is the age at which exactly half the population is older and half is younger.

**Population Pyramid** is a graphical presentation of population's age and sex composition. Horizontal bars present the numbers or proportions of males and females in each age group.

**Sex Ratio** is the ratio of males to females in a given population usually expressed as the number of males for every 100 females.

**Working Age Population** in Census is the population age 15 to 64 years (international definition).

**Young People** comprise the population age 0 to 14 years.

**Youth Population** comprise the population aged 15-24 years (international definition). However, according to Tanzania's Youth Policy. Youth Population refers to the population aged 15 to 35 years.

## **Household Composition**

**Average Household Size** is the average number of persons per private household. Average household size is obtained by dividing the total number of persons living in private households by the total number of private households.

**A Collective Household** is one in which a group of persons reside in one dwelling or compound and have no head of household. Boarding schools, hospitals and camps are examples of collective households.

**Head of Household** is a person who is acknowledged as such by other household members.

**Household** refers to a person or group of persons who reside in the same homestead or compound but not necessarily in the same dwelling unit, have same cooking arrangement, and are answerable to the same household head except for collective household.

**Private Household** is defined as a person or group of persons who reside in the same homestead or compound but not necessarily in the same dwelling unit, having the same cooking arrangement, and are answerable to the same household head.

## **Marital Status**

**Divorced Persons** are those persons who were once married but their marriages were permanently terminated and have not remarried since then. Note that in polygamous marriages the divorce of one or more wives does not categorize the husband as divorced if he still lives with the other wife (wives).

**Living Together** is an act of persons who are not formally married but are in a consensual union or are living in a socially recognized stable union.

**Marriage** is an act of persons who are living together or separately but are formally married irrespective of the type of marriage, which may be customary, civil or religious marriage.

**Mean Age at First Marriage** is defined as the average length of single life expressed in years among those who marry before age 50.

**Never Married** means persons who have remained single all their lives and exclude persons who have lived with spouse and are now living alone.

**Separated** is the act of persons who were once married but now are living apart. Those who live apart because their spouses are employed far away from home or for similar reasons are considered to be married.

**Widowed** is the act of persons whose marriages were terminated by death and have not remarried since. Note that in polygamous marriages the death of one or more wives does not make the husband a widower if he still has other wife (wives).

## **National Identification Documents and Citizenship**

**Birth Certificate** is a vital record that documents the birth of a child. The term "birth certificate" can refer to either the original document certifying the circumstances of the birth or to a certified copy of or representation of the ensuing registration of that birth.

**Birth Registration** is the process by which a child's birth is recorded in the civil register by Government authority.

**National Identification** is any official document that may be used to prove a person's identity such as the bearer's full name, birth date, address, an identification number, card number, sex, citizenship and more.

### **Survival of Parents**

**Orphanhood** is the condition of being a child without living parents. In other words, the term 'orphan' is understood to mean a person whose parents are both dead. However, United Nations definition that was adopted by Tanzanian Government identifies an orphan as a child under 18 years of age who has lost one or both parents.

### **Literacy, Numeracy and Education**

**Educational Attainment** is the highest grade completed according to the country's educational system. A grade is a stage of instruction usually covered in the course of a school year.

**Gross Enrolment Rate (GER)** is defined as the number of children attending primary school regardless of age divided by the total number of children age 7-13 years.

**Literacy** is the ability to read and write with an understanding of a short simple sentence in everyday life.

**Literacy Rate** is the percentage of a population that can read and write in Kiswahili, English, both Kiswahili and English or in any other language(s)

**Net Enrolment Rate (NER)** is defined as the number of children age 7-13 years who are attending school divided by the total number of children in that age group.

**Numeracy** is the ability to access, use, interpret and communicate simple mathematical information and ideas, to engage in and manage basic mathematical demands for a range of situations in adult life.

**Numeracy Rate** is the percentage of a population with the ability to access, use, interpret and communicate simple mathematical information and ideas.

**School Attendance** refers to attendance at any regular authorized or licensed educational institution or programme for organized learning at any level of education at the time of the Census.

## **Employment and Economic Activities**

**Economic activity status** refers broadly to economically active population which includes those employed and unemployed. It also includes inactive population covering all persons who were without work during the reference period and were not available for work.

**Labour Force Participation Rate (LFPR)** is defined as the number of persons in the labour force as a percentage of the working age population.

**Informal Non-Agricultural Economic Activities** are activities that are unregulated and often without formal recorded business transactions, and are normally outside the framework of formal business regulations and system.

**Unemployed persons** comprise of those who in the last seven days prior to the census enumeration were not engaged in any economic activity but were available for work regardless of whether they took any effort to look for work. (According to the relaxed international definition of unemployment).

## **Disability**

Disability is defined as a loss or limitation of opportunities to take part in the normal life in the community on an equal level with others due to physical, mental or social factors. All the three (physical, mental and social factors) use the concept of activity limitation in defining disability rather than physical impairment.

## **Land Ownership**

**Certificate of Right of Occupancy** is a formalized land tenure system. It allows individuals or entities to acquire rights to use and occupy land for specific purposes, such as agriculture, residential, commercial or industrial.

**Customary land tenure** is the form of land ownership based on customary practices and traditional land rights.

**Land ownership** is a process of acquiring land or right of occupancy from a relevant Government authority. It is categorized into three main tenure systems namely Customary Land Tenure, Right of Occupancy and Government Land.

**Land Title Deed** is a legal document that states and proves a person's legal right to own a piece of land

### **Housing Characteristics, Assets Ownership and Environmental Control**

**Improved roofing materials** are durable roofing materials used for roofing which include iron sheets, tiles, concrete and asbestos. Unimproved roofing materials include grass or leaves, mud and leaves, plastics or box and tent.

**Improved floor covering materials** are long lasting flooring materials such as cement, ceramic tiles, parquet or polished wood, terrazzo, vinyl or asphalt strips. Non-improved materials include wood planks, palm or bamboo, earth or sand, dung, containers or tents.

**Room for sleeping** is defined as any space within a dwelling which is currently used for sleeping by household members. Any space within a dwelling can be termed as a room for sleeping if currently used by any household members for sleeping purposes and can be a sitting room, a dining room or even a store.

**Improved sources of drinking water** include sources that, by nature of their construction or through active intervention, are protected from outside contamination, particularly faecal matter. It comprises piped water, tube well or borehole, protected dug well, protected spring, rainwater, bottled water, carts with small tank/drum and tanker truck. Unimproved

sources of drinking water include unprotected dug well, unprotected spring and surface water.

**Improved sanitation facilities** are the facilities that ensure hygienic separation of human excreta from human contact. They include flush or pour flush toilet that flushes the water and waste to a piped sewer system, septic tank, pit latrine or unknown destination; ventilated improved pit (VIP) latrine, pit latrine with washable slab and pit latrine without slab. Unimproved facilities include pit latrine without slab (open pit) and bucket.

**Solid waste disposal** refers to the collection, sorting, transport and treatment of waste as well as its storage and tipping above or burying, as well as the transformation operations necessary for its re-use, recovery or recycling.

**Electronic waste (E-waste)** describes discarded electrical or electronic devices. It is also known as waste electrical and electronic equipment (WEEE) or end-of-life (EOL) electronics. It also refers to discarded, recycled or refurbished electrical and electronic products.

## **Access and Use of Information and Communication Technology by Individuals and Households**

**Radio** refers to a device capable of receiving broadcast signals using frequencies in the FM, AM, LW and SW bands. A radio can be a standalone unit or integrated into other devices, including alarm clocks, audio players, mobile telephones or computers.

**Television** refers to a device capable of receiving broadcast signals using standard access methods, including radio frequency (over-the-air), cable, and satellite. A television set is usually a standalone unit but may be integrated into other devices, such as computers or mobile telephones.

**The Internet** is a vast global network of interconnected computers and other electronic devices, allowing them to share information and communicate through a standardised set of protocols known as the Internet Protocol Suite (TCP/IP). It provides access to several

communication services, including the World Wide Web and carries e-mail, news, entertainment and data files, irrespective of the device used.

**Landline Telephone** is a communication device that transmits and receives sound, typically the human voice, through physical wire or fibre optic cable connections.

**A mobile (cellular) telephone** also known as a cell phone, is a portable device that allows for voice and data communication over a wireless cellular network. Mobile phones have become essential devices in daily life, profoundly impacting how we communicate, access information, and interact with the world around us.

**Smart Mobile Phone (Smartphone)** refers to a device that performs many computer functions, typically having a touch screen interface, broadband Internet access, and an operating system capable of running apps such as Facebook, WhatsApp or YouTube.

**Non-Smartphone (Feature phone)** refers to a device that performs only basic functions such as making and receiving calls, sending/receiving text messages and browsing Internet.

**Computer** is an electronic device designed to process, store, and manipulate data according to a set of instructions known as programs. It can perform a wide range of tasks, from simple calculations to complex operations involving data analysis, graphics design, and more.

**Desktop Computer** is a personal computing device designed for regular use at a single location. Unlike portable devices like laptops and tablets, desktop computers typically comprise separate components, including a monitor (screen), a keyboard, a mouse, and a central processing unit (CPU) housed in a tower or desktop case.

**Laptop** is a portable computer that integrates all the components of a traditional desktop computer into a single compact unit. Laptops are designed for convenience and mobility, making them ideal for use in various settings, such as at home, in the office, while travelling, or in educational environments.

**Tablet** is a portable computing device with a touchscreen interface, allowing users to interact with digital content and applications through touch gestures. Tablets are larger than smartphones but smaller and more compact than laptops, making them highly portable while offering a screen size that enhances the experience of browsing the Internet, reading digital books, watching videos, and playing games.

## **Land Ownership**

**Certificate of Right of Occupancy** is a formalized land tenure system. It allows individuals or entities to acquire rights to use and occupy land for specific purposes, such as agriculture, residential, commercial or industrial.

**Customary land tenure** is the form of land ownership based on customary practices and traditional land rights.

**Land ownership** is a process of acquiring land or right of occupancy from a relevant Government authority. It is categorized into three main tenure systems namely Customary Land Tenure, Right of Occupancy and Government Land.

**Land Title Deed** is a legal document that states and proves a person's legal right to own a piece of land

## **Housing Characteristics, Assets Ownership and Environmental Control**

**Improved roofing materials** are durable roofing materials used for roofing which include iron sheets, tiles, concrete and asbestos. Unimproved roofing materials include grass or leaves, mud and leaves, plastics or box and tent.

**Improved floor covering materials** are long lasting flooring materials such as cement, ceramic tiles, parquet or polished wood, terrazzo, vinyl or asphalt strips. Non-improved materials include wood planks, palm or bamboo, earth or sand, dung, containers or tents.

**Room for sleeping** is defined as any space within a dwelling which is currently used for sleeping by household members. Any space within a dwelling can be termed as a room for

sleeping if currently used by any household members for sleeping purposes and can be a sitting room, a dining room or even a store.

**Improved sources of drinking water** include sources that, by nature of their construction or through active intervention, are protected from outside contamination, particularly faecal matter. It comprises piped water, tube well or borehole, protected dug well, protected spring, rainwater, bottled water, carts with small tank/drum and tanker truck. Unimproved sources of drinking water include unprotected dug well, unprotected spring and surface water.

**Improved sanitation facilities** are the facilities that ensure hygienic separation of human excreta from human contact. They include flush or pour flush toilet that flushes the water and waste to a piped sewer system, septic tank, pit latrine or unknown destination; ventilated improved pit (VIP) latrine, pit latrine with washable slab and pit latrine without slab. Unimproved facilities include pit latrine without slab (open pit) and bucket.

**Solid waste disposal** refers to the collection, sorting, transport and treatment of waste as well as its storage and tipping above or burying, as well as the transformation operations necessary for its re-use, recovery or recycling.

**Electronic waste (E-waste)** describes discarded electrical or electronic devices. It is also known as waste electrical and electronic equipment (WEEE) or end-of-life (EOL) electronics. It also refers to discarded, recycled or refurbished electrical and electronic products.

### **Access and Use of Information and Communication Technology by Individuals and Households**

**Radio** refers to a device capable of receiving broadcast signals using frequencies in the FM, AM, LW and SW bands. A radio can be a standalone unit or integrated into other devices, including alarm clocks, audio players, mobile telephones or computers.

**Television** refers to a device capable of receiving broadcast signals using standard access methods, including radio frequency (over-the-air), cable, and satellite. A television set is usually a standalone unit but may be integrated into other devices, such as computers or mobile telephones.

**The Internet** is a vast global network of interconnected computers and other electronic devices, allowing them to share information and communicate through a standardised set of protocols known as the Internet Protocol Suite (TCP/IP). It provides access to several communication services, including the World Wide Web and carries e-mail, news, entertainment and data files, irrespective of the device used.

**Landline Telephone** is a communication device that transmits and receives sound, typically the human voice, through physical wire or fibre optic cable connections.

**A mobile (cellular) telephone** also known as a cell phone, is a portable device that allows for voice and data communication over a wireless cellular network. Mobile phones have become essential devices in daily life, profoundly impacting how we communicate, access information, and interact with the world around us.

**Smart Mobile Phone (Smartphone)** refers to a device that performs many computer functions, typically having a touch screen interface, broadband Internet access, and an operating system capable of running apps such as Facebook, WhatsApp or YouTube.

**Non-Smartphone (Feature phone)** refers to a device that performs only basic functions such as making and receiving calls, sending/receiving text messages and browsing Internet.

**Computer** is an electronic device designed to process, store, and manipulate data according to a set of instructions known as programs. It can perform a wide range of tasks, from simple calculations to complex operations involving data analysis, graphics design, and more.

**Desktop Computer** is a personal computing device designed for regular use at a single location. Unlike portable devices like laptops and tablets, desktop computers typically comprise separate components, including a monitor (screen), a keyboard, a mouse, and a central processing unit (CPU) housed in a tower or desktop case.

**Laptop** is a portable computer that integrates all the components of a traditional desktop computer into a single compact unit. Laptops are designed for convenience and mobility, making them ideal for use in various settings, such as at home, in the office, while travelling, or in educational environments.

**Tablet** is a portable computing device with a touchscreen interface, allowing users to interact with digital content and applications through touch gestures. Tablets are larger than smartphones but smaller and more compact than laptops, making them highly portable while offering a screen size that enhances the experience of browsing the Internet, reading digital books, watching videos, and playing games.

### **Information on Buildings**

**Access Road** means any road whether public or private and includes any street, square, court, alley, beach, footway, path, passage or highway whether a thoroughfare or not.

**Building Census** is the act of collecting, analysing and disseminating of buildings' data for specific time.

**Building** means any structure or erection and any part of any structure or erection of any kind whatsoever whether permanent, temporary or movable, and whether completed or uncompleted.

**Building Parastatals** are government institutions whose functions are to provide and or facilitate the provision of housing and other buildings in Tanzania.

**Building Stock** refers to total number of buildings in a particular area.

**Detached house** is a building that stand alone from the foundation to roof level. Does not share walls with other houses. The building could be single or multi-storey.

**Non-residential Use** means a building or structure of any kind whatsoever used, designed or intended to be used for other than a residential use.

**Partly Complete House** is a building where one part is complete and can be occupied

and other part is still under construction.

**Physical Address** means the mailing address, including a zip code which details the Actual location (building number and street name) of person, business or physical property.

**Regularised Settlement** is the legalised tenure status in the informal or unplanned settlements through a deliberate process aimed at bringing the informal and unauthorised settlements within the official legal (formal) and administrative systems of land to guarantee secure tenure for the concerned population.

**Residential Building** means a structure used or constructed or adopted to be used primarily for human habitation; such buildings may be available as apartments, quarters and similar facilities or accommodation.

**Residential License** confers upon the licensee the right to occupy land in non-hazardous land, land reserved for public utilities and surveyed land, urban or peri-urban area for the period of time for which it has been granted as provided in Section 23 of the Land Act No.4 of 1999.

**Single Storey** is a building consisting of ground floor only.

**Stand Alone** is a single house that is separate and detached from other buildings.

**Surveyed Settlement** this refers to human settlements that cadastral surveying has been undertaken to each land parcel to determine its location, the extent of its boundaries and surface area, and to indicate its separate identity, both graphically on a map or in a record as well as physically on the ground.

**Tenure** is defined as institutions and rules which regulate property rights and resource use, and determine who can use what resource, under what conditions and for how long.

**Terrace/Row of Houses** is a terraced house is a row of more than two houses similar houses under one roof joined together by their side walls. The house could be single or multi-storey.

**Unit for the purpose of this publication,** a unit is a house or part of the house with all necessary amenities. A building can have more than one unit

# Chapter 1

## Overview of the 2022 Population and Housing Census

---

### 1.1 Introduction

The United Nations defines a population census as the total process of collecting, compiling, evaluating, analysing, publishing and disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country or in a well delineated part of a country. It is the primary source of detailed data on the size, distribution and composition of the population. It covers all population groups including those in private households, institutions, the homeless and migrants for all geographic and/or administrative units in a country.

Additionally, the term “Housing Census” is used to imply the collection of information related to housing conditions such as the number of households, access to basic household amenities and living conditions. By combining population and housing data, policy makers and researchers are provided with valuable insights about demographic trends, social conditions and housing patterns, enabling them to make informed decisions and develop appropriate policies to address the needs of the population.

#### 1.1.1 A Brief History of Census Undertaking in Tanzania

The history of population counts in Tanzania dates back to 1910. The first population census was conducted in 1958. Other censuses were conducted in 1967, 1978, 1988, 2002 and 2012 after the union of Tanganyika and Zanzibar in 1964. Since 1967, the country has conducted decennial Population and Housing Censuses (PHC) on a *de-facto* basis in accordance with the United Nations (UN) Principles and Recommendations for Conducting Population and Housing Censuses.

Unlike previous censuses, the 2022 PHC is the first digital census in Tanzania, whereby mobile technology was used at all stages of Census implementation. In the first phase, mobile GIS technology was used to facilitate demarcation of enumeration areas and transmission of census cartographic information to the servers located at NBS and OCGS Headquarters. Likewise, in the second phase, Computer Assisted Personal Interviews (CAPI) technology was used for data capture and transmission of information from the field to the servers during enumeration. Mobile devices (tablets) were programmed with a data capture system developed using CSEntry (a CSpro tool for data capture) that runs on Android Operating System. Development of the applications and programming of the devices were done by Tanzanian experts. The third phase of Census implementation which

includes data processing, analysis and dissemination is based on the use of more advanced technologies such as mobile phones for broadcasting census results and more iterative dashboards for data sharing.

## **1.2 Objectives of the 2022 PHC**

The main objective of conducting the 2022 PHC was to provide the Government and other stakeholders with information on the size, distribution, composition and other social economic characteristics of the population, environment and information on housing conditions. This information contributes to the improvement of quality of life for Tanzanians through provision of current and reliable data for policy formulation, development planning, evidence-based decision making and service delivery. Census information is also used for monitoring and evaluating population and socio-economic programmes in the country.

### **1.2.1 Specific Objectives of the 2022 PHC**

Specific objectives of the 2022 PHC were to:

- a) Increase availability and accessibility of accurate, timely and reliable data on demographic, socio-economic characteristics and environment;
- b) Enhance knowledge of stakeholders on socio-economic, demographic characteristics and environment of the Tanzanian population as well as patterns and trends of population growth; and
- c) Strengthen capacity of the National Bureau of Statistics (NBS) and the Office of the Chief Government Statistician (OCGS) in carrying out population and housing censuses, in areas of planning, collecting, processing, analysing, disseminating, utilising and archiving population and housing census and other statistical data.

## **1.3 Preparations for the 2022 PHC**

### **1.3.1 Legal Framework**

The 2022 PHC was carried out in accordance with the Statistics Act CAP 351. The Act, inter alia, mandates the NBS, in collaboration with OCGS Zanzibar, to conduct population and housing censuses within the United Republic of Tanzania every ten years. In this respect, the Statistician General (SG) of NBS is responsible for planning the overall organisation and technical administration of the Census. Furthermore, SG is the Accounting Officer and in charge of all Census operations. The Order to conduct the 2022 Population and Housing Census on 23<sup>rd</sup> August, 2022 was made by H.E. Dr. Samia Suluhu Hassan, President of

the United Republic of Tanzania, on 21<sup>st</sup> March, 2022 and was published in the Tanzania Government Gazette of the 29<sup>th</sup> April, 2022 as directed by the Act.

### **1.3.2 Census Organisation**

A Population and Housing Census is a massive undertaking that needs careful planning coupled with an appropriate organisational, administrative arrangements and procedures. These are necessary in ensuring that, extensive human and material resources mobilized for the census are effectively and efficiently used and that the census tight schedules and massive logistic requirements are met. During the 2022 Census, a well-planned decentralized census organisation was formed with a primary role of coordinating all census activities from the national down to the grass root level.

Preparations for the 2022 PHC were facilitated by various committees at national, regional, district, ward/shehia and village/mitaa levels to guide and monitor the Census processes. The committees drew members from Ministries, Departments and Agencies (MDAs), Higher Learning Institutions, Private Sector and Non-Governmental Organizations (NGOs). The main committees were: - National Census Central Committee, National Census Advisory Committee, Census Collaborators Forum, Technical Advisory Committee as well as Regional and Districts Census Committees.

The Prime Minister's Office of the United Republic of Tanzania and the Second Vice President's Office for the Government of Zanzibar, were responsible for overseeing overall operations of the 2022 PHC. The Regional and District Census Committees chaired by Regional and District Commissioners respectively were responsible for ensuring that all Census activities were successfully undertaken in their areas of jurisdiction.

The Population and Housing Census Commissars, one from each side of the United Republic of Tanzania, were responsible for publicity and advocacy activities such as educating, sensitising and mobilising the public for census exercise. They were also responsible for resource mobilisation and a link between census technical personnel and other stakeholders as well as enhancing political buy-in of the Census.

### **1.3.3 Development of Census Instruments**

The Census instruments (questionnaires, manuals and other census documents) were developed in collaboration with national experts from MDAs, higher learning and research institutions, private sector and Non-State Actors. The 2022 PHC questionnaires were developed in accordance with the United Nations Principles and Recommendations for the 2020 Round of Population Censuses. They included topics from previous censuses for comparison purposes (both national, regional and international) and new topics to cater for

the country's current data needs (Tanzania Development Vision 2050) and to feed into regional and international programmes (i.e., East African Community Vision 2050; the Southern African Development Community Vision 2050; African Development Agenda 2063; and 2030 Agenda for Sustainable Development). The draft questionnaires were shared widely with various stakeholders both in Tanzania Mainland and Tanzania Zanzibar through stakeholders' workshops and the Census Committees. The final questionnaires were approved by the Central Census Committee.

The 2022 PHC had three main digital tools for data collection. The first one was a community questionnaire, which collected information on all social amenities; land use patterns and environmental or natural features and available community infrastructure. The second tool was the main census questionnaire which collected detailed information on demographics, including fertility, mortality, migration, orphanhood, and disabilities; possession of national documents, education level and economic activities. It also collected information on land ownership and information related to ICT ownership and use, housing, utilities, ownership of assets and agriculture. The third tool was a questionnaire for special population groups such as diplomats and travellers.

#### **1.3.4 Cartographic Work**

The 2022 PHC enumeration was preceded by extensive cartographic work covering the entire country. The main objective of the cartographic work was to delineate the entire country into Enumeration Areas (EAs) in order to produce maps required for Census operations. In urban areas, EA sizes ranged from 50 to 150 households while for rural areas, a hamlet was considered as an EA.

Unlike in previous censuses, the 2022 Population and Housing Census used modern technology (Arc-GIS) in demarcating enumeration areas. The Arc-GIS technology enabled the use of digital based maps (Satellite images) instead of analogue -based maps. Delineation of EA boundaries was done using Global Positioning System (GPS). In addition, coordinates of prominent features existing in each particular EA were also recorded as shown on Map 1.1. Overall, 4,206 EAs were delineated in Tabora Region (682 EAs in urban areas and 3,524 hamlets in rural areas).

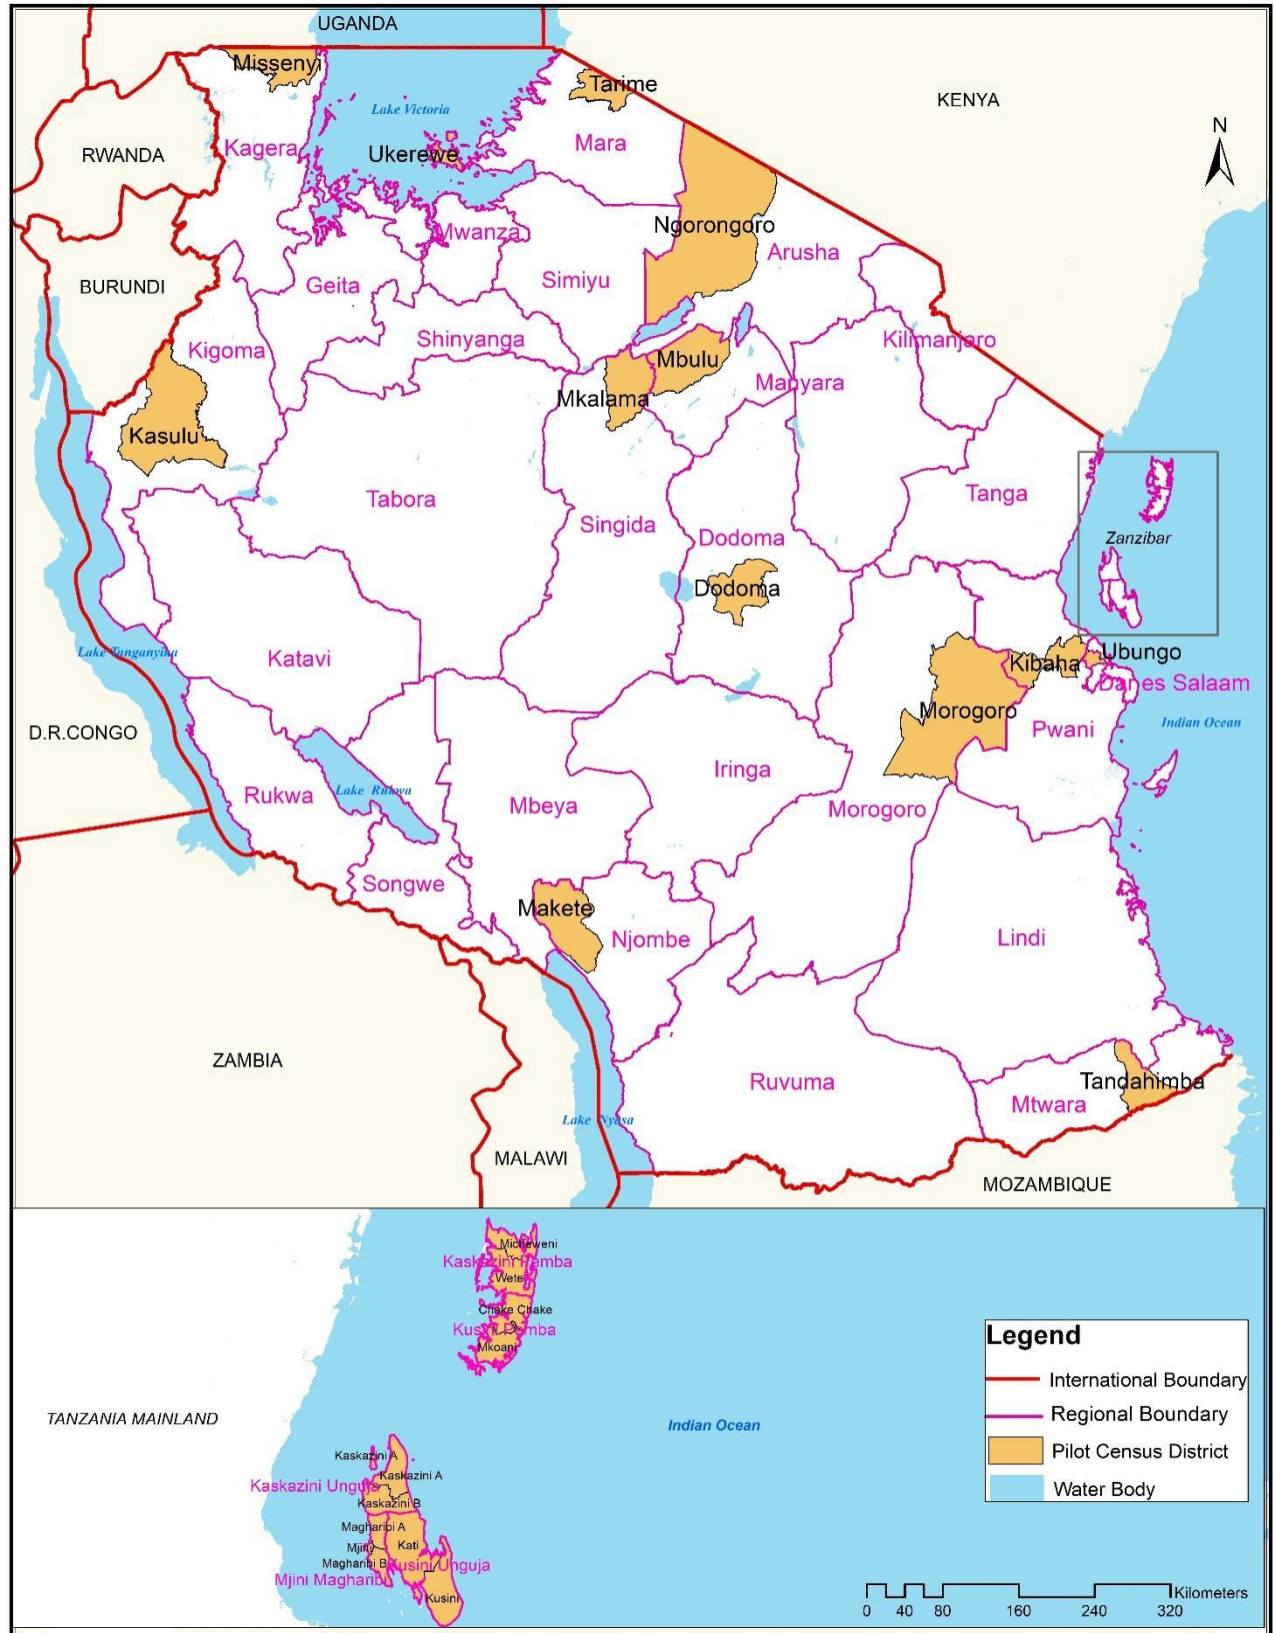

**Map 1. 1: A Typical Enumeration Area Map for 2022 PHC**

### **1.3.5 Pilot Census**

According to the United Nations requirements and guidelines, NBS/OCGS conducted a Pilot Census in September, 2021; one year before the actual census. The main purpose of the Pilot Census was to test the effectiveness of the entire Census mechanism that would be used during implementation of the 2022 Population and Housing Census. The Pilot was conducted in 18 purposively selected regions, of which 13 were in Tanzania Mainland and five in Tanzania Zanzibar (Map 1.2). The experience and obtained results provided valuable inputs which were used to improve Census instruments and logistics in the final preparations towards the 2022 Population and Housing Census enumeration.

**Map 1. 2: Selected Areas for the 2021 Pilot Census**

### 1.3.6 Census Publicity and Advocacy Campaign

The 2022 PHC used intensive and extensive publicity and advocacy programmes to educate, sensitise and mobilise the public to participate in the Census process. There were two Census Commissars one for Tanzania Mainland and the other for Tanzania Zanzibar. The main function of the Commissars was to publicise the implementation of the Population and Housing Census and Advocacy activities. Other functions were to collaborate with committees at all administrative levels to motivate community participation and ensure timely and sufficient availability of human and financial resources as well as equipment.

To standardise publicity and advocacy campaigns throughout the country, the NBS and OCGS developed publicity guidelines that were used during the Census publicity and advocacy operations. The guidelines explained in brief, the meaning and purpose of the Census as well as broad topics covered.

Given the importance of Census publicity, resources were availed to regional authorities for the purpose of educating, sensitising and mobilising the public to participate in the census in their respective areas.

Image 1.1: Hon. Anne Semamba Makinda, Census Commissar for Tanzania Mainland speaking to citizens living on the border of Tanzania and Rwanda at Rusumo during the 2022 census publicity campaign on 14<sup>th</sup> June, 2022.

## **1.4 Census Enumeration Activities**

Several activities were undertaken in preparation for the main enumeration exercise, including recruitment and training of field personnel and distribution of enumeration materials to all regions and districts.

### **1.4.1 Recruitment and Training**

Recruitment of census enumerators and supervisors followed procedures set by NBS and OCGS and approved by the Central Census Committee. The process was coordinated by Regional and District Census Committees in their respective administrative areas. A total of 205,000 enumerators and supervisors were recruited and trained.

Training for census enumeration was conducted at three levels namely: - Training of Trainers (TOT) at national level; training of trainers at regional level; and training of supervisors and enumerators at district level. Trainings were conducted from June to August 2022 and covered theoretical and field practical trainings. The training enabled participants to conceptualise the topics covered in the Census questionnaires; build common understanding of all questions, understand techniques of asking questions and probing where necessary. Furthermore, participants were trained on the use of ICT during data collection, particularly the use of tablets to collect the required information. Trainers were provided with training manuals while supervisors and enumerators were provided with instruction manuals to be used as reference materials.

### **1.4.2 Other Preparations for Enumeration**

A range of other preparatory activities were carried out in the second and third week of August 2022. The activities included distribution of enumeration materials to supervisors and enumerators, physical identification of EA boundaries and meeting local authorities in the respective areas. Activities at regional and district levels were coordinated by Regional and District Census Coordinators in collaboration with respective Census Committees.

### **1.4.3 Enumeration**

The targeted population for the 2022 PHC was all persons who spent the night of 22<sup>nd</sup>/23<sup>rd</sup> August, 2022 within the borders of Tanzania. The actual enumeration was conducted by enumerators and supervisors in their respective assigned areas. There were enumerators stationed at mass transit points (the night of 22<sup>nd</sup>/23<sup>rd</sup>) to enumerate passengers on buses, trains, airports and ships. Special enumeration cards were issued to each traveller after enumeration to avoid double-counting. Arrangements were also made to enumerate the homeless during the same night. During enumeration, enumerators were submitting data to

their supervisors every day and the supervisors in turn were transferring them to the server at NBS after checking their quality.

The duration for enumeration, as per the Presidential Order, was seven days from 23<sup>rd</sup> to 29<sup>th</sup> August, 2022. Enumeration exercise was completed by 93.45 percent within the planned period of seven days. However, in some areas, enumeration could not be completed within the seven days' period due to various reasons. Reasons for not completing enumeration within the allocated time included; scattered households, EAs having more households than expected and difficulty to reach EAs. Nevertheless, by the 5<sup>th</sup> September, 2022 the enumeration exercise had been completed by 99.99 percent in all EAs.

Image:1.2 H.E. Dr. Samia Suluhu Hassan, President of the United Republic of Tanzania being enumerated at the State House, Dodoma on 23<sup>rd</sup> August, 2022.

#### **1.4.4 Post Enumeration Activities**

After enumeration, all tablets and their accessories, quality control forms and notebooks were collected for safe custody at respective Regional Census Offices from where they were transported to NBS and OCGS headquarters for further logistics.

#### **1.5 Data Processing**

The whole process of compiling basic counts and basic data analysis was completed in 45 days after completion of the enumeration exercise. Initial results of the 2022 PHC at National level were released in Dodoma by H.E. Dr. Samia Suluhu Hassan, President of the United Republic of Tanzania on 30<sup>th</sup> October, 2022.

## **1.6 Quality Control Procedures**

Quality control is an essential component of the Census undertaking. Quality control standards and procedures were developed and observed throughout all steps of the census undertaking to ensure collection of quality data. All supervisors and coordinators were trained on quality control standards and procedures during training sessions of the census.

## Chapter 2

### Population Size, Growth and Distribution

---

#### Key Points

- Tabora Region has a population of 3,391,679 persons; (1,661,171 males and 1,730,508 females).
- The regional population grew at an average annual growth rate of 3.9 percent between 2012 and 2022. At this rate, Tabora Regional population is expected to double in the next 18 years; that is in year 2040.
- The regional population remains predominantly rural with 85.2 percent of its total population living in rural areas and 14.8 percent living in urban areas.

#### 2.1 Introduction

This chapter presents information on population size, distribution by place of residence and sex, population growth and the annual average intercensal growth rates in Tabora Region. Population size is the first demographic fact that any population census intends to obtain. Determining population size is important for planning, monitoring and establishing required resources for socio-economic development of any country. The growth and distribution of the population determines the demand for and location of essential social services, such as education, health, water, transport and housing. Therefore, understanding population size, growth and distribution is important for decision makers, planners, researchers, implementers of development programmes and the public in general. These statistics facilitate making evidence-based decisions, optimal resources allocation, planning, monitoring and evaluation of development frameworks.

#### 2.2 Population Size

Tabora Region has a population of 3,391,679 persons and is the third most populous region in Tanzania Mainland. Slightly more than half (51.0%) of this population are females (1,730,508 persons) and 49.0 percent (1,661,171 persons) are males (Table 2.1).

## 2.2.1 Population Size by Council

Administratively, Tabora Region has 8 Councils, out of those, six (6) are District Council, one (1) is Town Council and one (1) is Municipal Council. Kaliua District Council in Tabora Region has the largest population (678,447 persons) compared with other Councils. Other four Councils with large population are Nzega District (574,498 persons), Uyui District (562,588 persons), Igunga District (546,204 persons) and Sikonge District (335,686 persons). Thus, over 70 percent (79.5%) of the total population in Tabora Region live in the mentioned five councils. The last two councils with least population in Tabora Region are Urambo District (260,322 persons) and Nzega Town (125,193 persons) (Table 2.1 and Figure 2.1).

Further results show that proportion of females is high compared with males in all Council of Tabora Region

**Table 2.1: Number and Percentage Distribution of Population by Sex and Council; Tabora Region, 2022 PHC**

Council	Population size				
	Both sexes	Male		Female	
		Number	Percent	Number	Percent
<b>Total</b>	<b>3,391,679</b>	<b>1,661,171</b>	<b>49.0</b>	<b>1,730,508</b>	<b>51.0</b>
Nzega Town	125,193	60,097	48.0	65,096	52.0
Nzega District	574,498	283,145	49.3	291,353	50.7
Igunga District	546,204	266,554	48.8	279,650	51.2
Uyui District	562,588	276,261	49.1	286,327	50.9
Urambo District	260,322	127,424	48.9	132,898	51.1
Sikonge District	335,686	165,309	49.2	170,377	50.8
Tabora Municipal	308,741	150,416	48.7	158,325	51.3
Kaliua District	678,447	331,965	48.9	346,482	51.1

**Figure 2.1: Percentage Distribution of Population by Council; Tabora Region, 2022  
PHC**

### 2.2.2 Rural and Urban Population

Tabora Region population is predominantly rural, with 85.2 percent of its population living in rural areas and 14.8 percent living in urban areas. Across the Council, Kaliua and Nzega District all of its population living in rural areas. The other Councils with the most of their population living in rural areas are Uyui and Sikonge District with 97.7 percent and 94.5 percent respectively. Further results show that Tabora Municipal is the most urbanized Council while Nzega Town with all of its population residing in urban areas. (Figure 2.2 and Table 2.2).

**Figure 2.2: Percentage Distribution of Population by Council; Tabora Region, 2022  
PHC**

**Table 2.2: Number and Percentage Distribution of Population by Place of Residence, Sex and Council; Tabora Region, 2022 PHC**

Kaliua District	678,447	331,965	346,482	674,066	99.4	329,904	344,162	4,381	0.6	2,061	2,320

## 2.3 Population Change and Growth

### 2.3.1 Population Change

The population of Tabora Region has increased by 3.9 percent from 2,291,623 persons in 2012 to 3,391,679 persons in 2022. This is an indication of increasing population growth rate over the two decades) (Table 2.3).

### 2.3.2 Annual Population Growth Rate and Trends

Tabora Region population grew at an average annual growth rate of 3.9 percent between 2012 and 2022. This growth is above the national average of 3.2 percent. At this rate, the population is expected to double in the next 18 years, that is in year 2040. The growth rate for the male population is the same (3.9%) as that of the total population while for the female population it is 4.0 percent (Table 2.3).

**Table 2. 3: Population Size and Growth Indicators by Sex; Tabora Region, 2012 and 2022 PHCs**

Sex	Population Size		Percentage Changes	Percentage Growth Rate (per annum)	Doubling Time from 2022 (Years)
	2012	2022	2012-2022	2012-2022	
Total	2,291,623	3,391,679	48.0	3.9	18
Male	1,129,730	1,661,171	47.0	3.9	18
Female	1,161,893	1,730,508	48.9	4.0	17

Figure 2.3 shows that the trend of the Tabora Region population average annual intercensal growth rate has remained below the national average since 1967. However, the rate has no clear trends; it declined from 4.4 percent in 1967-1978 to 2.4 percent in 1988 - 2002, then increased to 3.9 percent in 2012 – 2022.

**Figure 2.3: Average Annual Inter-Censal Population Growth Rates; Tabora Region, 1967–2022 Censuse**

## Chapter 3

### Age and Sex Profile

---

#### Key Points

- Thirty nine percent (39.1%) of the Tabora Region population is aged below 15 years and 4.6 percent is aged 65 years and above, thus a youthful age structure.
- The median age of the Tabora Regional population is 15.0 years.
- The percentage of the working age population (15 - 64 years) in Tabora Region increased from 49.2 percent in 1988 Census to 47.7 percent in 2022.
- The percentage of the population aged 60 years and above in Tabora Region is 6.9
- The age dependency ratio for Tabora Region is 109.7.

#### 3.1 Introduction

This chapter discusses quality of age and sex data, presents age and sex profiles as well as population distribution by selected age groups and respective demographic attributes in Tabora Region. The Tanzania 2022 PHC collected information on age in completed years for all persons who spent the census night in the country. Age and sex are the most fundamental demographic characteristics of human populations. They are important variables in the study of population dynamics, demographic analysis, social functions and responsibilities in socio-economic development processes.

Age, in particular, is an important variable for planning and making important decisions in public administration for different population groups. For instance, age is used as an essential input in population projections, planning for social economic development and provision of social services including health, education, food security and energy. Despite its importance, the results from previous censuses and the experience from most developing countries, show that age and sex information are affected by misreporting.

### 3.2 Quality of Age and Sex Data

The quality of age and sex data in the 2022 PHC was examined using an array of conventional methods and indices and was observed to have suffered errors associated with age misreporting which cannot be neglected. Based on experience gained from previous censuses, age data are characterized by a significant clustering at ages ending in digits “0”, “5” and “8” and to a lesser extent to ages ending with even numbers, with corresponding deficiencies at ages ending in digits “1”, “3”, “7” or “9”. The tendency of respondents to report ages ending with certain digits at the expense of other digits is called age heaping, age preference or digit preference. Age misreporting is most pronounced among populations or population sub-groups with no birth registration systems or low literacy rates.

The 2022 Census results in Tabora Region show a significant heaping in ages ending with digits “0”, “2” and “6”, and avoidance of ages ending with digits “1”, “3”, and “9”. There is a clear indication that, age misreporting for digit 5 is insignificant. This might be due to improved data collection techniques used in the 2022 Census, specifically the use of tablets, improved probing of age data and the use of National Identification Cards during enumeration to reconfirm the stated ages. The observed jagged edged pattern is a typical feature of single-year age distributions in most developing countries’ census data depicting age misstatements. Digit preference is observed to be relatively higher among females than males (Figures 3.1).

**Figure 3.1: Population Distribution by Age in Single Years and Sex – Tabora Region, 2022 PHC**

### 3.2.1 Population Distribution by Five Year Age Groups

Tables 3.1, 3.2 and 3.3 present the distribution of population by five-year age groups and sex for Tabora Region. The data depict a young population age structure with 39.1 percent of the population aged below 15 years and 4.6 percent aged 65 years and above. The median age of the Tabora Region population is 15.0 years.

Sex ratio by age groups provides an important index of possible age misreporting. Under normal circumstances, the general trend of sex ratio is a gradual decrease with age, eventually falling below 100, whereby the number of females begins to exceed the number of males and the difference grows larger with advancing ages. The overall sex ratio for Tabora Region is about 93 males for every 100 females (97 for rural areas and 92 for urban) indicating more females than males. The sex ratio of the population aged 5 - 19 years in rural areas is relatively high (99 to 102 boys per 100 girls). On the other hand, the sex ratio of the population of the same age in urban areas is relatively low (87 to 96 boys per 100 girls). This indicates that there may be an early out migration of girls from rural to urban areas (Tables 3.1, 3.2 and 3.3).

**Table 3.1: Number and Percentage Distribution of Population by Sex and Five-Year Age Groups; Tabora Region, 2022 PHC**

Age Group	Both Sexes		Male		Female		Sex Ratio
	Number	Percent	Number	Percent	Number	Percent

### 3.2.2 Population Pyramid

A population pyramid is a graphical representation of the age and sex composition of a specific population. It provides a snapshot of the population's age and sex structure. It also provides useful insights into the patterns of vital events (birth and death rates). The pyramid of Tabora Region as per the 2022 PHC has a broad base indicative of high fertility and a youthful age structure (Figures 3.2 to 3.5). Tabora Region population structure resembles other regional structures in the country.

However, pyramids for major urban centres may have a different structure. For example, the pyramid for Tabora Municipal Council (Figure 3.5), the regional capital of Tabora Region shows a bulge in age group 15–24, an indication of youth in-migration from other parts of the country.

**Figure 3.2: Population Pyramid for Five Year Age Groups; Tabora Region, 2022 PHC**

**Figure 3.3: Population Pyramid for Five Year Age Groups; Tabora Rural, 2022 PHC**

**Figure 3.4: Population Pyramid for Five Year Age Groups; Tabora Urban, 2022 PHC**

**Figure 3.5: Population Pyramid for Five Year Age Groups; Tabora Municipal Council, 2022 PHC**

### 3.3 Population Distribution by Selected Age Groups

The 2022 PHC reveals that, Tabora Region has a young population with 49.2 percent of the total population below 15 years of age and 4.6 percent of the population aged 65 years and above (Table 3.4). The broad-based structure is an indication of a development stage where a population succeeds in reducing infant mortality while fertility remains high.

### 3.3.1 Children Under Five Years

The 2022 PHC results show that, the population under five years in Tabora Region is 18.1 percent. Figure 3.6 indicates that the percentage of population under five years in the Region has insignificantly increased from 18.0 percent in 2002 to 18.1 percent in 2022. This slight increase indicates a slow pace of fertility increase in the region during the specified period.

**Figure 3.6: Percentage of Children Under Five Years by Place of Residence; Tabora Region, 2002, 2012 and 2022 PHCs**

### 3.3.2 Young Population (0-14 Years)

Tabora Regional population is characterised by a young age structure, with 49.2 percent of the total regional population below 15 years of age. Figure 3.7 shows that the percentage of population below 15 years of age has increased from 46.9 percent in 2002 to 49.2 percent in 2022.

**Figure 3.7: Percentage of Young Population (0-14 Years) by Place of Residence; Tabora, 2002, 2012 and 2022 PHCs**

### 3.3.3 Young Population (0-17 Years)

Figure 3.8 shows that in Tabora Region 55.4 percent of the population is below 18 years. The percentage of population aged 0-17 years in Tabora Region has increased from 53.3 percent in 2002 to 55.4 percent in 2022.

**Figure 3.8: Percentage of Young Population (0-17 Years) by Place of Residence; Tabora, 2002, 2012 and 2022 PHCs**

### 3.3.4 Youth Population (15-24 Years)

The National Youth Development Policy, 2007 defines a youth as “a boy or girl who is in transition from childhood to adulthood”. According to the Policy, a youth is defined as a person aged 15 – 35 years. However, according to the United Nations, a youth is defined as a person aged 15 - 24 years. In this chapter the analysis has employed both definitions

Figure 3.9 indicate that the youth population (15 – 24 years) in Tabora Region account for 19.0 percent of the total regional population. The percentage of youth population (15-24 years) in Tabora Region was 19.0 percent and has remained almost the same during the 1988 - 2012 period (17.9% in 1988, 18.9% in 2002, and 19.1% in 2012).

**Figure 3.9: Percentage of Youth Population (15-24 Years) by Place of Residence; Tabora Region, 1988, 2002, 2012 and 2022 PHCs**

### 3.3.5 Youth Population (15 - 35 Years)

The 2022 PHC results show that the youth population as per the National Youth Development Policy, 2007 (15 - 35 years) accounts for 32.6 percent of the Tabora regional population. The percentage of persons aged 15-35 years has declined slightly from 33.7 in 2002 to 32.6 percent in 2022 (Figure 3.10).

**Figure 3.10: Percentage of the Youth Population (15-35 Years) by Place of Residence; Tabora Region, 2002, 2012 and 2022 PHCs**

### 3.3.6 Working Age Population (15-64 Years)

The working age population (15 – 64 years) in Tabora Region is 47.7percent of the total regional population. The percentage of working age population in the region has decreased slightly from 49.2 percent in 1988 Census to 47.7 percent in 2022 in (Figure 3.11)

**Figure 3.11: Percentage of the Working Age Population (15-64 Years) by Place of Residence; Tabora Region, 1988, 2002, 2012 and 2022 PHCs**

### **3.3.7 Elderly Population**

According to the international definition, an elderly is a person aged 65 years and above. However, according to the Tanzania National Ageing Policy of 2003, an elderly is a person aged 60 years and above. In this chapter the analysis has taken into account both definitions.

#### **Population Aged 60 Years and Above**

Findings indicate that, the elderly constitute a small segment of Tabora regional population. The percentage of the population aged 60 years and above in Tabora Region is 4.6 percent. The percentage of the elderly population in Tabora Region has decreased from 6.6 percent in 2002 to 4.6 percent in 2022 censuses (Figure 3.12).

**Figure 3.12: Percentage of the Population Aged 60 Years and Above; Tabora Region, 1988, 2002, 2012 and 2022 PHCs**

### **Population Aged 65 Years and Above**

Findings indicate that, the elderly population constitute a small segment (3.1%) of Tabora regional population. The percentage of the elderly population aged 65 years and above in the region declined from 4.2 percent in 2002 to 3.1 percent in 2022. (Figure 3.13).

**Figure 3.13: Percentage of the Population Aged (65 Years and Above) by Place of Residence; Tabora Region, 2002, 2012 and 2022 PHCs**

### 3.3.8 Age Dependency Ratio

Age-dependency ratio is the proportion of persons in the “dependent” ages (those under 15 years of age plus those aged 65 years and above) to the “working age population” (15-64 years). It is expressed as a number of dependents per 100 persons of the working age population. Ratios higher than 100 are undesirable. The age-dependency ratio is a proxy indicator of the economic burden and responsibility borne by the working age population.

According to the 2022 PHC results, the dependency ratio for Tabora Region is 109.7 implying that there are 110 dependents per 100 non-dependents. Results further show that the age dependency ratio in the region has inclined in three decades from 102.9 in the 1988 census to 109.7 in the 2022 census (Figure 3.14).

**Figure 3.14: Age Dependency Ratio by Place of Residence; Tabora Region, 1988, 2002, 2012 and 2022 PHCs**

## Chapter 4

### Household Composition

---

#### Key points

- Most of private households in Tabora Region (79.8%) are in rural areas.
- The average household size in Tabora Region is 5.6 persons; in rural areas it is 6.0 persons while in urban areas it is 4.1 persons.
- There is a decline in average household size from 5.9 persons in 2012 to 5.6 in 2022.
- The average number of persons per household in male-headed households is 5.9 and 5.1 in female-headed households.
- Female-headed households in Tabora Region increased from 29.9 percent in 2012 to 35.0 percent in 2022.

#### 4.1 Introduction

This chapter presents information on private households including household composition, number of households, average household size and household headship. Although the 2022 PHC collected information from private and collective households, this analysis is based on private households only.

A private household refers to a person or group of persons living together, having the same cooking arrangements and answerable to one household head, but not necessarily living in the same dwelling unit. Since the 2022 PHC enumeration was *de facto* some modifications were made to this definition. For instance, visitors present in the household on census night were also included as members of the household. Further, usual members of the household who spent the census night elsewhere due to being on duty were included as members of the household. On the other hand, collective households are those with members not necessarily related to each other, such as students in hostels, orphanages, prisons and patients in hospital wards.

## 4.2 Number of Households

The 2022 PHC reveals that Tabora Region has a total of 592,039 private households out of which 119,587 (20.2%) are in urban areas and 472,452 (79.8%) in rural areas. Female headed households account for 35.0 percent of all private households. The percentage of female headed households is slightly higher in urban areas (38.2%) than in rural areas (34.2%) (Table 4.1 and Table 4.2)

**Table 4.1: Number and Percentage of Private Households by Place of Residence, Sex of Head of Household and Age Group; Tabora Region, 2022 PHC**

## Basic Demographic and Socio-Economic Profile

Results further reveal that, Kaliua District Council has the largest number of households accounting for 19.6 percent of total private households in the region. The next four Councils with relatively high contributions to the total households are Nzega District (16.3%), Uyui (15.3%), Igunga (14.8%) and Tabora Municipal (12.2%). On the other hand, Nzega Town has the smallest contribution of households (4.8%) (Table 4.2).

**Table 4.2: Number and Percentage of Households by Place of Residence and Council; Tabora Region, 2022 PHC**

Figure 4.1 shows an increase in urban households from 12.5 percent in 2012 to 20.2 percent in 2022 PHC. Tabora Region shows an increase of 7.7 percentage points in urban households.

**Figure 4.1: Percentage Distribution of Private Households by Place of Residence; Tabora Region, 2012 and 2022 PHCs**

### 4.3 Average Household Size

Average household size is the mean number of persons in a private household. The average household size decreased from 5.9 in 2012 to 5.6 persons in 2022. Households in rural areas have an average of 6.0 persons per household which is relatively higher than in urban areas (4.1 persons). Average household size declined from 6.3 persons in 2012 to 6.0 in 2022 in rural areas while in urban areas the decline is from 4.3 persons in 2012 to 4.1 in 2022. Moreover, the average household size varies across Councils, ranging from 4.1 persons in Tabora Municipal Council to 6.2 persons in Uyui and Igunga District Council (Figure 4.2 and Table 4.3).

**Figure 4.2: Average Household Size by Council; Tabora Region, 2022 PHC.**

**Table 4.3: Population in Private Households, Number of Households and Average Household Size by Place of Residence and Council; Tabora Region, 2012 and 2022 PHCs**

#### 4.4 Household Headship

A household head is the individual normally recognized by other household members as their head. The 2022 PHC results show that, of the total private households in Tabora Region, 65.0 percent are headed by males and 35.0 percent are headed by females (Figure 4.3 and Table 4.4).

<sup>2</sup> Data from Tabora Region Basic Demographic and Social-Economic Profile, 2012 PHC

**Figure 4.3: Percentage Distribution of Households by Sex of Household Head and Place of Residence; Tabora Region, 2022 PHC**

Results further reveal that percentage of male-headed households decreased from 70.1 in 2012 to 65.0 percent in 2022 while female-headed households increased from 29.9 in 2012 to 35.0 percent in 2022. A similar pattern is observed across Councils (Table 4.4).

**Table 4.4: Percentage Distribution of Households by Sex of Household Head, Place of Residence and Council; Tabora Region, 2012 and 2022 PHCs**

Place of Residence	2012		2022	
	Male Headed	Female-Headed	Male Headed	Female-Headed
<b>Total</b>	<b>70.1</b>	<b>29.9</b>	<b>65.0</b>	<b>35.0</b>

Tabora Municipal	66.4	33.6	64.1	35.9
Kaliua District	73.8	26.2	65.3	34.7

In Tabora Region, the average number of persons in male headed households is higher (6.0 persons) than in female headed households (4.1 persons). A similar pattern is observed

## Basic Demographic and Socio-Economic Profile

in rural areas. However, in urban areas the average household size is the same for male headed and female headed households. Irrespective of sex of head, average household size in Igunga and Uyui District is the highest of all Councils (6.2 persons), Nzega District (5.9 persons each), tailed by Kaliua and Sikonge District (5.8 persons) and Tabora Municipal has the lowest (4.1 persons) (Table 4.5).

**Table 4.5: Distribution of Population in Private Households by Sex of Household Head, Number of Households, Average Household Size, Place of Residence and Council; Tabora Region, 2022 PHC**

#### 4.4.1 Households Living in Improved or Unimproved Houses

This sub section discusses the heads of households and the type of building materials used to build the main dwellings (houses). For the purpose of this report, an improved house means a house that is built using improved building materials in at least two of the following; roofing, walling and flooring materials.

Table 4.6 shows that 63.7 percent of households in Tabora Region live in improved houses, a percentage which is about the same for male headed and lower to that of female headed households (62.5% and 65.5% respectively). Results further show that the percentage of household which live in improved houses is higher (92.3%) in urban areas compared with rural areas (56.3%).

All Councils in Tabora Region have more than 50 percent of households living in improved houses. On the other hand, Councils with more than 40 percent of households living in unimproved houses are Urambo District (46.1%) and Tabora Municipal (43.5%). households (Table 4.6).

**Table 4.6: Percentage Distribution of Households living in Improved/ Unimproved Houses by Sex of Household Head, Place of Residence and Council; Tabora Region, 2022 PHC**

Place of Residence	Total			Male Headed			Female Headed		
	Total	Improved House	Unimproved House	Total	Improved House	Unimproved House	Total	Improved House	Unimproved House
<b>Total</b>	<b>592,039</b>	<b>63.6</b>	<b>36.4</b>	<b>385,034</b>	<b>62.5</b>	<b>37.5</b>	<b>207,005</b>	<b>65.5</b>	<b>34.5</b>
Rural	472,452.0	56.3	43.7	311,103.0	55.5	44.5	161,349.0	57.8	42.2
Urban	119,587.0	92.3	7.7	73,931.0	92.0	8.0	45,656.0	92.6	7.4
<b>Council</b>									
Nzega Town									
Nzega District	28,656	85.0	15.0	17,979	83.8	16.2	10,677	87.1	12.9
Igunga District	96,306	52.8	47.2	62,950	51.9	48.1	33,356	54.4	45.6
Uyui District	87,716	69.9	30.1	56,791	68.6	31.4	30,925	72.2	27.8
Urambo District	90,362	53.9	46.1	58,779	52.7	47.3	31,583	56.0	44.0
Sikonge District	46,691	63.6	36.4	30,664	62.4	37.6	16,027	65.9	34.1
Tabora Municipal	54,233	56.5	43.5	35,913	55.6	44.4	18,320	58.4	41.6
Kaliua District	72,259	89.2	10.8	46,288	88.8	11.2	25,971	89.8	10.2

The findings in Table 4.7 show that as age of household head increases the chances of living in improved house generally decreases. For example, while 65.5 percent of household heads aged 18-24 years live in improved houses, such percentage decreases to 60.1 percent for those household heads aged 80 years and above. This observation holds for both males headed and female headed households.

**Table 4.7: Percentage Distribution of Households living in Improved/Unimproved Houses by Sex of Household Head and Age Group; Tabora Region, 2022 PHC**

#### 4.4.2 Heads of Households by Marital Status and Occupation

Results reveal that in Tabora Region majority of male heads of household regardless of their marital status (51,782 or 31.5%) are employed as agricultural and fishery workers, followed by those engaged as crafts and related workers (43,914 or 26.7%) and those in elementary occupations (36,748 or 22.4%). Among the 1,665 widowed males (588 or 35.3%) are engaged in agricultural and fishery; 18.7 percent are elementary workers and 27.1 percent are craft and related workers. Results further reveal that, among all male heads of households who are engaged as agricultural and fishery workers, 35.3 percent are widowed (Table 4.8 and Table 4.9).

**Table 4.8: Number of Male Heads of Households by Marital Status and Occupation; Tabora Region, 2022 PHC**

### 4.4.3 Heads of Household by Type of Toilet Facility

In Tabora Region percentage of households using improved toilet facilities is 60.9 percent for the male headed and 64.1 percent for the female headed households. On the other hand, with respect to households with no toilet facilities, there is very slightly different between female headed (4.3%) and male headed households (4.2%) (Figure 4.4).

**Figure 4.4: Percentage Distribution of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head; Tabora Region 2022 PHC**

Results show that the percentage of households using improved toilet facilities is higher in urban than in rural areas, with a percentage point difference of 43.4 for female headed households and 43.7 for the male headed. However, there is hardly any difference between male headed and female headed households with improved toilet facilities for both rural and urban areas. In contrast, results further reveal that, households that use unimproved toilet facilities as well as those without toilet facilities are mostly found in rural areas (Figure 4.5).

**Figure 4.5: Percentage of Households with Improved/Unimproved Toilet Facilities by Sex of Household Head and Place of Residence; Tabora Region; 2022 PHC**

Across Councils, results reveal that Tabora Municipal has the highest percentage of both male and female headed households with improved toilet facilities (73.4% and 75.8% respectively). Other Councils with high percentage of male and female headed households using improved toilet facilities are Nzega Town (64.3% and 68.5%), Igunga District (31.7% and 34.6%) and Urambo District (31.1% and 32.3%).

Councils with high percentage of male headed households with no toilet facilities are Nzega District. (20.9%), Igunga District (19.6%) and Uyui District (17.5%). On the other hand, Councils with high percentage of female headed households with no toilet facilities are Nzega District (22.2%), Igunga District (20.3 %) and Uyui District (18.3%) (Table 4.12).

#### 4.4.4 Heads of Households by Source of Drinking Water

The results show that, in urban areas there is insignificant difference between female headed households that use improved source of drinking water (87.7%) compared with male headed households (86.8%). The same pattern is also observed in rural areas whereby the proportion of male headed households that use improved source of drinking water is 29.6 percent and 32 percent for female headed households.

Both male and female headed households using improved source of drinking water are more dominant in urban areas than rural areas. The proportion of households that use unimproved source of drinking water is higher for male than female headed in rural areas (70.4% and 68.0% respectively). The percentage in urban areas are 13.2 and 12.3 for male and female headed respectively (Figure 4.6).

**Figure 4.6: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head and Place of Residence; Tabora Region, 2022 PHC**

The results also reveal that the percentage of male headed households that use unimproved source of drinking water is higher (59.4%) compared with that of female headed households (55.7%) (Figure 4.7).

**Figure 4.7: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Sex of Household Head; Tabora Region, 2022 PHC**

Across Councils, Tabora Municipal has the highest percentage of both male and female headed households that use improved sources of drinking water (83.9% and 87.4% respectively). Other councils with relatively high percentages of male and female headed households using improved sources of water for drinking are Nzega Town 80.6 percent and Igunga District 45.7 percent

On the other hand, Councils with high percentages of male headed households using unimproved sources of drinking water are Uyui District (79.5%), Sikonge (72.0 %) and Urambo District (71.5 %). Female headed households with high proportion of households using unimproved sources of water for drinking are Uyui District (76.1%), Urambo District (68.8%) and Sikonge District (68.6 %) (73.1%) (Table 4.13).

#### 4.4.5 Household Heads with Children Under 18 Years

The results show that percentage of female headed households with one to three children under 18 years is higher (60.1%) than that of male headed households (56.5%). The percentage of male headed households with more than three children under 18 years (28.1%) is higher than that of female headed households (25.7%). On the other hand, the percentage of male headed households with no children under 18 years is higher (15.4%) compared with that of female headed households (14.2%) (Figure 4.8).

**Figure 4.8. Percentage Distribution of Households with Children under 18 Years by Sex of Household Head; Tabora Region, 2022 PHC**

Results further indicate that 60.0 percent of female headed households living in rural areas have one to three children under 18 years compared with 57.1 percent for male headed households. The same pattern is observed in urban areas. About thirty (30.4 %) percent of male headed households with more than three children reside in rural areas compared with 28.1 percent of female headed households. On the other hand, the proportion of male headed households with no children under 18 years is higher in urban areas (30.0%) compared with female headed households (23.6%) (Figure 4.9 and Table 4.14).

Across councils Kaliua District has the highest percentage of households (59.2%) with one to three children followed by Nzega District with 58.2 percent, while Tabora Municipal has the lowest percentage of households with one to three children (55.0%) (Table 4.14).

**Figure 4.9. Percentage Distribution of Households Having Children under 18 Years by Sex of Household Head, Number of Children and Place of Residence; Tabora Region, 2022 PHC**

## Chapter 5

### Marital Status

#### Key Points

- More than half (57.7%) of the population aged 15 years and above in Tabora Region are married.
- Four percent of persons aged 15 years and above are widowed. The percentage of Females widowed is higher (6.6%) than that of Males (1.2%).
- Nearly four percent (3.9%) of persons aged 15 years and above are divorced. Females are more likely to be divorced (5.2%) than males (2.4%).
- Mean Age at First Marriage in Tabora Region is 21.9 years. Females are getting married at a younger age (19.8 years) than males (24.2 years).

#### 5.1 Introduction

This chapter focuses on analysis of marital status and Singulate Mean Age at First Marriage. The term "marital status" refers to the state of being unmarried, married, widowed, separated or divorced. Marital status is one of the most important factors in population dynamics as it affects fertility and other social and economic characteristics such as school attendance and labour force participation. The information on marital status helps Government Agencies and other users to understand marriage trends and forecast future needs of programmes that have spousal benefits. It also measures the effects of policies that focus on the well-being of families, including financial assistance plans.

In the 2022 PHC questions on marital status were asked to all persons aged 10 years and above. However, in order to allow comparison of the 2022 Census results with the 2012 results, analysis is mainly focused on the population aged 15 years and above. Six categories namely never married, married, living together, separated, divorced and widowed were adopted to classify marital status. Data on marital status for the 2022 PHC is disaggregated by age, sex, rural and urban areas and councils.

## 5.2 Marital Status

In Tabora Region, results show that 57.7% of persons aged 15 years and above are married and the percentage is higher among females (59.8%) than males (55.4%). Proportionately, the percentage of married persons in rural areas is higher (60.2%) compared with urban areas (45.8%). More than twenty eight (28.4%) of persons aged 15 years and above are never married; among males it is 35.9 percent while for females it is 21.5 percent. The results also show notable differences between rural and urban areas for the never married persons (26.3% and 38.2% respectively).

Results further show that, the percentage of persons aged 15 years and above who are widowed is 4.0 percent which is higher among females (6.6%) than males (1.2 %). The percentage of widowed in rural areas in Tabora Region is 3.8 percent while for urban areas it is 4.6 percent. The large number of females who are widowed compared with males might be contributed by the tendency of most males to remarry after death of their wives. This may also be due to the fact that males are more subjected to risky tasks hence more likely to die at younger ages than females. Moreover, biologically females live longer than males. However, further studies are needed to ascertain the root causes of the disparities (Table 5.1 and Figure 5.1).

**Table 5.1: Percentage Distribution of the Population Aged 15 Years and Above by Place of Residence, Sex and Marital Status; Tabora Region, 2022 PHC**

Marital Status	Total				Rural				Urban

**Figure 5.1: Percentage Distribution of Population Aged 15 Years and Above by Sex and Marital Status; Tabora Region, 2022 PHC**

The percentage of married persons increased sharply with age from 55.1 percent for persons aged 20-24 years to 77.9 percent for those aged 35-39 and thereafter declines gradually as age increases. Percentage of the divorced persons increases with age from 0.3 for those aged 15–19 years to 9.4 for those aged 74-79 years and started to decline gradually up to 8.2 for those aged 80+ years. The widowed persons increase steadily as age increases from 1.5 percent for age 35-39 to 47.6 percent for those aged 80+ years (Table 5.2).

**Table 5.2: Percentage Distribution of the Population Aged 15 Years and Above by Marital Status and Five-Year Age Groups; Tabora Region, 2022 PHC**

### 5.2.1 Marital Status for Selected Age Groups

Table 5.5 shows the percentage of population by marital status for selected age groups. Results reveal that the percentage of married persons aged 15-64 years in Tabora Region is 58.3 while for age group 65 years and above is 47.5percent. Percentage for widowed for person aged group 65 years and above is 32.8 percent. Results further show that by age 65 and above, only 3.9 percent of the population aged 10 years and above are single implying that marriage in Tabora Region is almost universal. There is a relatively high proportion (3.9 and 4.2%) of persons living together in age groups 15 – 35 and 15-64 respectively.

**Table 5.5: Percentage Distribution of the Population Aged 10 Years and Above by Marital Status and Selected Age Groups; Tabora Region, 2022 PHC**

Selected Age Group	Total Population	Marital Status					
		Never Married	Married	Living Together	Divorced	Separated	Widowed
<b>Total</b>	<b>2,208,731</b>	<b>44.1</b>	<b>45.1</b>	<b>3.2</b>	<b>3.0</b>	<b>1.5</b>	<b>3.1</b>

Table 5.8 highlights the council variations of marital status for the persons aged 15 years and above. Results show that the percentage of the never married category ranges from 25.8 percent in Uyui District Council to 40.1 percent in Tabora Municipal Council. For the married category the range is from 44.9 percent in Tabora Municipal Council to 62.2 percent in Kaliua District Council. The percentage of persons in the widowed category ranges from 3.4 percent in Sikonge District Council to 4.8 percent in Tabora Municipal Council.

Figure 5.2 presents comparison of marital status of persons aged 15 years and above for the 2012 and 2022 Censuses. The results show an increase in the proportion of persons in the categories of never married, divorced, separated and widowed. On the other hand, a decreasing proportion is revealed for the married and living together categories.

**Figure 5.2: Percentage Distribution of Population Aged 15 Years and Above by Marital Status; Tabora Region, 2012 and 2022 PHCs.**

### 5.3 Mean Age at First Marriage

The Mean Age at First Marriage (MAFM) which is defined as the average length of single life (before marriage) expressed in years among those who marry before age 50, is one of the proxy determinants of fertility. The mean age at first marriage is estimated using the Singulate Mean Age at First Marriage (SMAM). A population with a low age at first marriage tends to have early childbearing and high fertility.

The results show that, MAFM in 2022 is 21.9 years; females are getting married at a younger age (19.8 years) than males (24.2 years). Results further show that there is a decrease in the MAFM for females from 22.1 years in 2012 to 19.8 years in 2022. During the same period, the MAFM for males decreased from 25.7 years in 2012 to 24.2 years in 2022 (Figure 5.3).

**Figure 5.3: Mean Age at First Marriage by Sex; Tabora Region, 2012 and 2022 PHC**

The MAFM is higher in urban areas compared with rural areas for both males and females and for both censuses (Figure 5.4).

**Figure 5.4: Mean Age at First Marriage by Place of Residence and Sex; Tabora Region, 2012 and 2022 PHC**

Table 5.9 shows that in Tabora Region, the MAFM for females slightly decreased from 22.1 years in 2012 to 19.8 years in 2022 while for males declined from 25.7 years in 2012 to 24.2 years in 2022. In general, there is no noticeable difference for MAFM in urban areas compared with rural areas for males and females in both censuses.

**Table 5.9: Mean Age at First Marriage by Sex, Place of Residence and Council; Tabora Region, 2012 and 2022 PHCs**

Place of Residence	2012			2022		
	Both Sexes	Male	Female	Both Sexes	Male	Female
<b>Total</b>	<b>23.8</b>	<b>25.7</b>	<b>22.1</b>	<b>21.9</b>	<b>24.2</b>	<b>19.8</b>
Rural	23.7	25.6	22.0	21.3	23.6	19.1
Urban	24.4	26.4	22.4	25.0	27.1	23.1
<b>Council</b>						
Nzega Town	0.0	0.0	0.0	24.0	26.2	22.0
Nzega District	23.9	25.6	22.2	21.2	23.5	19.1
Igunga District	24.4	26.3	22.7	21.4	23.7	19.3
Uyui District	23.9	25.8	22.2	21.2	23.6	19.0
Urambo District	23.7	25.6	21.7	22.6	25.0	20.5
Sikonge District	23.5	25.5	21.7	21.2	23.8	18.9
Tabora Municipal	24.5	26.4	22.8	25.3	27.4	23.4
Kaliua District	22.9	24.9	21.0	21.2	23.5	19.2

Figure 5.5 shows council variations with Tabora Municipal Council having the highest MAFM for both females (23.4years) and males (27.4 years), followed by Nzega Town 22.0 years

for females and 26.2 years for males, and Urambo District (20.5 and 25.0 years for females and males respectively). The council with the lowest MAFM is Nzega District (19.1 years) for females and 23.5 years for males.

## Chapter 6

### National Identification Documents and Citizenship

---

#### Key Points

- About eighty two percent (81.6%) of the population in Tabora Region have neither birth certificate nor birth notification.
- Thirty three percent of children (32.5%) under-five years have birth certificate
- About 13 percent of persons (13.3%) aged 18 years and above have national identification number and 12.3 percent have national identification cards.
- Three millions (3.3) out of 3,334,165 persons in Tabora Region have health insurance from national Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF).

#### 6.1 Introduction

This chapter presents information on possession of national identification documents, which include birth certificate and notification, National Identification Card (NIDA), Zanzibar Identification Card (ZAN ID), Driving License, Voter's ID, Travel Passport and Small Entrepreneur ID. The chapter also presents citizenship status. The objective of national identification documents is to help eligible citizens to access various services including financial, health and education.

#### 6.2 National Identification Documents

A national identification document is any official document that may be used to prove a person's identity such as the bearer's full name, birth date, address, an identification number, card number, sex, citizenship and the like. If issued in a small, standard smart card size, it is usually called an identity card or citizen card. Alternatively, it is issued in other formats such as Tanzania travel permit or passport. For a national identification document to be valid it should be issued by an authorized government/state institution.

### **6.2.1 Birth Certificate**

A birth certificate is a vital record that is used to document the birth of a child. The term "birth certificate" can refer to either the original document certifying the circumstances of the birth or to a certified copy or a representation of the ensuing registration of that birth.

In the 2022 PHC, data on birth certificates were collected from all respondents regardless of their age. Results show that, in Tabora Region 15.1 percent of the persons have birth certificates while majority of the population (81.6%) have neither birth certificates nor birth notifications. There is a declining percentage of population with birth certificates from younger to older age groups. It is highest for age group 0 - 4 years (32.5 %) followed by age group 5 - 9 years (16.5%). The results also show that the percentage of males with birth certificates is slightly higher (15.5%) than females (14.7%) (Tables 6.1).

The percentage of persons with birth certificates is larger in urban (32.0%) than in rural areas (12.2%). Further results show, 33.6 percent of males and 30.5 percent of females living in urban areas have birth certificates compared with males and females living in rural areas (12.5% and 11.9 % respectively) (Tables 6.2 and 6.3).

### **6.2.2 Birth Notification**

Birth notification is a document issued by a health facility to confirm the occurrence of birth. It is an initial document in the process of registering a child's birth. It provides the first legal recognition of the child and is generally required for the child to obtain a birth certificate and other legal documents and rights. The results show that, in Tabora Region 2.4 percent of the population have birth notifications, with the same percentage observed in rural and urban areas (2.5% and 1.6% respectively) (Tables 6.1, 6.2, 6.3 and Figure 6.1).

### 6.2.3 Other National Identification Documents

Tanzania Population and Housing Census 2022 collected information on travel passport, national health insurance/community health insurance and other health insurance schemes from all persons regardless of their age. On the other hand, information on national identification card, national identification number, Zanzibar identification card, driving license and voters' identification card were collected for all persons aged 18 years and above. In addition, persons aged 15 years and above provided information on possession of small entrepreneur identification card and those aged 60 years and above provided information whether they have card for elderly treatment.

#### 6.2.3.1 National Identification Cards

Table 6.5 and Figure 6.2 indicate that 181,269 persons (12.3%) aged 18 years and above in Tabora Region have national identification cards while 196,006 persons (13.3%) have only national identification numbers. Moreover, results show a higher percentage (19.1%) of persons in urban areas with national identification cards than in rural areas (10.9%). Additionally, results reveal that, 800,235 persons (54.3%) have voters' identification cards. Further results reveal that, six percent (6.1%) of person aged 15 years and above who engaged in informal activities have a small entrepreneur identification card

**Figure 6. 2: Percentage Distribution of Population Possessing Other National Identification Documents by Place of Residence and Type; Tabora Region, 2022 PHC**

### 6.2.3.2 Health Insurance

Table 6.6 indicates that 3.6 percent (121,422 persons) out of 3,334,165 persons in private households in Tabora Region have health insurance from the National Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF). Tabora Municipal Council has the highest percentage (10.1%, 30,136 persons) of persons who possess NHIF/CHIF insurance followed by Nzega Town Council (6.2%, 7,682 persons) and lastly Nzega District with (2.1%, 11,907 persons). In addition, there are (0.9 %,31,489 persons) with health insurance from other health insurers. Residential analysis indicates that more people (9.5%, 46,028 persons) in urban areas have NHIF/CHIF than rural areas with (2.6%, 75,394 persons). On the other hand, 0.9 percent (25,658 persons) in rural areas have other health insurance schemes while in urban is 1.2 percent (5,831 persons) in urban areas.

## 6.3 Citizenship

Tanzania citizenship is governed by the Tanzania Citizenship Act, Chapter 357 (Revised Edition of 2002) and its Regulations of 1997. The 2022 PHC collected information on citizenship status.

## Basic Demographic and Socio-Economic Profile, 2022 PHC

The results show that 3,388,284 (99.9%) of the persons enumerated in Tabora Region are Tanzanians. The majority of non-Tanzanians are from other East African Countries (1,726 persons) followed by other African Countries (993 persons) (Table 6.7).

**Table 6. 7: Distribution of Population by Place of Residence, Sex and Country of Citizenship; Tabora Region, 2022 PHC**

## Chapter 7

### Survival of Parents

#### Key Points

- Eighty out of ten (88.4%) of children under 18 years have both parents alive.
- Almost one out of eleven (11.6%) of children under 18 years is orphan with proportionately higher in rural areas (4.9%) than urban area (4.0%).
- About seven percent (6.8%) of children under 18 years are orphans with one parent dead.
- About five percent (4.8%) of children under 18 years are orphans with both parent dead.
- Sikonge District Council has the highest proportion (15.8%) of orphans than other councils in Tabora Region.

#### 7.1 Introduction

This chapter presents information on survival of parents at regional levels. The information helps to determine the extent of orphan hood in a society for making evidence-based decisions. In Tanzania, an orphan is defined as a child under 18 years of age who has lost one or both parents<sup>3</sup>. This definition is consistent with the United Nations definition.

The death of parents has a substantial impact on the wellbeing and survival of young children, especially those who are young and most vulnerable (under 5 years old). The death of a mother if other factors remain unchanged, has a significant impact and is associated with 2 to 50 times increased risk of death among the under-5 children left behind<sup>4</sup>. Orphans with no family or community support face risky life situations including: having no family social network; lacking food and healthcare and sometimes having to assume the role of heads of household and taking care of their younger siblings. Furthermore, information on survival of parents was collected from all children under 18 years with respect to a child's biological parents and not adopting or fostering parents.

<sup>3</sup> The law of Child Act Cap 56, 2019

<sup>4</sup> Hani K. Atrash,(2012)

## 7.2 Survival of Parents

Results indicate that 88.4 percent of all children under 18 years in Tabora Region has both parents alive. The percentage of children with both parents alive decreases with increasing age from 91.8 percent for children with one year to 81.3 percent for children aged 17 years. The results further show that the percentage of children their fathers dead and mothers alive is higher (4.9%) than those with their fathers alive and mothers dead (1.9%). In addition, the patterns of survival of parents are similar for both male and female children (Tables 7.1, 7.2 and 7.3).

### 7.2.1 Survival of Parents by Council

Results from Table 7.4 show that survival of both parents for children under 18 years for all councils in Tabora Region ranges from 84.2 percent to 90.3 percent. Urambo District Council has the highest percentage of children with both parents alive (90.3%) while Sikonge District Council has the least (84.2%).

The results further show that Kaliua District Council has the highest percentage (5.7%) of children with Father Dead Mother Alive compared with other councils. Furthermore, both Kaliua District and Nzega Town Council has the highest percentage of children with Father Alive Mother Dead (2.2%) while Sikonge District has the highest percentage of Father Dead Mother Dead (9.6%).

### 7.3 Orphanhood

The results from Figure 7.1 reveal that in Tabora Region, 11.6 percent of children under 18 years are orphans. The results further show that about seven percent (6.8%) of the children lost either father or mother and about five percent (4.8%) lost both of their parents. The percentage of children who are orphans is slightly higher in rural areas (4.9%) than urban areas (4.0%). The percentage of orphans varies across councils, ranging from 3.2 percent in Urambo District to 9.6 percent in Sikonge District.

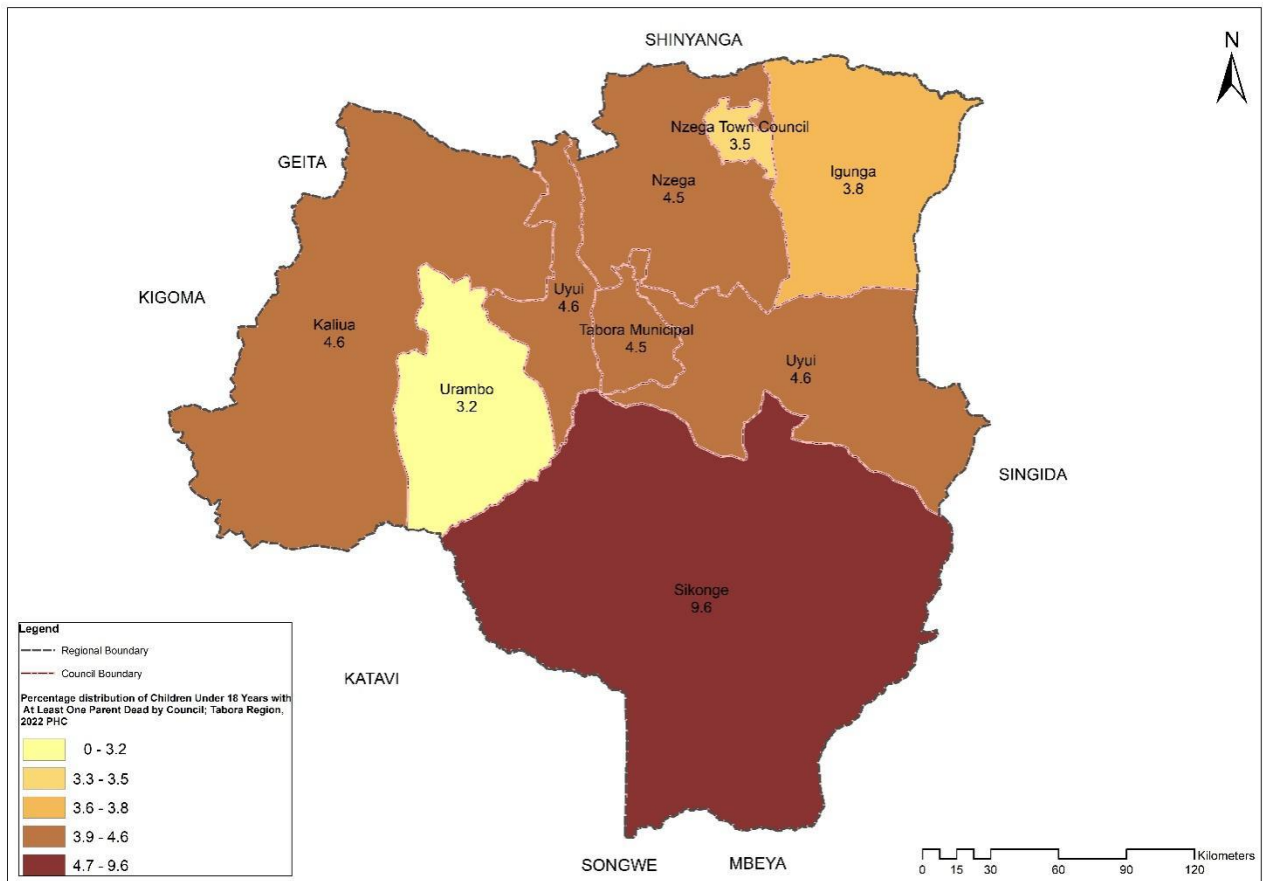

**Figure 7. 1: Orphanhood Status by Place of Residence; Tabora Region, 2022 PHC**

## Chapter 8

### Education, Literacy and Numeracy

---

#### Key Points

- More than three quarter (73.7%) of persons aged 15 years and above in Tabora Region are literate; 69.9 percent in rural and 94.3 percent in urban areas.
- Numeracy rate among persons aged five years and above is 64.3 percent. It is higher among males (65.3%) than females (63.4%)
- Sixty three percent (63.4%) of the primary school population age (7-13) are attending school and 31.6 percent had never been to school.
- Net Enrolment Rate (NER) for primary schools is 63.4 percent. It is higher (89.0%) in urban than in rural areas (59.8%).
- Majority (82.4%) of population aged four years and above attained primary education and 13.1 percent completed ordinary level secondary school education.
- About three percent (2.6%) of the population aged four years and above attained university and other related education level.

#### 8.1 Introduction

Education is one of the most important factors in social and economic development of any society. This chapter presents the status of education, literacy and numeracy for the persons aged five years and above in Tabora Region. It also provides information on school attendance, school dropout and education attainment for persons aged four years and above.

#### 8.2 Literacy

Literacy is the ability to read and write with an understanding of a short simple sentence in any language. It excludes the ability to only write or sign one's own name or write memorised phrases. The literacy rate in 2022 PHC is measured for persons aged five years and above who could read and write in: Kiswahili only; English only; both Kiswahili and English or any other language. No test was administered to verify those who were really literate.

Results show that out of 2,779,284 persons aged five years and above 1,725,253 persons (62.1 %) in Tabora Region are literate. The literacy rate is higher among males (64.1%) than females (60.2%). The literacy rates are generally higher among young population compared with older population. The highest literacy rate of 73.7 percent is observed for age group 15-19 years. Literacy rates below 65 percent is observed among children in the age group of 5-9 years and and persons aged 55 years and above. These results indicate a positive impact of the universal primary education and increased enrolment in secondary education resulting from free education programme (Table 8.1).

Literacy rate in urban areas is substantially higher (86.8%) than in rural areas (57.5%). Males are more literate than females in both rural and urban areas as presented in Tables 8.2, 8.3 and Figure 8.1.

### 8.2.1 Literacy for Selected Age Groups

Results show that youth (using national and international definition) have literacy rate above 73.7 percent and the rate is the highest (75.0%) among Secondary School in the age group of 14-17 years. Literacy rates are higher in urban than in rural areas, and for most of the selected age groups, males are more likely to be literate than females in both rural and urban areas.

Literacy rate among population in primary school age in Tabora Region is 59.7percent and among secondary school age population is 75.0 percent. The literacy rate among primary and secondary population is higher among females than males in both rural and urban areas (Table 8.4).

**Table 8. 4: Literacy Rates by Place of Residence, Sex and Selected Age Groups; Tabora Region, 2022 PHC**

### 8.2.2 Adult Literacy

The results show that, the adult literacy rate for persons aged 15 years and above is 68.0 percent. The literacy rate is higher among males (73.2%) than females (63.2%). Furthermore, results reveal that in urban areas the adult literacy rate is higher (89.2%) than in rural areas (63.5%). Males are more literate than females in both rural and urban areas (Figure 8.2).

**Figure 8. 2: Adult Literacy Rates for Person Aged 15 Years and Above by Sex and Place of Residence; Tabora Region, 2022 PHC**

Literacy rates among adults increased from 59.0 percent in 2012 to 68.0 percent in 2022. Results also indicate that, the increase in adult literacy rate is more pronounced among females (10.3 percentage point difference) than males (7.7 percentage point difference) (Figure 8.3).

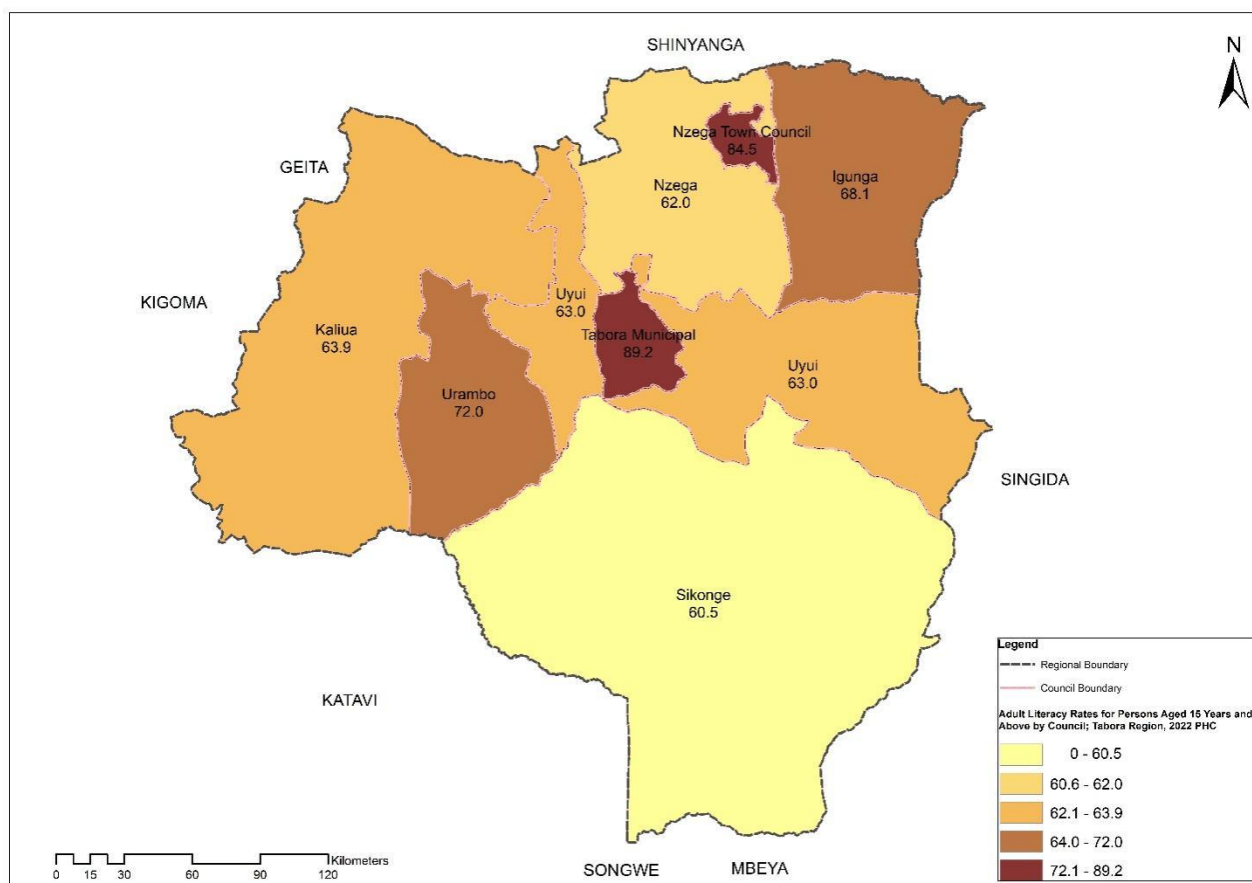

**Figure 8. 3: Adult Literacy Rates for Person Aged 15 Years and Above by Sex; Tabora Region, 2012 and 2022 PHCs**

Adult literacy rates vary across councils, ranging from 60.5 percent in Sikonge District to 89.2 percent in Tabora Municipal. Other council with adult literacy rate above 80 percent is Nzega Town 84.5%. Other councils besides Sikonge District with relatively low adult literacy rates are Nzega District (62%) and Uyui District (63.0%)

(Map 8.1).

**Map 8. 1: Adult Literacy Rates for Persons Aged 15 Years and Above by Council; Tabora Region, 2022 PHC**

Results reveal that, adult literacy rates increased from 59.0 percent in 2012 to 68.0 percent in 2022 censuses with an overall of difference of 9.0 percentage point. Across councils, the highest percentage point change is 18.8 percent observed in Igunga District (Table 8.5).

### 8.2.3 Adult Literacy in Different Languages

The results in Table 8.6 and Figure 8.4 show that in Tabora Region literacy rate is 68.0. It is highest in Kiswahili only (55.7%), followed by literacy in both Kiswahili and English (11.1%) and is lower for other languages (0.3%). In addition, results show that, illiteracy rates increase with age.

**Figure 8. 4: Percentage Distribution of Adult Population Aged 15 Years and Above by Literacy Rate; Tabora Region, 2022 PHC**

Table 8.7, Figures 8.5 and 8.6 show that, the percentage of individuals who are literate in Kiswahili only is higher in urban (60.3%) than in rural areas (54.7%), The similar situation is also observed for those who are literate in both Kiswahili and English to be higher in urban (27.9%) than in rural areas (7.5%). In urban areas, females are more literate in Kiswahili only (61.3%) than males (59.1%).

### 8.3 Numeracy

Numeracy is the ability to access, use, interpret and communicate simple mathematical information and ideas, to engage in and manage mathematical demands for a range of situations in adult life. Basic numeracy skills consist of comprehending fundamental arithmetic operations such as addition, subtraction, multiplication and division.

Numeracy rate in this chapter is defined as the percentage of a population aged five years and above who can perform simple arithmetic calculations. No test was administered to verify those who were numerate. The questions on numeracy were asked in private households only.

Out of 2,728,801 persons aged 5 years and above in Tabora Region, 1,755,966 persons (64.3%) are numerate. The numeracy rate is slightly higher among males (65.3%) than females (63.4%). It is also noted that numeracy rates are higher (more than 70%) for youth aged 15 to 59 years and is relatively low (33.5%) for young population (5 -9 years) and older ages (80 years and above) which is 40.9 percent. Numeracy rate is higher (84.1%) in urban areas than in rural areas (60.8%). Furthermore, the rate is higher among males than females in both rural and urban areas (Table 8.9 and Figure 8.7).

**Table 8. 9: Numeracy Rate of Population Aged Five Years and Above by Place of Residence, Sex and Five Year Age Groups; Tabora Region, 2022 PHC**

**Figure 8. 7: Numeracy Rates for Persons Aged Five Years and Above by Sex, and Place of Residence; Tabora Region, 2022 PHC**

The results reveal that numeracy rate for the youth aged 15–35 years is 75.3 percent. The rate is slightly higher (77.1%) for males than females (73.1%) whereas among teenagers the rate is higher (74.7%) for females than males (73.6%). Numeracy rate for working age population (15-64 years) is higher (89.5%) in urban than in rural areas (71.7%). A similar pattern is observed for other selected age groups.

Results reveal that numeracy rate for persons in the secondary school age (14-17 years) in Tabora Region is 75.0 percent and 57.2 percent for persons in the primary school age (7–13 years). The rate of numeracy for secondary school age is higher (76.0%) for females than for males (74.1%). A similar pattern is observed in rural and urban areas for persons in both primary and secondary school age (Table 8.10).

### 8.3.1 Adult Numeracy Rates

Numeracy rate for persons aged 15 years and above in Tabora Region is 73.4 percent and is higher (88.4%) in urban areas than in rural areas (70.3%). The numeracy rate is higher for males than females across every council. The rates vary across councils ranging from 66.1 percent in Sikonge District to 87.4 percent in Tabora Municipal (Table 8.11 and Map 8.2).

**Table 8. 11: Number and Numeracy Rate for Adult Population Aged 15 Years and Above by Sex, Place of Residence and Council; Tabora Region, 2022 PHC**

## 8.4 Education

This section provides information on school attendance status, education attainment, net and gross school enrolment.

### 8.4.1 School Attendance Status

School attendance refers to attendance at any regular authorised or licensed educational institution or programme for organised learning at any level of education at the time of the census. Informal training in particular skills, which is not part of the recognised educational structure was not considered under school attendance.

Results show that, out of 2,906,329 persons aged four years and above, 26.6 percent have completed school at different levels of education system, 24.8 percent are attending school, 11.4 percent have dropped out and 37.2 percent have never been to school. Percentage of females who have never been to school is higher (39.3%) compared with males (35.0%).

Furthermore, results show that percentage of dropouts is higher (12.9%) among males than females (9.9%) (Figure 8.8).

**Figure 8. 8: Percentage Distribution of Population Aged Four Years and Above by Sex and School Attendance Status; Tabora Region, 2022 PHC**

More than sixty percent (63.4%) of the primary school population age (7-13) are attending school and 31.6 percent had never been to school. Among secondary school population aged 14-17 years, 47.3 percent are attending, 22.1 percent had never been to school, while 15.8 percent had completed school. The rate of dropouts is higher among secondary school age population (14.8%) than primary school age population (4.3%) (Table 8.12).

Among all councils, Sikonge District has the highest percentage of persons who had never attended school (46.4%) and the lowest is Tabora Municipal with 13.7 percent (Figure 8.10). Regarding sex differentials for never attended school category, the percentage is higher for females than males in all councils in both rural and urban areas.

Urambo District is the council with the highest (14.7%) dropout rate while Tabora Municipal has the lowest rate (8.7%). Results also show that the percentage of dropouts is higher among males than females in all councils (Tables 8.15, 8.16 and 8.17).

Among persons aged four years and above who joined primary school education, 43.4 percent completed, 37.3 percent are still attending and 19.3 percent dropped out. Those who joined ordinary level secondary school education, 40.8 percent completed, 41.1 percent are still attending and 18.1 percent dropped out. Those who were admitted for university education, 64.5 percent completed, 34.2 percent are still attending and 1.3 percent dropped out. Drop out is minimal at the university level compared with other levels of education. Moreover, slightly more females dropped out at university level (1.4%) than males (1.2%). The percentage of persons who completed primary education, secondary education (ordinary and advanced level) and university level is higher in urban areas compared with rural areas (Tables 8.18, 8.19 and 8.20).

### 8.4.2 Net and Gross School Enrolment

Enrolment rate depict the proportions of children currently attending school which is important indicator in assessing access to education among the population. In primary education, Net Enrolment Rate (NER) is defined as the number of children aged 7-13 years who are attending school divided by the total number of children in that age group. The 7-13 years age group is the official primary school age in Tanzania. On the other hand, Gross Enrolment Rate (GER) is defined as the number of children attending primary school regardless of age divided by the total number of children aged 7-13 years.

#### Net Enrolment Rate

Results show that, for primary schools NER is 63.4 percent; it is higher (89.0%) in urban areas compared with rural areas (59.8%). Furthermore, results show that NER is higher (66.6%) for females than for males (60.2%) (Table 8.21).

**Table 8. 21: Net Enrolment Rates in Primary Schools by Place of Residence, Sex and Council; Tabora Region, 2022 PHC**

Council	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
<b>Total</b>	<b>63.4</b>	<b>60.2</b>	<b>66.6</b>	<b>59.8</b>	<b>56.6</b>	<b>63.2</b>	<b>89.0</b>	<b>87.5</b>	<b>90.4</b>
Nzega Town	86.9	83.9	89.7	NA	NA	NA	86.9	83.9	89.7
Nzega District	59.2	54.6	63.9	59.1	54.5	63.8	92.6	90.4	94.6
Igunga District	61.9	57.1	66.7	59.3	54.3	64.4	77.8	75.2	80.3
Uyui District	59.8	57.2	62.4	59.2	56.6	61.8	85.3	83.1	87.5
Urambo Distric	69.1	66.8	71.5	66.5	64.0	69.1	91.9	92.1	91.6
Sikonge District	52.5	50.3	54.8	50.6	48.5	52.8	91.8	91.0	92.5
Tabora Municipal	89.1	87.6	90.7	78.5	75.1	82.0	94.7	94.5	94.9
Kaliua District	61.1	58.8	63.5	60.9	58.6	63.3	94.1	94.6	93.6

NER in primary schools varies across councils ranging from 52.5 percent in Sikonge District to 89.1 percent in Tabora Municipal. Two (2) Councils have NER above the regional average of 63.4 percent (Figure 8.11).

**Figure 8. 11: Net Enrolment Rates in Primary Schools by Council; Tabora Region, 2022 PHC**

Results show an improvement in net enrolment rates from 2002 to 2022 censuses. The overall NER in primary schools increased from 52.2 percent in 2002 to 63.4 percent in 2022 census. Improvement is more remarkable among females (from 52.5 % to 66.6%) compared with males (from 51.8 to 60.2%) as shown in Figure 8.12.

**Figure 8. 12: Primary School Net Enrolment Rates by Sex; Tabora Region, 2002, 2012 and 2022 PHCs**

The rural NER in primary schools increased from 48.3 percent in 2002 to 59.8 percent in 2022 and the urban NER increased from 81.4 percent in 2002 to 89.0 percent in 2022 (Figure 8.13).

**Figure 8. 13: Primary School Net Enrolment Rates by Place of Residence; Tabora Region, 2002, 2012 and 2022 PHCs**

### 8.4.3 Gross Enrolment Rate

The primary school Gross Enrolment Rate (GER) in Tabora Region is 63.4 percent. GER is higher (60.2%) in urban areas than in rural areas (59.8%) and is higher (66.6%) for

females than males (%). A gross rate exceeding hundred percent could be due to over age and underage enrolment of children (Figure 8.14).

**Figure 8. 14: Primary Schools Gross Enrolment Rates by Place of Residence and Sex; Tabora Region, 2022 PHC**

Results show GER decreased from 70.8 percent in the 2012 to 63.4 percent in 2022. The decrease is higher among females (from 71.5 % to 66.6%) compared with males (from 70.2% to 60.2%) as shown in Figure 8.15.

**Figure 8. 15: Primary School Gross Enrolment Rates by Sex; Tabora Region, 2012 and 2022 PHCs**

#### 8.4.4 Education Attainment

Education attainment is the highest level completed by an individual within the country's official education system. Table 8.22 shows that, majority (82.4%) of population aged four

years and above attained primary education and 13.1 percent completed ordinary level secondary school education. More females had attained primary education (83.3%) compared with males (81.7%). The same pattern is observed in rural and urban areas. Results also show that 2.6 percent attained university education.

**Table 8. 22: Number and Percentage of Population Aged Four Years and Above by Sex, Level of Educational Attainment and Place of Residence; Region, 2022 PHC**

## Chapter 9

### Employment and Economic Activities

---

#### Key Points

- The current unemployment rate in Tabora Region is 3.6 percent; the rate is higher for females (3.9 %) than for males (3.3%).
- The overall Labour Force Participation Rate (LFPR) of Tabora Region is 83.4 percent; the rate is 82.4 in rural and 87.8 in urban areas.
- Agriculture, forestry and fishing industry has the highest proportion (76.5%) of the total employment.
- Majority of employed persons (66.2%) are agricultural and fishery workers.
- Agricultural sector constitutes the highest share of employed persons (78.3%).
- There are 213,578 persons aged 15 years and above engaged in informal non-agricultural economic activities, with more females (107,604 persons) than males (105,974 persons).

#### 9.1 Introduction

This chapter presents findings on current economic activities for persons aged 15 years and above in Tabora Region. In particular, it provides information on people's participation in economic activities, occupation, sector of employment and industry. Further, information on informal non-agricultural economic activities is also presented. Analysis in this chapter does not include population enumerated in institutions.

Statistics on employment and economic activities are important inputs for planning labour related policies and programmes to ascertain the size and structure of the working age population and its distribution by main occupation, industry and employment status. Such information from census on employment and economic activities is critical in setting the baseline data for making appropriate interventions to enhance labour force participation.

## 9.2 Current Economic Activity Status

Economic activity status refers broadly to economically active population which includes employed and unemployed population. It also includes inactive population covering all persons who were without work during the reference period and were not available for work.

Table 9.1 indicates that, out of 1,682,972 persons aged 15 years and above, 1,267,756 persons are in employment, 47,263 are unemployed and 367,953 are economically inactive. Moreover, results show that, there are 1,047,330 employed persons in rural areas and 220,426 in urban areas. Further, results show that there are 318,572 inactive persons in rural and 49,381 in urban areas.

**Table 9. 1: Number of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment), Sex and Place of Residence; Tabora Region, 2022 PHC**

Sex/ Place of Residence	Economic Activity Status			Total
	Employed	Unemployed	Inactive	
<b>Both Sexes</b>	<b>1,267,756</b>	<b>47,263</b>	<b>367,953</b>	<b>1,682,972</b>
Male	621,277	20,901	158,013	800,191

Urban	220,426	20,051	49,381	289,858

The results further show that in Tabora Region 75.3 percent of persons aged 15 and above are employed. The council with highest percentage of employed persons is Tabora Municipal (77.3%) while the council with the lowest is Kaliua (73.5%) (Figure 9. 1).

**Figure 9. 1: Percent Distribution of Persons Aged 15 Years and Above by Economic Activity Status (Relaxed International Definition of Employment) and Councils; Tabora Region, 2022 PHC**

Table 9.2. shows that in rural areas the total number of persons aged 15 years and above who are employed ranges from 35,404 in Tabora Municipal Council to 234,571 in Kaliua District Council. In urban areas the number ranges from 1,115 in Nzega District Council to 101,198 in Tabora Municipal Council.

### 9.3 Current Unemployment

Unemployment is an indicator of labour under-utilization and it is measured as a percentage of the labour force that is currently unemployed. According to the relaxed international definition of unemployment, unemployed persons comprise those who in the seven days prior to the census/survey enumeration were not engaged in any economic activity but were available for work regardless of whether they took any effort to look for work or not.

Figure 9.2 presents current unemployment rates in Tabora Region based on the relaxed international definition of unemployment. The results reveal that the current unemployment in Tabora Region is 3.6 percent. The rate is higher (8.3%) in urban than rural areas (2.5%). Unemployment rate is slightly higher between females (3.9%) among males (3.3%). (Figure 9.2).

**Figure 9. 2: Current Unemployment Rate of Persons Aged 15 Years and Above by Sex and Place of Residence; Tabora Region, 2022 PHC**

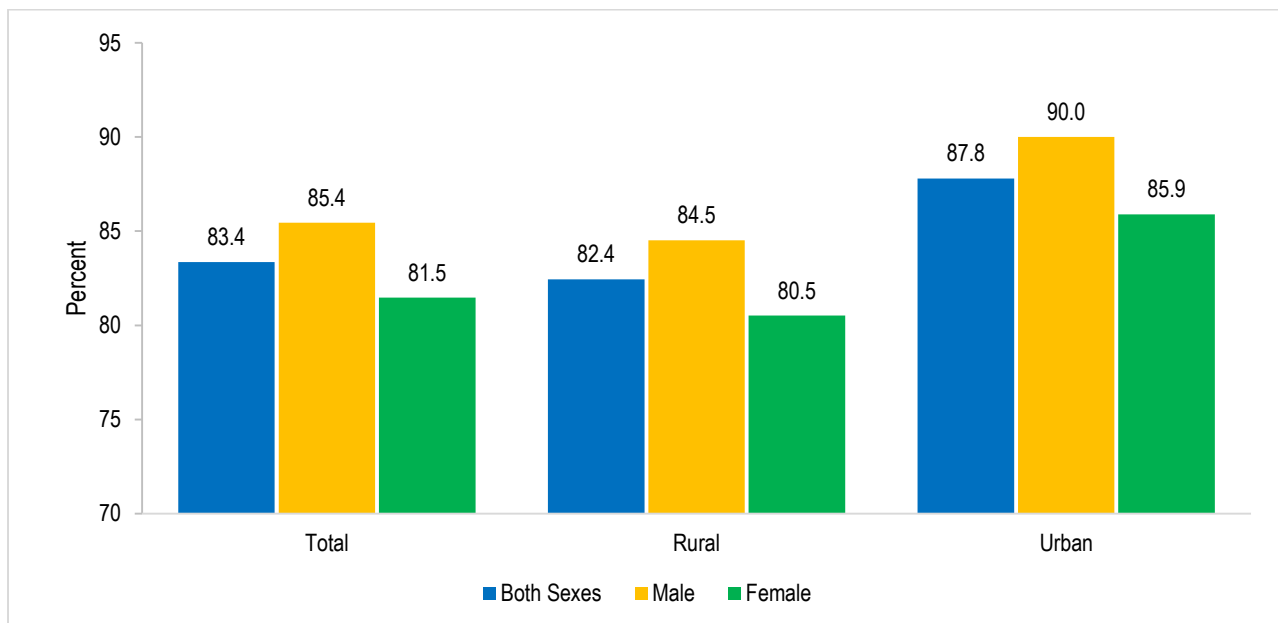

#### 9.4 Labour Force Participation Rate

The Labour Force Participation Rate (LFPR) provides an estimate of the size of the labour supply currently available for production of goods and services in a country. It is defined as the number of persons in the labour force as a percentage the population aged 15 years and above. It provides important insight into various policy decisions to enhance performance of the labour market.

Figure 9.3 shows that, the overall Labour Force Participation Rate (LFPR) of Tabora Region is 83.4 percent; it is higher in urban areas (87.8%) than rural areas (82.4%) in Results also reveal that LFPR is higher for males (85.4%) than for females (81.5%).

**Figure 9. 3: Labour Force Participation Rates for Persons Aged 15 Years and Above by Place of Residence and Sex; Tabora Region, 2022 PHC**

### 9.5 Employment by Industry

Employment by industry provides information on relative importance of different economic activities in the labour market. This information is useful for identifying broad shifts in employment and stages of development. Classification of employment by industry in this report is based on the International Standard Industrial Classification of all Economic Activities (ISIC) Revision 4.

Results show that agriculture, forestry and fishing industry have the highest proportion (76.5%) of the total employment. The industry of ‘whole sale and retail trade, repair of motor vehicles and motorcycles’ ranked second with 4.6 percent, followed by accommodation and food services activities with 3.4 percent (Table 9.4).

**Table 9. 4: Percentage Distribution of Employed Population Aged 15 Years and Above by Place of Residence, Sex and Industry of Employment; Tabora Region 2022 PHC**

Industry of Employment	Total			Rural			Urban

## 9.6 Occupation Status

This section highlights the distribution of employed persons aged 15 years and above by occupation and sex. The information provides critical insights into the economic, societal and individual aspects of the labour market. It also helps to make right decisions related to labour policies, education and skills training programmes as well as facilitating effective manpower planning. Occupation is classified according to the Tanzania Standard Classification of Occupations (TASCO). Results reveal (66.2%) percent of employed persons in Tabora Region are agricultural and fishery workers followed by in elementary occupation (14.3%) and craft and related workers (12.2%) occupations (Table 9.5).

**Table 9. 5: Percentage Distribution of Employed Population Aged 15 Years and Above by Sex and Occupation; Tabora Region, 2022 PHC**

Occupation	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female

## 9.7 Employment by Sector

This section presents distribution of employed persons aged 15 years and above by sex and sector of employment. The information is an important component for conducting macroeconomic analysis, policy formulation and effective labour interventions. Table 9.6 reveals that agricultural sector accounts for the highest (78.3%) share of employed persons followed by private sector (11.2 %) and household activities (8.0 %).

**Table 9. 6: Percentage Distribution of Employed Persons Aged 15 Years and Above by Place of Residence, Sex and Sector; Tabora Region, 2022 PHC**

Sector	Total			Rural			Urban		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female
<b>Total</b>	<b>1,267,756</b>	<b>621,277</b>	<b>646,479</b>	<b>1,047,330</b>	<b>514,660</b>	<b>532,670</b>	<b>220,426</b>	<b>106,617</b>	<b>113,809</b>

Household activities	8.0	7.9	8.0	7.5	7.7	7.2	10.3	9.0	11.6

## 9.8 Informal Non-Agricultural Economic Activities

The 2022 PHC refers to informal non-agricultural economic activities as activities which are unregulated and often without formal recorded business transactions and normally occurring outside the framework of formal business regulations and systems. It needs small capital and typically involves individuals such as street vendors and small-scale production activities without legal licenses or adhering to formal reporting and taxation requirements. Activities often operate within local communities to cater for immediate needs and therefore contributes to informal sector's overall economic performance.

Table 9.7 shows that there are 213,578 persons aged 15 years and above engaged in informal non-agricultural economic activities, with 107,604 females and 105,974 males. Moreover, results reveal that majority of persons engaged in informal sector comprise youth aged 15-35 years; accounting for 61.3 percent of total employment, followed by adults aged 36-64 years with 33.9 percent. The lowest participation in the informal sector is noticed for adults aged 65 years and above with 4.8 percent. A similar distribution is observed in rural and urban areas.

**Table 9. 7: Percentage Distribution of Population Aged 15 Years and Above Engaged in Informal Non-Agricultural Economic Activities by Place of Residence, Sex and Selected Age Groups; Tabora Region, 2022 PHC**

# Chapter 10

## Disability

---

### Key Points

- There are 224,987 persons in Tabora Region, equivalent to 9.0 percent of the total population aged 7 years and above living with some form of disability.
- Most common type of disability is seeing (2.4%) followed by walking (1.5%).
- Most Persons With Disabilities (20.6%) reported inborn as a major cause of their disability.
- Fifty five percent (55.3%) of Persons With Disabilities reported Diseases as a cause of their disabilities.
- The use of assistive devices among Persons With Disabilities is very low

### 10.1 Introduction

This chapter presents information on disability including prevalence of disability by sex and region/council, causes of disability and use of assistive devices. Disability is a broad term with various definitions depending on different aspects at international, regional and national levels. For instance; the Washington Group on disability statistics defines Persons With Disabilities (PWDs) as *“all those persons who are at greater risk than the general population in experiencing restrictions in completing specific tasks or activities due to limitations in their basic functioning such as walking, seeing, hearing or memory – even if such limitations are ameliorated by use of assistive devices, a supportive environment or plentiful resources”* (United Nations, 2001). The World Health Organisation explains that disability refers to an umbrella term covering impairments, activity limitations and participation.

At National level, the Tanzania National Policy on Disability of 2004 defines disability as a loss or limitation of opportunities to take part in the normal life in the community on an equal

level with others due to physical, mental or social factors. All three definitions use the concept of activity limitation in defining disability rather than physical impairment.

Tanzania started collecting data on disability through the population census for the first time in 2002. However, the definition of disability used was based on impairment rather than activity limitation. The 2012 and 2022 PHCs used the broad definition of disability that is based on activity limitation to collect disability statistics. More specifically, the 2022 PHC defines PWDs as all persons with physical, mental, intellectual or sensory impairment which may hinder or limit their full and effective participation in society on an equal footing with others.

The main domains of disabilities included in the 2022 PHC were: visual, hearing, communication, mental, physical and self-care. The 2022 PHC also collected information on other disabilities, including: albinism, cleft palate, hydrocephalus, spinal bifida, spinal cord injuries, epilepsy psoriasis and storiasis. Other types were autism, mental health, mental disorder, persons with short stature, leprosy and persons with hunchback. The following are illustrations of some types of “other disabilities”. Ethical clearance for using the pictures on types of disability was obtained from the relevant authority<sup>5</sup>

<sup>5</sup> Shirikisho la Vyama vya Watu wenye Ulemavu Tanzania (SHIVYAWATA)

Albinism

Cleft Palate

Hydrocephalus

Spinal bifida

Spinal cord injuries

psoriasis

Storiasis

Autism

Mental health

Persons with short stature

Leprosy

Persons with Hunchback

Disability statistics are important for promotion of evidence-based policy and programming decisions and effective monitoring. Moreover, disability statistics are essential for governments and stakeholders for enhancement of inclusiveness of PWDs in all aspects of life by removing the barriers faced by people with disabilities. Data on disability from the Census also provides a benchmark for collecting disability statistics from other household-based sample surveys.

Note that, population of PWDs and total population used to compute disability prevalence does not include persons that were enumerated in institutions.

## 10.2 Prevalence of Disability

The 2022 PHC results show that 224,987 persons in Tabora Region (105,835 males and 119,152 female), which is equivalent to 9.0 percent of the total regional population aged 7 years and above have some form of disability. The rate is slightly higher among those living in urban (9.7%) than in rural areas (8.9%).

Among the six major domains of disabilities, seeing (2.4%) and Walking (1.5%) are the most common while self-care is the least with 0.2 percent of the population aged seven years and above reporting this disability. With the exception of remembering, communication and self-care, seeing for the remaining types of disability (i.e hearing, communication, remembering and other types of Disability) the proportion of PWDs is slightly higher for females than males (Table 10.1).

## 10.2.1 Prevalence of Disability by Councils

The prevalence of disability varies across councils, ranging from 8.4 percent in Uyui District to 11.0 percent in Urambo District. Four councils have prevalence of disability above the regional average of 9.0 percent (Figure 10.1 and Table 10.1).

**Table 10. 1: Disability Prevalence Among Persons Aged 7 Years and Above by Type of Disability, Place of Residence and Council; Tabora Region, 2022 PHC**

**Figure 10. 1: Prevalence of Disability for Persons Aged 7 Years and Above by Council; Tabora Region, 2022 PHC**

### 10.2.2 Prevalence of Disability by Sex and Council

The 2022 PHC results show that, prevalence of disability is slightly higher for females than males in all councils in the Region. Urambo District has the highest percent of PWDs (11.2%) followed by Nzega Town Council (10.8%) while Uyui District count for the lowest percent of PWD (8.6%) (Table 10.2).

**Table 10. 2: Disability Prevalence by Sex, Place of Residence and Council; Tabora Region, 2022 PHC**

### 10.2.3 Prevalence of Disabilities by Age and Sex

Results show that disability prevalence increases with age for both males and females. The level of disability prevalence in Tabora Region is almost the same for females and males below 44 years. Thereafter, the rate increases relatively sharply for females than for males reaching 43.0 percent for females and 44.9 percent for males aged 80 years and above (Figure 10.2).

**Figure 10. 2: Prevalence of Disability by Age Groups and Sex; Tabora Region, 2022  
PHC**

### 10.3 Prevalence of Persons with Albinism

Tabora Region has a total of 2,968 persons with albinism which is (0.09) percent of the total population in the region. Out of that, 1,771 persons (0.11%) are males and 1,197 (0.07%) are females. Below one percent of persons with albinism are living in urban areas (0.13%)

and (0.08%) live in Rural areas. Councils with large numbers of persons with albinism are Kaliua District (727 persons), Nzega District (446 persons) and Igunga District (433 persons) (Table 10.3 and Table 10.4).

**Table 10. 3: Number and Percentage of Persons with Albinism by Sex, Place of Residence and Council; Tabora Region, 2022 PHC**

#### 10.4 Population with Other Types of Disability

Results reveal that 61,579 persons in Tabora Region which is equivalent to 2.47 percent of the regional population have other types of disability. Spinal cord injuries (0.28%) and Mental health (0.27%) are the most common types of other disability. The percentage of persons with mental health issues and mental health disorders is high among males compared with females. The same pattern is observed in both rural and urban areas (Table 10.5).

## 10.5 Causes of Disabilities

There are different causes of disabilities within the population. Some persons are born with disabilities (congenital malformations), or a disability may be a result of a disease, accident, physical violence, drug abuse or pregnancy complications.

The 2022 PHC results reveal that diseases are major causes for all types of disability in Tabora Region. Almost 6 out of 10 PWDs (55.3%) reported disease as a cause of their disability while 20.6 percent were born with disability. Relatively high proportion of PWDs (81.8.%) living in rural areas compared with 18.2 percent in urban areas. Another notable cause of disabilities in the region is accidents (6.8%).

More males with disabilities (8.9%) reported accidents as a major cause of their disability compared with females (Tables 10.6 and 10.7).

**Table 10. 6: Percentage Distribution of Persons with Disability by Cause of Disability, Place of Residence and Sex; Tabora Region, 2022 PHC**

## 10.6 Use of Assistive Devices

Assistive devices help PWDs to perform their daily activities more effectively. Devices enable PWDs to participate in social economic activities such as education, employment and hence improve their social-economic conditions.

Results reveal that, the use of assistive devices among PWDs is very low. Except for persons with albinism of whom 20.4 percent are using assistive devices, for other types of disability, the use is very low. For example, less than 1 percent (0.6%) of persons with hearing disabilities and 1.4 percent of those with communication disabilities are using assistive devices. Use of assistive devices is relatively higher in urban than rural areas for all types of disability (Table 10.8).

**Table 10. 8: Percentage of Persons with Disability Using Assistive Devices by Sex and Type of Disability; Tabora Region, 2022 PHC**

# Chapter 11

## Land Ownership

---

### Key Points

- Thirty percent (30.3%) of the population aged 15 years and above in Tabora Region own land.
- About thirty five percent (34.7%) of males in Tabora Region own land alone compared with 26.3 percent of females.
- Forty five percent (45.4%) of persons aged 15 years and above who own land in Tabora Region do not possess legal land ownership documents.
- Among the land owners possessing legal documents in Tabora Region, 18.7 percent own land alone

### 11.1 Introduction

This chapter describes the status of land ownership which includes information on persons owning land, type of ownership and possession of legal land ownership documents. Land ownership is a process of acquiring land tenure or right of occupancy from a relevant Government authority. The process provides the legal notes or documents to own or occupy the land. Land ownership in Tanzania can be categorized into three main tenure systems namely Customary Land Tenure, Right of Occupancy (ROO) and Government Land.

Respondents were asked about possession of any legal documents pertaining to land ownership. Legal documents for land ownership in this chapter comprise Certificate of Right of Occupancy (title deed), residential license, letter of offer/acknowledgment of payment, customary ownership, contract, land registration card (Zanzibar) and official documents from Mtaa/Village/Shehia.

## 11.2 Land Ownership Status

Information on land ownership status was collected from individuals in private households only and is categorised into individuals owning land alone; jointly; both alone and jointly; or do not own land. In this report land ownership is irrespective of type of use.

Results reveal that 30.3 percent of persons aged 15 years and above in Tabora Region owns land. Ownership of land is higher (32.0%) among rural population compared with the urban population (22.1%). Land ownership by sex reveals that proportions of females owning land is lower than that of males (Table 11.1).

**Table 11. 1: Percentage Distribution of Persons Aged 15 Years and Above Owning Land by Place of Residence and Sex; Tabora Region, 2022 PHC**

Place of Residence	Sex	Land Ownership		Percentage of Persons Owning Land
		Total Population	Number of Individuals Owning Land	
<b>Total</b>	<b>Both Sexes</b>	<b>1,682,972</b>	<b>509,796</b>	<b>30.3</b>
	Male	800,191	277,676	34.7
	Female	882,781	232,120	26.3
<b>Rural</b>	<b>Both Sexes</b>	<b>1,393,114</b>	<b>445,695</b>	<b>32.0</b>
	Male	666,276	242,522	36.4
	Female	726,838	203,173	28.0
<b>Urban</b>	<b>Both Sexes</b>	<b>289,858</b>	<b>64,101</b>	<b>22.1</b>
	Male	133,915	35,154	26.3
	Female	155,943	28,947	18.6

About sixty-eight percent (67.8%) of persons aged 15 years and above do not own land, 10.7 percent own land alone and 18.6 percent own land jointly. The ownership pattern in Tabora Region reveals that the percentage of females owning land alone (6.9%) is significantly below that of males (14.8%). However, the percentage of females owning land jointly is slightly lower (18.5%) than that of males (18.7%). The results further show that the percentage of females owning land jointly in both rural and urban areas are (20.3% and 10.1% respectively) while that of males are (20.4% and 10.0% respectively) (Table 11.2).

**Table 11. 2: Percentage Distribution of Persons Aged 15 Years and Above by Land Ownership Status, Place of Residence and Sex; Tabora Region, 2022 PHC.**

Place of Residence	Sex	Land Ownership Status					
		Total	Alone	Jointly	Both alone and jointly	Does not own	Don't Know
Total	<b>Both Sexes</b>	<b>1,682,972</b>	<b>10.7</b>	<b>18.6</b>	<b>1.1</b>	<b>67.8</b>	<b>1.9</b>
	Male	800,191	14.8	18.7	1.2	63.5	1.8
	Female	882,781	6.9	18.5	0.9	71.7	2.0
Rural	<b>Both Sexes</b>	<b>1,393,114</b>	<b>10.5</b>	<b>20.4</b>	<b>1.1</b>	<b>66.0</b>	<b>2.0</b>
	Male	666,276	14.6	20.4	1.3	61.8	1.8
	Female	726,838	6.7	20.3	0.9	69.9	2.1
Urban	<b>Both Sexes</b>	<b>289,858</b>	<b>11.3</b>	<b>10.1</b>	<b>0.8</b>	<b>76.4</b>	<b>1.4</b>
	Male	133,915	15.4	10.0	0.9	72.3	1.4
	Female	155,943	7.7	10.1	0.7	80.0	1.5

Results show that percentage of persons who do not own land in Tabora Region is 67.8 percent, while those who own land (alone, jointly or both) is 30.4 percent. Out of all persons who own land, the proportion is higher (14.8%) for males than for females (6.9%) (Figure 11.1).

**Figure 11. 1: Percentage Distribution of Persons aged 15 Years and Above by Land Ownership Status and Sex; Tabora Region, 2022 PHC.**

Table 11.3 presents land ownership status for persons aged 15 years and above disaggregated into broad age groups and place of residence. It is observed that land is mostly owned by persons aged 20-64 years (82.8%) followed by those aged 65 years and above (10.1%). Similar ownership patterns by age with differentiated magnitudes are observed in rural and urban areas for 20-64 years (82.3% and 86.1% respectively). On the other hand, the proportion of persons aged 15-19 years owning land in rural areas is higher (7.7%) than those in urban areas (3.2%). Regardless of whether a person lives in rural or urban areas, both males and females of age group 20-64 are more likely to own land than any other age group.

Findings reveal that, Sikonge District Council has a relatively higher proportion (38.1%) of persons aged 15 years and above owning land compared with other councils. On the other hand, council with small proportions of persons owning land is Tabora Municipal I (24.4%) (Figure 11.2).

**Figure 11. 2: Percentage Distribution of Population Aged 15 Years and Above by Land Ownership Status, and Council; Tabora Region, 2022 PHC**

**11.3 Possession of Legal Land Ownership Documents**

The 2022 PHC results show that 45.4 percent of persons aged 15 years and above in Tabora Region own land without any legal documents. For those possessing legal documents, 18.7 percent own land alone, 33.6 percent own land jointly and 2.2 percent own land alone and jointly. The results further reveal that ownership of legal documents is in favour of females owning land jointly (39.3%) compared with males (29.7%) (Table 11.4).

Further, 47.3% of persons owning land in rural areas do not have any legal documents compared with 31.8 percent of persons in urban areas. Among persons with legal documents in rural areas, 16.2 and 2.2 percent own land jointly and alone respectively. On the other hand, 35.9 percent of persons possessing legal documents in urban areas own land alone while 29.8 percent own land jointly. Results also show that in rural areas, possession of legal documents is higher among females owning land jointly (39.3%) whereas in urban areas, it is higher (41.9%) among males owning land alone (Table 11.4).

## Chapter 12

### Housing Characteristics, Assets Ownership and Environmental Control

---

#### Key Points

- Seven in ten (69.0%) households in Tabora Region own houses they live in.
- More than fortyone percent (41.9%) of households use improved sources of drinking water.
- About thirty Four percent (33.8%) of households use improved toilet facilities.
- More than seventy eight percent (78.9%) of households in rural areas and 21.2 percent in urban areas use firewood for cooking.
- Percentage of households using electricity from national grid for lighting increased from 11.3 percent in 2012 to 20.2 percent in 2022.
- Nearly four in ten (38.9%) households use burning of solid waste as the main method of solid disposal.

#### 12.1 Introduction

The 2022 PHC collected information on household ownership and characteristics as an indicator on household wealth information. This chapter presents information on tenure and ownership status of the household's main dwelling; legal right over the ownership of land where the main dwelling is built; building materials for the main dwelling and number of rooms available for sleeping. In addition, it also presents information on the main source of drinking water; sanitation; main source of energy used for cooking and lighting; environmental control methods used by households; ownership of assets and equipment. The questions on housing characteristics, assets ownership and environmental control were asked in private households only.

## 12.2 Housing Ownership and Tenure Status

Households were asked about the ownership of houses where they live and the availability of legal documents over the land where the house is built. In Tabora Region, 69.0 percent of private households are living in their own houses; it is higher (73.9%) in rural areas than in urban (49.7%). The percentages of male headed household (70.2%) owning houses is higher than female headed households (66.7%). Across councils, Nzega District has the highest percentage (79.4 %) of households living in their own houses while Tabora Municipal has the lowest percentage (52.7%) (Figure 12.1 and Table 12.1).

**Figure 12. 1: Percentage Distribution of Households by Ownership Status of the Main Dwelling and Place of Residence, Tabora Region, 2022 PHC**

### 12.2.1 Legal Ownership of Land

In Tabora Region, 34.4 percent of the households do not have legal documents for the land where their houses are built while 7.6 percent have title deeds. Among households that live in their own houses 35.1 percent have customary type of ownership. Households in urban areas are more likely (28.5%) to have title deed documents than those in rural areas (4.1%). On the other hand, rural household living in their own houses are more likely (38.3%) to have customary type of ownership than those living in urban areas (16.1%). Female-headed households are more likely (8.6 %) to have title deeds than male-headed households (7.1%).

Across councils the percentage of households with title deeds ranges from 3.0 percent in Nzega District to 26.3 percent in Tabora Municipal (Table 12.2).

### 12.3 Household Characteristics

Household characteristics describe the living conditions of households that are useful in guiding policy interventions. The living conditions include the type of building materials for roofing, walls and floor as well as number of rooms for sleeping.

#### 12.3.1 Roofing Materials

In Tabora Region, 65.7 percent of households are living in houses with improved roofing materials (iron sheet, tiles, concrete and asbestos). At the council level, more than 60 percent of households in all councils are living in houses with improved roofing materials except for Nzega District (52.9%) and Uyui District (56.9 %) (Figure 12.2).

**Figure 12. 2: Percentage Distribution of Households with Improved and Unimproved Roofing Material by Council; Tabora Region, 2022 PHC**

Table 12.3 show that, the majority of households in urban areas (93.5%) are living in houses roofed with iron sheets compared with 58.2 percent of households in rural areas. The percentage of households living in houses roofed with iron sheets ranges from 52.6 percent in Nzega District Council to 92.0 percent in Tabora Municipal. The council with the highest

percentage (44.5%) of households living in houses roofed with grass or leaves is Nzega District.

**Table 12. 3: Percentage Distribution of Households by Type of Roofing Material of Main Dwelling, Place of Residence/Headship and Council; Tabora Region, 2022 PHC**

Place of Residence	Total Number of Household	Type of Roofing Materials							
		Iron sheets	Tiles	Concrete	Asbestos	Grass/Leaves	Mud and Leaves	Plastics/Box	Tent

### 12.3.2 Floor Covering Materials

The percentage of households in Tabora Region living in houses with improved floor covering materials (cement, ceramic tiles, parquet or polished wood, terrazzo, vinyl or asphalt strips) is 40.4 while 59.6 percent live in houses with non-improved materials (wood planks, palm or bamboo, earth or sand, dung, containers or tents). Across councils, households with improved floor covering materials range from 27.7 percent in Uyui District to 76.3 percent in Tabora Municipal (Figure 12.3).

**Figure 12. 3: Percentage Distribution of Households Living in Households with Improved and Unimproved Floor Covering Materials by Council; Tabora Region, 2022 PHC**

The results further show that, 58.7 percent of households in Tabora Region are living in dwellings with earth or sand floors followed by cement (37.1%). In urban areas, about seven out of ten households (68.6%) are living in houses with cement as floor covering materials followed by earth or sand (19.4%). In rural areas, most households (68.6%) are living in houses that have earth or sand as the floor covering materials followed by cement (29.1%).

Percentage of households living in houses with cement as floor covering materials in the main dwelling is highest (65.2%) in Tabora Municipal Council followed by Nzega Town Council (62.4%). The council with the lowest percentage of households living in houses with

cement as floor covering materials in the main dwelling ranges are Uyui District (26.3 percent) and Nzega District (29.0%) (Table 12.4).

**Table 12. 4: Percentage Distribution of Households by Type of Floor Covering Material of Main Dwelling, Place of Residence/Headship and Council; Tabora, 2022 PHC**

<sup>6</sup> Others include households living in containers or tents.

### 12.3.3 Wall Materials

Most households in Tabora Region, have their house walls built with sundried bricks 47.8, followed by followed by baked bricks (28.4%) and cement/rock bricks and mud /poles each with 10.9%. In urban areas, more than two-fifth of households (41.0%) use cement bricks as wall materials, followed by baked bricks (35.1%). In rural areas, 12.7 percent of the households are living in houses built with poles and mud as the main wall materials, followed by baked bricks (26.7%).

Tabora Municipal Council has the highest (45.7%) percentage of households with houses built using cement/rock bricks. Kaliua and Sikonge District Councils have less than 3 percent (2.3%, and 2.5% respectively) of households living in houses built with cement/rock bricks (Table 12.4).

**Table 12. 5: Percentage Distribution of Households by Type of Wall Materials of Main Dwelling, Place of Residence/Headship and Council; Tabora Region, 2022 PHC**

### 12.3.4 Rooms for Sleeping

The number of people sleeping in a room is a major determinant of crowding and hence affects household members' health. A room for sleeping in the 2022 PHC is defined as any space within or outside the dwelling of the household which is currently used by household members for sleeping. This implies that any space within the dwelling can be termed as a room for sleeping if currently used by household members for sleeping purpose. By this definition any other space such as a sitting room, dining room or even stores were included if they were used for sleeping.

About three in ten (27.2%) households have one room for sleeping, 36.3 percent have two rooms and 19.9 percent have three rooms. On the other hand, 16.6 percent of households have more than three rooms for sleeping. There is no difference between male and female headed households in regard to the average number of rooms for sleeping.

The proportion of households with only one room for sleeping is higher (39.0%) in urban than in rural areas (24.2%). Tabora Municipal Council has the highest (38.1%) percentage of households with one room for sleeping compared with other councils. The Council with the lowest percentage of households with one room for sleeping is Nzega District (22.9%) (Figure 12.5 and Table 12.6).

**Figure 12. 4: Percentage Distribution of Households by Number of Rooms for Sleeping and Place of Residence; Tabora Region, 2022 PHC**

## 12.4 Water and Sanitation

Inadequate and inequitable access to water and sanitation services along with inappropriate hygiene practices at household level, largely contributes to barriers that hinder efforts to support realisation of personal rights to live in a safe and clean environment.

### 12.4.1 Source of Drinking Water

Sources of drinking water are categorised into improved and unimproved sources. Improved sources of water include piped water, tube well/borehole, protected dug well, protected spring, rainwater, bottled water, carts with small tank/drum and tanker truck. On the other hand, unimproved sources include unprotected dug well, unprotected spring and surface water.

Results show that in Tabora region 41.9 percent of households use improved sources of drinking water. Across councils, three councils namely Tabora Municipal (85.2%), Nzega Town (80.6%), Igunga District (45.7%) have high percentages of households using improved sources of drinking water. On the other hand, three councils with less than 30

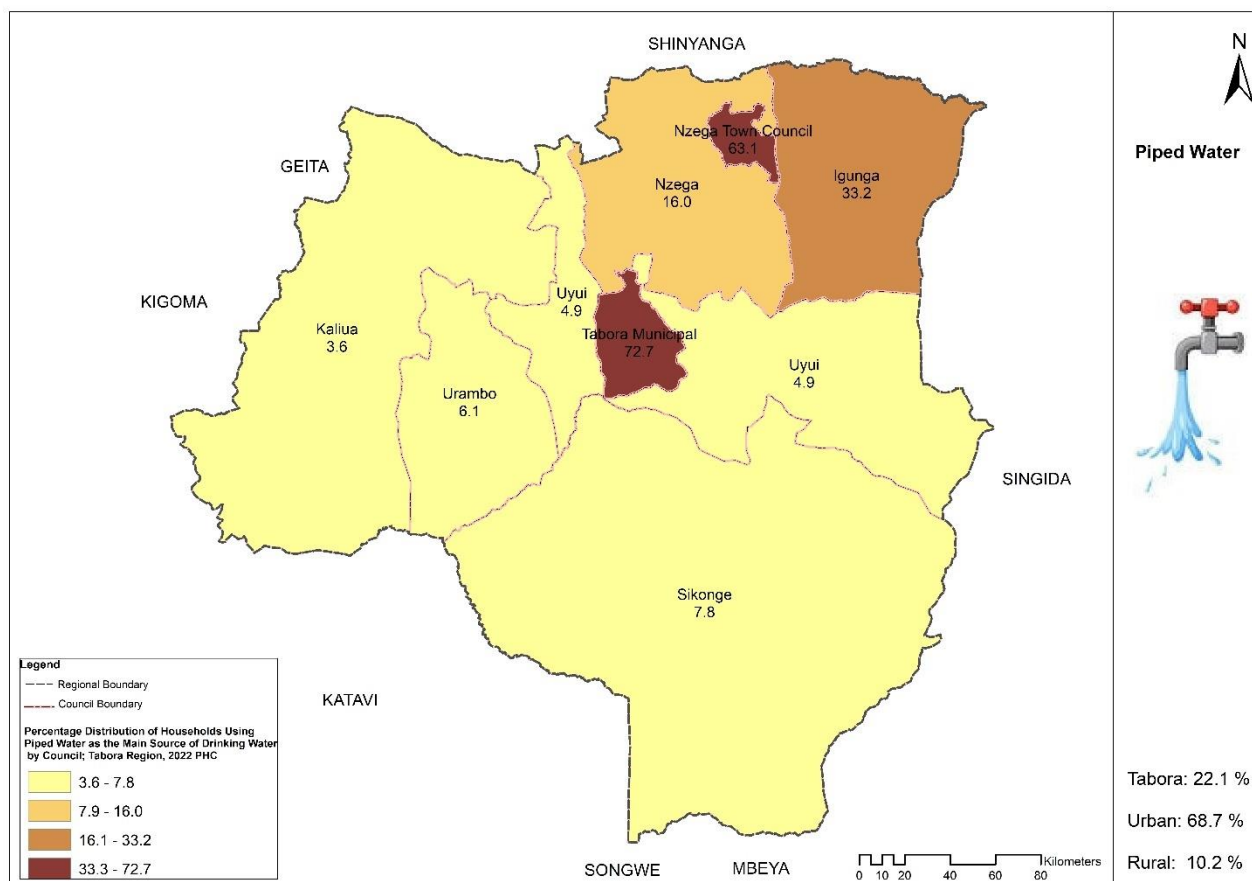

percent of their households using improved sources of drinking water are Uyui District (21.7%), Urambo District (29.5%) and Sikonge District (29.2%) (Figure 12.5).

**Figure 12. 5: Percentage Distribution of Households Using Improved and Unimproved Sources of Drinking Water by Council; Tabora Region, 2022 PHC**

Piped water is one of the improved water sources which include piped water into dwelling, piped water in the yard/plot, public tap/standpipe, neighbours tap or standpipe. Overall, half of households (48.2%) in Tabora Region are using unprotected dug well as the main source of drinking water (Map 12.1 and Table 12.7).

**Map 12. 1: Percentage Distribution of Households Using Piped Water as the Main Source of Drinking Water by Council; Tabora Region, 2022 PHC**

Households living in rural areas are more likely to use unprotected dug well than those living in urban areas (57.7% and 10.5% respectively). Households in urban areas having piped water into their dwelling or yard is 33.1 percent, while 20.1 percent are getting water from a neighbours' piped supply and 10.4 percent from a public tap. In rural areas, 1.9 percent of households have piped water into their dwelling or yard, 0.9 percent get drinking water from a neighbours' piped supply and 6.6 percent from a public tap. Percentage of households using piped water ranges from 3.6 percent in Kaliua District Council to 72.7 percent in Tabora Municipal Council (Map 12.1 and Table 12.7).

**Table 12. 7: Percentage Distribution of Households by Main Source of Drinking Water, Place of Residence, Headship and Council; Tabora Region, 2022 PHC**

Note: Surface water includes river, dam, lake, pond, stream, charco dam, canal and irrigation channels

### 12.4.2 Sanitation Facilities

The 2022 PHC collected information on toilet facilities used by households. Toilet facilities are categorised into two groups; improved and unimproved. Improved facilities include flush or pour flush toilet that flushes the water and waste to a piped sewer system, septic tank, covered pit or unknown destination; ventilated improved pit (VIP) latrine, pit latrine with washable slab and with lid, pit Latrine with washable slab without lid and pit latrine without washable slab (soil slab). Unimproved facilities include pit latrine without slab (open pit) and bucket.

More than thirty percent (33.8%) of households in Tabora Region use improved toilet facilities. In rural households' 22.4 percent are using improved toilet facilities; this is below the Third Tanzania Five Years Development Plan target of 75 percent by 2025/26. Tabora Municipal Council has the highest percentage (74.3%) of households using improved toilet facilities, while Uyui District Council has the lowest (19.3%). The most commonly (52.2%) used toilet facilities in private households are pit latrines without slab (open pit). A higher proportion of households using pit latrines without slab/open pit are in rural than in urban areas (60.7% in rural and 18.8% urban). The percentage of households without toilet facilities (open defecation) ranges from 1.9 percent in Tabora Municipal Council to 21.3 percent in Nzega District Council (Figure 12.6 and Table 12.8).

**Figure 12.6: Percentage Distribution of Households with Improved, Unimproved and without Toilet Facility by Council; Tabora Region, 2022 PHC**

## **12.5 Sources of Energy**

The 2022 PHC collected information on households' main source of energy for cooking and lighting. The information collected enabled assessment of access to clean sources of energy (electricity, solar energy and gas). Use of clean energy as an alternative source has two benefits which are (a) to reduce the heavy reliance on wood as the main source of fuel for cooking hence protecting the environment and (b) to improve the health of the population especially women through reduced exposure to smoke from wood fuels.

### **12.5.1 Sources of Energy for Cooking**

Table 12.9 shows that the majority of households in Tabora Region use firewood (67.2%) as the main source of energy for cooking followed by charcoal (24.3%). In rural areas 78.9 percent of households use firewood for cooking while in urban is 21.2 percent. The percentage of households using charcoal for cooking in rural areas is 14.6 percent and in urban areas it is 62.7 percent.

Across councils, the percentage of households using firewood for cooking ranges from 24.1 percent in Tabora Municipal to 83.1 percent in Nzega District. On the other hand, the percentage of households using charcoal for cooking ranges from 11.1 percent in Nzega District to 58.8 percent in Tabora Municipal (Table 12.9).

**Table 12. 9: Percentage Distribution of Households by Main Source of Energy for Cooking, Place of Residence, Headship and Council; Tabora Region, 2022 PHC**

Clean energy includes electricity, gas, biogas, solar, generator or private sources and wind generated electricity. The use of clean energy for cooking by households has increased from 0.5 percent in 2012 to 7.1 percent in 2022. At council level, there is high increase of households using clean energy in Tabora Municipal from 2.3 percent in 2012 to 14.9 percent in 2022 and Nzega Town from 0.0 percent in 2012 to 10.1 percent in 2022 (Figure 12.7).

**Figure 12.7: Percentage Distribution of Households Using Clean Energy for Cooking by Council; Tabora Region, 2012 and 2022 PHCs**

**12.5.2 Sources of Energy for Lighting**

Results show that, 47.0 percent of households use solar energy as the main source of energy for lighting, followed by 20.2 percent of households using electricity from the national grid (TANESCO). Electricity is predominantly used in the urban households (63.8%) compared with the rural households (9.2%). Use of electricity for lighting ranges from 6.6 percent in Nzega District Council to 60.1 percent in Tabora Municipal Council.

Councils with lower percentages of households using electricity as the main source for lighting have relatively high percentages of households using solar energy. The Councils

with the highest percentage of households using solar as the main source of energy e of lighting is Nzega District (61.2%) followed by Uyui District (57.5%) (Figure 12.9).

**Figure 12. 8: Percentage Distribution of Households Using Electricity and Solar as Main Sources of Energy for Lighting by Council; Tabora Region, 2022 PHC**

Figure 12.9 shows that, there is an increase in use of national grid electricity for lighting in Tabora Region. Percentage of households using electricity from the national grid for lighting increased from 11.3 percent in 2012 to 20.2 percent in 2022. A similar increase is observed in all councils.

**Figure 12. 9: Percentage Distribution of Households Using Electricity from National Grid for Lighting by Council; Tabora Region, 2012 and 2022 PHCs**

## 12.6 Household Environmental Control

### 12.6.1 Waste Disposal

Waste disposal is a collection, processing and recycling or deposition of the waste materials generated by human being. Waste materials are either in form of liquid or solid and effect of their components may be either hazardous or inert on health and environment. Improper disposal of waste is a burden to public health provision. This section discusses the major means used by households in disposing solid and electronics waste.

Nearly four out of ten (38.9%) of households' in Tabora Region use burning of solid waste as the main method of solid disposal, followed by burying or pit (14.9%). In urban areas, 41.7 percent of private households use regularly collection as means of disposing solid waste, followed by burning methods (32.7%) and burying or pit (11.8%). In rural areas 40.4 percent of households use burning followed by burying or pit (15.7%) and open space (11.3%). Tabora Municipal Council has a higher percentage (42.7%) of households using regular collection of solid waste followed by Nzega Town Council (34.1%) (Table 12.11).

**Table 12.11: Percentage Distribution of Households by Main Means of Solid Waste Disposal, Place of Residence, Headship and Council; Tabora Region, 2022 PHC**

Place of Residence/Headship	Total Number of Households	Means of Solid Waste Disposal								
		Regularly Collected	Irregularly Collected	Burnt	Roadside Dumping	Burying/ Pit	Open Space	Ocean/ Lake/ River/ Shore	In the Farm/ Manure	Bush/ Ravine

## 12.6.2 Waste Collection Authorities

The results show that Councils (22.7%) and private individuals (63.8%) are the main authorities that usually collect solid waste in private households. Out of the total households which reported that household waste is collected, households in rural areas are more likely to use private individuals (84.9%) as waste collectors while urban households are more likely to use Councils (31.7%) (Figure 12.10 and Table 12.12).

**Figure 12.6: Percentage Distribution of Households by Type of Authorities Collecting Waste and Place of Residence; Tabora Region, 2022 PHC**

### 12.6.3 Electronic Waste Disposal

Electronic waste (e-waste) refers to electronic products that are unwanted, not working and nearing or at the end of their useful life. Electronic waste are products that have exhausted their utility value through either redundancy, replacement, or breakage and include goods such as computers, televisions, radios, cell phones, copiers, fax machines, refrigerators, washing machines and microwaves. The method through which households use to dispose their electronic waste can pose a risk to public health.

Results show that 56.6 percent of households in Tabora Region mix electronic waste with other refuse. Households living in urban areas (72.6%) and 52.5 percent of those in rural areas mix electronic waste with other refuse. The percentage of households mixing electronic waste with other refuse as main method of disposal is highest (74.4%) in Tabora Municipal Council followed by Nzega Town (69.0%). All councils have more than 50 percent of their households mixing electronic waste with other refuse except for Nzega District Council (46.8%) and Sikonge District (47.3%) (Table 12.13).

**Table 12.123: Percentage Distribution of Households by Methods of Disposing Electronic Waste by Place of Residence, Headship and Council; Tabora Region, 2022 PHC**

## 12.7 Ownership of Assets

Ownership of assets refers to possession of any personal property regardless of the purpose it serves. Any asset owned by any member of the household was treated as a household asset in the 2022 PHC. The information collected about assets in this section are in three groups: transport, housing and agricultural equipment. Questions on ownership of specific assets aim at obtaining non-monetary poverty indicators.

### 12.7.1 Transport Assets

Transport assets are motorised equipment (i.e., motor vehicles, motorcycles or vespa and tri-motorcycles), non-motorised equipment (i.e., bicycles and tricycle) and draft animals (i.e., donkey or camel). In Tabora Region, bicycle is the main transportation asset owned by households (43.9%) followed by motorcycles (7.4%) and motor vehicles (1.4%). The percentage of households owning bicycles is higher in male-headed households (49.1%) compared with female-headed households (34.3%). The percentage of households owning bicycle is higher (46.5%) in rural areas than in urban areas (33.8%). Across councils, the percentage of households owning bicycles ranges from 35.6 percent in Tabora Municipal to 56.3 percent in Nzega District (Table 12.14).

**Table 12. 14: Percentage Distribution of Households by Type of Transport Assets owned, Place of Residence, Headship and Council; Tabora Region, 2022 PHC**

### 12.7.2 Housing and Cooking Assets

Housing and cooking assets include a house electric or charcoal iron, electric or gas cooker and refrigerator or freezer. The 2022 PHC results show that, 71.3 percent of households own houses. The percentage of households in Tabora Region owning houses is higher (76.8%) in rural than in urban areas (49.6%). The percentage of male headed households owning houses is slightly higher (73.9%) than for female headed households (66.7%). Other housing and cooking assets owned by households are electric iron (6.0%), charcoal iron (9.7%), electric or gas cooker (4.2%) and refrigerator or freezer (3.5%). Except for ownership of houses, households living in urban areas are more likely to own cooking assets than households living in rural areas (2.2%) (Table 12.15).

**Table 12.15: Percentage Distribution of Households by Type of Housing and Cooking Assets owned, Place of Residence, Headship and Council; Tabora Region, 2022 PHC**

### 12.7.3 Agricultural Assets

Agricultural assets include plough, power tiller, hand hoe, oxen, land or farm and tractor. In Tabora Region, 68.8 percent of households own land or farm and 64.6 percent own a hand hoe. The percentage of households owning land or farm is higher (74.3%) among households living in rural areas than in urban areas (47.0%). Households in rural areas are also more likely (68.0%) to own hand hoes than those in urban areas (51.0%).

Across councils, ownership of land or farm ranges from 50.4 percent of households in Tabora Municipal to 82.5 percent of households in Nzega District. On the other hand, the percentage of households owning hand hoe ranges from 54.4 percent in Tabora Municipal to 75.7 percent in Nzega District (Table 12.16).

## Chapter 13

---

### Access and Use of Information and Communication Technology by Individuals and Households.

---

- Seven out of ten (75.2%) person aged 15 years and above own mobile phones.
- About nine percent (8.7%) of persons aged 15 years and above own both smart phones and non-smart phones.
- Less than one percent (0.4%) of persons aged 15 years and above own only smart phones or tablets
- Sixty six percent (66.1%) of persons aged 15 years and above own only non-smart phones
- Eight out of ten households (82.9%) have at least one person aged 4 or above who owns a mobile phone in Tabora Region.
- Less than one percent (0.7%) of persons aged 15 years and above own desktop and one percent (1.3%) own laptop computers.
- Majority of persons aged 15 years and above (78.1%) use ICT equipment for communication.
- Non-smartphones are mostly owned by individuals with training after secondary education (98.6%).
- Smartphones are mostly owned among individuals with training after secondary (76.2%)

### 13.1 Introduction

Information, Communication and Technology (ICT) is increasingly setting the pace of global socio-economic development. Countries are prioritising investment in the digital ecosystem to transform and modernise their economies in recognising ICT's developmental role in facilitating and accelerating overall development. ICT statistics have been an agenda in the International statistical community for many years, and it has been receiving increasing attention due to its impact on the economy and society in general.

The availability of ICT infrastructure and its use continues to grow. The Internet, in particular, is transforming society through the growing amount of information and related tools available. These advances and recognition that ICTs drive society and economic development have led to the need for reliable, comprehensive and comparable statistics to support Government decisions.

This chapter describes the status of individuals and household access and the use of Information and Communication Technology (ICT), in Tabora Region which includes ownership and use of ICT equipment in Tabora Region. Although the information on ICT access and use by households and individuals was collected from all persons aged four years and above, for the purpose of this report, some indicators are analysed based on persons aged 15 years and above to facilitate national, regional comparisons of ICT Indicators. In addition, ICT indicators in this report comply with the International Telecommunication Union (ITU) Guidelines for Measuring ICT Access and Usage by Individuals and Households.

Information collected during 2022 PHC, includes access and usage of radios, televisions, computers, mobile phones, fixed-line telephones and internet facilities for all individuals aged 4 years and above. Access, usage and ownership of ICT equipment are key in linking communities, facilitating businesses and empowering communities socially and economically.

## 13.2 Households with Radio

The 2022 PHC results reveal that 31.0 percent of households in Tabora Region have a radio<sup>7</sup>. Higher proportion of households with radio are in urban areas (56.7%) than rural areas (24.5%). The Council with the highest percentage of households with radio is Nzega Town Council (100.0%), followed by Tabora Municipal Council (45.4%) and Sikonge District Council (30.2%). Kaliua District Council has the lowest percentage of households with radio (19.6%) (Table 13.1).

## 13.3 Ownership of Television

According to the 2022 PHC results, 20.1 percent of the households in Tabora Region owns televisions. Analysis by the place of residence indicates that urban areas have a higher proportion (55.1%) of households with television sets than rural areas (11.3%). Across councils, Nzega Town Council has the highest proportion of households owning television (100 %), followed by Tabora Municipal Council (38.1%) and Ulambo District Council (17.0%). On the other hand, Kaliua District Council has the lowest proportion (9.1%), (Table 13.1).

## 13.4 Households with Landline Telephone

According to the Tanzania Communications Regulatory Authority (TCRA) communication statistics report, landline telephone market is characterised by general stagnation, manifested by drastically decreasing subscriptions from 176,367 fixed telephone lines in 2012 to 85,976 in 2022.

The 2022 PHC results reveal that less than one percent (0.9%) of households in Tabora Region has landline telephones. The percentage of households with landline telephone in urban areas (3.2%) is higher than that of rural areas (0.4%). Nzega Town Council has the highest percentage of households with landline telephone (11.0%), while Urambo District Council has the lowest percentage (0.3%) (Table 13.1).

## 13.5 Households with Internet Facility

The 2022 PHC results reveal that 0.3 percent of households in Tabora Region have Internet<sup>8</sup> facilities. Urban areas have higher proportion (0.6%) of households with Internet

---

<sup>7</sup> For the purpose of the 2022 PHC, radio was limited to a standalone unit only.

<sup>8</sup> 'Household with Internet access' means that the Internet is generally available for use by all members of the household at any time, regardless of whether it is actually used.

facilities than in rural areas (0.2%). Tabora Municipal Council has the highest percentage of households with internet facilities (0.8%), followed by Nzega Town Council and Urambo (0.3 % each), Nzega, Sikonge and Kaliua District Councils (0.2% each) have relatively small percentages of households with internet facilities (Table 13.1).

**Table 13. 1: Percentage Distribution of Households Owning Selected ICT Equipment and Selected Household Attributes by Place of Residence and Council; Tabora Region, 2022 PHC**

## 13.6 Mobile Phones

### 13.6.1 Ownership of Mobile Phones by Individuals

An individual is considered to own a mobile cellular telephone if he/she has a mobile phone device with at least one active SIM card for personal use. It includes those with a mobile phone for personal use that is not registered under his/her name but it excludes individuals with only active SIM cards (s) and not mobile phones.

Results reveal that 75.2 percent of the population aged 15 years and above in Tabora Region own any mobile phone. Individuals in urban areas reported higher proportions of households owning mobile phones (86.4%) than rural areas (72.9%). Ownership of mobile phones is higher among males (83.3%) than females (67.9%) (Figure 13.1).

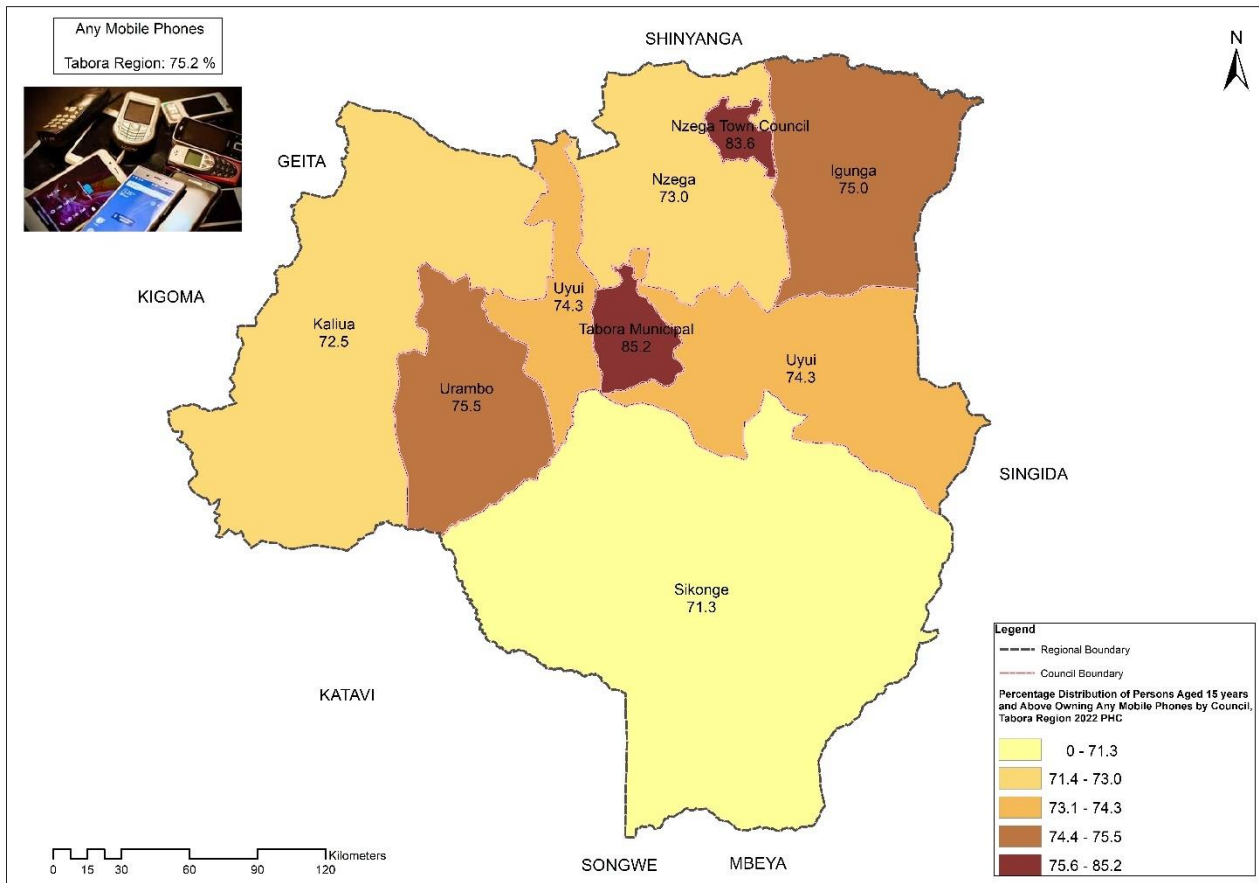

**Figure 13. 1: Percentage Distribution of Persons Aged 15 Years and Above Owning Mobile Phones by Sex and Councils ; Tabora Region, 2022 PHC**

### 13.6.2 Ownership of Mobile Phones by Households

Ownership of mobile phones by phone type indicates that in Tabora Region 82.9 percent of households have at least one member aged four years and above owning any type of mobile phone. The proportion of households owning a mobile phone is higher (91.8%) in urban areas than in rural areas (80.7%). In urban areas, the proportion of households that own smart mobile phone is 37.2 percent and 91.8 percent for non-smartphone; which is higher than in rural areas (10.0% and 80.7%, respectively).

Across all councils in Tabora Region, the proportion of households with smartphones range between 9.3 percent and 36.9 percent of household . Results also indicate that Tabora Municipal has the highest percentage of households that owns smart mobile phones (36.9%), followed by NzegaTown Council (31.2%) while Nzega District recorded 9.3 percent which is the lowest (Table 13.3).

**Table 13. 3: Percentage Distribution of Households with at Least One Member Aged Four Years and Above Owning Mobile Phone by Type, Place of Residence and Council; Tabora Region, 2022 PHC**

### 13.6.3 Ownership of Mobile Phones by Age Groups and Sex

Non-smartphone is the most widely owned phone type among persons aged four years and above in Tabora Region; it is owned by 51.6 percent of all individuals (53.6% males and 49.6% females). When the data is disaggregated by locality, 49.4 percent of individuals in rural areas own a non-smartphone compared with 63.9 percent in urban areas (Table 13.4).

The proportion of ownership of smartphone is the highest (17.5%) for individuals in the age group 30-34 years while for non-smartphone, it is the highest (91.6%) which is in the age group 45 -49 years. The results also show that ownership of non-smart phone increases steadily from age group 5-9 years and attains its maximum point in the age group 55- 59, thereafter declines steadily to persons of age groups 80 and above. ownership of smart phone increases from age group 5 – 9 years and attains its maximum position in the age group 25 -29 and then steadily declines to older age groups (Figure 13.2).

### 13.6.4 Ownership of Mobile Phones by Level of Education

The 2022 PHC results reveal that non-smartphones are mostly owned by individuals with training after secondary education (98.6%) compared with other levels of education and least owned by those with Secondary School O - level (77.4%). Analysis by sex shows that, non-smartphone ownership is higher among males in all education levels (Table 13.5).

**Table 13. 5: Number and Percentage of Population Aged 15 Years and Above Owning Non-smartphones by Place of Residence, Sex and Education Level Attained, Tabora Region; 2022 PHC**

### 13.6.5 Usage of Mobile Phones by Individuals

Results reveal that 81.4% of individuals aged 15 years and above in Tabora Region are using non-smartphones and 9.4 percent are using smartphones. The proportions of individuals using non-smart-phone is higher (89.3%) in urban areas than in rural areas (79.8%). A similar situation is observed in the usage of smartphones, where the proportion of individuals in urban areas (27.0%) is higher than that of rural areas (5.8%). Generally, proportion of males who are using mobile phones are higher than females for both smart and non-smart phone.

Across all councils, the proportion of individuals using smartphone is highest in Tabora Municipal (26.5%) and non-smartphone is highest in Nzega Town Council (88.9%). On the other hand, Nzega District Council has the smallest (5.5%) proportion of individuals using smartphones while is Sikonge District Council (71.1%) has the lowest proportion of individuals using non-smartphone (Table 13.7).

### 13.6.6 Usage of Mobile Phones by Type, Age Group and Sex

Majority of persons (51.6%) aged four years and above in Tabora Region used non-smartphones in the last three months prior to the 2022 PHC. The proportion of males (53.6%) using non-smart phones is higher than that of females (49.6%). Similar situation is observed in the usage of smart phone where the proportion of population that use smart phone is higher in urban areas (19.3%) compared to rural areas (3.5%) (Table 13.8).

Non-smart phones are mostly used by individuals aged 20 – 79 years while smart phones are mostly used by individuals aged 20 – 39 years. The use of non-smartphones increases steadily from age 5-9 up to age 20-24, then increases at a slower pace up to age 25-29, thereafter decreases slowly down to age group 80 and above (Figure 13.3).

### 13.6.7 Type of Use of ICT Equipment

The Census further sought to establish the use of ICT equipment (mobile phones and computers) for all persons aged 15 years and above. The results show that majority of persons aged 15 years and above in Tabora Region mostly use ICT equipment for communication (78.1%), followed by sending and receiving money (37.2%), while online businesses recorded about two percent (2.3%) which is the least (Table 13.9).

Results show that persons who are living in both rural and urban areas mostly use ICT equipment for communication (76.2% for rural and 87.0% for urban), followed by sending and receiving money (32.5% for rural and 59.7 % for urban) and searching or receiving information (20.7% for rural and 38.1% for urban). However, the likelihood of using ICT equipment for any purpose is higher in urban areas than in rural areas (Table 13.9). The use of ICT equipment by individuals aged 15 years and above varies across Councils. The most common use of ICT equipment across councils is for communication followed by sending and receiving money and searching/receiving information. Online business was the least use of ICT equipment across councils (Table 13.9).

**Table 13. 9: Percentage of Persons Aged 15 Years and Above Using ICT Equipment by Type of Use, Sex, Place of Residence and Council; Tabora Region, 2022 PHC**

### 13.6.8 Usage of Non-Smartphones by Education Level

The 2022 PHC results reveal that, in Tabora Region non-smartphone is mostly used by individuals who have attained training after secondary education (98.6%) and least used by those who have attained pre-primary level (78.1%). Analysis by sex shows that, the usage of non-smartphone is higher for males and females who attained training after secondary education than other education level.

The uses of non-smartphone in Tabora Region are higher in urban areas than in rural areas for all levels of education (Table 13.10).

**Table 13. 10: Number and Percentage of Population Aged 15 Years and Above Using Non-smartphones by Place of Residence, Sex and Education Level; Tabora Region, 2022 PHC**

## Chapter 14

### Information on Buildings

---

#### Key Points

- About thirty percent (29.6%) of all buildings have permanent flooring materials (sand-cement or Tiles/with cement or concrete, tiles or marble and terrazo).
- About eleven percent (10.9%) of all buildings in Tabora Region are connected to the national grid electricity, while 39.2 percent are powered by other sources.
- Twenty percent (20.5%) of all buildings/Units have water services.
- Three percent (3.3%) of all buildings in Tabora Region have infrastructure for the People With Disabilities.
- Seventy-two percent (72.3%), of all individually owned buildings/Units in Tabora Region are owned by men, 19.8 percent by women, and 5.0 percent are jointly owned.
- About Seventy eight percent (77.6%) of all buildings/Units in Tabora Region are used by the owners themselves, and 9.7 percent are used by tenants.
- Seventy-four percent (74.3%) of all buildings in Tabora Region are built on un-surveyed land.
- About forty-three percent (37.7%) of all buildings/units in Tabora Region are constructed on land that does not have legal documents.

#### 14.1 Introduction

This chapter provides information on the number of buildings, types of buildings, main uses of buildings and the number of units in residential and commercial-residential buildings in Tabora Region and Council levels as per the 2022 Tanzania Building Census (2022 TBC) results. It also presents findings on buildings information which constitutes building categories, occupancy status, building ownership, construction status, building materials used for construction, number of

bedrooms, building tenure status and buildings condition. In addition, the chapter presents information on basic services which are categorized as services within the building (electricity, water, and toilets) and accessibility of buildings (roads) and availability of infrastructure for People with Disabilities (PWD). Furthermore, it provides an overview of building ownership status, land surveying, and the presence of legal documents for land ownership where the buildings are built.

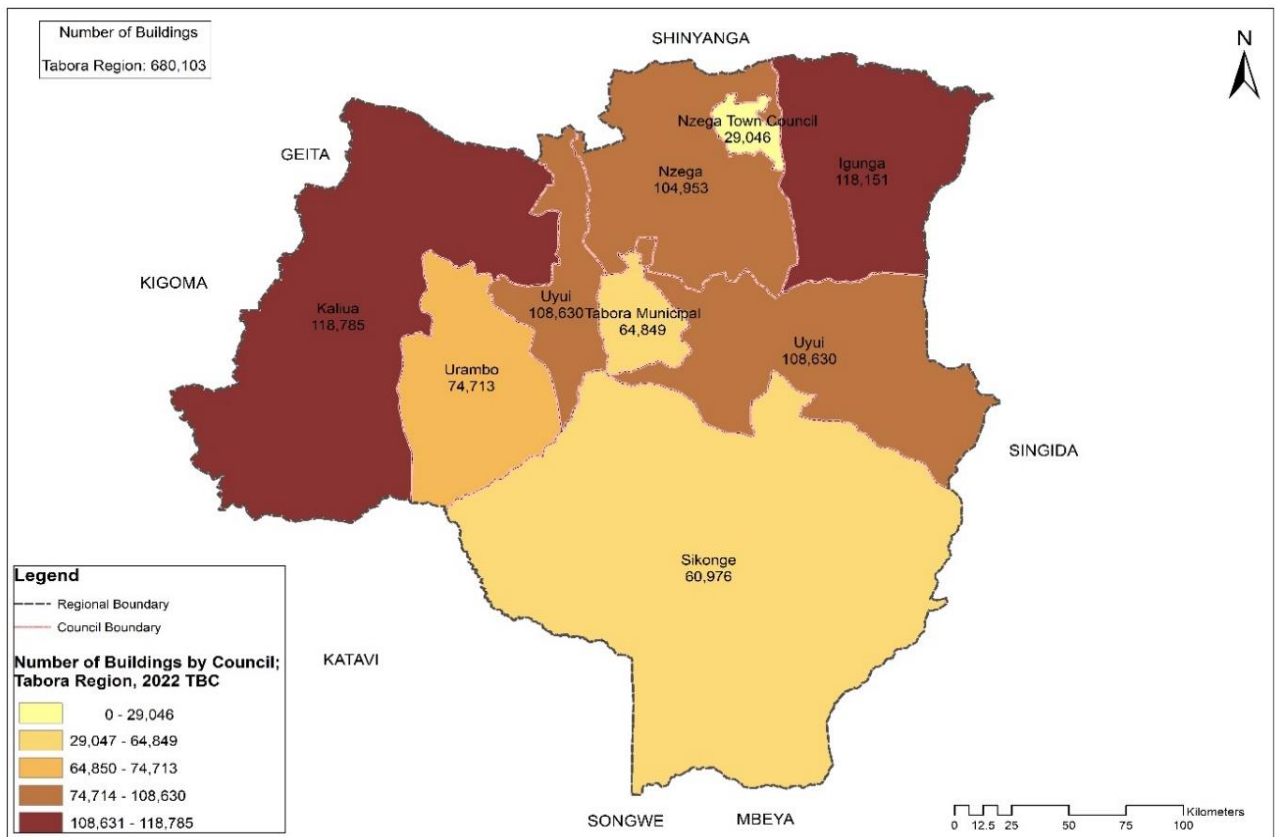

## **14.2 Number of Buildings**

The results show that Tabora Region has a total of 680,103 buildings whereby 573,378 are in rural and 106,725 in urban areas. Kaliua District Council has the largest number of buildings (118,785 buildings) in the region followed by Igunga District Council (118,151 buildings) and Uyui District Council (108,630 buildings). On the other hand, Nzega Town and Sikonge District councils have fewer numbers of buildings (29,046 and 60,976 respectively). Further results show that Tabora Municipal Council has the largest number (249) of multi-storey buildings, followed by Igunga District Council (39) of multi-storey while Nzega District Council (12) and Sikonge District Council (15) have the least number of multi-storey buildings (Map 14.1 and Table 14.1).

**Figure 14. 2: Percentage Distribution of Buildings with Physical Addresses by Council: Tabora Region, 2022 TBC**

### 14.2.2 Type of Buildings

Building types are categorized into single storey buildings (one floor buildings) and multi-storey buildings (more than one floor buildings). Information on buildings under construction including those at foundation stage was also collected.

The results reveal that, 95.3 percent of all buildings in Tabora Region are single storey and only less than one percent (0.1%) are multi-storey. The percentage of multi-storey buildings is slightly higher (0.3%) in urban than in rural areas (0.0 %). Results further reveal that 4.6 percent of all buildings in the region are under construction; percentage of buildings undergoing construction in urban areas (8.0%) is almost twice of rural areas (4.0%) (Figure 14.3).

**Figure 14.3: Percentage Distribution of Buildings by Type, Place of Residence;Tabora Region, 2022 TBC**

### 14.2.3 Main Uses of Buildings

The main uses of buildings are divided into three groups, which are residential, commercial-residential and non-residential uses. The results show that 93.3 percent of buildings in Tabora Region are used for residential purpose, 2.4 percent for commercial-residential and 4.3 percent for non-residential. The pattern of use of building is almost similar in rural and urban areas.

At the Council level, Nzega District Council has the highest proportion of residential buildings (94.2%) compared with Tabora Municipal, which has the lowest (90.8%). With regard to non-residential buildings, Urambo District has the highest proportion (5.0%) while Nzega District Council has lowest (3.8%) (Table 14.3).

The main usage of non-residential buildings in Tabora Region is for commercial purposes (37.7%), followed by institutional services (16.7%) and Godown/Ware House 16.1 percent. Kaliua District Council has the highest percentage of buildings (47.6%, 2,440 buildings) used for commercial purposes followed by Nzega District Council (44.8%, 1,796 buildings), while Tabora Municipal Council has the lowest (26.5%, 77 buildings). Nzega town council, has the highest number of buildings (3.2%, 36 buildings; ) used for industrial purposes (Table 14.4).

#### **14.2.4 Number of Units in a Building**

Information on the number of units in the building was collected only in residential and commercial-residential buildings. Results show that, most buildings in Tabora Region (99.1%) have one unit. The pattern of distribution of buildings by number of units is similar for both rural and urban areas (Table 14.5).

At the council level, Nzega District has the highest (96.6) proportion of buildings with single unit, while the Urambo District has lowest (83.6%). Results further show that, percentage of buildings with two units range from (1.1%) in Nzega District Council to (3.7%) in Urambo District. (Table 14.5)

### 14.3 Buildings' Attributes

This section presents findings on attributes of buildings which constitute categories, occupancy status, ownership, construction status, materials used for construction, number of bedrooms, tenure status and condition of buildings. Buildings in this section refer to all buildings irrespective of their use and ownership.

#### 14.3.1 Building Categories

For the purpose of 2022 TBC, the categories building are semi-detached, terrace or row of houses, and detached or stand-alone buildings. The results show that most (95.0%) of the buildings in Tabora Region are detached or stand-alone buildings. The same pattern is observed in rural and urban areas and across all councils in Tabora Region (Figure 14.7 and Table 14.6).

**Table 14. 6: Number and Percentage Distribution of Buildings by Building Category, Place of Residence and Council; Tabora Region, 2022 TBC**

Place of Residence	Total Number of Buildings	Building Category

### 14.3.2 Construction Status of Buildings

The construction status of buildings is divided into four categories, namely completed, partly completed, under construction and temporary buildings. The 2022 TBC results show that, 81.9 percent of all buildings in Tabora Region have been completed and 5.2 percent are partly completed. Buildings under construction account for 9.9 percent while temporary buildings accounts for 3.0 percent. The results also indicate that 83.7 percent of all buildings in the rural areas are completed compared with 72.1 percent in urban areas. Nzega District Council has the highest percentage of completed buildings (88.5%) while Tabora Municipal Council has the lowest (69.5%). Three percent of buildings in Tabora Region are temporary. Percentage of temporary buildings range from 2.3 percent in Nzega District Council to 3.9 in Sikonge District Council (Table 14.7).

**Table 14. 7: Percentage Distribution of Buildings by Construction Status, Place of Residence and Council; Tabora Region, 2022 TBC**

Place of Residence	Total Number of Buildings	Completed	Partly Completed	Under Construction	Temporary Building
<b>Total</b>	680,103	81.9	5.2	9.9	3.0

**Figure 14. 5: Percentage Distribution of Buildings by Construction Status and Place of Residence; Tabora Region, 2022 TBC**

### 14.3.3 Building Occupancy Status

The occupancy status of buildings is determined by checking whether the building is in use or vacant. The results show that 88.5 percent of all buildings in Tabora Region are in use, while 11.5 percent are vacant. Furthermore, the results indicate that rural areas have a higher proportion of buildings in use (89.7%) compared with urban areas (82.2%). Nzega District Council has the highest percentage (92.6%) of buildings in use while Tabora Municipal Council has lowest (80.8%) (Figure 14.6 and Table 14.8).

**Table 14. 8: Percentage Distribution of Buildings by Occupancy Status, Place of Residence and Council; Tabora Region, 2022 TBC**

**Figure 14. 6: Percentage Distribution of Buildings by Place of Residence and Occupancy Status; Tabora Region, 2022 TBC**

#### **14.3.4 Building Construction Materials**

This section describes the types of building materials used in flooring, wall and roofing. Analysis in this section is based on buildings and not on households as presented in chapter twelve of this publication.

##### **14.3.4.1 Floor Materials**

Materials used for floor include cement, PVC tiles, ceramic tiles (marble), terrazzo, clay, earth/sand, hard plastic or bitumen, polished wood, cow dung, wood planks, or bamboo or plant residues. About sixty percent of buildings in Tabora Region (55.8%), have mud/soil or sand floors, followed by sand cement (27.5%) and ceramic tiles floors (2.0%).

Furthermore, in rural areas, buildings with earth/sand floor constitute 62.3 percent of all buildings while in urban areas it is 21.0 percent. Tabora Municipal Council has the highest percentage (48.1%) of buildings with cement floor while Uyui District Council have lower percentage of about 20.8 percent (Table. 14.9).

**Table 14. 9: Percentage of Buildings by Types of Flooring Materials, Place of residence and Council; Tabora, 2022 TBC**

Place of Residence	Total	Flooring Materials								No Floor
		Sand-cement	Ceramic tiles	Parquet or polished wood	Terrazzo	PVC tiles	Wood planks	Earth/sand/soil	Cow dung

**68.8 Note:** Other flooring materials are PVC tiles, parquet or polished wood, wood planks, terrazzo or cow dung

### 14.3.4.2 Wall Materials

Materials used in wall construction include stones, cement or stone blocks, sun-dried clay bricks, burnt clay bricks, glass, wood, iron sheets, bamboo/poles/mud and poles/grass or tents. Most of the buildings in Tabora Region have walls built with sundried bricks (52.7%), followed by burnt bricks (27.1%). Over thirty eight percent (38.2%) of all buildings in urban areas have walls constructed with cement blocks or stone blocks followed by burnt bricks (32.9%). However, in rural areas, most of the buildings (58.3%) in rural areas are constructed using Sundried bricks followed by burnt bricks (26.0%). Tabora Municipal Council has the highest percentage (43.7%) of buildings built with cement blocks or stone blocks walls while Kaliua District Council has the lowest percentage (1.5%) (Table 14.10).

**Table 14. 10: Percentage Distribution of Buildings by Type of Wall Materials, Place of Residence and Council; Tabora Region, 2022 TBC**

**Note:** "No walls" refers to buildings that were under construction (at foundation stage) during Census enumeration

#### **14.3.4.3 Roofing Materials**

Construction materials used for roofing can be permanent or temporary. Permanent construction materials include corrugated iron sheets, tiles, concrete and asbestos, while temporary roofing materials are grass (leaves or palm leaves), mud/grass and poles, plastics, tarpaulin and straw.

The results show that, the highest percentage (56.6 %) of all buildings in Tabora Region are roofed with corrugated iron sheets, followed by grass/ leaves (32.3%). In rural areas, 52.3 percent of all buildings are roofed with corrugated iron sheets compared with 79.3 percent in urban areas. The percentage of buildings roofed with corrugated iron sheets range from 49.0 percent in Nzega District Council to 76.4 percent in Tabora Municipal Council (Table 14.11).

### 14.3.5 Number of Bedrooms

This section provides information on the number of bedrooms in residential and commercial-residential buildings only. The results show that 29.5 percent of such buildings/units in Tabora Region have one bedroom, 39.9 percent have two bedrooms, 18.8 percent have three bedrooms, and 11.7 percent have four or more bedrooms.

Furthermore, in rural areas, the proportion of buildings/units with one bedroom is high (31.4%) compared with 42.8 percent those with two bedrooms. In urban areas, most (30.9%) of buildings/units have two bedrooms, followed by those with three bedrooms (28.2 %) (Figure 14.7 and Table 14.12).

**Table 14. 12: Percentage of Residential and Commercial Building/Units - Residential Buildings/Units by Number of Bedrooms, Place of Residence and Council; Tabora Region, 2022 TBC**

#### 14.4 Basic Services in Buildings

This section presents information on basic services in buildings/units. The services are electricity, water and toilets.

##### 14.4.1 Electricity

Electricity service in buildings/units is divided into two main groups: - electricity from the national grid (TANESCO) and electricity from alternative sources such as solar energy and generators.

The results indicate that 10.9 percent of all buildings/units in Tabora Region are connected to the national grid. 40.2 percent of all buildings in urban areas are connected to the national grid compared with 5.3 percent in rural areas. Across the councils of Tabora Region, Tabora Municipal (36.8%) and Nzega Town (25.9%) have a high percentage of buildings connected to the national grid while Nzega District has the lowest percentage (3.9%) (Figure 14.8 and Table 14.13).

**Figure 14. 8: Percentage Distribution of Buildings/units with Electricity from the National Grid (TANESCO) by Council; Tabora Region, 2022 TBC**

Alternative sources of electricity include all other sources such as solar electricity and generators. The results reveal that 39.2 percent of all buildings/units in Tabora have alternative sources of electricity. The percentage of buildings with alternative source of electricity is high in rural areas (43.0%) than in urban area (21.8%).

Percentage of buildings with alternative source of energy is generally high in Councils with low percentage of buildings connected to the national grid, ranging from (23.1%) in Tabora Municipal Council to 55.1 percent in Nzega District Council. (Table 14.13).

### 14.4.2 Water

According to the 2022 TBC, water service in a building/units means the presence of water inside the building and/or on the premises of the relevant building. The results reveal that 20.7 percent of all buildings/units in Tabora Region have water service. Proportion of buildings with water services is higher in urban (48.3%) than in rural areas (15.6%). Across councils, Tabora Municipal has the highest percentage (44.9%) of buildings with water service while, Uyui District has the lowest percentage (12.9%) (Figure 14.9 and Table 14.13).

**Figure 14. 9: Percentage Distribution of Buildings/Units with Water Services by Council; Tabora Region, 2022 TBC**

### 14.4.3 Toilets

Toilet service in a building/units includes the presence of a toilet inside the building and/or on the premises of the concerned building. The results reveal that 67.0 percent of all buildings/units in Tabora Region have toilet facility. The percentage of buildings with toilet facilities in urban areas is higher (75.3%) than in rural areas (65.4%). There is marked disparity in percentage of households with toilet facilities across councils,

ranging from 61.1 percent in Igunga District to 74.6 percent in Tabora Municipal. (Figure 14.10 and Table 14.13).

**Figure 14. 10: Percentage Distribution of Buildings/Units with Toilet Facility by Council; Tabora Region, 2022 TBC**

**Table 14. 13: Distribution of Building/Units by Type of Basic Services, Place of Residence and Council; Tabora Region, 2022 TBC**

## 14.5 Accessibility of the Building

This section provides information on the accessibility of buildings by road and the presence of infrastructure for Person With Disabilities.

### 14.5.1 Access Roads

The results indicate that 64.5 percent of all buildings in Tabora Region are accessible by road. Notably, most of the buildings (81.5%) in urban areas are accessible by road, while it is 61.4 percent in rural areas. Tabora Municipal Council has the highest percentage (87.6%) of buildings accessible by road while Igunga District Council has the lowest (50.4%) (Figure 14.11).

**Figure 14. 11: Percentage Distribution of Buildings with Access Road by Council; Tabora Region, 2022 TBC**

#### 14.5.2 Infrastructure for Persons with Disabilities

Results reveal that 3.3 percent of all buildings in Tabora Region have infrastructure for Persons with Disabilities (PWDs). Buildings with infrastructure for PWDs account for 2.7 percent and 6.7 percent of buildings in urban and rural areas respectively. Tabora Municipal Council has the highest percentage (7.0%) of buildings with infrastructure for PWDs while Nzega District Council has the lowest percentage (1.9%) (Figure 14.12).

**Figure 14. 12: Percentage Distribution of Buildings with Infrastructure for Persons With Disabilities by Council; Tabora Region, 2022 TBC**

## 14.6 Tenure Status of Buildings

This section provides an overview of building ownership status, land surveying and the presence of legal documents for land ownership where the building is built.

### 14.6.1 Buildings Ownership Status

The results reveal that the majority (81.1%) of buildings in Tabora Region are individually owned, followed by 9.5 percent of co –owned buildings. The same pattern is observed in rural and urban areas (Figure 14.13).

**Figure 14. 13: Percentage Distribution of Buildings by Ownership Status and Place of Residence; Tabora Region, 2022 TBC**

### **14.6.2 Buildings Ownership by Sex**

Ownership by sex considers only individually owned buildings/units. Ownership status may be by male only, female only or jointly. The results show that most of the buildings/units in Tabora Region are owned by male only (76.3%), followed by female only (19.8%) and 3.9 percent by male(s) and female(s) jointly. The same pattern is observed in rural and urban areas.

Nzega District Council has the highest proportion (24.3%) of buildings/units owned by females alone while Kaliua District Council has the lowest proportion (17.4%) (Table 14.14).

**Table 14. 14: Percentage Distribution of Individually Owned Building/Units by Place of Residence, Sex of Owner and Council; Tabora Region, 2022 TBC**

### **14.6.3 Buildings Occupancy Tenure Status**

Occupancy tenure status considers only occupied buildings/units. The 2022 TBC results indicate that 87.4 percent of all buildings in Tabora Region are occupied by the owners themselves, followed by tenants alone (6.8%).

In rural areas, the results reveal that 90.2 percent of all buildings/units are occupied by owners themselves followed by tenants alone (5.0%). A similar pattern is observed in urban areas, however the proportion of buildings occupied by tenants (18.2%) is substantially higher than that in rural areas.

Nzega District Council has the highest percentage (91.1%) of buildings/units occupied by owners themselves, while Tabora Municipal Council has the lowest percentage (72.7%). In addition, Tabora Municipal has the highest percentage (15.9%) of tenant-occupied buildings/units, while the Nzega District Council has the lowest (4.8%) (Table 14.15).

**Table 14. 15: Percentage Distribution of Building/Units by Occupancy Tenure Status, Place of Residence and Council; Tabora Region, 2022 TBC**

#### **14.6.4 Buildings Land Survey Status**

Results reveal that the majority of buildings in Tabora Region (74.3%) are built on un-surveyed land while, 16.9 percent on surveyed land and 5.8 percent on regularized land. Moreover, 33.4 percent of urban buildings are built on Un-surveyed land compared with 82.0 percent of rural buildings. Nzega District Council has the highest percentage (84.8%) of buildings built on un-surveyed land while the Tabora Municipal Council has the lowest (44.1%) (Table 14.16).

**Table 14. 16: Percentage Distribution of Building Plots by Place of Residence, Land Survey Status and Council; Tabora Region, 2022 TBC**

### 14.6.5 Buildings Land Ownership Documents

Information on land ownership status includes title deeds, residential licenses, letters of offer or acknowledgments of payment, certificates of customary right of occupancy (CCRO in Mainland), agreements or contracts, registration card (Zanzibar), and local government documents. Results show that 37.1 percent of all buildings/units are built on land without legal documents, 26.8 percent are built on land with certificate of customary right of occupancy land ownership documents and 6.7 percent have title deeds (Table 14.17)

**Table 14. 17: Percentage of Building/Units and Land Ownership Status by Council; Tabora Region, 2022 TBC**

## Chapter 15

### Summary of Key Findings, Implication and Recommendations

---

#### 15.1 Introduction

This chapter presents key findings of the 2022 PHC results with the aim of informing Regional and Local Government Authorities and stakeholders on the key indicators, implications and recommendations for policies and programmes to realise socio-economic development of Tabora Region.

#### 15.2 Key Findings

Key findings summarized here are on the selected areas of Tabora Region Basic Demographic and Socio-Economic Profile Report, considered to be of high priority for policy and programmes implementation by councils in this region. Further details and specific results, relevant statistics and full references are found in respective chapters of this report.

##### 15.2.1 Population Size and Growth

- i. The population of Tabora Region has increased from 2,291,625 persons in 2012 to 3,391,679 persons in 2022; and
- ii. The population of Tabora Region has been growing at an average growth rate of 3.9 percent annually during the 2012 – 2022 intercensal period.

#### Implications for Policies and Programmes:

- i. With the current annual growth rate of 3.9 percent (which is above the national average of 3.2%), the population of Tabora Region is expected to double in the next 18 years;
- ii. On the positive side, growth rate of 3.9 percent annually may lead to greater human capital, higher economic growth and higher economies of scale; and

- iii. On the negative side, growth of 3.9 percent annually may lead to increased pressure on social services, contribute to depletion of natural and environmental resources, as well as pressure on land use, urban housing and other urban infrastructure.

### **Recommendations**

- i. Regional, Local Government Authorities and stakeholders need to effectively implement respective national and sector policies while advocating for planned and balanced approach to population growth and economic development;
- ii. Regional and Local Government Authorities need to consistently undertake land use planning, urban planning and put in place effective supervision and implementation mechanism; and
- iii. Regional Authorities, Local Government Authorities and stakeholders should strengthen enforcement mechanism (through by - laws) to protect and safeguard the environment in line with the National Environmental Policy (2022) and other sector policies on environment to ensure that negative impact caused by human activities as a result of population growth on environment is minimized.

### **15.2.2 Age Profile**

#### **Key Findings**

- i. About eighteen percent (18.1%) of Tabora regional population is aged below five years;
- ii. About fifty five percent (55.4%) of total regional population is below 18 years of age;
- iii. About one third (32.6%) of Tabora regional population are youths aged 15 – 35 years; and
- iv. Percentage of persons aged 60 years and above decreased from 5.7 percent in 2012 to 4.6 percent in 2022 of total regional population.

#### **Implications for Policies and Programmes:**

- i. High proportion of children under five years implies increased demand for Mother and Child Health Services as well as potential demand in social services including education and healthcare in general;

- ii. High proportion of persons under 18 years of age implies increased demand for education, healthcare and other social services leading to a strain in resources and infrastructure. This may lead to higher unemployment rates, which is likely to contribute to social unrest and political instability;
- iii. High proportion of youths (15 – 35 years) exerts pressure on the economy to create more jobs and skills to absorb a growing youth population. However, high proportion of youth population, means a potential labour force that can actively contribute to economic growth, especially when they are educated and skilled and appropriate investments are made in education, health and skills development
- iv. Elderly persons need social protection which includes universal pension, health insurance and housing; and
- v. A high age dependency increases demand for social services and long-term care services; high burden of public finances to cover the associated cost of providing social services; and reduce productivity growth.

### **Recommendations**

- i. Regional and Local Government Authorities to strengthen implementation of policies and enforcement of laws related to child and youth development and protection;
- ii. Regional and Local Government Authorities to ensure allocation of enough resources to cater for education, health, social security and protection of young people.
- iii. Regional and Local Government Authorities to effectively implement policies programmes that are intended to provide services to the elderly as indicated in related national and sectoral policies on the plight of older people in Tabora Region.

### **15.2.3 Marital Status and Early Marriage**

#### **Key Findings**

- i. About eighteen percent (17.8%) of the female population aged 15 - 19 in Tabora Region are married; and
- ii. About seven percent (6.6%) of female aged 15 years and above are widowed.

### **Implications for Policies and Programmes:**

- i. Early marriage has potentially lifelong harmful consequences such as, increased early pregnancies, child and maternal mortality, and domestic violence. Young women who marry early are also denied education, economic opportunity opportunities and can experience psychological consequences; and
- ii. Widowhood may lead to social and economic difficulties such as decline in economic growth and increase in poverty levels as well as change of family formation and unbalanced child upbringing.

### **Recommendations**

- i. Regional, Local Government Authorities and stakeholders should strengthen supervision and implementation of national and sector policies related to girl child education and welfare;
- ii. Regional and Local Government Authorities need to scale up measures to enforce laws and regulations that prohibit incidences of early marriage; and
- iii. The Regional and Local Government Authorities to design supportive programmes for widows including cash transfer and public works programmes such as those implemented under TASAF.

#### **15.2.4 Possession of National Identification Documents**

##### **Key Findings**

- i. About sixty three percent (62.5%) of children under five years of age in Tabora Region have neither birth certificate nor birth notification;
- ii. About twelve percent (12.3%) and 13.3 percent of persons aged 18 years and above have national identification cards (NIDA) and national identifications number respectively; and
- iii. About four percent (3.6 %) of persons in Tabora Region have health insurance from National Health Insurance Fund (NHIF) or Community Health Insurance Fund (CHIF).

### **Implications for Policies and Programmes**

- i. National identification documents are important for citizens to access services and fulfil their rights and obligations. They also help in association of information

in the national databases, national security issues and law enforcement. Moreover, birth and national certification is mandatory for every citizen and therefore high proportion of persons without birth certificate and national identification is contrary to Births and Deaths Registration Act, (CAP 108, R.E 2002) and Registration and Identification of Persons Act of 1986 (R.E 2012);

- i. Birth certificate is a crucial document for children to access services before the age of 18 years, which is the minimum age for acquiring the National Identification Card; and
- ii. Health Insurance Identification card is important for ensuring accessibility to quality health care services to all people. Health insurance guarantees a society that is healthy and productive to attain economic prosperity. Contrary to that the government will spend more resources to cure its people.

### **Recommendations**

- i. Regional and Local Government Authorities to support measures to strengthen capacity of institutions responsible for birth certificates and national identification to issue corresponding documents;
- ii. Regional Authorities and Local Government Authorities as well as other stakeholders need to regularly sensitize the public, especially the youths on the importance of national identification documents; and
- iii. Regional, Local Government Authorities and stakeholders need to educate and sensitize the public on the importance and benefits of Universal Health Insurance Act of 2023 to promote access to health services through prepaid mechanisms.
- iv. .

### **15.2.5 Orphanhood**

#### **Key Findings**

- i. About twelve percent (11.6 %) of children under age 18 in Tabora Region are orphans (6.8 % with one parent dead and 4.8 % both parents dead); and
- ii. Sikonge District Council has the highest percentage (9.6%) of orphaned children while Urambo District Council has the lowest (3.2%)

### **Implications for Policies and Programmes**

- i. Orphans are likely to become victims of violence, human trafficking and exploitation, as well as likelihood to experience mental health challenges; and
- ii. The orphanhood may lead to increased burden to family, household and governments in terms of costs of care.

## **Recommendations**

- i. Region, Councils and stakeholders need to sensitize communities on the plight of orphan children and encourage stakeholders to take actions to minimize their sufferings; and
- ii. Regional and Local Government Authorities should consider sustaining mobilisation and allocation of adequate resources to support plans and strategies regarding to orphanage services including education subsidies and running cost of caring centres.

### **15.2.6 Literacy and Education**

#### **Key Findings**

- i. Sixty eight percent (68.0%) of population aged 15 years above in Tabora Region is literate. Literacy rates range from 60.0 percent in Sikonge District Council to 89.2 percent in Tabora Municipal Council;
- ii. Net Enrolment Rate (NER) in primary school in Tabora Region is 63.4 percent with notable disparity among councils, ranging from 52.5 percent in Sikonge District to 89.1 percent in Tabora Municipal;
- iii. About fifteen percent (14.8%) of secondary school age children (14-17 years) dropped out of school;
- iv. Fifty percent (50.0%) of Persons with Disabilities (PWD) dropped out of education for people with mental health challenges; and
- v. Primary education Gross Enrolment Ratio (GER) decreased from 70.8 in 2012 to 63.4 percent in 2022.

#### **Implications for Policies and Programmes:**

- i. Adult literacy rate (68.0%) in Tabora Region is low compared to the national average (83%) which implies the presence of significant number of illiterate

- population in the Region. This may lead to unhealthier population, low economic growth and poor labour market participation
- ii. Disparities in education (literacy and enrolment) may lead to slow achievement in national development targets and lack of harmony in the society;
  - iii. Net Enrolment Rate for Tabora Region is below the national average of 83.3 percent which indicates that a significant number of children of official primary school age are not enrolled in schools which translates into poor education outcomes for region's children and in a long-term resulting to poverty and inequality;
  - iv. Persons with Disabilities are already disadvantaged; this coupled with lack or poor education aggravates their level of poverty leading to an increase in intergenerational poverty;
  - v. School dropout has significant implication both at the individual and society level. Dropouts lead to cycle of poverty and increased risks of committing crime and may also imply inefficiency in education system; and
  - vi. Decrease of Gross Enrolment Ratio implies that Tabora Region indicate that a a good number of children (regardless of their age) are not enrolled in primary schools.

### **Recommendations**

- i. Regional and Local Government Authorities need to enhance efforts (awareness campaigns, by-laws, resource mobilization and allocation) to raise literacy and enrolment in the region in order to achieve national targets and address disparities among councils;
- ii. Regional and Local Government Authorities need to put in place effective mechanisms to ensure supervision and implementation of provision of skills training as emphasized in the National Education Policy (2023);
- iii. Regional and Local Authorities to establish major causes of relatively drop high drop-out rate in secondary schools, create supportive learning environment, address individual needs and provide resources to keep students engaged and motivated;

- iv. Regional and Local Government Authorities as well as other stakeholders to support measures to strengthen education system for PWDs to address the issue of high drop-out rates; and
- v. Regional and Local Government Authorities to raise awareness of parents and guardians of PWDs on the importance of supporting their educational development initiatives.

### **15.2.7 Employment and Economic Activities**

#### **Key Findings**

- i. The overall unemployment rate in Tabora Region is 3.6 percent; the rate is high in urban (8.3%) than in rural (2.5%) areas;
- ii. Agriculture, forestry and fishing industry has the highest proportion (76.5%) of the total employment in Tabora region; and
- iii. About sixty one percent (61.3%) of youth population aged 15 - 35 are engaged in informal non-agricultural economic activities.

#### **Implications for Policy and Programmes:**

- i. Unemployment can lead to a reduction in economic growth, as unemployed individuals have less disposable income to spend on goods and services, which can lead to a decrease in demand for goods and services. The 3.6 percent unemployment for Tabora Region is below the national level (7.8%) and is therefore moderate, which indicates that its impact on economic growth is also moderate. However, unemployment is a potential source of social vices such as crime and social unrest;
- ii. Unemployment can also have a significant impact on individuals and families such as financial hardship, social isolation, and a loss of self-esteem. Unemployed persons may also experience negative health outcomes including depression, anxiety, and stress;
- iii. Employment is the main source of household income leading to wellbeing and poverty reduction. Agriculture, forestry and fishing industry is a key sector for employment in the region. Therefore, interventions to develop the sector will lead to more job creation and sustenance of the employment; and
- iv. Informal sector is a significant youth employing sector in Tabora Region. This sector generates income for youth leading to poverty reduction. The sector also

leads to local community development. However, if measures are not taken to improve the working environment for the sector it can become insecure and lack social protection.

### **Recommendations**

- i. Regional and Local Government Authorities to put in place measures aimed at improving agriculture, forestry and fishing industry in line with national policies so as to increase sector productivity;
- ii. Region and Local Government Authorities in collaboration with other stakeholders to develop programs that promote entrepreneurship and self-employment, access to education and vocational training for the youth; and
- iii. Region and Local Government Authorities to create conducive business environment by streamlining bureaucratic procedures, regulations, and facilitate access to affordable credit.

### **15.2.8 People with Disabilities**

#### **Key Findings**

- i. Nine percent (9.0%) of the total Tabora Region population aged 7 years and above have some form of disability;
- ii. Most Persons with Disabilities (55.3%) reported diseases as major cause of their disabilities;
- iii. Almost seven percent (6.9) of Persons with Disabilities (PWDs), reported their disability to have been caused by accidents; and
- iv. Use of assistive devices among PWDs is very low.

#### **Implications for Policies and Programmes:**

- i. Although prevalence of disability is moderate, its presence implies additional cost of care for the household and the society at large;
- ii. People with Disabilities are more likely to experience adverse social economic outcome such as health care and poverty due to barriers to education, employment, earnings and weak social protection mechanism. However, the use of assistive devices reduces the negative effect of disability; and
- iii. Poor PWDs are caught in vicious cycle of poverty and disability, each being cause and consequence of the other.

## **Recommendations**

- i. Regional and Local Government Authorities need to ensure that all programs and project in the councils integrate issues of PWDs so that they can fully participate in their own development using the resources available in the region;
- ii. Regional, Local Government Authorities and stakeholders to strengthen health and nutrition programs for prevention and cure so as to reduce the incidence of diseases leading to reduction of PWDs in the region;
- iii. Regional and Local Government Authorities should put in place effective supervision mechanism for organs responsible with safety issues including road and occupational places to strive to enforce laws and regulations; and
- iv. Regional and local Government authorities should undertake sensitization, advocacy and awareness raising programs on the use of assistive devices and facilitate access to these devices.

### **15.2.9 Land Ownership**

#### **Key Findings**

- i. About forty five percent (45.4%) of persons aged 15 years and above own land without any legal documents in Tabora Region, the percentage ranges from (32.1%) in Tabora Municipal to 56.4 percent in Nzega District.
- ii. The proportion of males aged 15 years and above who own land alone is significantly higher (14.8%) than females (6.9%).

#### **Implications for Policies and Programmes**

- i. The overall aim of the National Land Policy is to promote and ensure a secure land tenure system, to encourage the optimal use of land resources, and to facilitate broad-based social and economic development without upsetting or endangering the ecological balance of the environment;
- ii. Gender inequality in land ownership is a critical issue in Tabora Region, with significant policy implications;
- iii. Existence of gender inequality in land ownership leads to unequal economic opportunities;
- iv. Women who own land can engage in income generating activities leading to empowerment, poverty reduction and better livelihood; and

- v. Lack of legal documents for land ownership leads to insecurity of land properties and inaccessibility to economic opportunities;

### **Recommendations**

- i. Regional and Local Government Authorities to strengthen monitoring implementation of the 1997 Land Policy to accelerate land ownership process by enhancing capacities of responsible institutions;
- ii. Regional and Local Government Authorities need to address gender disparity in land ownership to guarantee economic empowerment and achieve human rights outcomes; and
- iii. Regional, Local Authorities and other stakeholders to strengthen education and awareness campaigns about benefits of joint land ownership to promote gender equality for sustainable development and poverty reduction.

#### **15.2.10 Drinking water**

##### **Key Findings**

- i. About forty two percent (41.9%) of private households in Tabora Region use drinking water from improved sources; with significant disparity between councils ranging from 21.7 percent in Uyui District to 85.2 percent in Tabora Municipal; and
- ii. There is significant disparity between urban (87.2%) and rural (30.4%) on percentage of private households in Tabora Region using improved source of drinking water.

##### **Implications for Policy and Programmes**

The use of water from unimproved sources has implication on human health as these sources are easily contaminated leading to poor health outcomes. About sixty percent (58.1%) household in Tabora Region are using water from unimproved sources for drinking, hence, high a likelihood of poor health outcome emanating from water usage

##### **Recommendations**

- i. Region and Local Government Authorities needs to initiate new water supply projects especially in underserved rural areas and Councils; and
- ii. Region and Local Government Authorities should allocate enough resources to rural areas and councils that are lagging behind in the use of improved source of water for drinking.

### 15.2.11 Sanitation

#### Key Findings

- i. About one third (33.8%) of households in Tabora Region is using improved toilet facility; with significant disparities between councils ranging from 19.3 percent in Uyui District to 74.3 percent in Tabora Municipal; and
- ii. About fourteen percent (13.6%) of households in Tabora Region have no toilet facility with notable disparity between councils ranging from 1.9 percent in Tabora Municipal to 21.3 percent in Nzega District.

#### Implications for Policies and Programmes

- i. Use of unimproved or non-use of toilet facilities contributes to the spread of infectious diseases such as cholera, diarrhoea, dysentery, hepatitis A, typhoid, and polio. These diseases can lead to serious illness (morbidity) and even death (mortality); and
- ii. Unsafe sanitation practices can contaminate water sources, soil, and ecosystems. This pollution affects not only human health but also the environment. Proper sanitation facilities help prevent contamination and protect natural resources.

#### Recommendations

- i. Regional and Local Government Authorities need to effectively supervise and implement sanitation projects at local/community level to avoid adverse effect of poor sanitation;
- ii. Regional and Local Government Authorities to strengthen and enforce by-laws for effective implementation of sanitation and hygiene initiatives; and
- iii. Regional and Local Government Authorities in collaboration with stakeholders to undertake sanitation and hygiene education and awareness campaigns in the community.

### 15.2.12 Energy

#### Key Findings

- i. About sixty seven percent (67.2%) and 24.3 percent of private households in Tabora Region use firewood and charcoal respectively as the main source of energy for cooking;

- ii. About seven percent (7.1%) of households in Tabora Region use clean energy for cooking;
- iii. About twenty percent (20.2%) of households use electricity from National Grid for lighting; with significant disparity between councils ranging from 6.6 in Nzega District to 60.1 percent in Tabora Municipal; and
- iv. Forty seven percent (47.0%) of households in Tabora Region use solar energy for lighting.

### **Implications for Policy and Programmes:**

- i. High proportion of households using firewood and charcoal as main source of energy for cooking lead to detrimental impact on environment by perpetuating deforestation, land degradation, soil erosion, air pollution, and loss of forest resources and therefore contributing to climate change;
- ii. Use of clean energy signals the potential of addressing environmental destruction and natural resources;
- iii. Access to national grid in Tabora Region is low, which implies constrained economic opportunities/potentials for the Region and Councils; and
- iv. Disparities in energy access between councils lead to unequal development due to unlocked income generating opportunities by availability of reliable energy from the national grid.

.

### **Recommendations**

- i. Regional and Local Government Authorities to support national campaign on the use of gas as alternative source to charcoal and firewood;
- ii. Regional and Local Government Authorities to continue sensitizing population on the importance of using clean energy and educate public about the negative effects of dirty energy including respiratory system diseases and deforestation which is one of the main the cause of climate change;
- iii. Regional, Local Government Authorities in collaboration with the Non-Governmental Organizations and other stakeholders to continue providing awareness to population on the efficient use of energy and installation of clean energy at lower prices; and

- iv. Regional and Local Government Authorities in collaboration with TANESCO and REA to identify and put in place plan to hasten distribution and installation of electricity to households and communities.

### **15.2.13 Information and Communication Technology (ICT) Access and Use by Individual and Households**

#### **Key Findings**

- i. Almost nine out of ten households (82.9%) in Tabora Region have at least one member aged 4 years and above who owns a mobile phone;
- ii. Less than one percent of both males (0.4%) and females (0.5%) aged 15 years and above own a smartphone or tablet;
- iii. Less than one percent (0.8%) and about two (1.3%) of persons aged 15 years and above own a desktop and laptop computer respectively; and
- iv. About twenty percent (20.1%) of households in Tabora Region own radio while 20.1 percent own television with notable disparities between councils ranging from 19.6 percent in Kaliua District to 100 percent in Nzega Town (Radio) and from 9.1 percent in Kaliua District to 100 percent in Nzega Town (Television set).

#### **Implications for Policies and Programmes**

- i. The level of adoption of ICT services among households and individuals shows that the sector is growing in the right direction. Despite this growth, evidence from other sources (administrative data) shows that the digital divide gap is still high. For instance, though the broadband population coverage in Tanzania, was 72 percent in 2022, only around 45 percent of the population used broadband services;
- ii. Ownership and usage of ICT smart devices (smartphones, tablets and computer) are low which contribute to low speed of broadband services uptake; and
- iii. Access and use of ICT services are generally low among females compared to males as well as between urban and rural areas.

#### **Recommendations**

- i. Regional and Local Government Authorities need to promote and supervise digital literacy programmes in education curriculum at pre primary, primary and secondary education levels; and

- ii. Regional and Local Government Authorities need to raise awareness in communities to establish digital networks where they can share communication facilities and promote access to communication service and digital skills.

#### **15.2.14 Information on Buildings**

##### **Key Findings**

- i. About seventy one percent (70.9%) of all buildings in Tabora Region have physical addresses;
- ii. About fifty one percent (50.7%) of all buildings in Tabora Region have electricity services, of which 10.9 percent are connected to the national grid and 39.2 percent are powered by other sources;
- iii. About twenty one percent (20.5%) of all buildings have water services;
- iv. About three percent (3.3%) of all buildings in Tabora Region have infrastructure for Persons with Disabilities;
- v. About three quarters (74.3%) of all buildings in Tabora Region are built on un-surveyed land with significant disparity between Councils ranging from 44.1 percent in Tabora Municipal to 84.8 percent in Nzega District
- vi. About thirty eight percent (37.7%) of all buildings in Tabora Region are constructed on land that do not have legal documents.

##### **Implications for Policies and Programmes**

- i. Regional and Local Government Authorities to effectively supervise the identification and posting of physical addressees and regularly undertake the exercise to take into account growth of settlements;
- ii. Physical address is crucial for accessing emergency services, facilitate commerce and government taxes such as property tax. It is also, useful for enforcing regulation and management of land planning and use as well as provision and billing of utilities (water, electricity and gas).
- iii. The presence of a small percentage of buildings with electricity and water services, affects the implementation of economic activities for individual citizens in accessing opportunity to increase income and enhancing their development;
- iv. Large percentage of buildings that do not have friendly infrastructure for Persons with Disabilities causes difficulty for this group to reach and use the

buildings, thus depriving them the basic rights to access services provided in those buildings;

- v. Buildings without legal ownership documents indicate that: - The National Programme of Land Planning, Surveying and Titling has not yet been able to reach many beneficiaries, a loss of Government revenue, tenure insecurity among land holders, increase in land related conflicts and inability of land owners to use their land as a mortgage for obtaining loans; and
- vi. Presence of many buildings in unplanned and un-surveyed areas signifies escalation of informal settlements, lack of social services and infrastructure.

### **Recommendations**

- i. Regional and Local Government Authorities to facilitate efforts by utility companies to provide electricity and water services in a manner that will enable low-income citizens to be connected to these services;
- ii. Regional and Local Government Authorities to strengthen supervision and enforce laws that require buildings to have friendly infrastructure for PWDs;
- iii. Regional and Local Government Authorities to strengthen supervision of implementation of National Programme of Land Use Planning, Surveying and Titling together with Land Tenure Improvement Programme (LTIP); and
- iv. Regional and Local Government Authorities to strengthen and strategically manage land use plans and surveying projects.
