The United Republic of Tanzania (URT), Ministry of Finance and Planning, Tanzania National Bureau of Statistics and President's Office - Finance and Planning, Office of the Chief Government Statistician, Zanzibar. The 2022 Population and Housing Census: Administrative Units Population Distribution Report; Tanzania Mainland, December 2022.

Note:

Maps and land area used in this publication are derived from the cartographic work; thus, it is for statistical use only.

Foreword

The 2022 Population and Housing Census (PHC) for the United Republic of Tanzania had its reference as the midnight of the 22nd/23rd August 2022. This was the Sixth and the first digital Census after the Union of Tanganyika and Zanzibar in 1964. Other

post union censuses were carried out in 1967, 1978, 1988, 2002 and 2012. The Sixth Phase Government of Tanzania under the leadership of Her Excellence Dr. Samia Suluhu Hassan, and the Eighth Phase Government of Zanzibar under the leadership of Dr. Hussein Ali Mwinyi like the previous phases, have fulfilled their obligation of conducting the 2022 PHC according to the United Nations Principles and Recommendation for the Population and Housing Census. **We owe them much appreciation for their commitment and support during Census implementation.**

The 2022 PHC was conducted in accordance with the Statistics Act Cap 351, which mandates the Government of the United Republic of Tanzania to conduct Population and Housing Census every ten years. It also followed the United Nations Principles and Recommendations for conducting the 2020 Round of Population and Housing Census, including adoption of advanced Information and Communication Technology (ICT) at all stages of Census implementation. Indeed, the country's decision to use more advanced technology to capture data during cartographic mapping; enumeration and data transmission; and processing made the 2022 PHC the first ever digital census to be conducted in Tanzania.

The 2022 PHC results are for integrated plans and sustainable development of the country and will increase awareness and transparency in allocation of resources at all levels of administration based on the actual population. The results will be used by the Government and stakeholders in monitoring and evaluating various national, regional and international development frameworks including the Tanzania Development Vision 2025 and Zanzibar Development Vision 2050; the Third National Five-Year Development Plan 2021/22 - 2025/26 and Zanzibar Development Plan 2021/22 - 2025/26; the East African Community Vision 2050; Southern and African Development Community Vision 2050 and the African Development Agenda 2063.

Furthermore, the results will enable the country to evaluate the progress of implementation of Sustainable Development Goals (United Nation Agenda 2030); goals that aim at achieving equality and eradicating poverty of all kinds including extreme poverty by 2030 by ensuring no one is left behind. The census data will also provide a basis for the computation of several indicators such as enrolment and literacy rates, infant and maternal mortality rates, unemployment rate and others.

The Administrative Units Population Distribution Report is the first in a series of planned publications for the 2022 PHC. The report has three volumes; The United Republic of Tanzania (Volume 1A), Tanzania Mainland (Volume 1B) and Tanzania Zanzibar (Volume 1C). The main purpose of the report is to give aggregated totals of population by sex at regional, council and ward levels for informed decision making. The report also provides number of households, average household size, average annual intercensal population growth rates, population density, as well as sex ratios. Other reports in the series of planned Census publications will present among others Age and Sex Population Distribution, and Basic Demographic and Socio-Economic Characteristics of the population at National, Regional and Council levels.

The Success of 2022 PHC depended on the cooperation and contributions from the Government, specifically Census Committees from national to the lowest administrative level. These include the National Central Census Committee comprising of Ministers; National Census Advisory Committee comprising of Permanent/Principal Secretaries; National Census Technical Committee; Census Committees at regional, district, wards, village/mtaa and hamlet. Forums from Non-States Actors including Collaborators Forum, Private Sector, various institutions and the public at large.

A word of thanks goes to Government leaders at all levels, particularly, Prime Minister's Office - Policy, Parliamentary Affairs and Coordination; Office of Second Vice President of Zanzibar; Minister for Finance and Planning; Minister of State - President's Office, Finance and Planning, Zanzibar; Members of Parliament; Members of the House of Representatives; Councillors/Shehas; Regional and District Census Committees chaired by Regional and District Commissioners of respective areas; Census Coordinators (National and Zanzibar); Regional and District Census Coordinators; Supervisors; Enumerators; Local leaders and all respondents (heads of households, members of households and other individuals).

Special gratitudes are extended to the following Development Partners:- United Nations Population Fund (UNFPA); World Bank (WB); United Nations Children's Fund (UNICEF); UN-Women; International Organization for Migration (IOM); United States Agency for International Development (USAID); Foreign, Commonwealth and Development Office (FCDO); United States Census Bureau (USCB), The Republic of South Korea, The People's Republic of China and other Development Partners for providing equipment, expertise, training and financial support in making the 2022 Population and Housing Census a success. We also thank religious, traditional and political leaders, non-governmental organization leaders, the media and all citizens and non-citizens in general for their participation and contributions in the successful implementation of the Census.

Special thanks also go to Honourable Anne Semamba Makinda - Census Commissar for Tanzania Mainland and Former Speaker of the National Assembly; and Honourable Ambassador Mohamed Haji Hamza - Census Commissar for Tanzania Zanzibar, for their effective leadership and management in educating and sensitizing all citizens and non-citizens to participate in the 2022 Population and Housing Census thus, resulting in enhanced quality, smoothness and timely execution of the Census exercise. We also thank the Chairperson of the Governing Board of the National Bureau of Statistics (NBS), Dr. Amina Msengwa and the Chairperson of the Statistics Board of Zanzibar, Ambassador Amina Salum Ali, for their guidance throughout the implementation of the Census exercise.

Last but not least, we acknowledge the unprecedented efforts and commitment of the management and staff of the National Bureau of Statistics under the leadership of Dr. Albina Chuwa, the Statistician General; and staff of the Office of the Chief Government Statistician, Zanzibar under the leadership of Mr. Salum Kassim Ali; Chief Government Statistician; staff from the Ministry of Lands, Housing and Human Settlements Development; Ministry of Information, Communication and Information Technology; as well as other Government officials who worked tirelessly in ensuring that the 2022 Population and Housing Census was implemented successfully.

Kassim Majaliwa Majaliwa (MP)
Prime Minister of
The United Republic of Tanzania

Hemed Suleiman Abdulla (MHR)
Second Vice President of Zanzibar

Acknowledgement

The National Bureau of Statistics and Office of the Chief Government Statistician, Zanzibar conducted the 2022 PHC to provide necessary information for policy implementation, planning, monitoring and evaluation of development processes. The Census collected detailed information on demographics, disabilities, migration, possession of national documents and orphanhood, education, economic activities, land ownership and information related to ICT ownership and use, fertility, mortality, housing ownership and assets, agriculture, community facilities and buildings. Some information on physical addresses was also collected.

This report presents population distribution disaggregated by administrative areas from regional level to ward. It provides detailed statistics of different indicators that facilitate making evidence-based decisions relevant to the population at their localities. We therefore express our appreciation to all experts who have put their time and efforts to produce this report. In particular we would like to thank Ruth Davison Minja, the Acting Director of Population Census and Social Statistics; Fahima Mohamed Issa, Director of Social Statistics, Census and Survey, (OCGS); Seif Ahmad Kuchengo, the National Census Coordinator; Abdul-majid Jecha Ramadhan, the Tanzania Zanzibar Census Coordinator and the National Census Technical Team, Statisticians, Demographers, Information Technology and Geographic Information System officers for their commitment which led to successful completion of this report.

Our appreciation is as well extended to all professionals, Regional and District supervisors, enumerators and field supervisors as well as the media for their dedicated work. Certainly, without their commitment and dedication, the census would not have been successful. We would also like to thank the public for their cooperation during the entire period of the Census.

Dr. Albina Chuwa
Statistician General
National Bureau of Statistics

Salum Kassim Ali
Chief Government Statistician
Office of the Chief Government
Statistician, Zanzibar

Tanzania Mainland Census Results in Brief

Indicator	2012 ¹	2022		
	Total	Total	Rural	Urban
Total Population	43,625,354	59,851,347	39,232,999	20,618,348
Male Population	21,239,313	29,137,638	19,247,420	9,890,218
Female Population	22,386,041	30,713,709	19,985,579	10,728,130
Average Annual Intercensal Growth Rate ²	2.7	3.2	2.4	4.8
Number of Households	9,109,150	13,916,945	8,427,217	5,489,707
Average Household Size	4.8	4.3	4.7	3.8
Sex Ratio	95	95	96	92
Population Density	49	68	-	-

¹ The Rural and Urban Data for 2012 are available at nbs/ocgs website

² Growth Rate is expressed as an exponential rate of growth of population from year 2012 to 2022

Basic Concepts and Definitions

Household refers to a person or group of persons who reside in the same homestead/compound but not necessarily in the same dwelling unit, have the same cooking arrangements, and are answerable to the same household head.

Average household size is calculated by dividing the total number of persons by the total number of households (Collective and Private) in a given population.

Sex ratio is the ratio of males to females in a given population usually expressed as the number of males for every 100 females. For example, sex ratio of 98 for Katavi region means, for every 100 females, there are 98 males.

Population density refers to the number of people living in a given area per square kilometer of land.

Population growth refers to the change in population over time, and can be quantified as the change in the number of individuals in a population using "per unit time" for measurement.

Population Growth Rate refers to the change in population over a unit time period, often expressed as a percentage of the number of individuals in the population at the beginning of that period. Growth rate in this book is expressed as an exponential rate of growth of population from year 2012 to 2022 and is termed as average annual intercensal population growth rates.

Population Share refers to the percentage of population of a certain area for example region and district to that of total population of country, or region respectively.

Section A: Summary of Findings - Population

1.0 Introduction

This section presents summary of findings of the 2022 PHC. These include number of persons by region, average annual intercensal population growth rates, average household size, population density and sex ratio.

1.1 Number of Persons

The 2022 PHC revealed that the population of Tanzania Mainland has increased five times from 11,958,654 persons in the 1967 Census to 59,851,347 persons in the 2022 Census (Figure 1).

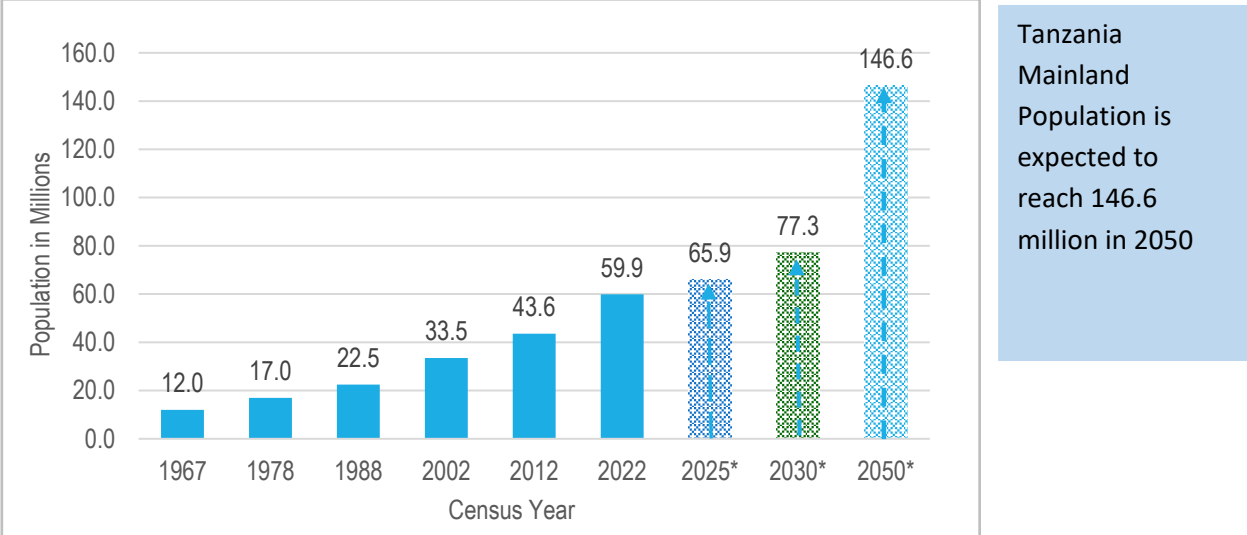

Figure 1: Population Trends in Tanzania Mainland; 1967 – 2022 Censuses

* Indicates exponentially projected population by the end of implementation of the following development frameworks

2025* - 65.9 million - Tanzania Development Vision 2025

2030* - 77.3 million - Sustainable Development Goals 2030

2050* - 146.6 million - East African Community Vision 2050 and Southern African Development Community Vision 2050

1.2 Population by Region

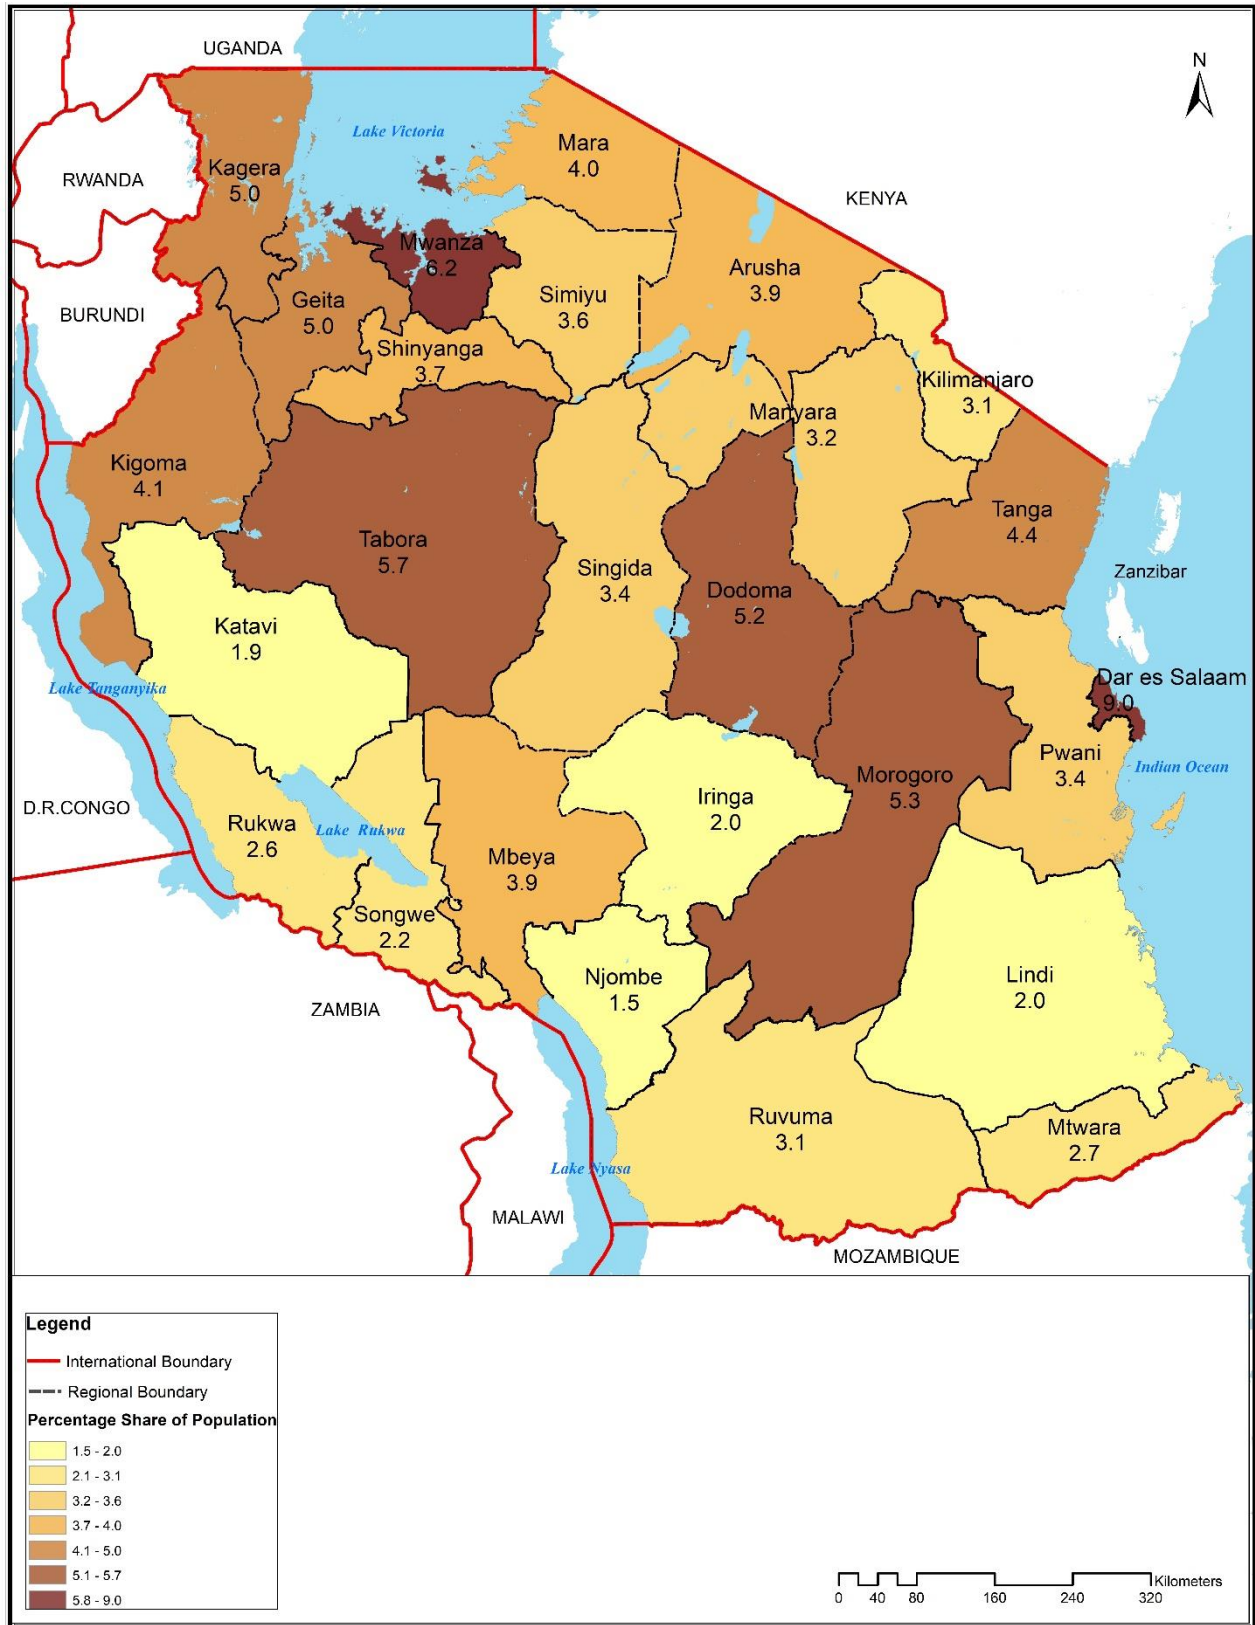

The United Republic of Tanzania is a union of Tanganyika (Tanzania Mainland) and Zanzibar (Tanzania Zanzibar). Administratively, Tanzania Mainland has 26 regions. Table 1 presents regional populations during the 2012 and 2022 Population and Housing Censuses and their annual average intercensal population growth rates.

In the 2022 Census, Dar es Salaam region was found to have the largest population of 5.4 million accounting for 9.0 percent of the Tanzania Mainland total population. The region with the smallest population is Njombe with a population of 889,946 that is equivalent to 1.5 percent of the Tanzania Mainland total population as seen in Map 1.

Table 1: Population by Region and Average Annual Intercensal Population Growth Rate; 2012 and 2022 PHCs

Region	Population			Population Increase (Number) 2012 - 2022	Average Annual Intercensal Population Growth Rate (Percent)

Map 1: Percentage Share of Regional Population, Tanzania Mainland; 2022 PHC

1.3 Average Annual Intercensal Population Growth Rates

The average annual intercensal population growth rate in Tanzania Mainland decreased from 3.2 percent in 1978 to 2.7 percent in 2012 and then increased to 3.2 percent in 2022 as seen in **Figure 2**.

With the current average annual intercensal population growth rate of 3.2 percent, the population of Tanzania Mainland will double in the next 22 years

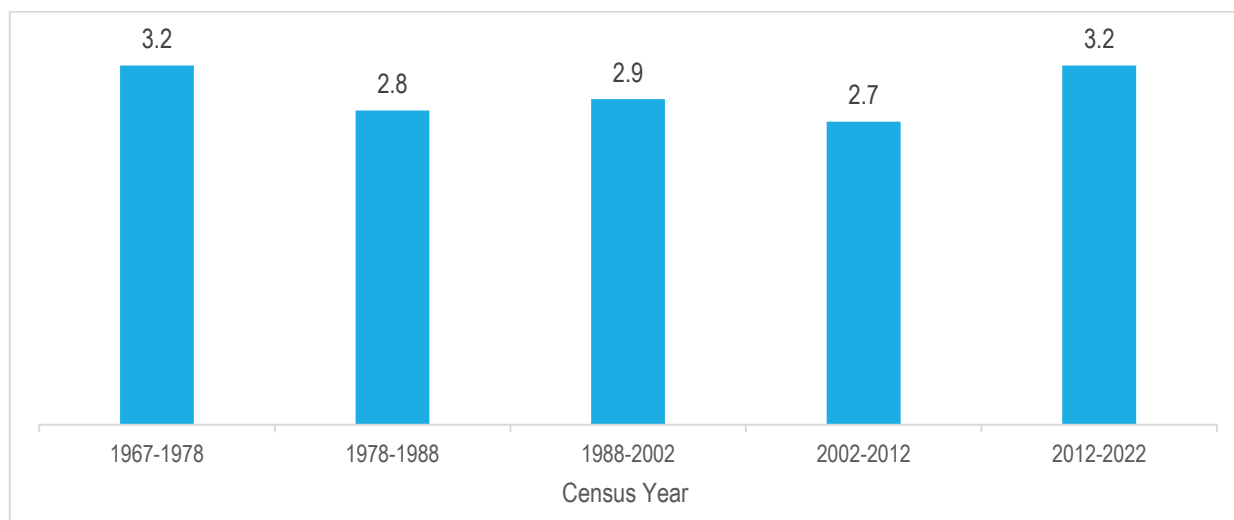

Figure 2: Trends in the Average Annual Intercensal Population Growth Rates, Tanzania Mainland; 1978 – 2022 Censuses

Average annual intercensal population growth rates vary across regions. The average annual intercensal population growth rates for the period of 2012 to 2022 range from 1.3 percent in Kilimanjaro Region to 7.1 percent in Katavi Region. The regions that recorded relatively large increases in the average annual intercensal population growth rates for the 2012 - 2022 period are Katavi (from 3.2 percent in 2012 to 7.1 percent in 2022), Pwani (from 2.2 percent in 2012 to 6.1 percent in 2022), Geita (from 2.6 percent in 2012 to 5.4 percent in 2022), Lindi (from 0.9 percent in 2012 to 3.2 percent in 2022), and Tabora (from 2.9 percent in 2012 to 3.9 percent in 2022).

Dar es Salaam Region recorded a relatively large decrease in the average annual intercensal population growth rates (from 5.6 percent in 2012 to 2.1 percent in 2022), followed by Kagera (from 3.2 percent in 2012 to 2.0 percent in 2022) and Kigoma (from 2.4 percent in 2012 to 1.5 percent in 2022) as seen in Figure 3.

Key Message Box 1:

Fertility, Mortality and Migration are the factors for population change. An increase or decrease of average annual intercensal population growth rates depend on those factors.

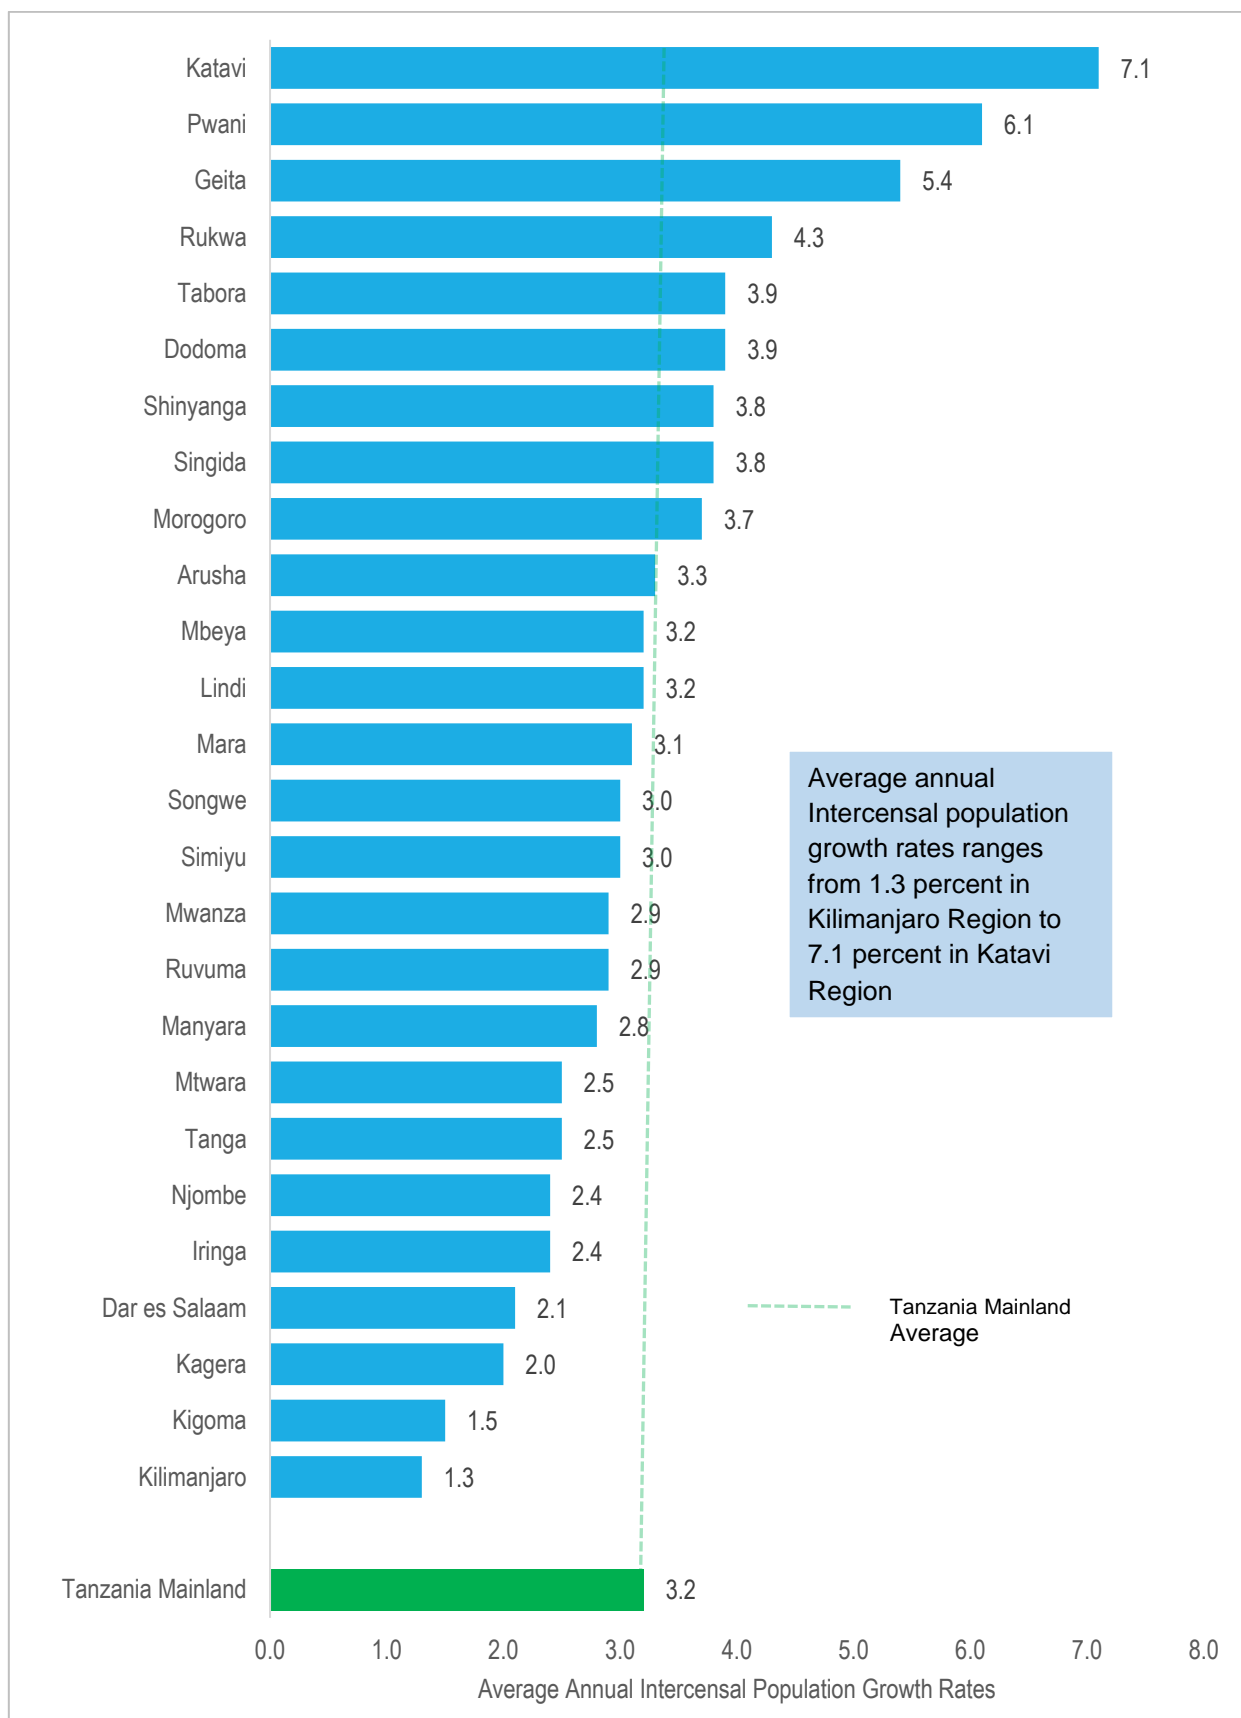

Figure 3: Average Annual Intercensal Population Growth Rates by Region, Tanzania Mainland; 2012 – 2022 Censuses

1.4 Population Density

Tanzania Mainland is sparsely populated with population density of 68 persons per square kilometre with variation across regions (Figure 4 and Map 2). Persons are concentrated in Dar es Salaam region with population densities of 3,865 persons per square kilometre. Regions with lowest population densities are Lindi (18 persons per square kilometre) and Katavi (25 persons per square kilometre).

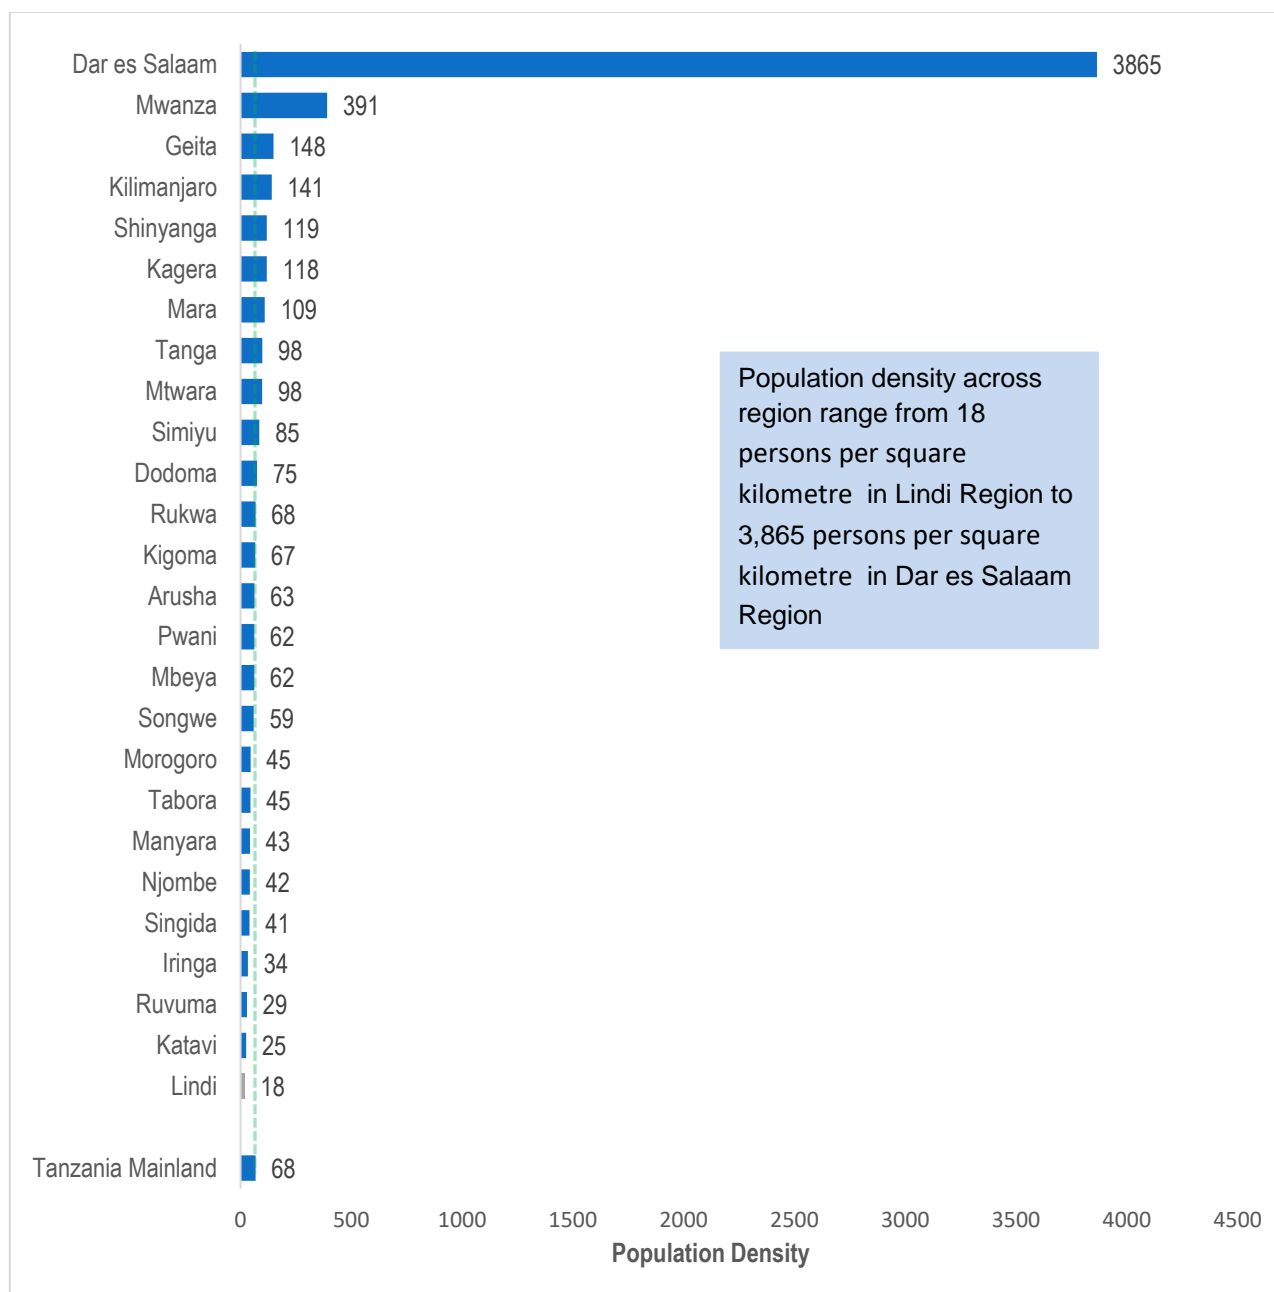

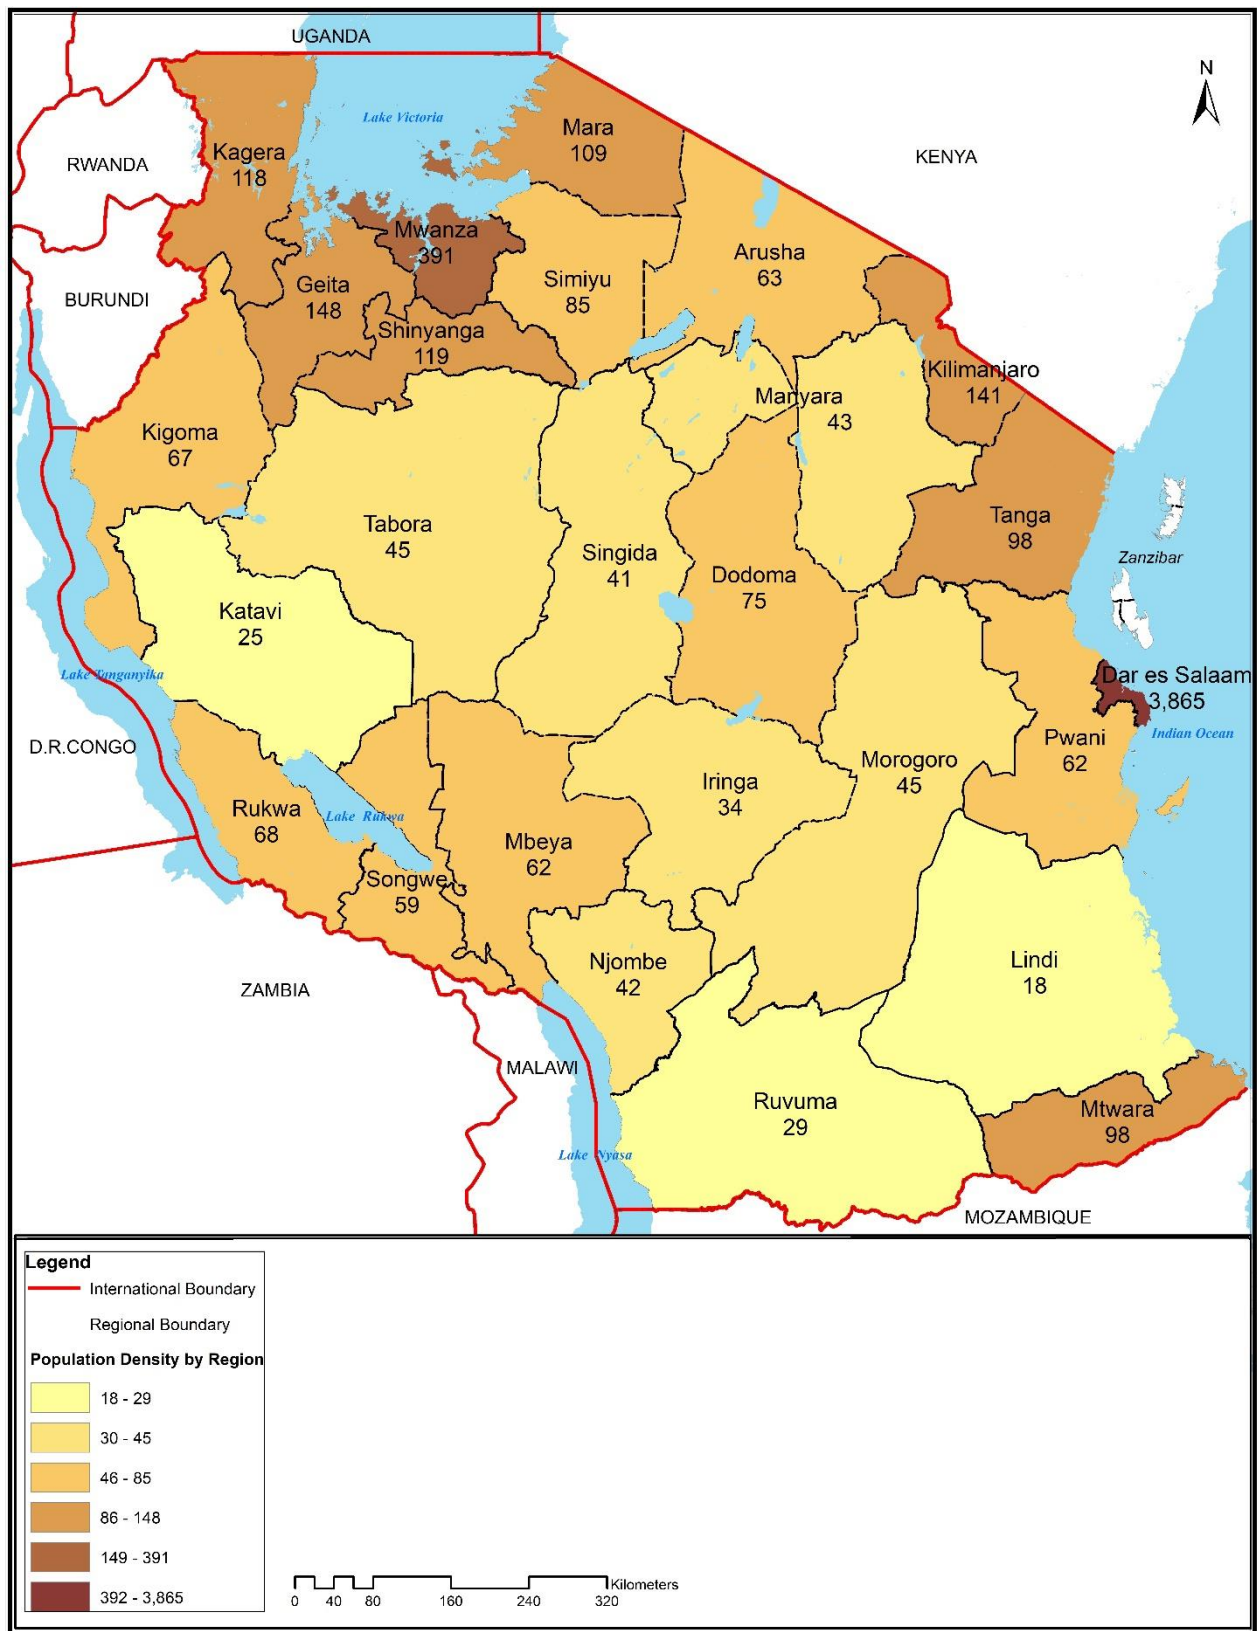

Figure 4: Population Density by Region, Tanzania 2022 PHCs

Map 2: Population Density by Region, Tanzania Mainland; 2022 PHC

1.5 Household Size

The average household size in Tanzania Mainland for the 2022 Population and Housing Census was 4.3 persons indicating a decrease from an average of 4.8 persons recorded in 2012. The average household size varies across regions, ranging from 3.3 persons in Mtwara Region to 6.7 persons in Simiyu Region. Eleven regions recorded an average household size above the Tanzania Mainland average of 4.3 persons (**Figure 5 and Table 2**).

Key Message Box 2:

A decrease of average household size might be a result of reduced fertility rate and increase of single person households which are contributed by various social economic factors. This can be used as a proxy indicator for individual wellness

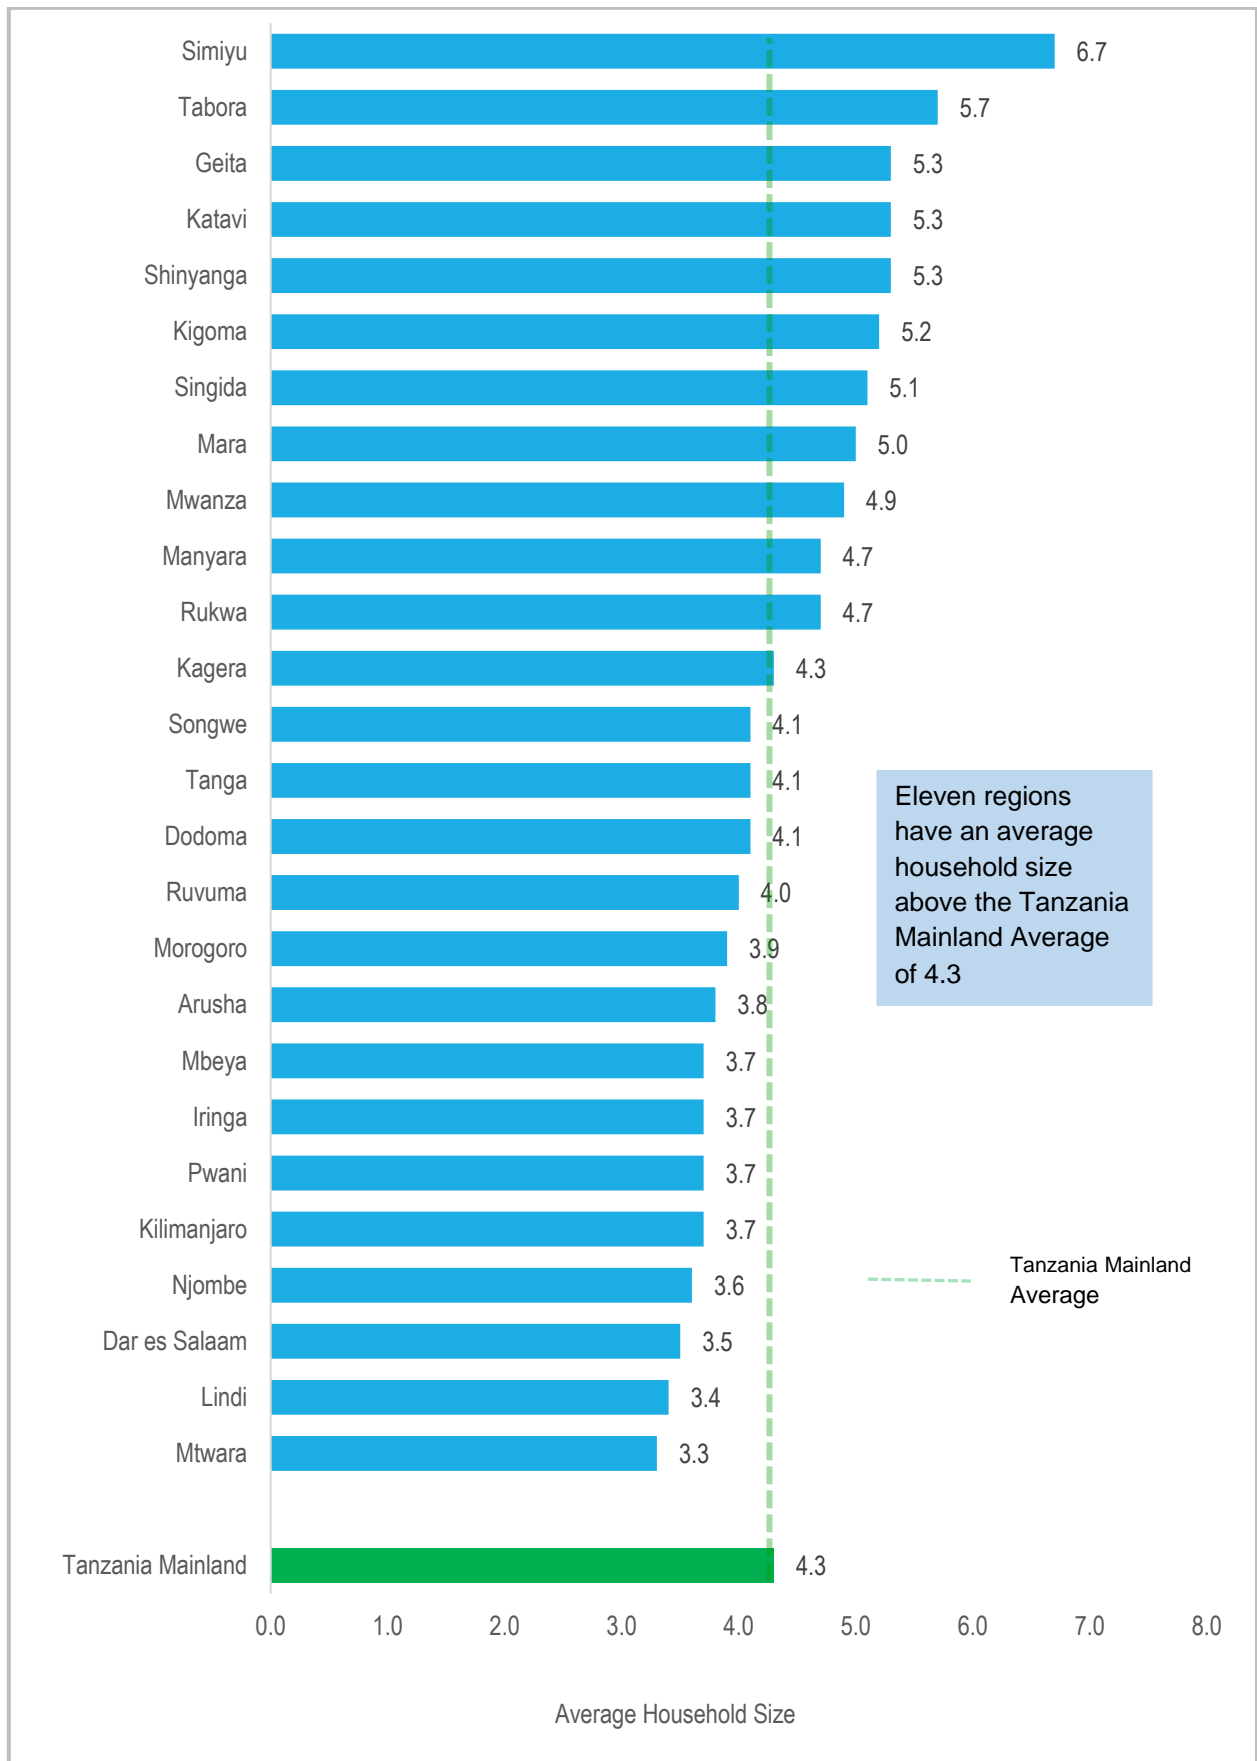

Figure 5: Average Household Size by Region, Tanzania Mainland, 2022 Census

Geita	1,739,530	286,757	6.1	2,977,608	561,942	5.3
Songwe	998,862	232,292	4.3	1,344,687	330,739	4.1

1.6 Sex Ratio

The sex ratio of Tanzania Mainland is 95 males per 100 females. Sex ratio varies across regions from 90 males per 100 females in Njombe to 102 males per 100 females in Manyara. In most regions, sex ratio ranges from 92 to 95 males per 100 females. A region with a sex ratio of more than 100 indicates that there are more males than females in that region as seen in Figure 6.

Key Message Box 3:

More male than female in Manyara Region might be caused by disproportionate in and out migration among males and females.

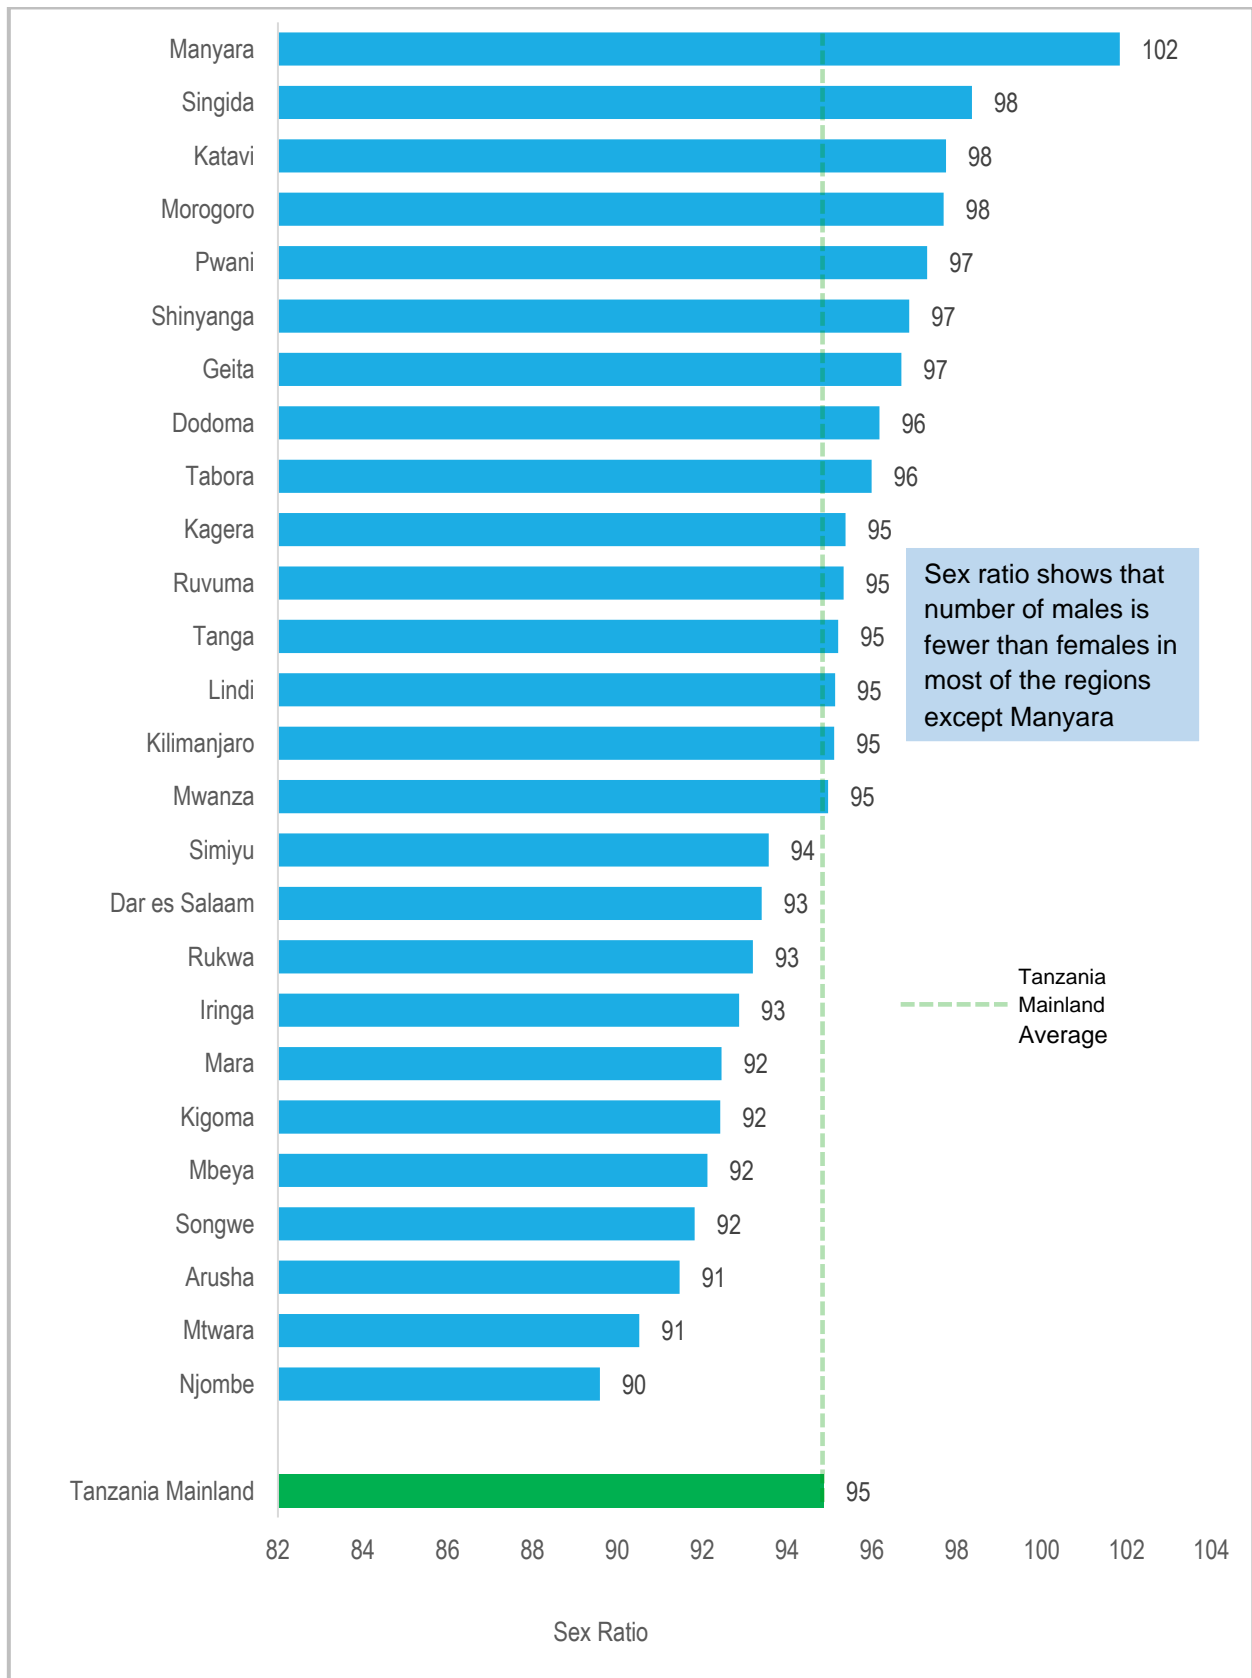

Figure 6: Sex Ratio by Region, Tanzania Mainland; 2022 PHC

Trends in sex ratio in the 1978, 1988, 2002, 2012 and 2022 Censuses show that there were more females than males in Tanzania Mainland as seen in Figure 7.

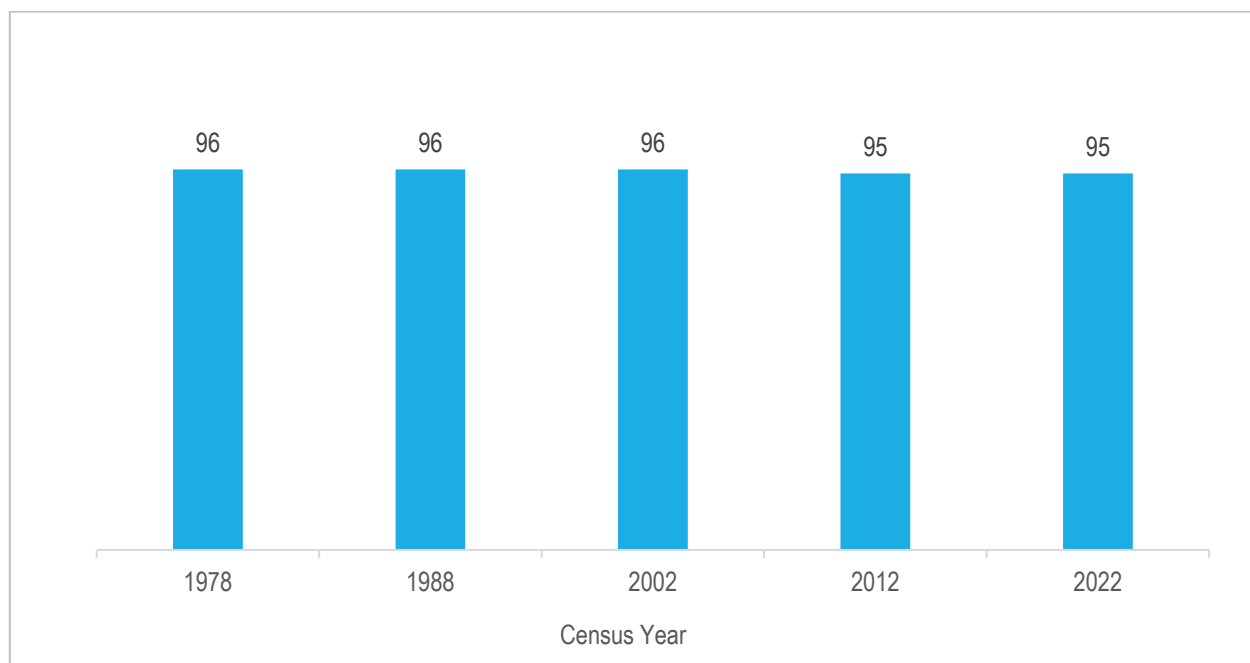

Figure 7: Trends in Sex Ratio, Tanzania Mainland; 1978 – 2022 PHCs

1.7 Population Size in Regions

Population size varies across regions with Dar es Salaam region having the largest population (5,383,728 persons) accounting for 9.0 percent of the Tanzania Mainland's total population, followed by Mwanza (3,699,872 persons) with 6.0 percent. Other regions with population of more than three million people are Tabora (3,391,679 persons), Morogoro (3,197,104 persons) and Dodoma (3,085,625 persons). Regions with the smallest population are Njombe (889,946 person) and Katavi (1,152,958 persons) accounting for 1.5 and 1.9 percent respectively as seen in Table 3.

Table 3: Population by Sex, Sex Ratio, Number of Households and Average Household Size by Region; 2022 PHC

Region	Population			Sex Ratio	Number of Households	Average Household Size
	Both Sexes	Male	Female

Section B: Key Findings, Policy implications and Recommendations

1.0 Introduction

This section highlights key achievements made pertaining to the objectives of the 2022 PHC it also presents key findings of the Census and their policy implications and recommendations. The Population and Housing Census is the only trusted and reliable source of demographic and housing statistics at the lowest administrative level. The 2022 PHC provides baseline population and housing data which are crucial on policy formulation and updating, monitoring and evaluation of development frameworks at national, regional and international levels. It is rational to explicitly indicate key findings and their policy implications, provide policy recommendations for planners, business community, researchers and the public to ensure that the Census results are used in making evidence-based decisions in development processes.

2.1 Key Findings and Policy Implications

This section explains key results of the Administrative Units Population Distribution statistics and their policy implications

- a) The population of Tanzania Mainland increased for about five times from 12.0 million in 1967 to 59.9 million in 2022.

Policy implication: Increase in population may result into increased demand for social services such as education, health, infrastructure as well as restructuring of administrative areas, urbanization and land ownership.

- b) With the current average annual intercensal population growth rate of 3.2 percent, the population of Tanzania Mainland is expected to double in the next 22 years.
- c) Average annual Intercensal population growth rates range from 1.3 percent in Kilimanjaro Region to 7.1 percent in Katavi Region

Policy implication: Increase in population growth rate if well managed implies increase of the labour force and participation rates in production of goods and services which could leads to competitives businesses, increased individual per capita income and market shares of commodities which have direct impact on poverty reduction and economic growth. On the other hand, it may result into high unemployment, limited resources to meet the basic socio-economic services of the population, environmental pollution particularly, greenhouse gas emissions, land degradation and disruption of water sources caused by human activities.

Furthermore, high population growth rate imply either high fertility rate, reduced mortality or high net migration. At individuals and families, high rates of population growth are associated with high dependency ratios and low investment in the

human capital of children and young adults. At the macro level, high rates of population growth hinder investment in both human and physical capital formation, and exert pressure on the environment and often fragile resource base.

- d) Average household sizes of 11 regions are above that of Tanzania Mainland average of 4.3 persons. Simiyu Region has recorded household size of 6.7 which is the highest among regions.

Policy implication: Large households are likely to be constrained by poor access to adequate food, housing, water, sanitation, transportation, energy, education and health services. Thus, there is need for improved and inclusive social protection policies to address needs of different population groups.

- e) The sex ratio of Tanzania Mainland is 95 males per 100 females. Sex ratio varies across regions ranging from 90 males per 100 females in Njombe Region to 102 males per 100 females in Manyara.

Policy implication: More females than males imply that females constitute a large population share in the country. Nonetheless, women are marginalized in terms of education and economic opportunities compared to men. Thus, empowering them with equal opportunities will uplift a significant proportion of population from poverty to improved social and economic welfare.

2.2 Policy Recommendations

The best way to manage population growth depends on a combination of political will and effective economic measures. In order to attain a sustainable economic development, poverty reduction, conserved environment, combat climate change and ensure an educated society as stipulated in the National Population Policy of 1992 and reviewed in 2006, the following should be considered in short, medium and long-term development plans: -

- a) Population growth should be managed through a set of variables, including reproductive health, education, employment, rural/urban migration, women empowerment and environmental management leading to the development of human resources and skills development. A direct consequence is better economic opportunities, improved household savings to stimulate investments and subsequent poverty reduction. More importantly, improvement of the standards of

living and aspiration to better quality of life is expected to enhance the desire for small family sizes;

- b) Enhance family planning education programmes and incorporate population growth and family planning into school curriculum;
- c) Integrate population management issues into National Development Plans;
- d) Establish a permanent population committee to plan, develop, and implement population policies and related research.
- e) Expand and enhance access to health and education facilities and services to enable the population effectively participate in the country's social and economic development activities;
- f) Enhance the production of food and cash crops as well as livestock and its products to ensure food security for the country and promote exports to earn more foreign currency for development;
- g) Enforce the implementation of Tanzania Development Vision (TDV 2025) and Third National Five-Year Development Plan 2021/22 - 2025/26 which have a theme of realising competitiveness and industrialization for human development that aims to increase efficiency and productivity in manufacturing using the resources available in abundance within the country; In order to sustain growing population, the economy has to grow three times as much as the population growth rate (Malthus, 1798). The TDV 2025 and the National Strategy for Growth and Reduction of Poverty II have aspired 8 percent and 10 percent economic growth rates respectively.
- h) Enforce fertility regulation and reduce mortality rates through better health, education and employment opportunities will stimulate household saving and investment.
- i) Revise the Environmental Management Act of 2004 in line with the National Employment Policy of 2021 to address emerging issues resulting from rapid increase of population inappropriate technology and climate change.

Section C: Population Distribution in Regions

Region 01 : Dodoma

Map 1.0: Population Distribution by Council, Dodoma Region; 2022 PHC

Annex: List of Contributors

Contributors to the Administrative Units Population Distribution Report – Tanzania Mainland

Census Commissars

Hon. Anne Semamba Makinda (Tanzania Mainland)

Amb. Mohamed Haji Hamza (Tanzania Zanzibar)

NBS/OCGS Board Chairpersons

Dr. Amina Msengwa (NBS)

Amb. Amina Salum Ali (OCGS)

NBS/OCGS Chief Government Statistician

Dr. Albina Chuwa (NBS)

Salum Kassim Ali (OCGS)

NBS and OCGS Directors

Ruth Minja (NBS)

Fahima Mohamed Issa (OCGS)

Emilian Karugendo (NBS)

Bakari Kitwana Makame (OCGS)

Daniel Masolwa (NBS)

Haroub Ali Masoud (OCGS)

Daniel Ulindula Andrew (NBS)

Abdalla Khamis Abdalla (OCGS)

Census Coordinator

Seif Kuchengo (NBS)

Abdul-Majid Jecha Ramadhan (OCGS)

Authors/Reviewers

Aldegunda Komba	Ramadhan Othman (NBS)
Dr. Mwinyi Mwinyi (NBS)	Boniface Simpoli (NBS)
Mariam Kitembe (NBS)	David Mwaipopo (NBS)
Phausta Ntigiti (NBS)	Hassan Jamal Hassan
Veronica Mwangoka (NBS)	Hilali Abdullah (NBS)
Said Mohamed Said (OCGS)	Henrick R. Mwellu (NBS)
Novat T. Buberwa (NBS)	Pastory Ulimali (NBS)
Asia Hassan Mussa (OCGS)	Philbert G. Mrema (NBS)
Deogratius Malamsha (NBS)	Amina Musa Khamis
Mdoka Omar (NBS)	Bakari Khamis Kondo
Hellen Hillary (NBS)	Kazija Khamis Said (OCGS)
Zawadi Biki (NBS)	Hashim Njowele (NBS)
Saidi K. Mnenge (TAMISEMI)	Zawadi Biki (NBS)
Livini Avith Morrice (NEC)	Richard Bakubiye (TAMISEMI)
George Joseph Miringay (TAMISEMI)	

Spatial Data Analysts

Benedict Mugambi (NBS)	Khalid Lewanga (NBS)
Mohammed S. Gharib (OCGS)	Julieth Msuya (NBS)
Yunis Nota (NBS)	Nassir H. Salum (OCGS)

Data Processing

Mwanaidi Mahiza (NBS)

Stephen S. Jutta (NBS)

Hashim Uzia Mohamed

Novat T. Buberwa (NBS)

Steven Lwendo (NBS)

Munir Mdee (NBS)

Bakar K. Omar

George Mockray

Beatrice Rwegoshora (NBS)
